Welcome to the 2018-2019 academic catalog for the Johns Hopkins University full-time undergraduate and graduate programs in the Zanvyl Krieger School of Arts and Sciences and the G.W.C. Whiting School of Engineering. This catalog contains information about academic and student life programs and policies. It also includes links to external websites; these are provided as a convenience to the reader and the content contained therein is not part of the catalog.

The University reserves the right to change without notice any programs, policies, requirements, or regulations published in this catalog. The catalog is not to be regarded as a contract.

About the Catalog

The Johns Hopkins University is accredited by The Middle States Association of Colleges and Schools, Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104-2680.

The following Bachelor of Science programs in the Whiting School of Engineering are accredited by the Engineering Accreditation Commission of ABET: Biomedical Engineering, Chemical and Biomolecular Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Engineering Mechanics, Environmental Engineering, Materials Science and Engineering, and Mechanical Engineering.

The Bachelor of Science program in Computer Science is accredited by the Computing Accreditation Commission of ABET.

For current faculty and contact information go to http://krieger.jhu.edu/publichealth/directory/

Notes on the Degrees

1. Candidates for the master’s as a terminal degree are accepted, but financial aid generally is not available.
2. Candidates for the master’s as a terminal degree may be accepted in special cases, but financial aid generally is not available.
3. Candidates are admitted to the Ph.D. program only, but the M.A. is awarded to students who (a) complete one year of courses, pass an examination in one foreign language, and submit an acceptable master’s essay to a member of the faculty or (b) complete two years of courses and pass an examination in two foreign languages.
4. Candidates for the master’s as a terminal degree are not accepted. However, a student is awarded a master’s degree en route to the Ph.D. after the successful completion of the Graduate Board oral examination.
5. A master of science in engineering or a master of materials science and engineering are offered.
6. See department listing.
7. M.S. available only to Arts and Sciences baccalaureate students.
8. M.A. only.
9. B.A. only.
10. B.A. or B.S. available.
11. Candidates are admitted to the Ph.D. program only, but the M.A. is awarded to students who complete requirements set by the director of graduate studies.
12. Applicants must currently be JHU undergraduate.
13. Within the Department of Biomedical Engineering.
14. Within the Department of Applied Mathematics and Statistics.
15. Within the School of Medicine.
16. Master’s degree awarded by the School of Advanced International Studies.
17. Master’s degree awarded by the School of Public Health.
18. Qualified Undergraduates from any AS or EN program are eligible to apply.
19. Area of Concentration
20. Candidates may also major in Environmental Engineering, but may not major in both Environmental Science and Environmental Studies.

Minors

JHU Academic Programs

In addition to the full-time offerings of the Krieger School of Arts and Sciences and the Whiting School of Engineering, Johns Hopkins offers additional undergraduate, graduate, and professional programs through other academic divisions.

For more information about these opportunities please visit https://jhu.edu/academics/.
**UNDERGRADUATE STUDENTS**

The policies, procedures, resources, and opportunities included in this section are relevant for undergraduates enrolled in the full-time degree programs in the Zanvyl Krieger School of Arts and Sciences and the Whiting School of Engineering on the Homewood campus. Please use the links at the left to navigate to your topic of interest.

**Admissions and Finances**

Every year the Office of Undergraduate Admissions enrolls a freshman class of approximately 1,300 men and women from all over the United States and many countries. In addition to first-year students, transfer students are also welcomed each fall to the Homewood campus from other colleges and universities.

The admissions committee looks for students who will thrive as Johns Hopkins undergraduates. As part of a holistic review process, intellectual interests, academic performance and character, and personal contributions are important components of the application evaluation. A student’s intellectual curiosity, seriousness of purpose, and range of extracurricular activities and leadership are considered as well as scholastic record, aptitude test results, essays, and recommendations.

More information about the undergraduate admissions process can be found at apply.jhu.edu.

**Financial Services**

Johns Hopkins is dedicated to enrolling the strongest students each year, and it’s our goal to enable students to make their college decision without being limited by their family financial circumstances. The Office of Undergraduate Admissions and the Office of Student Financial Services are dedicated to meeting 100% of calculated financial need for all admitted students.

Financial aid advisers in the Office of Student Financial Services are always available to guide you through the process. Reach them at 410-516-8028 or fin_aid@jhu.edu for more information.

Visit the Office of Student Accounts website (https://studentaffairs.jhu.edu/student-accounts/tuition-fees) for the fall and spring semester tuition refund policy and deadlines.

The tuition refund policy and deadlines for summer courses are posted on the Summer Programs website (https://summerprograms.jhu.edu).

**Veterans Educational Benefits**

Johns Hopkins is approved by the Maryland Higher Education Commission for the training of veterans, service members, eligible spouses and dependents under the provisions of the various federal laws pertaining to veterans’ educational benefits. Information about veterans’ benefits and enrollment procedures may be obtained at https://studentaffairs.jhu.edu/registrar/veterans/ or veterans@jhu.edu the Office of the Registrar, 75 Garland Hall, 410-516-6635.

**Initial Enrollment**

Once admitted to the university, the student must complete an Application for Program of Education or Training (VA Form 22-1990) from the Department of Veteran Affairs (https://benefits.va.gov/gibill). A copy of the Certificate of Eligibility, along with a copy of the DD-214, is sent to the Veterans Desk, Office of the Registrar, 75 Garland Hall, Johns Hopkins University, Baltimore, Maryland 21218. Additional delivery options can be found at https://studentaffairs.jhu.edu/registrar/veterans/.

The student who is transferring from another university or college will need to obtain a Request for Change of Place of Training (VA Form 22-1995) from the Department of Veteran Affairs (https://benefits.va.gov/gibill). The completed form should be submitted to the VA, and a copy sent to the Veterans Desk at the university.

**Re-enrollment**

Students who received veterans’ benefits at the university the preceding semester and plan to enroll with no change of objective should inform the Veterans Desk, veterans@jhu.edu at the time of registration that they want to be recertified under the provisions of their eligibility.

Students receiving veterans’ benefits must take courses that lead toward the exact objective (usually a specific degree) on the original VA application. Otherwise, they must submit a Request for Change of Program (VA Form 22-1995). Students utilizing veterans’ benefits must let the Veteran School Certifying Official know immediately of any change in their program or status that might affect the amount of their VA payment. If they fail to do so, the Department of Veterans Affairs will seek reimbursement from the student for any overpayment.

**Standards of Progress**

Continuation of VA payments depends on the student’s meeting the university’s academic standards for all students. The student must also meet any standards of progress which may be established by VA regulations.

**Military TA**

For guidance with utilizing Military tuition assistance please contact veterans@jhu.edu.

**The College Navigator Tool**

Veteran students may go to the College Navigator (http://nces.ed.gov/collegenavigator) to access a school comparison tool.

**Academic Policies**

The Krieger School of Arts and Sciences and the Whiting School of Engineering offer myriad opportunities for intellectual exploration, academic challenge, and personal growth. To satisfy your academic goals and assure your progress toward graduation, take action and responsibility for the following:

- Seek advice from multiple faculty and other university professionals.
- Meet with your assigned advisor at least once a semester.
- Learn the information contained within this online catalog. Failure to do so does not excuse you from responsibility for the rules and procedures.
- Track your completion of your degree requirements.
- Consult your advising office and your major department about any questions concerning academic policy.

All students are expected to observe the academic policies and practices of the university; personal difficulties, illness, and/or advice contradicting the rules and procedures does not constitute automatic grounds for exemption from these rules or procedures. Written requests for
exceptions must be submitted to the student’s academic advising office. After review, a student will be notified whether the exception is approved.

The University reserves the right to change rules, procedures and other information within this website as appropriate. This website is not to be regarded as a contract. If you have questions, contact your school’s advising office.

Requirements for a Bachelor's Degree

The information below describes the requirements for students entering JHU in Fall 2014 or later. Students who entered JHU prior to Fall 2014 should view the appropriate archived catalog (p. 1012).

There are five categories of degree requirements that comprise an undergraduate degree at Hopkins:

1. Total degree credit requirement
2. Residency requirement
3. Distribution requirements
4. Writing requirement
5. Departmental major requirements (and minor requirements, if applicable)

All approved credit earned through exams or at other colleges and universities may be used to meet requirement areas 3-5 listed above: distribution requirements, the writing requirement (according to the procedures defined by the Writing Center [http://krieger.jhu.edu/ewp/writing-requirement]), (http://krieger.jhu.edu/ewp/writing-requirement) departmental major and minor requirements, and to satisfy course prerequisites.

The total degree credit requirement (requirement 1) is considered a distinct degree requirement, and ranges from 120-129 credits depending on the degree. It is not merely a cumulative tally of courses used to satisfy requirement areas 3-5 listed above. Because students who entered the university directly from high school must complete 100 JHU credits (requirement 2), there is an effective limit on how many exam and transfer credits can be counted towards the total degree credit requirement (requirement 1).

For a degree requiring 120 total credits, a maximum of 20 approved credits from other sources may be counted towards the total degree credit requirement (requirement 1), even if more than 20 credits from external sources have been used to satisfy requirement areas 3-5 listed above.

For example, a student is pursuing a degree whose total degree credit requirement is 120. This student could have a total of 32 external credits posted to the transcript: 8 transfer credits from another university and 24 AP exam credits. All 32 of these credits may be applied to requirement areas 3-5. However, in order to allow room for the residency requirement (requirement 2), only 20 of those 32 credits will be tallied towards the 120 total degree credit requirement (120-100=20). If this student changes to a degree program whose total degree credit requirement is 126, 26 of those 32 credits would be tallied towards the total degree credit requirement (126-100=26).

All approved exam credits earned will be posted to the transcript. Up to 12 approved transfer credits will be posted to the transcript. See External Credits (p. 21) section for details.

"D" Grade Restriction

University policy allows no more than 18 credits from courses with grades of D or D+ to be counted toward the credits required for graduation. Departments may set a lower limit on the number of permissible D or D+ grades for a specific major. Many departments do not accept any D or D+ credits for major requirements.

Ten-Year Degree Completion Limit

A student must fulfill all degree requirements for graduation within 10 academic calendar years from the date of matriculation at the university.

Degree Credit Totals

The Bachelor of Arts degree requires 120 credits. The Bachelor of Science degree, whether in Arts and Sciences or Engineering, requires from 120 to 130 credits, depending on the major. No program may require more than 130 credits.

Residency Requirement for Freshmen

Students who enter the university from high school must complete at least 100 credits at JHU. This includes courses that are taken after matriculation as a degree-seeking student:

- in fall, intersession, spring, or summer at JHU
- in other divisions of the university (including Advanced Academic Programs and Engineering for Professionals)
- through the Baltimore Student Exchange Program institutions during the fall and spring semesters only
- through an approved study abroad program (up to 30 credits)

In addition, credits earned through JHU courses prior to matriculation as a degree-seeking student are applied to the 100-credit residency requirement.

Students who entered JHU prior to Fall 2014 should view the appropriate archived catalog (p. 1012).

All students must complete a minimum of four semesters in residence as a full-time student. Students must be in residence for at least two of the final four semesters, including the final semester prior to graduation.

Residency Requirement for Transfer Students

Students who enter the university as transfer students must complete at least 60 credits at JHU. This includes courses that are taken after matriculation as a degree-seeking student:

- in fall, intersession, spring, or summer at JHU
- in other divisions of the university (including Advanced Academic Programs and Engineering for Professionals)
- through the Baltimore Student Exchange Program institutions during the fall and spring semesters only
- through summer and intersession study abroad programs sponsored by Hopkins departments

In addition, all transfer students must complete at least four full-time semesters in residence at JHU. Study abroad programs offered during fall and spring semesters do not count towards this four-semester
requirement. Transfer students must be in residence for at least two of their final four semesters, including the final semester prior to graduation.

Residency Requirement for Peabody Double Degree Students

Students earning a double-degree at Peabody must complete at least 48 credits on the Homewood campus in either the Krieger School of Arts & Sciences or the Whiting School of Engineering.

Writing Designation Requirements

To encourage excellence in writing, across disciplines, the university requires all undergraduates to take a number of writing-intensive courses. A writing-intensive (W) course is one in which students write at least 20 pages of finished writing, distributed over multiple assignments, usually 3 or 4 papers, throughout the semester. Instructors respond to students’ work in written comments or in conference, or both; and students have at least one opportunity to receive their instructor’s feedback on a draft and then revise. A writing-intensive course guides students’ practice in writing and makes writing an integral part of the course. The writing-intensive requirement is administered by Patricia Kain, Director of the Expository Writing Program (http://krieger.jhu.edu/ewp).

Writing-intensive courses are indicated by a “W” in the JHU course schedule and an asterisk (*) on a student’s unofficial transcript. Courses taken to satisfy the writing requirement must be taken for a letter grade and passed with a grade of C- or better. Writing-intensive courses taken to satisfy major, minor, or distribution requirements may also count toward the writing requirement.

All students earning a degree from the School of Arts and Sciences must complete at least 12 credits in writing-intensive courses. Candidates for a B.A. degree in the School of Engineering must complete 12 credits (four courses at least 3 credits each) in writing-intensive courses, while candidates for a B.S. degree in Engineering must complete 6 credits (two courses at least 3 credits each) in writing-intensive courses. Please note, this requirement is based upon a student’s degree; students are not required to complete a separate writing requirement for any additional majors.

For information about transferring writing intensive credits to JHU, please see the External Credits (p. 23) section of Academic Policies.

Academic Area Designation Requirements

The distribution requirement stipulates that students must earn a minimum number of credits in academic areas outside of their primary major. Area designators represent an association between the course and an academic area. Courses with area designators are expected to do more than employ basic techniques, they are to advance knowledge and increase a student’s understanding of the theory. Courses that are teaching a basic skill, and therefore do not expose the student to modes of analysis and scholarship that represent the essence of a given discipline, will not be assigned an area designator. If taught within a Homewood academic department, the department is responsible for assigning area designators to their courses. Courses not offered through Homewood academic departments will be reviewed by the appropriate dean’s office to review proposed designators.

The academic areas in the Hopkins curriculum are humanities (H), natural sciences (N), social and behavioral sciences (S), quantitative and mathematical sciences (Q), and engineering (E).

The area designations of courses (H, S, N, Q, and E) are included in the course information in the departmental pages (p. 53) of the catalog and in the online schedule of classes. The area designation also appears beside the course title on a student’s academic record. When a course has more than one area designation (HS, EN, EQ, etc.), students may use only one of the designations to satisfy the distribution requirement.

Only courses or other credit-bearing opportunities with area designations may be used to satisfy the distribution requirement. Area designators are not assigned to the following:

- Independent study
- Research
- Internships
- Music performance (unless taken as part of a music minor, in which case the course will be designated H)
- Dance performance
- Foreign language elements courses (see additional foreign language rules (p. 14))
- Medical tutorials

Area designations can be assigned to courses taken elsewhere, to courses taken in other divisions of the university, or to graduate courses taken by undergraduates. These assignments are made by the appropriate dean’s office based on the course content and the recommendations of the faculty. The most useful criteria for determining an appropriate area designator will be the course description and a similar JHU departmental offering.

The following courses at the Peabody Conservatory have H designations:

<table>

Distribution Requirement for Arts & Sciences Students

Students must earn:

- At least 9 credits in humanities
- At least 9 credits in social sciences
- At least 9 credits in natural sciences, quantitative, or engineering

These credits fulfilling the distribution requirement may overlap with major or minor requirements and the writing requirement.

In Arts and Sciences, courses taken for the distribution requirement may be taken for a letter grade or for Satisfactory/Unsatisfactory credit. Courses passed with a letter grade of D or better, or passed with a
Satisfactory grade, will fulfill the distribution requirement. For any student whose first-semester grades are covered under the current first-semester grading policy, an earned D will satisfy the distribution requirement even though the grade will appear as Unsatisfactory (UCR) on the official record. Satisfactory grades (representing a C- or higher letter grade) earned in a student’s first semester at JHU will satisfy the distribution requirement if they have the correct area designations.

Students who entered JHU prior to Fall 2014 should view the appropriate archived catalog (http://e-catalog.jhu.edu/archive).

**Distribution Requirement for Engineering Students**

Students earning a degree in the School of Engineering must complete the following distribution requirement:

- 18 credits (6 courses at least 3 credits each, except for the two specific course sequences listed below) designated H and/or S. Although language elements courses do not carry an area designator, engineering students may use these courses as substitutes for humanities courses in meeting the distribution requirement.
- The following specific course pairings of a 2-credit course and a 1-credit course have been approved to count towards the H/S distribution requirements in place of a single 3-credit course:

1. **Set One:** EN.660.400 Practical Ethics for Future Leaders (2 cr.) with EN.660.406 Practical Ethics for Future Leaders - Special Topics (1 cr.)
2. **Set Two:** EN.660.400 Practical Ethics for Future Leaders (2 cr.) with EN.520.404 Engineering Solutions in A Global, Economic, Environmental, and Societal Context (1 cr.)

In Engineering, each department determines whether or not the Satisfactory/Unsatisfactory grading option will be permitted for courses used to satisfy the distribution requirement.

**Completing a Major and Minimum Grade Point Average**

Every student who earns a bachelor’s degree must satisfy the requirements of a major. A major is a structured curriculum, usually within the confines of a particular academic field. Generally the requirements for a major provide a student with a broad overview of the field through introductory courses, followed by more specialized courses tailored to meet the student’s interests in the field. The requirements for the major may also include courses in other disciplines that provide skills and information of importance to professionals in the major field. Courses required for the major must be taken for a letter grade and students must have a grade point average of at least 2.00 in the courses required for the major, i.e., not including elective courses or courses used only for the distribution requirement. Many majors require a grade of C- or better in required courses.

**Departmental Directors of Undergraduate Studies**

For every major and minor that is offered at Johns Hopkins, there is a faculty member, or their designee, who serves as the program’s Director of Undergraduate Studies (DUS). They are available to answer questions about their major(s) and/or minor(s). The directors also assign faculty advisors to students who declare a major or minor.

---

**Declaring a Major in Arts and Sciences**

Students who enter the Krieger School of Arts and Sciences from high school are classified as pre-majors during their freshman year. In April, freshmen in Arts and Sciences will meet with an academic advisor to declare their primary major in Arts and Sciences. To declare a major at a later time, see Changing Majors or Advisors section below. Students must declare a major by April 15th of their sophomore year in order to assure that they will complete requirements for graduation in four years.

**Declaring a Major in Engineering**

Students who enter the Whiting School of Engineering declare a specific engineering major on their application for admission. A student must take direct action to change the major. To change a major, see Changing Majors or Advisors section below.

Students who select the Biomedical Engineering major must be accepted into the program at the time of application for admission. The student’s offer of admission to the university will indicate either:

- acceptance into the BME program
- acceptance into any Engineering or Arts & Sciences major except BME

On a space available basis, BME may accept a limited number of students into the program at the end of the freshman year based on the overall academic credentials of each applicant. However, this option is exercised very infrequently by the BME department.

Students may also select the more general “undecided engineering” category on the admissions application to enter the Whiting School of Engineering. It is recommended that undecided engineering students select a specific major no later than the end of freshman year.

**Special Note for Freshmen**

Arts and Sciences freshmen may declare second majors and minors offered through the School of Engineering beginning their freshman year until April 15th of their junior year. Engineering students may declare a second major or minor offered through either the School of Engineering or the School of Arts and Sciences beginning their freshman year until April 15th of their junior year.

**Changing Majors or Advisors**

Once students have declared a major, they may change their major or their faculty advisor by obtaining a Change of Major form from the Office of the Registrar or the advising offices, meeting with the appropriate person in the major to be assigned a new faculty advisor, and submitting the form to the Office of the Registrar.

Note that students may declare the BME major only at the time of application for admission to the University or as one of a limited number of students accepted into the program at the end of the freshman year based on the overall academic credentials of each applicant and on space available.

**Double Majors**

Students who wish to complete the requirements of more than one major are expected to declare the additional major(s) by April 15th of their junior year. Students may add or drop an additional major by completing the appropriate form, available from the Office of the Registrar or from the student’s academic advising office. The form must be signed by the director of undergraduate studies for the major before it is submitted to
the Office of the Registrar. The DUS will also assign a faculty advisor to the student.

A student with a double major receives the degree (B.A./B.S.) associated with the student’s primary major. Completing a second major does not entitle the student to a second degree. The completion of additional majors is recorded on the transcript and diploma. When completing a double major, students need only satisfy the distribution requirement affiliated with the school of their primary major.

**Declaring a Minor (optional)**

Students who wish to complete the requirements for a minor(s) are expected to declare the minor(s) by April 15th of their junior year. Students may add or drop a minor by completing the appropriate form, available from the Office of the Registrar or from the student’s academic advising office. The form must be signed by the director of undergraduate studies for the minor before it is submitted to the Office of the Registrar. The DUS will also assign a faculty advisor to the student. The completion of a minor is recorded on the transcript, but the minor does not appear on the diploma.

Official recognition with notation on the academic record is not given for completion of majors or minors at other divisions of the university or at other colleges.

**Restrictions Applying to Double Majors and Minors**

Within the Hopkins curriculum, requirements for the completion of undergraduate majors and minors are established by academic departments and approved by the Homewood Academic Council, acting on recommendations from the Curriculum Committees of the Krieger and Whiting Schools. Students who fulfill the necessary prerequisites, and satisfy the specified course requirements for a major/minor will be certified as having completed that major/minor. While departments are free to designate the range of courses that may satisfy major/minor requirements for their own academic programs, they may not prohibit the use of course work presented for their department's major/minor from being used to satisfy the requirements of other majors or minors. In other words, students may "double count" coursework that independently meets the requirements of more than one major/minor.

Students are encouraged to choose additional areas of study to complement their major. However, students may not choose a minor with an identical name to their major. For example, a student majoring in Africana Studies may not declare a minor in Africana Studies.

**Other prohibited combinations include:**

1. Students may not major in Molecular and Cellular Biology and Biology.
2. Students majoring in the Natural Sciences Area may only double major or minor in a program outside of the natural sciences
3. Students majoring in Medicine, Science and the Humanities may not double major in Natural Sciences Area.
4. Students majoring in Romance Languages may not major or minor in one of the individual Romance Languages (except for the Spanish for the Professions minor).
5. Students majoring in French may not complete either French minor option.

**Closely-related majors and minors that are allowed include:**

1. Economics majors may complete a Financial Economics minor.
2. Spanish majors and Romance Languages Majors may complete the Spanish for the Professions minor.
3. Computer Science majors may complete a Computer Integrated Surgery minor.
5. Students majoring in Environmental Engineering may major in any major offered through the Department of Earth and Planetary Sciences

The examples provided above may not be an exhaustive list and students who have questions about combinations of related programs should consult an advisor in their respective advising office.

**Student Status**

**Contact Information**

All matriculated students are required to have on record with the university accurate local and permanent contact information at all times and may be subject to a registration hold if this information is missing. This includes local address, local telephone number, and valid JHU e-mail address. Parent or legal guardian emergency contact information also must be on record and updated as necessary. This information should be maintained with the Registrar’s Office by using SIS for Students (https://sis.jhu.edu/sswf).

**Student Classification (Year of Study)**

Student classification refers to the familiar names for the four undergraduate years: freshman, sophomore, junior, and senior. A student's classification is generally determined by the academic year in which the student's cohort began the first year of college. In the first year, students in the cohort are designated freshmen. For students transferring into the university, an official student classification will be assigned by the respective advising office after completion of a final transfer credit evaluation. The number of credits a student has earned does not determine class standing. A student who graduates after three years would graduate as a junior.

For students who have been on leave and missed two or more semesters, classification will be determined by the student's academic advising office when the student returns to the university. If, for example, a student was on leave of absence for an entire academic year, the advising office may assign the student to a cohort one year behind the student's original cohort.

Students are required to register with their cohort, not on the basis of total credits or expected date of graduation. Plans to graduate early are not grounds for registering before a student's cohort. If a student who intends to graduate early is closed out of a required course for the major, the student may petition the department offering the course for approval to add the course. The decision rests with the department.

**Full-Time Student Status**

Undergraduate students at Johns Hopkins University must be registered for a minimum of 12 credits each semester. Students who have not completed degree requirements after eight full-time semesters (or four full-time semesters for transfer students) may register for fewer than 12 credits and pay for courses on a per credit basis with approval of the student's academic advising office. Prior to a ninth semester, a student may not enroll for fewer than 12 credits.
Leave of Absence

Leaves of absence are granted for specific periods, generally up to one year, and such leaves are regarded as approved interruptions of a student's program. No tuition or fees are charged while on leave. If applicable, students should consult with the Office of Financial Aid prior to requesting a leave of absence. Students may not be eligible for health benefits if enrolled through JHU's Student Health Benefits.

For more information, visit https://studentaffairs.jhu.edu/registrar/students/student-health-benefits/ and/or https://finaid.jhu.edu/.

Personal Leave of Absence

Students may be granted a term leave of absence for personal reasons with the approval of the academic advising office for the student's school and with a letter from the student's parent or guardian acknowledging the request for leave. Written requests for a leave of absence should be submitted to the academic advising office in the student's school. During a leave of absence, students may not enroll in another institution for the purpose of transferring credits back to JHU.

Students who fail to return to the university when expected will be considered to have withdrawn from the university.

Medical Leave of Absence (Physical or Mental Health)

Students may be granted a term leave of absence for physical or mental health reasons with the approval of the Office of the Dean of Student Life. Mental health leaves of absence require consultation with the Counseling Center. Physical health leaves of absence require consultation with the Student Health and Wellness Center. No tuition or fees are charged while on leave. Further details are available from the Office of the Dean of Student Life (http://studentaffairs.jhu.edu/student-life/support-and-assistance/medical-leave-absence).

Note for Peabody Double Degree Students

Peabody double degree students may request a leave of absence from the double degree program, however they cannot be granted a leave of absence from only one portion (Homewood or Peabody) of the program.

Withdrawal from the University

A student who wishes to withdraw from the university with no intent to return should consult with the respective academic advising office in order to submit an official notification. An official notification of withdrawal consists of the following items:

- a letter providing brief reason for withdrawal and effective date
- a letter from parent(s)/guardian(s) acknowledging the student's withdrawal from JHU

The academic advising office will inform the Office of the Registrar, who will subsequently circulate the notification to other relevant campus offices, such as Student Accounts, Housing, Office of International Services, etc.

An enrolled student who leaves the university without notice, or who fails to register by the end of the second week of the semester, may be considered to have withdrawn from the university.

A student who transfers to another institution is automatically considered to have withdrawn from JHU.

In the rare situation where a withdrawn student wishes to return to the university, the student must submit a written request for readmission to their respective advising office for evaluation. Neither readmission nor transfer of credits is guaranteed. A student must be formally readmitted before registering for courses. Readmitted students do not pay another matriculation fee.

A student who wishes to withdraw from the university on a temporary basis and intends to return in a future semester should see the information under Leave of Absence (p. 10).

Peabody Double Degree Students

Information about withdrawing from one or both of a student's degree programs is available on the Peabody Double Degree page. (p. 975)

Combined Bachelors/Masters Programs

Many departments, institutes, and centers offer undergraduates the opportunity to complete some of the requirements for a master's degree while still completing the requirements for a bachelor's degree. These programs offer early admission to a graduate program, and may enable a student to complete both bachelor's and master's degrees in four years. Other programs are considered five-year programs. Visit http://e-catalog.jhu.edu/degree-programs/ for information on offerings available in specific departments.

Students in the School of Arts and Sciences or the School of Engineering must be accepted into a combined program no later than the first semester of their senior year, however departments may set an earlier application deadline. Students in a combined program are considered to be full-time students, and are charged full tuition.

Students in a combined program are considered to be graduate students (1) upon completion of undergraduate degree requirements, or (2) upon completion of eight full-time semesters as an undergraduate student. Clearance from a student's respective department is also required.

Additional information about combined programs is available at https://engineering.jhu.edu/academics/combined-bachelors-masters/ and http://homewoodgrad.jhu.edu/academics/combined-concurrent-bachelors-masters-policies/.

Taking a Course as an Alumnus

JHU alumni who completed their bachelors degree through the Krieger School of Arts and Sciences or the Whiting School of Engineering may take additional courses in those divisions with permission of the advising office of the school from which they graduated. Students should complete a paper registration form and have it signed in their respective advising office before taking it to the Office of the Registrar for processing. Courses, grades, and credits will appear on a new academic record. Students must follow the rules for earning a second major or a minor after graduating, if applicable.

Finishing a Second Major or a Minor after Graduating

Students who have completed eight or more semesters in college may take an additional course or two after graduation to complete a second major or minor if they have filed an approved plan with their respective advising office before their initial graduation date. The courses, grades, and credits will appear on a new academic record. A notation indicating the additional major or minor will be added to the new academic record, but a new diploma will not be issued. Students must notify their academic advising office when additional courses taken after graduation satisfy another major or minor.

A plan consists of the following:
1. Written approval from the director of undergraduate studies for the additional major/minor.

2. Description of the remaining requirement(s) to be completed. No more than two courses may be needed and these courses must be completed within one year of a student's initial graduation date.

3. Brief summary of why it is necessary for the student to have their degree conferred before completion of all planned majors or minors.

4. Final approval of a plan must be obtained from the student's respective advising office.

Students who graduate in fewer than eight semesters may also take courses after graduation as a full-time or part-time student if not completing an additional major or minor. Students who graduate early lose the opportunity to complete additional majors or minors after graduation.

Students should seek assistance of their respective advising office in order to register for a course after graduation.

**Second Degrees**

Krieger School of Arts and Sciences and Whiting School of Engineering undergraduate-degree alumni who wish to earn a second bachelor's degree at Hopkins must contact their advising office. Students who receive approval must have already completed the requirements for the first bachelor's degree and complete an additional 60 credits at Hopkins beyond what they have done for the first degree. Alumni must request permission to pursue a second bachelor's degree within ten years of the conferral of the first bachelor's degree. The second bachelor's degree must be completed within ten years from the starting date of the second bachelor's degree.

**Registration Policies**

**Advising and Registration Periods**

All students are required to meet with an advisor for each declared major prior to registering for the fall and spring semesters. Advisor alert(s) for each declared major are placed on all students' records in SIS well in advance of the registration period; the alert(s) must be released by the advisor(s) to permit the student to register.

In the School of Arts and Sciences, freshman, first-semester transfer students, and undeclared students meet with their academic advisor beginning six weeks in advance of the registration period. Students with declared majors should contact their faculty advisor to schedule a meeting prior to their registration date.

In the School of Engineering, students meet with their faculty advisors during Engineering Advising Week (early November for spring registration and early April for fall registration).

Undergraduates register for spring semester in November, for Intersession in December, for summer in March, and for fall semester in April. Detailed instructions about registration will be emailed to all students before the registration period each term. If the student has not received this information at least two weeks before the start of classes for a fall or spring term, perhaps because of a change of email address or status in the university, the Office of the Registrar should be contacted immediately.

**Schedule Verification**

Students are responsible for verifying their schedules in SIS. Students are encouraged to retain a copy of their schedule for their records. In addition, students are advised to check their schedules after performing online registration changes (adding and/or dropping courses) to ensure accuracy. It is also recommended that students review their schedule prior to the add, drop, and withdrawal deadlines. Changes to a student's schedule will not be approved after these deadlines have passed. Failure to review and retain a copy of their registration confirmation will not be considered grounds for approving exceptions to these deadlines.

**Intersession and Summer Special Registration Information**

Summer and intersession opportunities, such as JHU-sponsored study abroad courses and career exploration courses, may have special registration deadlines, fees, and procedures. Please see the Intersession (http://pages.jhu.edu/intersession) or Summer (http://pages.jhu.edu/summer) Programs websites for additional information.

Intersession is a three-week period in January for students and faculty to participate in a variety of courses and activities that are offered for credit, and for non-credit. These offerings are designed to enrich the intellectual and social life of the campus. Registration in Intersession is optional.

For intersession academic exploration courses, the tuition cost of Homewood KSAS and WSE courses is free to undergraduates who were enrolled full-time in the previous fall semester (including approved study abroad); part-time students must pay tuition. All students must pay relevant fees. Students who are returning from a leave of absence may register for intersession if they pay tuition per credit hour. Students who register for Hopkins intersession courses outside of KSAS/WSE are subject to tuition charges determined by the individual school.

Summer courses at JHU are primarily offered during two five-week terms. Some courses run on alternative schedules and may, therefore, have different deadlines. Courses are sponsored by the same academic departments that oversee the university’s full-time degree programs. They are designed to reproduce, as closely as possible, similar courses offered during the spring and fall semesters. Tuition charges, and deadline dates, are published on the Summer Programs (http://pages.jhu.edu/summer) website.

**Late Registration Fees**

Registration in the School of Arts and Sciences and the School of Engineering is not permitted after the end of the second week of the semester, except in extraordinary circumstances as approved by the Assistant Dean for Academic Advising for their respective school. Students must register on time, even when they lack sufficient funds. The university provides many financing alternatives that permit students to register in most financial situations. Visit https://finaid.jhu.edu/ for information on the variety of financial support programs offered at JHU.

Students who for any reason do not complete their registration until after the prescribed registration period will be required to pay a late registration fee according to the following schedule:

- $100 · end of prescribed registration period until the day before the first day of classes of the upcoming semester
- $150 · first day of classes through the end of the first week of classes
- $200 · second week of classes
Adding a Course

During the fall and spring semesters, students may add a course until the end of the second week of classes and pay no fees to add courses. During this time students may add courses without written approval, unless the course is filled or will cause a credit overload. If the course will cause a credit overload, Arts and Sciences students need approval from the Arts and Sciences Advising Office, while Engineering students will need the approval of their faculty advisor and the approval of the Engineering Advising Office. Approvals for credit overloads can be processed in the SIS by the student's respective advising office which will enable students to add the course(s) online.

An instructor's signature is required to add a course that is filled. By the end of the second week of classes, students should have the schedule they want to keep. As an exception to this policy, students may enroll in Independent Study, Independent Research, Thesis, and/or Internship until the end of the sixth week of the semester.

For fall and spring courses that are scheduled for less than the full semester, the last day to add will vary based upon course length and start date. Please see the Registrar's Office (https://studentaffairs.jhu.edu/registrar/students/registration) website for details. For intersession and summer deadlines, please refer to the Intersession (http://pages.jh.edu/intersession) or Summer (http://pages.jh.edu/summer) Programs websites.

When adding courses in other divisions or at schools in the Baltimore Student Exchange Program (BSEP), Homewood undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the add deadlines are based on the quarter system, not the semester system that is used in other JHU divisions.

Dropping a Course

Courses may be dropped from the student's record until the end of the sixth week of the semester, provided that the student remains registered for a minimum of 12 credits. For engineering students, faculty advisor approval is required to drop a course after the second week of classes.

For fall and spring courses that are scheduled for less than the full semester, the last day to drop will vary based upon course length and start date. Please see the Registrar's Office (https://studentaffairs.jhu.edu/registrar/students/registration) website for details. For intersession and summer deadlines, please refer to the Intersession (http://pages.jh.edu/intersession) or Summer (http://pages.jh.edu/summer) Programs websites.

When dropping courses in other divisions or at schools in the Baltimore Student Exchange Program (BSEP), Homewood undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the drop deadlines are based on the quarter system, not the semester system that is used in other JHU divisions.

Withdrawing from a Course

After the end of the sixth week and until the end of the eleventh week of the semester, course withdrawals must be conducted in person at the Office of the Registrar using an add/drop form. Engineering students need the signature of their faculty advisor on the add/drop form. No signature is required for Arts and Sciences students to withdraw from a course.

Withdrawing from a course may adversely affect a student's academic standing and/or financial aid satisfactory academic progress, even with official approval, and students should discuss these topics with the respective offices prior to submitting signed add/drop forms to the Office of the Registrar.

For fall and spring courses that are scheduled for less than the full semester, the last day to withdraw will vary based upon course length and start date. Please see the Registrar's Office (https://studentaffairs.jhu.edu/registrar/students/registration) website for details. For intersession and summer deadlines, please refer to the Intersession (http://pages.jh.edu/intersession) or Summer (http://pages.jh.edu/summer) Programs websites.

When withdrawing from courses in other divisions or at schools in the Baltimore Student Exchange Program (BSEP), Homewood undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the withdrawal deadlines are based on the quarter system, not the semester system that is used in other JHU divisions.

Full-Time Student Status

Undergraduate students at Johns Hopkins University must be registered for a minimum of 12 credits each semester. Students who have not completed degree requirements after eight full-time semesters may register for less than 12 credits and pay for courses on a per credit basis with the permission of their respective academic advising office.

Fall and Spring Semester Credit Requirements and Limits

Credit is an approximate measure of the work required in a course. For undergraduate courses, the number of credits is normally equal to the number of hours that the class meets each week. Some laboratory courses are exceptions to this rule, meeting more hours per week than the credits awarded. Graduate-level courses completed by undergraduates are generally awarded the same number of credits as an upper-level undergraduate course (3 credits).

For Arts and Sciences (AS) students, the average course load is 15 credits per semester for eight semesters. For Engineering (EN) students, the standard load is 16-18 credits. AS freshmen are limited to 17 credits, while AS upperclassmen are limited to 18.5 credits. EN freshmen are limited to 18 credits (18.5 if including a foreign language), while EN upperclassmen are limited to 19.5 credits.

Undergraduate students must maintain full-time status by registering for at least 12 credits in fall semesters, and in spring semesters.

Intersession and Summer Credit Limits

Students may take a maximum of 3 credits during intersession.

During the summer, students may take a maximum of 14 credits total, with a limit of 7 credits per session.
Exceptions to These Credit Limits

Arts and Sciences students who wish to take a credit overload must meet one of the following criteria:
- Double degree students who are taking courses at both Peabody and Homewood
- Seniors in their eighth semester
- Upperclassmen who made Dean’s List in the prior semester

Credit overloads for arts and sciences students require approval from AS academic advising.

Exceptions for EN Students

Credit overloads for engineering students are approved on a case-by-case basis. EN students who wish to overload credits need their faculty advisor’s signature, then final approval by the EN Advising Office. Usually, the student’s most recent academic performance is a factor in the decision. First-semester freshman are not granted credit overloads.

Registration and Restrictions

The following content is included on this page:
Registration Alerts (p. 14)
Retaking a Course (p. 14)
Prohibition on Registering for Courses that Meet at the Same Time (p. 14)
Restrictions on Equivalent Courses and Courses Taken Out of Sequence
Policy on Statistics Courses Sequencing (p. 15)
Important Note About Credit and Grades for Language Courses (p. 15)
Instructor’s Permission (p. 16)
Auditing a Course (p. 16)

Registration Alerts

Registration alerts may be applied to student records for a variety of reasons, such as outstanding financial obligations, insurance and health clearances, academic standing, and missing emergency contact information. A student whose registration has been placed on hold for a non-academic reason must obtain clearance from the office or offices that placed the hold on registration. Transcripts will not be released for students with unpaid balances.

Students who have three or more incomplete grades from the previous semester may have a hold placed on registration activity. The student must have an approval signature from their respective advising office to register, add, or drop.

Retaking A Course

Students may retake a course to absolve a grade of C+ or lower. The grade for the second attempt and the associated credits are recorded on the transcript and are calculated into the GPA. The original grade remains unchanged with the notation “R” to indicate that the course was retaken, and it does not affect grade point calculations, nor does it carry credit toward graduation. Only the grade in the retaken course accrues credit and applies to the GPA, even when the retaken grade is lower than the original grade. However, if a student drops or withdraws from the subsequent attempt, the grade is calculated into the GPA. A student may retake one course without written permission. Taking the same course a third time or retaking another course requires written permission of the student’s respective academic advising office.

A course originally taken for a letter grade must be retaken for a letter grade. A course taken under the Satisfactory/Unsatisfactory grading option must be retaken under the Satisfactory/Unsatisfactory grading option. First semester courses whose grades are covered by S/U notation are considered to have been taken for a letter grade. If a student wants to retake a course from the first semester, the second attempt must also be for a letter grade.

To absolve a grade, the same course must be taken at Hopkins, not at another college or university. In situations where the same course is no longer offered, students may be able to absolve a grade in one of two ways:
1. by repeating a course of comparable content and level, or
2. as an independent study

Students who earn credit for courses which are sequential in nature, such as the Expository Writing sequence, must be taken in their proper order. One exception to this policy is that AS.110.405 Honors Analysis I cannot be taken in reverse order with permission of the department.

Credit will be awarded only once for equivalent courses covering the same material. Examples of equivalent courses are Intermediate French and Advanced Intermediate French, and AP Calc AB and Calculus I. This restriction does not apply to the Expository Writing course which may be taken twice. Be aware that departments may change course numbering or titles without changing the course content. Students who believe that they have registered for an equivalent course should consult with their academic advising office.

The following restrictions apply to overlapping and the sequencing of courses in the Mathematics and Applied Mathematics and Statistics Departments:
- Students who earn credit for AS.110.201 Linear Algebra cannot receive credit for the combined course EN.553.291 Linear Algebra and Differential Equations or for the course AS.110.212 Honors Linear Algebra.
- Students who earn credit for AS.110.405 Real Analysis I cannot receive credit for AS.110.415 Honors Analysis I
The list below shows the courses and sequences that are allocated to course.

- Students who earn credit for AS.110.406 Real Analysis II cannot receive credit for AS.110.416 Honors Analysis II.
- Students who earn credit for AS.110.302 Differential Equations and Applications cannot receive credit for EN.553.291 Linear Algebra and Differential Equations.
- Students who earn credit for AS.110.202 Calculus III cannot receive credit for AS.110.211 Honors Multivariable Calculus.
- Students who earn credit for AS.110.311 Methods of Complex Analysis cannot receive credit for AS.110.407 Honors Complex Analysis.

A student who earns credit in EN.553.291 Linear Algebra and Differential Equations may receive credit for further study of linear algebra or differential equations by enrolling for independent study. Normally students will earn 2 credits for such an independent study, but the number of credits may vary and is to be decided by the faculty sponsor. These students may not earn credit for AS.110.302 Differential Equations and Applications, AS.110.201 Linear Algebra, nor AS.110.212 Honors Linear Algebra.

- Students who earn credit for EN.553.426 Introduction to Stochastic Processes cannot receive credit for EN.553.427 Stochastic Processes and Applications to Finance.

Courses in the Economics Department with restrictions:

- Students who earn credit for AS.180.301 Microeconomic Theory may not earn credit for AS.180.401 Advanced Microeconomic Theory.
- Students who earn credit for AS.180.334 Econometrics may not earn credit for AS.180.434 Advanced Econometrics.

**Policy on Statistics Courses Sequencing**

Undergraduate students at the Homewood Schools of Johns Hopkins University enjoy a wide selection of courses on statistics; however, it is not allowable for a student to be awarded credit for two courses that cover essentially the same material. Likewise, it is not allowable for a student to receive credit for a more basic course after having received credit for a more advanced course in the same subject.

Our statistics courses fall into one of the following four categories, listed in increasing level of sophistication:

1. **Non-calculus based, basic**
2. **Non-calculus based, intermediate**
3. **Calculus based, intermediate**
4. **Calculus based, advanced**

A student may take at most one course (or course sequence) from within one of these categories. A student may not take a course in a lower numbered category after having taken a course in a higher numbered category.

Some departments may require their undergraduate majors to take specific statistics courses, however, all students are precluded from receiving credit for two courses that have much the same content, though they may have different emphases. This policy does not imply that a course in one of the above categories may be substituted for another course.

The list below shows the courses and sequences that are allocated to these categories. Examples:

- A student may take EN.553.111 but then may not subsequently take AS.230.205.
- A student who has taken EN.553.310 may not also take EN.553.311 or any of the courses in the first two categories.

**Category 1: (Non-calculus based, basic course)**

- EN.553.111 Statistical Analysis I
- AS.230.205 Introduction to Social Statistics
- AP Statistics

**Category 2: (Non-calculus based, intermediate course)**

- EN.553.211 Probability and Statistics for the Life Sciences
- EN.553.230 Introduction to Biostatistics
- AS.280.345 Public Health Biostatistics

**Category 3: (Calculus-based, intermediate course)**

- EN.553.310 Probability & Statistics for the Biological Sciences and Engineering
- EN.560.348 Probability & Statistics in Civil Engineering

**Category 4: (Calculus-based, advanced course)**

- EN.553.420 Introduction to Probability-EN.553.430 Introduction to Statistics

Some courses do not fall into one of the four categories:

- EN.553.413 Applied Statistics and Data Analysis This course is mostly independent of the other probability/statistics courses, but subsumes enough of the non-calculus, basic course material such that no Category 1 course may be taken after EN.553.413.
- EN.553.112 Statistical Analysis II may be taken after any category 1, 2, or 3 course. However, the preferable sequence is EN.553.111 Statistical Analysis I-EN.553.112 Statistical Analysis II.

**Equivalent Statistics Courses**

The courses EN.553.310 Probability & Statistics and EN.553.311 Probability and Statistics for the Biological Sciences and Engineering are considered equivalent to each other and can be used interchangeably. In accordance with the course retake policy, a grade in one may be absolved by the opposite course.

**Important Note About Credit and Grades for Language Courses**

Both semesters of language elements courses in French, German, Greek, Italian, Latin, Portuguese, Spanish, Yiddish, and languages offered in the Near Eastern Studies Department must be completed with passing grades in order to retain credit for both courses. If study of the language is terminated after the first semester, the student will lose the credit for the course. The course and grade will remain on the academic record, but no credit will be awarded and the grade will not affect the grade point average. This change to the record is generally made in the last semester prior to graduation by the student’s academic advising office, but students can also request that the advising office make the change at an earlier point. Students do not have to take both semesters of the first year of languages taught through the Center for Language Education to retain credit from the first semester.
Students must take the language elements (or beginning/first year) courses for a letter grade.

Students in the School of Arts and Sciences do not receive an area designation for these elements (beginning/first-year) courses. For students in the School of Engineering, language elements (or beginning/first-year) courses can be substituted for humanities courses in meeting the distribution requirement.

Instructor's Permission

Many graduate (600-level and above) courses in the School of Arts and Sciences and the School of Engineering offered in the graduate divisions of the university, and some advanced undergraduate courses, require the instructor’s approval. Engineering students also need their faculty advisor’s approval. If online enrollment is not available, students must use a paper registration or add/drop form, and the instructor’s signature is required.

Auditing a Course

Undergraduate students may not audit a course. By the end of the add period, a student may only attend or participate in courses for which they are enrolled.

Registering for Independent Academic Work

Independent Academic Work is the collective term used to encompass independent study, research, and academic internships. Independent study means a program of study and reading under the tutelage of a faculty member. Academic credit for independent study is based on work equivalent to class-based courses. Research involves planning and conducting experiments, collection and analysis of data, and the reporting of results. Academic internships are practical work experiences which have an academic component as certified by a member of the faculty.

All forms of independent academic work require early planning with a faculty sponsor. To receive academic credit, the independent academic work must include activity, exercise, and/or product that can be evaluated by a member of the AS/EN faculty whose field of expertise is closely enough related to the work for the faculty sponsor to competently evaluate the work, and certify that it merits academic credit.

Academic credit for independent academic work must be sponsored by a full-time member of the Homewood faculty. This is the case whether the work is done on-campus or off-campus. The work supervisor and the faculty sponsor may be the same individual. If the faculty sponsor is not the work supervisor, the work supervisor must provide the faculty sponsor with a report on the student’s achievements while doing the independent project, and the faculty member must certify how much academic credit the project merits.

Students who wish to pursue independent academic work begin by discussing their ideas with an appropriate faculty sponsor. That discussion must focus on what type of project the student envisions, and what possibilities for academic credit the faculty member envisions. If the student and faculty member agree on the type of project and its academic value, then the student should find a suitable research or work environment for the project.

No more than three credits may be earned for independent study or research in one semester or summer (sessions I and II combined); only one credit may be earned for an academic internship during one semester or summer. Additionally, no more than 6 credits of any type of independent academic work may be earned in one academic year (see exception for students graduating in their eighth semester or later (p. 31)). The academic year begins in May/June with the first summer session and ends in May at the conclusion of the spring semester. Independent work done for academic credit must be unpaid. Credits for research and independent study vary from 1-3 credits, and may be graded with either letter grades (A, B, etc.) or Satisfactory/Unsatisfactory. Each credit hour should reflect 40 hours of work on the project. Credit for an internship is limited to 1 credit, and the grading method is Satisfactory/Unsatisfactory only.

Students must register for independent academic work by the end of the sixth week of the semester. Students must adhere to the registration and add/drop deadlines during Intersession, and Summer.

Although academic credit is awarded for independent academic work, area designations are not assigned and the credit may not be used to satisfy the distribution requirement. The use of credit for independent academic work to satisfy the requirements of a major or minor is subject to prior written approval by the appropriate department or program.

Registering for Courses in Other JHU Divisions During the Fall and Spring Semesters

Qualified undergraduates may take courses at other divisions of the university by registering in person with the Homewood Registrar. Students submit an Interdivisional Registration (IDR) form, which is available in the Homewood Registrar’s Office in 75 Garland Hall, in the Office of Academic Advising Garland Hall Suite 300, or in the Office of Engineering Advising 103 Shaffer Hall. Courses taken at other JHU divisions must be taken for a letter grade, unless the course at the host division is offered on an S/U basis only. Approval(s) are required for all AS/EN students as indicated on the IDR form. All students must meet the course requirements as defined by the host division.

Peabody Institute

Peabody Conservatory offers courses that must be taken for grade and credit. Homewood undergraduates who are not enrolled in a music major, minor, or the Peabody Double Degree program may only take one nonperformance course per semester at the Conservatory, and may also take one performance course concurrently with the approval of the student's respective advising office. Performance courses will receive 1 credit per semester unless taken as part of the Peabody Double Degree program.

Students taking lessons for the first time at Peabody Conservatory must complete an Application for Admission to the Peabody Conservatory of Music Interdivisional Program for Initial Enrollment, and an IDR form. These forms are available at the Homewood Registrar’s Office. Students may take private lessons at Peabody Conservatory with an instructor who is a Conservatory faculty member, or a Preparatory faculty member approved by the Deans of the Preparatory and Conservatory. Acceptance is on a space available basis following an audition to demonstrate intermediate or advanced skill. Auditions for Conservatory lessons are held in September. Students will be notified of their audition time by the Conservatory Registrar’s Office. Space in lessons is limited, and registration is on a first-come, first-served basis. There is a $190 fee per semester for one half-hour lesson per week ($200 for voice). Students who wish to take additional lessons will be charged.

The Conservatory schedule and deadlines can differ from those at Homewood. Students taking courses and lessons at the Conservatory must check these dates in the Peabody schedule of courses located at https://peabody.jhu.edu/academics/academic-calendar-resources/ registrar/. Visit https://peabody.jhu.edu/academics/peabody-at-
homewood/ for additional information about taking lessons at the Conservatory.

Peabody Preparatory offers beginning level music lessons on a non-credit basis. IDR is not available for Homewood students seeking to enroll in music lessons through the Peabody Preparatory. Visit https://peabody.jhu.edu/preparatory/ for information on lessons offered, application, registration, and payment.

The Carey Business School and The School of Education
Students may register for approved courses in these two schools on a case-by-case basis. In order to register in the Carey Business School or the School of Education, students in Arts and Sciences and Engineering programs should use the Interdivisional Registration Form, available from the Homewood Registrar’s Office, which requires permission of their academic advisor and the appropriate school program director or advisor. Courses must be taken for a grade. Note that the Carey Business School and the School of Education students have priority in registering for these schools’ courses.

School of Medicine and Bloomberg School of Public Health
Undergraduates may register for courses in the School of Medicine and/or the Bloomberg School of Public Health with the approval of the faculty advisor, the course instructor, and the student’s academic advising office. Students must have an adequate background for the courses, and courses must be taken for a grade. Public Health Studies majors taking courses at the Bloomberg School of Public Health require only the Public Health faculty advisor’s approval signature.

Registering for Courses at Other JHU Divisions During the Summer
Degree-seeking students are permitted to IDR enroll during the summer term(s). Students must meet designated course prerequisites and/or be otherwise qualified for the desired course(s) at the following JHU divisions:

- Advanced Academic Programs (AAP) division of the Krieger School of Arts and Sciences
- Bloomberg School of Public Health (excluding offerings through the Summer Institute)
- Engineering for Professionals (EP) division of the Whiting School of Engineering
- Peabody Institute (permission required from Peabody Associate Dean for Academic Affairs)
- School of Advanced International Studies
- School of Education
- School of Medicine

Students should register using the IDR form, and pay for the course at their home division. The course, along with credits and grade, will appear on the student's home division transcript. Approval from both the home and host divisions is required to ensure that the interdivisional enrollment is appropriate for the student’s degree. Summer courses in other divisions must be taken for a grade.

IDR enrollment is not available during the summer term(s) at the Carey Business School, nor the School of Nursing. Students seeking enrollment at either of these schools should pursue enrollment directly with the respective division.

Registering for Courses through the Baltimore Student Exchange Program
Undergraduates may take one course per semester (fall/spring only) at one of the several area colleges and universities that comprise the Baltimore Student Exchange Program (BSEP). This program includes the following colleges in the Baltimore area: Community Colleges of Baltimore County, Coppin State University, Goucher College, Loyola University Maryland, Maryland Institute College of Art, Morgan State University, Notre Dame of Maryland University, Stevenson University, Towson University, University of Baltimore, and University of Maryland Baltimore County.

Students who have received Air Force ROTC scholarships will register for the required ROTC courses at the University of Maryland College Park using the cooperative institution registration process described in this section.

Courses that are equivalent to those offered at the Homewood campus may not be taken through BSEP. Students register in-person with the Homewood Registrar. Students submit a BSEP registration form, which is available from the Registrar’s Office at 75 Garland Hall, or from the student’s academic advising office. The faculty advisor’s approval signature is required for all courses. An academic advisor from the student’s respective advising office must also sign the form. Submit completed registration materials to the Homewood Registrar’s Office.

Prior to the start of classes at the host institution, students may report to the host school’s registrar for additional assistance (for example, campus maps or id cards). JHU students enrolled through BSEP are not required to complete registration forms at the host institution, and no academic record is established at the host institution. There is no additional fee or tuition charge for courses taken through the cooperative education program, except when the host school charges a laboratory or materials fee. In that event, the student pays the fee directly to the host institution.

Courses at these schools must be taken for letter grades. Both grades and credits appear on the Hopkins academic record along with an indication of where the courses were taken. The grades are included in calculations of the grade point average.

Independent undergraduate work, special tutorials, or private study types of courses that consume a large portion of faculty time are generally not included in the BSEP program, nor are weekend or evening courses offered through continuing educational studies programs.

Cooperative Education in Engineering
Engineering students may participate in government or industry-based cooperative education programs. Students who have received an offer from an employer should contact the Engineering Advising Office at 410-516-7395 or wseadvising@jhu.edu.

ROTC
Enrollment in the Johns Hopkins University Department of Military Science ROTC Program prepares students for full- and part-time careers in the U.S. Army and its Reserve Forces, as well as providing leadership and management skills valuable in any profession. Freshmen interested in finding out about the military profession should enroll in a Military Science course. Contact the professor of military science at 410-516-4685 for enrollment procedures and scholarship information. Visit http://www.jhurotc.com/page.php?page=home for additional information.
Final Examination Schedule for Fall and Spring Semesters

The Registrar establishes the final examination schedule. In rare cases, the official final exam schedule available on the Registrar’s website may slot three final exams on one day for a student. Students should contact their respective academic advising office for assistance in these instances. Instructors may administer final examinations only at the officially scheduled time, not during class time or during the reading period. Take-home final examinations, and other final exercises (such as papers) that are expected to be prepared for and completed after classes have concluded are due at the end of scheduled in-class final examination time for the course. All other papers can be due at any deadline during the semester set by the professor, including the reading and final examination periods. Students who are concerned that any of these policies are being violated by their instructors should notify their respective academic advising office.

The final exam schedule (https://studentaffairs.jhu.edu/registrar/students/course-schedule) is posted on the Office of the Registrar’s website.

Grading Policies

Grades are submitted to the Registrar at the end of the semester. Grades can be viewed online by students using their JHED account and password. Students may designate authorized users to view final course grades in SIS.

Grades and Grade Point Average Points

Each grade corresponds to a numerical grade point equivalent to allow the computation of a grade point average. S and U grades have no effect on grade point average. The grades and their grade point equivalents are as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Performance</th>
<th>GPA Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>Excellent</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>Excellent</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>Good</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>Good</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>Satisfactory</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>Satisfactory</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>Passing</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>Passing</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
<td>0.0</td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory (C- and above)</td>
<td>N/A</td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory (D+ and below)</td>
<td>N/A</td>
</tr>
</tbody>
</table>

Other marks are used in special circumstances as follows:

<table>
<thead>
<tr>
<th>I/Grade</th>
<th>Incomplete/Reversion Grade (incomplete grade reverts to this letter grade at deadline unless alternate grade is submitted prior to that deadline)</th>
</tr>
</thead>
<tbody>
<tr>
<td>MR</td>
<td>Missing grade roster</td>
</tr>
<tr>
<td>MT</td>
<td>Multi-term</td>
</tr>
<tr>
<td>NG</td>
<td>No grade given, course completed</td>
</tr>
<tr>
<td>W</td>
<td>Official withdrawal</td>
</tr>
<tr>
<td>X</td>
<td>No grade reported by instructor</td>
</tr>
</tbody>
</table>

Grade Points and Grade Point Average

To determine the grade point average, multiply the grade point equivalent by the number of credits for the course. Add the products (grade points earned), then divide the total by the number of credits in the computation.

A Sample Calculation of a Grade Point Average

<table>
<thead>
<tr>
<th>Grade</th>
<th>Credit</th>
<th>Grade Point Equivalent</th>
<th>Grade Points Earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>A-</td>
<td>4</td>
<td>3.7</td>
<td>14.8</td>
</tr>
<tr>
<td>B</td>
<td>3</td>
<td>3</td>
<td>9</td>
</tr>
<tr>
<td>B+</td>
<td>3</td>
<td>2.7</td>
<td>8.1</td>
</tr>
<tr>
<td>C+</td>
<td>3</td>
<td>2.3</td>
<td>6.9</td>
</tr>
<tr>
<td>TOTAL</td>
<td>13</td>
<td></td>
<td>38.8</td>
</tr>
</tbody>
</table>

GPA = 38.8/13 = 2.98

Satisfactory/Unsatisfactory Grades

Undergraduates may select one course each semester and summer (across all summer terms) to take for Satisfactory/Unsatisfactory credit at JHU. Students indicate their S/U choice on their add/drop form. Arts and Sciences students need the advising office approval for courses within their major and/or for writing intensive courses. Engineering students need approval from their faculty advisor. Course instructors are unaware of which students in a class are registered for S/U credit. Instructors submit letter grades to the Registrar for all students in their course.

Students must decide whether to take a course on a S/U basis by the end of the eleventh week of the semester. This deadline applies to all courses, even those which may not have any graded work assigned or returned before the end of the eleventh week.

S/U grades have no effect on a student’s grade point average. On the academic transcript, students who earn a grade of C- or above in a S/U course receive Satisfactory credit and a mark of S is entered on the academic record. Students who earn a grade below C- in a S/U course receive no credit and a mark of Unsatisfactory is recorded on the academic record.

Under certain conditions, graduating students in their eighth semester or later may exceed the normal S/U grading limit. See Graduation Policies (p. 31) for details.

Restrictions on Satisfactory/Unsatisfactory Grading

The S/U option applies only to courses in the fall, spring and summer terms in the School of Arts and Sciences and the School of Engineering. Only one course per semester or summer (across all summer terms) may be taken with the S/U grading option. However, an eligible student who registers for a course that is only offered for S/U credit may select an
additional S/U course in the same semester. Language elements courses must be taken for a letter grade.

If a student has taken a course for S/U credit and then changes to a major or minor that requires the course, the grade can be changed to a letter grade before graduation with the approval of the student’s academic advising office and the director of undergraduate studies for the relevant major or minor. If the S grade is acceptable for the new major or minor, the S grade will not be converted to a letter grade.

Incomplete Grades

Students who are confronted with compelling circumstances beyond their control which interfere with the ability to complete their semester’s work during the normal course of a term may request an incomplete grade from the instructor. Approval of such a request is neither automatic nor guaranteed. Procrastination or distraction by other pursuits are not regarded as compelling circumstances, and extensions in these situations are unfair to students who have completed their course requirements within the allotted time.

If the instructor agrees to grant an incomplete grade, the instructor and student must establish a timetable for submitting the unfinished work, but no later than the end of the third week of the subsequent semester. See below for specific information about graduating students. When entering an incomplete grade in SIS, the instructor must also enter a reversion grade. This is the grade that the student will receive if the missing work is not completed. For example, if the student, based on the coursework completed by the end of the semester, would receive a C+ grade without the missing work, then the grade of I/C+ is entered on the transcript. If the incomplete grade is not resolved within the allowed period (the end of the third week of the subsequent semester), the incomplete grade is automatically converted to the reversion grade (a C+ in this example). Effective Summer 2018, the grade of I/A+ is not an allowable reversion grade.

Students who are in good academic standing have until the end of the third week of the subsequent semester to finish incomplete work. Exceptions to this deadline require a petition from the instructor, and appeal to the student’s respective academic advising office before the end of the third week of the subsequent semester. When appealing to change the deadline, faculty members must specify a new date for completion of the work which must be before the end of the current semester. Incomplete grades cannot be held over to another semester in order to complete the missing work by retaking the course. Students and instructors do not have an option in this situation.

Incomplete grades do not affect a student’s grade point average, which is based upon the grades that are available for the term. However, students with three or more incomplete grades on their record at the start of a semester may be prevented from making changes to their registration for the semester without the approval of the student’s respective academic advising office. Students who are on academic probation are not allowed to take incomplete grades in courses without the approval of their respective academic advising office. Unauthorized incomplete grades will be treated as failures when evaluating the work of students who are on academic probation. Authorized incomplete grades must be resolved no later than the deadline established by the student’s respective academic advising office if the student is on academic probation.

Special Rules for Graduating Students

Students with incomplete grades in required courses at the date of degree conferral will not graduate. Students with incomplete grades in courses that are not required for degree completion may still graduate. However, the deadline for completion is abbreviated; students must resolve incomplete grades within 30 days of degree conferral when the university closes the undergraduate record. If the work is not finished by the deadline, the reversion grade will be recorded. For the specific deadline relevant to each degree conferral, please consult with Academic Advising or the Office of the Registrar. For more details on incomplete grades and graduation, see Graduation Policies (p. 31).

Policy on Changing a Grade

Once an instructor has submitted a grade to the Registrar, grade changes can be made only in the case of error in grading, calculation, or transcription. Students with questions about grading should contact the faculty instructor who has sole authority to assess and assign course grades. If the instructor determines a change is warranted because of error, the change must be submitted to the Registrar’s Office by the end of the subsequent semester. Grade changes for graduating seniors must be submitted by the close of the undergraduate record.

Under extenuating circumstances when the student has engaged the services of the case managers in the Office of the Dean of Student Life, the following procedure may be used to withdraw a student from a previously graded course:

- Support for changing a grade to a withdrawal must be submitted by the Office of the Dean of Student Life to either the Arts and Sciences Office of Academic Advising or the Office of Engineering Advising
- Such support must include the last date of attendance, and the instructor’s approval
- The Registrar’s Office will process the course withdrawal, and note the academic record upon receipt of approval documentation
- Late withdrawals may adversely affect a student’s academic standing
- Financial aid satisfactory academic progress even with official approval

Retaking a Course

Policies about retaking a course can be found in the catalog. (p. 14)

First-Year Language Courses: Information about Credit and Grades

Policies about first-year language course can be found in the catalog. (p. 14)

Dean’s List

Students who earn a term grade point average of 3.50 or above in a program of at least 14 credits with at least 12 graded credits will be placed on the Dean’s List for academic excellence. An appropriate notation is made on the student’s academic record. Letters are sent to parents/guardians by the student’s respective academic advising office. The university places notification in your appropriate hometown newspaper, if you elect to follow the directions provided with the letter.

Class Rank

The university does not calculate class rank and therefore, cannot provide this information to students or outside parties.

Transcripts

Information about ordering transcripts is available on the Registrar’s website (https://studentaffairs.jhu.edu/registrar/students/transcripts). Partial transcripts of a student’s record will not be issued.
Transcripts are normally issued only at the request of the student or with his/her written consent. Transcripts can be issued to offices and departments within the university without consent of the student.

Class Attendance and Absences
Although there are no university regulations concerning attendance, students are expected to attend all courses regularly. Students should consult with their instructors and/or teaching assistants when they have missed classes to explain the reasons for their absence, and to stay on track in the course. Instructors are encouraged to establish their own policies regarding attendance, and it is the student’s responsibility to know those policies.

In certain courses regular attendance is given special importance. These include foreign language courses, as well as introductory courses in Writing Seminars, and Expository Writing. Instructors in these courses may lower a student’s grade for unexcused absences.

If a student is absent from classes over a period of several days without explanation, instructors are encouraged to inform the student’s respective academic advising office. In some cases, withdrawing from a course may be considered; however, the student must withdraw from a course before the end of the eleventh week of the semester, and still remain in at least 12 credits.

Absence From Class Due to Illness
The Student Health and Wellness Center (SHWC) does not provide excuses for students who miss individual classes, including required attendance classes or labs. For students who are seen at the SHWC for a serious or extended illness that causes them to miss a number of classes over several days and/or to miss major academic assignments (mid-terms examinations, major presentations), the SHWC will provide verification of the visit to the student directly, and alert the Office of the Dean of Student Life. Verification will not be provided retroactively. It is the student’s responsibility to forward the verification to any professors/instructors who request it.

Since the absence from a final examination is excused only for the most serious of circumstances, the SHWC will provide verification of the visit for those students who are seen at the SHWC for treatment at the time of their illness only.

Students should be guided by the following:

1. Ask instructors about expectations for class attendance and what procedures they will follow for students who miss class or assignments. Such policies are determined by each instructor and will differ from class to class.
2. In the event of a missed class or inability to complete course work due to illness, contact the instructor to make whatever arrangements are necessary to make up any work.
3. Notify the professor promptly by email. This should be done before the missed class unless it is not possible to do so (for example, if hospitalized or incapacitated). In cases where prior notification is not possible, notify the professor as soon as possible.
4. Misrepresenting personal circumstances to a faculty member, SHWC staff, or any university official constitutes academic dishonesty and is grounds for action by the Academic Ethics Board.

Absence for Religious Holidays
Religious holidays are valid reasons to be excused from class. Students who must miss a class or an examination because of a religious holiday must inform the instructor as early in the semester as possible in order to be excused from class or to make up any work that is missed.

Approved Absences
The university encourages students to participate in varsity athletics and other significant extracurricular activities. Students who must miss a class or an examination because of participation in a scheduled in-season varsity athletic event must notify the course instructor as early in the semester as possible. Approved absences are granted at the discretion of the course instructor. When students must miss a scheduled examination, several solutions have been found by instructors. Students have been permitted to take an examination before leaving for the event, or coaches have served as proctors for examinations taken during the athletic event at approximately the same time as the other students in the course. Students have also been allowed to take the examination, or an alternative examination, upon their return from the athletic event.

Academic Standing Policies
Good Academic Standing
Students who maintain a minimum of 12 credits earned and a term GPA of at least 2.0 each semester are considered in good academic standing. In the rare circumstance that a student is given permission prior to the start of the semester to be enrolled in less than 12 credits, that student must complete 100% of the enrolled credits with a term GPA of at least 2.0 to remain in good standing.

Reviewing Academic Standing
Each academic advising office reviews student records at the end of fall and spring semesters to monitor academic standing. Based on this review, students may be placed on academic probation or academically dismissed.

Satisfactory Academic Progress
Satisfactory Academic Progress (SAP) refers to minimal standards for grades and cumulative credits required to receive financial aid. The SAP policy is available at https://finaid.jhu.edu/undergraduate-aid/apply-for-aid/undergraduate-sap/.

Academic Probation
At the end of each fall and spring semester, the academic advising offices review the records of all undergraduate students to evaluate the academic standing of each student. Students who earn less than 12 credits or earn a term GPA below 2.0 are placed on academic probation. A letter informing a student of this status and the terms of academic probation are sent to the student in January (for fall performance) or June (for spring performance).

The terms of academic probation are as follows: Students must complete at least 12 credits with a minimum term GPA of 2.0 in the next enrolled fall or spring semester. Students may also be required to achieve a cumulative GPA of 2.0 or above in order to be removed from academic probation. In making the GPA calculation, incomplete grades (I) may be calculated as failures (F). In addition, any grade in a satisfactory/unsatisfactory course may be taken into consideration.

Students who do not meet the terms of academic probation will be academically dismissed (p. 21). In some circumstances, a student may be continued on academic probation instead of being dismissed. A student whose term GPA falls below 1.0 or earns less than 6 credits may
be dismissed without having been on academic probation the previous semester.

The advising offices send written notification to students who are placed on academic probation. Incomplete or missing grades may prevent timely notification. Students with a term grade point average below 2.0 or who earned less than 12 credits should consult with an academic advisor about their academic standing, even if they have not received the letter from their advising office.

Students on academic probation may be restricted from registering for the maximum course load. Engineering students on academic probation are permitted a maximum of 14 credits during the probation semester.

A student’s academic performance during the summer term or intersession will not affect his/her academic standing.

### Academic Dismissal

A student on academic probation who has not met the terms of probation will be subject to academic dismissal from the university for a minimum of one semester and a summer. A student whose term GPA falls below 1.0 or earns less than 6 credits may be dismissed without having been on academic probation the previous semester.

Students may direct inquiries about the dismissal process to the Academic Review Committee of their respective advising office. Students who intend to return to the university in a future semester are encouraged to work with their academic advisor to develop a plan for their time away.

When a student is dismissed from the university, several offices are notified, and there are important consequences, as follows:

- Registrar’s Office: cancels the student’s registration for the next semester, and authorizes a refund of tuition paid for that semester (in accordance with policy);
- Office of Student Financial Services: suspends financial aid and work-study aid to the student;
- Housing Office: cancels the student’s housing contract if the student is in university housing;
- Office of International Services: performs duties as required by U.S. federal regulations regarding persons not eligible to study at the university.

### Readmission after Academic Dismissal

The terms for readmitting a student who has been dismissed for academic reasons are established by the Academic Review Committee of their respective advising office.

Students are readmitted on academic probation and must meet those terms in their returning semester or face dismissal again.

Students who receive prior approval to complete courses at another college or university during the period of dismissal are subject to the university’s 12-credit limit on the number of transfer credits that can be applied toward graduation.

### Readmission Requests

To apply for readmission, a dismissed student must submit a written request to their respective advising office. The request should include an analysis of what went wrong during the preceding two semesters of enrollment, a description of activities while not in attendance, and an academic plan for completing all degree requirements. Supplemental materials such as transcripts of courses taken elsewhere, letters of reference from work or volunteer supervisor, and/or letters of support from a mental/physical health care provider may be required. Students are encouraged to contact their academic advisor prior to submitting a written request for readmission.

### Readmission and Financial Aid

Academic dismissal and financial aid suspension are two distinct actions and must be addressed separately. The Financial Aid Satisfactory Academic Progress (SAP) appeal process can be found online (https://finaid.jhu.edu/undergraduate-aid/applying-for-aid/undergraduate-sap). This appeal is in addition to the request for readmission to your advising office.

### Subsequent Academic Dismissals

A student who is dismissed a second time will be required to separate from the university for a minimum of one year. A third academic dismissal is permanent.

### Eligibility for Financial Aid

Degree-seeking students who are eligible to register are also eligible to apply for financial aid. Only U.S. citizens and eligible non-citizens (e.g., permanent residents) are eligible for Federal Title IV financial aid.

Students should be aware that JHU scholarship and grant funds are awarded for a maximum of eight semesters. Under some circumstances, a ninth semester may be awarded on appeal. Federal and state aid may be available for additional semesters.

Students are required to maintain full-time status by registering for at least 12 credits per semester. In rare circumstances, such as severe illness, a student may be permitted to register for less than 12 credits in a given semester. Even with this permission, less than full-time status may affect some types of financial aid.

### Satisfactory Academic Progress

Satisfactory Academic Progress (SAP) refers to minimum standards for grades and cumulative credits required to receive financial aid. The SAP policy is available at https://finaid.jhu.edu/undergraduate-aid/applying-for-aid/undergraduate-sap/.

### External Credit Policies

It is expected that the majority of credits applied towards degree requirements are earned by completion of courses taught at Johns Hopkins University by our faculty. We do recognize that some students may have other sources of college-level credit that could be applicable to some requirements. This section explains the conditions and restrictions regarding credits earned outside of JHU.

For full details about the application of external credits towards degree requirements, please see the Requirements for a Bachelor’s Degree (p. 7) and the Residency Requirement (p. 7).

### Exam Credit

The information below describes the requirements for students entering JHU in Fall 2018. Students who entered JHU prior to Fall 2018 should view the appropriate archived catalog (p. 1012).

### Advanced Placement Exams

To receive credit, Advanced Placement examinations must be taken prior to admission to the university.

If a student enters the university with credit from an Advanced Placement Exam and then takes an equivalent course for credit at the university, the...
credits from advanced placement (and lab class waiver, if applicable) will be disallowed. The credits and grade for the Hopkins course will appear on the academic record. The Advanced Placement Exam title also remains on the record, but the credit value is converted to zero. This policy also applies to IB credit, GCE credit, and credit from foreign exams.

* Macroeconomics: Students who score a 5 on the Macro AP exam are placed out of AS.180.101 Elements of Macroeconomics and receive University credit. However, it does not count as one of the ten courses required for the economics major (or one of the six courses required for the economics minor).

** Microeconomics: Students who score a 5 on the Micro AP exam, AND who pass a diagnostic test administered by Professor Hamilton will place out of AS.180.102 Elements of Microeconomics and receive University credit for it. However, it does not count as one of the ten courses required for the economics major (or one of the six courses for the economics minor). Interested students should make an appointment with Professor Hamilton.

*** Students who are awarded credit for AP Biology are exempt from taking the corresponding lab courses (AS.020.153 General Biology Laboratory I-AS.020.154 General Biology Lab II). The lab courses are waived but no credit is awarded. Students who have credit for AP Biology who take AS.020.151 General Biology I and/or AS.020.153 General Biology Laboratory I will lose the three credits for AS.020.151 General Biology I. Students who have credit for AP Biology who take AS.020.152 General Biology II and/or AS.020.154 General Biology Lab II will lose the three credits for AS.020.152 General Biology II.

**** Students who have credit for AP Chemistry but take either lab semester without the lecture course, will lose four AP credits for the corresponding lecture in addition to the lab. Students who take either lecture class without the lab will lose four AP credits for the corresponding lab in addition to the lecture. Effective fall 2014, students with AP Chemistry credits for AS.030.101 Introductory Chemistry I/AS.030.105 Introductory Chemistry Laboratory I may not take AS.030.102 Introductory Chemistry II/AS.030.106 Introductory Chemistry Laboratory II without taking AS.030.101 Introductory Chemistry I/AS.030.105 Introductory Chemistry Laboratory I at JHU (forfeiting four AP credits). Students with a score of 4 and therefore have credits only for AS.030.101 and AS.030.105 should take AS.030.103 in order to not lose AP credits. Alternatively, these students may start in AS.030.101 and AS.030.105, but will forfeit their AP credits. Students with a score of 5 and therefore have credits for AS.030.101/AS.030.105 and AS.030.102/AS.030.106 who take AS.030.103 Applied Chemical Equilibrium and Reactivity w/lab will lose four AP credits for AS.030.102 and AS.030.106. Alternatively, these students may start in AS.030.101/AS.030.105 and forfeit all 8 AP credits.

*****Students may receive credit for Calculus I via only one exam. Students who have AP Calculus I credits who take AS.110.106 Calculus I (Biology and Social Sciences) will lose four AP credits for AS.110.108 Calculus I. Students who have AP Calculus II credits who take AS.110.107 Calculus II (For Biological and Social Science) or AS.110.113 Honors Single Variable Calculus will lose four AP credits for AS.110.109 Calculus II (For Physical Sciences and Engineering).

******Students who are awarded credit for AP Physics are exempt from taking the corresponding lab courses (AS.173.111 General Physics Laboratory I and AS.173.112 General Physics Laboratory II). The lab courses are waived but no credit is awarded. Students who have credit for AP Physics who take AS.171.101 General Physics:Physical Science Major I or AS.171.103 General Physics I for Biological Science Majors or AS.171.107 General Physics for Physical Sciences Majors (AL) will lose four credits for AS.171.101 General Physics:Physical Science Major I. Students who have credit for AP Physics who take AS.171.102 General Physics: Physical Science Major II or AS.171.104 General Physics/Biology Majors II or AS.171.108 General Physics for Physical Science Majors (AL) will lose four credits for AS.171.102 General Physics: Physical Science Major II. Students who have AP Physics - Mechanics C credit who take EN.530.123 Introduction to Mechanics I will lose four credits for AS.171.101 General Physics:Physical Science Major I. Students who take AS.171.105 Classical Mechanics I or AS.171.106 Electricity and Magnetism I may retain their AP Physics credits.

^ The applicability of AP Computer Science exam credits to the computer programming requirement of a particular major is determined by the academic department responsible for that major.

The rules regarding credit forfeiture described in the Advanced Placement Exam section above also apply to IB exam credits.

**Foreign Certificate Exams**

Credit is awarded for grades of A or B on the British and Singapore General Certificate of Education A-Level courses in many of the subject areas included on the Advanced Placement exams and International Baccalaureate courses listed above. A grade of A in Physics on the GCE is awarded 8 credits. A grade of B is awarded 4 credits. AS and O levels are not accepted. Foreign certificate programs like the French Baccalaureate and the German Abitur are considered on a case-by-case basis. No foreign language credit is available for these exams. The rules regarding credit forfeiture described in the Advanced Placement Exam section above also apply to foreign exam credits.

**Exam Credits for Foreign Language**

Effective Fall 2015, the German and Romance Languages Department will not award any credit for Spanish AP/IB exams. French, German, and Italian will grant six credits for AP scores of 4 or 5 (IB Exams for 6 or 7) only after a student successfully completes two courses in that same language sequence at the intermediate level or higher. Visit http://e-catalog.jhu.edu/undergrad-students/academic-policies/registration-policies/#language for additional information.

**JHU Placement Exams**

Some departments may offer placement exams or other evaluations that allow a student to bypass lower-level content in that department, most commonly mathematics and foreign language. No credit is awarded for these departmental exams or evaluations as they are for placement purposes only. In some cases, a waiver of the bypassed course(s) may be noted on the student's academic record. No academic credit is awarded when a course is waived. Students should contact their respective academic advising office for additional information.

**Transfer Credit**

Students who entered JHU prior to Fall 2015 should view the appropriate archived catalog (http://e-catalog.jhu.edu/archive).

Registering for Courses at Other Colleges and Universities After Matriculation (p. 24)

Policies Unique to Students Admitted to JHU as Transfer Students (p. 25)

Description of Transferable Credit (p. 25)

Transfer of Writing Intensive Credits

**Transfer Credit Limits**

**Students admitted directly from high school**

Students who enter the university from high school may transfer up to 12 credits from approved courses taken at other institutions, whether taken before or after matriculation. The 12-credit limit on transfer credits does not include credit from Hopkins summer courses, Advanced Placement examinations, British General Certificate of Education courses, International Baccalaureate courses, or foreign certificate courses.

**Students admitted as transfer students**

Students who enter the university as transfer students into the Krieger School of Arts and Sciences may bring in up to 60 transfer credits towards a degree requiring 120 credits. Students earning degrees requiring more than 120 credits in both KSAS and WSE may bring in more than 60 credits; however at least 60 of the total degree credits must be earned in residence as a full-time student at JHU. See the Requirements for a Bachelors' Degree section in the catalog (p. 7) for additional residency requirements. All transfer students may transfer up to an additional 12 credits after matriculation. The 12-credit limit on transfer credits does not include credit from Hopkins summer courses, Advanced Placement examinations, British General Certificate of Education courses, International Baccalaureate courses, or foreign certificate courses.

**Transfer Credit Rules**

The following rules apply to both online courses and courses taken in a traditional classroom setting.

To be eligible for transfer credit, an approved course must be taken for a grade at an approved college and completed with a grade of C or better. In the United States, an approved institution is a 2-year or 4-year college or university that is accredited by one of the following regional accrediting agencies:

- Middle States Commission on Higher Education
- New England Association of Schools and Colleges, Commission on Institution of Higher Education
- North Central Association of Colleges and Schools, The Higher Learning Commission
- Northwest Commission on Colleges and Universities
- Southern Association of Colleges and Schools, Commission on Colleges
- Western Association of Schools and Colleges, Accrediting Commission for Community and Junior Colleges
- Western Association of Schools and Colleges, Accrediting Commission for Senior Colleges and Universities

Transfer credits from non-US academic institutions must be approved on a case-by-case basis by the academic advising offices in the respective schools. Non-US academic institutions must be degree-granting and recognized and authorized to issue academic records by the appropriate national (or regional) bodies in their home countries.
How the number of semester credits is determined
For courses offered in semester credits at the host institution, courses will be awarded the same number of semester credits at JHU. For example, if a Calculus I course is offered for 5 semester credits at another institution, it will be transferred to JHU as 5 credits, even though our parallel course is a 4-credit course. Credit for courses earned at a school using the quarter system will be converted to a comparable number of semester credits. One quarter credit is equivalent to 2/3 of a semester credit. Other unit systems will be converted to semester credits based on the transcript key provided by the host institution. If a key is not available, credits are evaluated such that one year of full-time coursework at the other school is considered proportional to one year of full-time coursework at JHU.

How transfer credits are posted on a JHU transcript
The following information is included for each course transferred to JHU:

- name of institution where course was taken
- course title
- JHU course equivalent (if any)
- credits awarded

The grades earned in these courses do not appear on the Hopkins record and therefore do not contribute to the grade point average.

Restriction on courses taken without a letter or numerical grade
Ungraded or pass/fail courses taken at another institution prior to matriculation at JHU, if approved, may receive credit if the host school states in writing that the mark represents a grade of C or better.

Restriction on transferring duplicate content
A transfer course will not be approved when the course content has significant overlap with other courses the student has already completed. Likewise, transfer students may not take courses at JHU with significant overlap with prior course content. In cases where a department requires a student to do this, the transfer credit will be zeroed out on the transcript.

Entering freshman with more than twelve transferable credits
Some students enter the university from high school with additional college coursework beyond the 12 credits that may be transferred. If these additional courses are equivalent to subjects that the university accepts for credit by Advanced Placement exams, and if the courses are needed to complete requirements for a major or prerequisites for higher level courses that the student will take at JHU, then students may request that the department waive the comparable courses at JHU. Waivers do not carry semester credits. Students must contact their respective academic advising office for detailed information about how to obtain a waiver.

Credits earned at JHU prior to matriculation, including the JHU Pre-College Summer Program
A student who takes JHU courses prior to matriculation as a degree-seeking student may receive credit for those courses completed with grades of C or better, but the grades are not included in the undergraduate record. Because these courses were taken at JHU, they are not subject to the 12-credit transfer rule. Credits earned through this program may be applied to the 100-credit JHU residency requirement (applicable to freshmen matriculating fall 2014 and later).

Credits earned at other JHU schools in the summer
Students should refer to this section (http://e-catalog.jhu.edu/undergrad-students/academic-policies/registration-policies/#specialsituationtext) of the catalog for details about the policies related to credits earned at other JHU schools in the summer.

Credits earned through study abroad
For the purposes of fulfilling the JHU residence requirements, Homewood-approved study abroad courses posted as HA.xxx.xxx or TR.xxx.xxx on the transcript are considered in-residence and are included in the 100 credit residency requirement for students who enrolled directly from high school as freshmen. Transfer students should refer to the residency requirements section (p. 7) for applicability of study abroad credits. Students participating in study abroad programs must meet university residence requirements, including the requirement that they be on Homewood campus during their final semester prior to graduation.

Students may transfer a full-year of credit from Homewood Abroad Courses (HA) or up to 30 credits from authorized Study Abroad Transfer Courses (TR) toward their Hopkins undergraduate degrees. Students may apply up to 12 additional transfer credits from pre-approved programs abroad, with a 42-credit transfer credit maximum from all study abroad (HA/TR) and domestic courses combined. Students on Homewood Abroad Courses (HA) will be held to the same course load guidelines that apply to course loads and over loads on the Homewood Campus.

Students may enroll in a combination of semester and/or summer/ intersession abroad programs, but students may not enroll in three consecutive fall/spring semesters abroad.

Transfer of credits from international institutions without pre-approval
Students who pursue coursework at an international institution without pre-approval may request these credits be transferred after completion. However, these credits will be reviewed and, if acceptable, will be processed as transfer credits, not study abroad credits. Therefore, these credits are subject to the 12 credit transfer maximum.

Deferred Admission
Students who have been accepted to the university may defer admission for up to two years with approval from the director of undergraduate admissions. Freshmen who have deferred admission begin their studies in the fall semester. The purpose of a deferral is to allow students to take time off in order to travel, work, or experience another culture. Deferrals are not granted for the purpose of studying at another institution. Students who wish to pursue academic studies during the deferment period may do so; however, the credits earned during the deferment period will not be applied toward the university’s degree requirements.

Special Note for Students on Disciplinary Suspension from Hopkins
While serving a disciplinary suspension, academic work completed at another institution will not be recognized for credit transfer to JHU.

Registering for Courses at Other Colleges and Universities After Matriculation
Students are required to seek pre-approval to transfer credits from courses completed at other institutions. A form for this purpose is available in the advising offices. Directions regarding appropriate signatures and required supplemental materials (typically a detailed course description and/or a course syllabus) are on the form. Courses must be taken for a letter grade and a grade of C or better is required.

In order to transfer credit for previously-approved summer work done elsewhere, students must arrange for an official transcript to be sent to the Office of the Registrar.
Courses at colleges and universities in the Baltimore Student Exchange Program (BSEP)
See Registering for Courses through BSEP (p. 16) in the Registration Policies section. BSEP does not operate during the summer session; courses taken at these institutions during the summer are considered transfer credit and are subject to the same rules and limits as courses from other colleges and universities.

Concurrent registration at JHU and another institution
Students may take courses at another institution when registered at JHU and have these courses transfer to JHU only if permission is granted before registering for the courses at another institution. During the fall and spring semesters, students must be registered at JHU for a minimum of 12 credits and the addition of courses at another institution may not exceed our maximum credit limit for the term. During summer term, the total credits across institutions may not exceed the 14 credit maximum. During intersession term, the total credits across institutions may not exceed the 3 credit maximum.

Policies Unique to Students Admitted to JHU as Transfer Students
• Transfer students who completed Advanced Placement or other exams during high school are subject to the same policies as students admitted directly from high school as of the term they matriculate at JHU. We do not transfer exam credits directly from another college or university transcript.
• Students who transfer from the Peabody Conservatory will be granted full credit for performance courses in their major instrument. For performance courses in other instruments, only one credit per semester will be awarded.

Description of Transferable Credit
In order to be transferable, a course does not have to match a currently existing JHU course; however, courses should cover topics that are broadly defined as part of the curriculum at Hopkins. For example, we do not regularly teach a course about horror films. However, since this is a film studies course and we have a major in film and media studies, it's likely that this course would be eligible for transfer. A course can be transferred as either (1) a direct equivalent to one of our courses or (2) a generic course affiliated with a field of study. A course with an identical name at another institution is not necessarily going to transfer as directly equivalent to the course with the same title at JHU.

A maximum of 6 credits may be granted for courses which are in curriculum areas not covered by the fields of study in the School of Arts and Sciences and the School of Engineering.

Additional Details About Course Eligibility for Transfer:
Section One (p. 25): Common courses not accepted for transfer credit
Section Two (p. 25): Common courses with restrictions for transfer credit
Section Three: (p. 26) Non-domestic studies
Section Four (p. 26): Transferring writing-intensive courses

Section One: Common courses that will not be accepted for transfer credit:
Physical Education or Personal Health and Wellness Courses are not accepted.

• However, a maximum of 6 credits in the fields of nutrition, dietetics, or kinesiology if these courses were part of a curriculum leading to a college degree in the subject.

Study Skills or Career Development Courses are not accepted.
• However, courses that are in-depth studies of career paths within a field of study may be considered. Psychology courses in career counseling or learning theory may be accepted.

Math Courses Below the Pre-Calculus Level are not accepted.
• However, we do accept most introductory statistics courses. We will accept one course designed to review all necessary background for the study of calculus and to introduce the concept of the rate of change of a function.

Theology Courses are not accepted.
• However, we will consider comparative religion courses or other religion courses that study religion from an academic viewpoint.

Developmental English, English Grammar, or English as a Second Language Courses are not accepted.
• However, we do typically transfer "freshman composition" courses.

Independent Study, Research, or Internship Credits are not accepted
• However, hybrid courses that include lectures and graded assignments along with practical experiences are reviewed individually.

Trade Skill Courses are not accepted.
• Trade skills courses are defined as being part of an educational program leading to a specific trade such as (but not limited to) automotive repair, culinary arts, day care provider, or airplane pilot.

Computer Software Courses are not accepted.
• However, courses that teach some use of software, Internet design and security, basic programming in html or Java, computer aided-design or introduce field-specific software programs may be considered.

Section Two: Common courses with restrictions for transfer credit

Chemistry
General Chemistry courses intended to serve as a one year sequence for students in the sciences are transferrable. However, because of the variability of these courses, it is often not possible to transfer just one semester of two-semester sequences (or one or two quarters). Syllabi review is required to transfer these courses. Rudimentary introductory chemistry courses intended to prepare students for a year of general chemistry are not transferrable. One-semester chemistry courses intended for non-science majors designed to fulfill general education requirements for non-science student may transfer.

Organic Chemistry Lab
JHU offers a one-semester, three-credit course (AS.030.225 or AS.030.227) that is recognized by medical schools as being equivalent to other institutions' typical year-long introductory organic lab courses that are frequently 1 credit each. To transfer these lab courses from other institutions, students must take both semesters at the other institution,
as one semester alone is not transferable. If the course lecture and lab are taught as a single course unit at the other institution, students must take the full year-long sequence of the course lecture and lab in order to transfer the courses to JHU. Our course AS.030.228 is an intermediate level organic chemistry laboratory course intended for only chemistry majors and typically goes beyond other institutions’ expectations of students from introductory organic chemistry lab.

Physics

General physics courses, typically covering the topics of mechanics, heat, sound, electricity and magnetism, optics, and modern physics intended to serve as one year of physics study for students in the sciences, may be transferred if the course was taught using the principles of calculus. Those courses that do not require calculus knowledge will not transfer. Rudimentary introductory physics courses intended to prepare students for a year of general physics will not transfer. Introductory one-semester physics or astronomy courses intended for non-science majors, for example those offered to help students fulfill general education requirements, may be transferred.

Finance

We accept transfer credits for corporate finance courses that may include, but are not limited to, understanding the design and functioning of financial markets or modeling financial forecasting and decision making. We do not transfer credit for personal finance courses designed to teach the individual consumer about topics such as money management, budgeting, home mortgages, personal tax, individual insurance, or investing.

Graphic Design

In order to be considered for transfer, graphic design courses must be taught as part of the required curriculum for a major leading to a degree at the offering institution and the course content must include design theory and practices. These carry no area designation. Courses that focus solely on software usage will not transfer.

Website Design

In order to be considered for transfer, website design courses must be taught as part of the required curriculum for a major leading to a degree at the offering institution and the course content must include some programming components. Courses that solely focus on usage of productivity software such as word processing, spreadsheet, presentation, database, graphics editing, accounting, statistical processing, or webpage creation will not transfer.

Internet/Social Media

Marketing courses that discuss the effective use of social media concepts and tools, search engine optimization (SEO) or other analytical market analysis techniques, and content creation and management strategies for marketing campaigns will be considered. However, courses teaching effective use of the internet for personal research or educating the lay person about its structural design or usage of social media will not transfer.

Medical Terminology

In order to transfer a course teaching medical terminology, the course must have: 1) an emphasis on etymology from Latin and Greek (as opposed to just learning word parts per se; i.e. the course has to have some direct and explicit treatment of the ancient languages) and 2) a significant historical/cultural component, involving study of the history of medicine (including at least some ancient material).

American Sign Language

If offered for degree credit at the host institution, courses in American Sign Language may transfer. It is at the discretion of a department if the language may be used to fulfill the foreign language requirements of a major or minor.

College/University Orientation

Credit-bearing courses designed to promote student success may be considered for transfer. Courses should include topics such as: learning strategies, study techniques, career readiness, academic planning, and how to engage in the academic/campus community. Courses focused only on campus-specific topics will not transfer.

Section Three: Non-domestic studies

For those attending programs leading to the medical profession

In several countries around the world, students enter higher education programs that lead to a medical degree without the completion of the United States equivalent to a bachelor’s degree. We do not transfer credits from these types of programs.

US citizens who studied abroad prior to acceptance as a transfer student to JHU

Like our international students who studied internationally before transferring to Johns Hopkins, courses taken abroad by US citizens either through study abroad programs or direct matriculation at international institutions will be processed as transfer credits, not as study abroad credits. A transcript from the originating institution will be required.

Composition courses not taught in English

Courses taught in a language other than English that mimic the typical “freshman composition” or “expository writing” courses found in the United States will transfer. These courses will be reviewed for transfer credit as potential courses in our English Department (home of our Expository Writing Program), not as foreign language courses. They may not be used to meet the JHU writing-intensive requirement.

Current JHU students studying internationally in their home country

Please see study abroad eligibility restrictions (p. 28) for limitations during the academic year.

During the summer, courses may be taken in a student’s home country or country of citizenship. Students follow the procedures for pre-approval (p. 24) of transfer credits. Such courses are subject to the 12-credit transfer rule.

Courses unique to China

We do not transfer three commonly required courses: Introduction to Mao Zedong Thoughts, Ideological and Moral Cultivation and Fundamentals of Law, and Principles of Marxism.

Section Four: Details about transferring writing-intensive credit

Students may transfer up to 6 credits of writing-intensive credit for a course(s) under these conditions:
1. The course must meet University criteria ([http://krieger.jhu.edu/ewp/writing-requirement](http://krieger.jhu.edu/ewp/writing-requirement)) for a writing intensive course.
2. Students must take the course during the regular academic year, in either fall or spring semester (there is no writing-intensive transfer credit for summer courses).
3. Students must have a grade of B or higher in the course.

Except for courses completed in a study abroad program, review of transfer courses for writing intensive credit is conducted in the student’s respective academic advising office. Study abroad courses are handled by Patricia Kain, Director of the Expository Writing Program. To arrange a meeting, she may be emailed at kain@jhu.edu.

Students who wish to have a course evaluated for writing intensive credit, should:

- Confirm that their respective academic advising office has an official transcript for the course.
- Gather the necessary materials to apply for transfer of W credit. These materials include a syllabus for the course, a course description from the catalog or official website, and copies of the papers you wrote for the course. If you have the original papers with the instructor's notes, bring them. All materials must be printed; they will not be reviewed electronically.
- Schedule a 30 minute meeting in advance with the appropriate academic advisor.
  - Arts and Sciences incoming freshmen meet with either Ami Cox or Kathie Sインド。
  - Arts and Sciences incoming transfer students meet either Ami Cox or Kathie Sインド (students should schedule with the advisor who is NOT their assigned academic advisor).
  - Engineering incoming freshmen meet with their assigned academic advisor, either Linda Moulton or Denise Shipley.
  - Engineering incoming transfer students meet with Linda Moulton.

**Study Abroad Policies**

The Johns Hopkins University views international education as an integral component of its academic mission. Not only does the university actively encourage enrollment of a diverse international and multicultural student body, but it strives to provide students with educational opportunities throughout the world. More than 33% of Johns Hopkins undergraduates study abroad.

For undergraduates in the Krieger School of Arts and Sciences, and the Whiting School of Engineering, Johns Hopkins offers a wide variety of international opportunities including departmentally sponsored intersession and summer programs, semester-based programs, and full-year programs at major universities in the United Kingdom, Australia, New Zealand, Europe, Africa, Latin America, Asia and the Middle East.

Johns Hopkins accepts credit for coursework taken abroad toward major and minor requirements, as well as toward graduation requirements. Most students who study abroad graduate on time. What is more, upon successful completion of a program abroad, students may choose to build upon their international experience in graduate or professional school. The advisors in Pre-Professional Advising, and the Career Center, work with Hopkins students to maximize the benefits of a program abroad.

Visit [https://studyabroad.jhu.edu/](https://studyabroad.jhu.edu/) or call (410) 516-7856 for more information.

**Study Abroad Programs**

Hopkins offers students three options for study abroad: departmental programs, direct enrollment programs, and approved/vetted third-party provider programs. Programs managed by Hopkins or third-party providers offer the highest level of on-site support. Exchange programs and direct enrollment are well suited to more independent students who prefer greater autonomy while abroad. We encourage students to consider their personal background and comfort levels when choosing a study abroad option.

**Johns Hopkins Departmental Programs**

Many academic departments sponsor study abroad programs that directly support major and minor requirements. Whenever possible, qualified students in these majors are encouraged to participate in departmental programs. Credit is approved, and may be applied toward major and minor requirements in the sponsoring departments. Hopkins departmental programs may vary with regard to the level of support that students receive while abroad. In many cases grades in Homewood Abroad (HA) courses from these programs will post on students’ Hopkins transcript and be included in students’ Hopkins grade point average.

Johns Hopkins Departmental Programs include the following categories:

- Semester and year programs managed by Hopkins or external organizations
- Johns Hopkins exchange programs
- Johns Hopkins Summer Programs Abroad
- Johns Hopkins Intersession Programs Abroad

**Direct Enrollment in a University Abroad**

Students may enroll in colleges and/or universities abroad after consulting with a Study Abroad Advisor. Students apply as visiting, non-degree students, and take regularly scheduled classes with national and international students.

Major/minor credits must be pre-approved by the Hopkins Director of Undergraduate Studies (DUS) for students’ majors and/or minors prior to participation. In most cases grades from Transfer (TR) courses from these program(s) will not post on the Hopkins transcript or be included in the Hopkins grade point average. Transcripts with grades from a U.S.-accredited School of Record will generally be available through a sponsoring institution if the direct enrollment was facilitated by an approved third-party provider.

**Approved/Vetted Third-Party Provider Programs**

The Office of Study Abroad and the Faculty Advisory Committee have vetted specialized programs that offer courses in specific areas, disciplines, or locations where direct enrollment may not be feasible. Sponsored by third-party providers, these specialized programs provide study abroad opportunities for language acquisition, field experience, research opportunities, and disciplinary courses often in less common locations.

Major/minor credits must be pre-approved by the Hopkins Director of Undergraduate Studies (DUS) for students’ majors or minors prior to participation. Third-party providers offer additional support services, including assistance with applications, housing, registration, visas, and on-site support. In most cases grades from Transfer (TR) courses from these program(s) will not post on students’ Hopkins transcript or be included in Hopkins grade point averages. Transcripts with grades from
The program specific eligibility requirements might include:

- Language proficiency requirements: students must demonstrate language proficiency at the college level, either through courses taken at a U.S. college or university, AP credit, or university administered placement exams.
- Course prerequisites: students must have met course prerequisites, as determined by the host institution, in order to register for classes abroad.

Credit and Residency Requirements for Study Abroad

For the purposes of fulfilling university residency requirements, up to 30 credits from study abroad courses are considered “in-residence” and may be included in the 100-credit JHU residency requirement. A student may be awarded a full-year of credit from Homewood Abroad (HA) courses, or up to 30 credits from study abroad courses taken through direct enrollment or vetted programs, toward their undergraduate degree.

Students may transfer a full-year of credit from Homewood Abroad Courses (HA) or up to 30 credits from authorized Study Abroad Transfer Courses (TR) toward their Hopkins undergraduate degrees. Students may apply up to 12 additional transfer credits from pre-approved programs abroad, with a 42-credit transfer credit maximum from all study abroad (HA/TR) and domestic courses combined. Students on Homewood Abroad Courses (HA) will be held to the same course load guidelines that apply to course loads and over loads on the Homewood Campus.

Students may enroll in study abroad in a combination of semester and/or summer/intersession abroad programs, but students may not enroll in three consecutive fall/spring semesters abroad.

Students may participate in summer and intersession programs abroad any term after matriculation.

Students must have completed at least three semesters of coursework on the Homewood campus prior to enrolling in a semester/academic year program abroad. This means a student may study abroad for a semester, or academic year, beginning with the second semester of their sophomore year through the fall semester of their senior year. An exception to this policy is the Hopkins Oxford St. Anne’s College program which offers a full year abroad for sophomore students.

Study Abroad in Home Country/Country of Citizenship

International students are encouraged to take full advantage of study abroad opportunities by pursuing studies outside the United States and their home countries. Johns Hopkins will not approve study abroad at locations where students have completed secondary education or where they have lived and/or worked within eight years of matriculation at Johns Hopkins. Students who wish to take courses at universities in their home countries will be asked to petition the Faculty Advisory Committee for Study Abroad. Students must present a strong academic rationale for the program.

Academic Policies

Matriculation Status

All students on study abroad programs who have completed the mandatory procedures established by Johns Hopkins prior to departure remain enrolled as full-time, matriculated students. This official status is recorded as off-campus matriculated.

Credits Required for a Semester/Academic Year Abroad
Students are required to enroll in the equivalent of 15 credits per semester while abroad. Students who wish to take fewer than 15 credits, or more than 18 credits, a semester must obtain written permission from the Director of the Office of Study Abroad.

Credit for Courses Taken Abroad

Students may earn up to 30 credits for study abroad from any combination of academic terms — semester, academic year, summer, and intersession.

Students may transfer a full-year of credit from Homewood Abroad Courses (HA) or up to 30 credits from authorized Study Abroad Transfer Courses (TR) toward their Hopkins undergraduate degrees. Students may apply up to 12 additional transfer credits from pre-approved programs abroad, with a 42-credit transfer credit maximum from all study abroad (HA/TR) and domestic courses combined.

As part of the Hopkins application process, students are required to have pre-approval for transfer of credit for all overseas course work prior to studying abroad. Pre-approval of transfer credits toward major and/or minor requirements is granted by the Director of Undergraduate Studies (DUS) in the student’s academic department(s). Pre-approval of transfer credit toward distribution requirements is granted by the Director of Study Abroad. Final approval of credit and transfer of courses occurs after students have returned to Hopkins.

Courses must be completed with a grade equivalent of C or better to be eligible for transfer of credit toward a Hopkins degree. Transcripts from the program abroad should be sent to the Director of the Office of Study Abroad for credit evaluation and transfer of credit. The Director will contact the students when their official program transcript has been received.

Students should remember to save electronic copies of syllabi, course descriptions, reading lists, assignments, papers, and examinations. Students will need to submit these to the Director of Study Abroad and/or the DUS for their major(s) and/or minor(s) in order to complete the credit evaluation, and the transfer of credit.

Transfer of Credits from International Institutions without Pre-Approval

Students who pursue coursework at an international institution without pre-approval may request these credits be transferred after completion. However, these credits will be reviewed and, if acceptable, will be processed as transfer credits, not study abroad credits. Therefore, these credits are subject to the 12 credit transfer maximum.

Grades and Transcripts

Courses taken at overseas programs are entered onto the official Hopkins transcript along with the name of the host school and location of the study abroad program.

Grades from most Hopkins Departmental Programs (Hopkins Departmentally Sponsored Semester and Year Programs, Hopkins Summer Abroad and Hopkins Intersession Abroad) are posted on the JHU transcript, and are calculated into students’ term and cumulative GPAs. These courses will appear on the Hopkins transcript as AS/EN/HA courses with Hopkins course numbers (e.g. HA.100.320 – History of China).

All students on Hopkins Approved Programs (Vetted Programs and Direct Enrollment) must take courses abroad for a grade. Students will not receive credit for pass/fail courses taken abroad. Students must receive the equivalent of a C or higher in order to receive Hopkins transfer credit.

Grades from Hopkins Approved Programs do not appear on the Hopkins transcript, and will not be calculated into JHU GPAs. These courses will appear on students’ transcripts as TR courses (e.g. TR.100.300 – History of China). Students’ transcripts reflect how credits earned abroad have been awarded toward their Hopkins degree.

Housing Policy

Johns Hopkins University vets and approves study abroad programs based on academic quality, cultural immersion, and health/safety practices. Housing is an integral aspect of the abroad experience in that it promotes language and communication skills and provides opportunities for personal growth. In addition, housing organized by program sponsors provides an additional layer of safety and security.

For these reasons, JHU requires the use of program-established housing in home stays, residences, dormitories, or program-provided apartments by all Hopkins students on approved study abroad programs. Furthermore, JHU strongly encourages students to participate in a home stay experience if that option is available. Students who want to make independent housing arrangements should set up an appointment to meet with the Director of Study Abroad to discuss options and petition for approval.

Study Abroad at Locations Under Department of State/WHO/CDC Travel Warning

Travel Warnings are issued by the United States Department of State to describe long-term, protracted conditions that make a country dangerous or unstable. A Travel Warning is also issued when the U.S. Government’s ability to assist American citizens is constrained due to the closure of an embassy or consulate or because of a drawdown of its staff. The WHO and CDC post travel warnings and alerts in the event of public health crises.

JHU does not permit undergraduates to study abroad in locations with travel warnings. Despite this warning, if a student believes he or she has a sound academic reason to study at a chosen site, the student may file a petition for individual exemption in order to have their course work recognized for academic credit at Johns Hopkins.

Financial Structure of Study Abroad

Departmental Programs (semester/academic year)

Students studying abroad in semester and/or year JHU departmental or exchange programs are charged Hopkins tuition. In most cases, an additional fee is assessed to cover services that might include housing, international health insurance, emergency services, and logistical and academic support. Students are billed through the Hopkins Student Accounts Office.

Departmental Programs (intersession/summer)

Students studying abroad in a Hopkins departmental summer or intersession program are charged the program fee and billed through Hopkins. Fees vary by program, with some including charges for services such as airfare and/or meals.

Direct Matriculation and Vetted Programs (semester/intersession/summer)

Students who study abroad through an external program (direct enrollment at a university abroad or approved provider) are charged the cost of their program as established by the host university or provider, and a study abroad and application fee equivalent to 12% of JHU tuition.

Grades from Hopkins Approved Programs do not appear on the Hopkins transcript, and will not be calculated into JHU GPAs. These courses will appear on students’ transcripts as TR courses (e.g. TR.100.300 – History of China). Students’ transcripts reflect how credits earned abroad have been awarded toward their Hopkins degree.

Housing Policy

Johns Hopkins University vets and approves study abroad programs based on academic quality, cultural immersion, and health/safety practices. Housing is an integral aspect of the abroad experience in that it promotes language and communication skills and provides opportunities for personal growth. In addition, housing organized by program sponsors provides an additional layer of safety and security.

For these reasons, JHU requires the use of program-established housing in home stays, residences, dormitories, or program-provided apartments by all Hopkins students on approved study abroad programs. Furthermore, JHU strongly encourages students to participate in a home stay experience if that option is available. Students who want to make independent housing arrangements should set up an appointment to meet with the Director of Study Abroad to discuss options and petition for approval.

Study Abroad at Locations Under Department of State/WHO/CDC Travel Warning

Travel Warnings are issued by the United States Department of State to describe long-term, protracted conditions that make a country dangerous or unstable. A Travel Warning is also issued when the U.S. Government’s ability to assist American citizens is constrained due to the closure of an embassy or consulate or because of a drawdown of its staff. The WHO and CDC post travel warnings and alerts in the event of public health crises.

JHU does not permit undergraduates to study abroad in locations with travel warnings. Despite this warning, if a student believes he or she has a sound academic reason to study at a chosen site, the student may file a petition for individual exemption in order to have their course work recognized for academic credit at Johns Hopkins.

Financial Structure of Study Abroad

Departmental Programs (semester/academic year)

Students studying abroad in semester and/or year JHU departmental or exchange programs are charged Hopkins tuition. In most cases, an additional fee is assessed to cover services that might include housing, international health insurance, emergency services, and logistical and academic support. Students are billed through the Hopkins Student Accounts Office.

Departmental Programs (intersession/summer)

Students studying abroad in a Hopkins departmental summer or intersession program are charged the program fee and billed through Hopkins. Fees vary by program, with some including charges for services such as airfare and/or meals.

Direct Matriculation and Vetted Programs (semester/intersession/summer)

Students who study abroad through an external program (direct enrollment at a university abroad or approved provider) are charged the cost of their program as established by the host university or provider, and a study abroad and application fee equivalent to 12% of JHU tuition.
JHU is responsible for making direct payments to host universities and providers on behalf of students. Fees will be posted to a student's Hopkins SIS account by the Homewood Student Accounts Office.

**Additional Costs Associated with Any Program Type**

Students are responsible for all additional costs that are not included in mandatory fees. Additional costs may include: housing, airfare, personal expenses, meals, visas, and other incidental expenses. Some programs may include costs for many of these services as part of their mandatory fees. In those cases Hopkins will include those fees when making direct payment to the provider on behalf of students.

**Billing**

Study Abroad fees will be assessed to students' SIS accounts by the Homewood Student Accounts Office.

The Homewood Student Accounts Office posts charges in SIS on or about July 1 for the fall semester, December 1 for intersession, December 1 for the spring semester, and April 1 for summer. Payment arrangements may be made through the Homewood Student Accounts Office.

The Office of Study Abroad creates a program financial budget worksheet for each student which reflects the estimated cost of attendance for his or her program, and details which fees will be posted on student's JHU account. The financial budget worksheet should be used to assist students and their parents in calculating expenses (the cost of attendance) associated with an academic program abroad. In addition, the Office of Study Abroad provides sample financial worksheets for programs commonly attended by Hopkins students.

**Financial Aid**

Johns Hopkins extends portability of federal, state and institutional financial aid to Johns Hopkins Departmental Study Abroad Programs, Approved Study Abroad Provider Programs, and to Direct Enrollment in a University Abroad for the fall semester, spring semester or academic year.

Financial aid, including institutional aid may be applied toward the cost of these programs.

For the semester study abroad, the JHU Grant will not increase, even if the study abroad cost is greater than the cost to attend Hopkins. However, the JHU Grant for the semester study abroad may decrease if the study abroad cost is less than the cost of attendance at Hopkins. Students' financial aid will be credited to their student accounts.

Only loan assistance can cover additional expenses. In most cases, financial aid does not apply for summer and intersession programs. Students may be eligible for external study abroad scholarships.

**Refund Policy**

Students with credit balances may request a refund. Refund requests cannot be processed any earlier than 10 days prior to JHU's first day of classes for each semester. Refund information is available at https://studentaffairs.jhu.edu/student-accounts/refunds/.

Students should consider study abroad options carefully prior to making a commitment. Students who withdraw from a study abroad program after having submitted their program acceptance form(s) or Hopkins acceptance form(s), are responsible for all non-recoverable costs associated with their program. After receipt of a final billing statement from the student's program, Hopkins will refund recoverable expenses, excluding non-refundable deposits. Recoverable expenses are determined by the program provider in consultation with JHU. If for any reason study abroad plans change, the Office of Study Abroad should be contacted immediately so that the financial impact of the voluntary withdrawal can be determined.

Students involuntarily withdrawn or dismissed from a program for cause will receive no refund, may not be eligible for credit for coursework completed on the program abroad and are responsible for any costs incurred by early dismissal.

Should Hopkins cancel or suspend a study abroad program, we will work with students to either refund recoverable costs or apply fees toward alternate academic programs.

**Conduct and Ethics**

**Conduct**

Students are responsible for their own actions, activities and behavior while participating on a program abroad. Serious consideration of health and personal circumstances should be taken in to account by students when applying for or accepting a place on a program abroad.

Students are obligated to be aware of and comply with local laws and customs while abroad. Respect of local customs includes the conscious awareness of cultural attitudes toward alcohol use and sexual behavior. As representatives of JHU in other countries, we ask that students behave in a manner that is respectful of the rights and well-being of others.

Conduct considered unacceptable to Johns Hopkins University includes, but is not limited to, excessive consumption of alcohol; loud and/or abusive behavior; sexual harassment; criminal conduct of any kind, including the purchase, sale, possession or use of drugs other than prescribed medication for legal medicinal purposes. Students’ must notify JHU Office of Study Abroad of any disciplinary or legal issues while abroad.

Students participating in programs abroad are expected to adhere to the Johns Hopkins University Undergraduate Student Code of Conduct (https://studentaffairs.jhu.edu/policies-guidelines/student-code), the policies of the program abroad and the terms set forth in the Study Abroad Conditions of Participation agreement.

**Violations of the Code of Conduct, Conditions of Participation and Program Policies**

Students who are alleged to have violated the Hopkins Undergraduate Student Conduct Code, the policies of the program, and/or standards of academic integrity while abroad will be reported to the program director, and the JHU Director for Study Abroad. If a violation is determined to have occurred, the program director in collaboration with the JHU Director for Study Abroad will take appropriate disciplinary action, which may include immediate dismissal from the program.

A student dismissed from a program for cause will receive no refund, may not be eligible for credit for coursework completed on the program abroad, and is responsible for any costs incurred by early dismissal.

Students must maintain both academic and disciplinary eligibility through the designated start of their study abroad program. Students’ academic and disciplinary records may be reviewed prior to departure. If records indicate a significant decline in GPA, if a cumulative or term GPA falls below JHU or program requirements, and/or if academic and/or disciplinary sanctions are imposed prior to departure, a student may be involuntarily withdrawn from an approved study abroad program.
**Academic Ethics**

All study abroad students are bound by the Johns Hopkins University Code of Academic Ethics both during the application process and while abroad. Students are obliged to refrain from acts which they know, or under circumstances have reason to know, violate the academic integrity of the University. Violations of academic ethics include, but are not limited to: cheating; plagiarism; submitting the same or substantially similar work to satisfy the requirements of more than one course without permission; submitting as one’s own the same or substantially similar work of another; knowingly furnishing false information to any agent of the University for inclusion in academic records; falsification, forgery, alteration, destruction or misuse of official University documents or seal. All students must sign a Conditions of Participation agreement to adhere to this policy as part of the application process.

**Institutional Research Board (IRB)**

Students participating in or conducting research abroad must complete the Hopkins IRB process in addition to any institutional review that may be required by the host institution. Failure to comply is a serious breach of research ethics. Students who fail to receive appropriate HIRB review of their research will not be able to use the research or data for projects, theses, courses or requirements at Johns Hopkins.

**Graduation Policies**

**Applying to Graduate**

Students who intend to graduate in the next academic year must complete an Application for Graduation as directed by their respective academic advising office. The university confers degrees three times per year and there is one annual commencement ceremony in May.

**Graduating in May**

Most students who enter the university directly from high school graduate in May, after eight semesters of full-time enrollment. Full-time enrollment is a minimum of 12 credits. Part-time enrollment is not permitted within a student's first eight semesters. Students are required to have full-time status in the semester immediately prior to graduation, and must therefore be enrolled for at least 12 credits in the final semester even if all course and credit requirements could be met with fewer than 12 credits.

**Graduating in August**

A small number of students complete their degree during the summer. Students who have completed eight full-time semesters may graduate in the summer if all degree requirements have been satisfied by the degree conferral date (last Friday in August preceding the start of fall semester classes). Students who have not completed eight full-time semesters should see the Graduating Early (p. 31) policies.

**Graduating in December**

A small number of students complete their degree at the end of the fall semester, which does not include Intersession. Students may graduate in December if all degree requirements have been satisfied by the degree conferral date (December 30th or the preceding Friday if the 30th falls on a weekend). Students are required to maintain full-time status, enrolled for at least 12 credits in their final semester, unless they are in their ninth semester or later.

**Note for students who entered as transfer students**

Transfer students are not subject to the eight semester full-time restrictions as listed above. Transfer students must complete at least four full-time semesters at JHU before they are eligible to graduate.

**Completing Graduation Requirements**

Students are responsible for completing the requirements for a bachelor’s degree as indicated at [http://e-catalog.jhu.edu/undergrad-students/academic-policies/requirements-for-a-bachelors-degree/](http://e-catalog.jhu.edu/undergrad-students/academic-policies/requirements-for-a-bachelors-degree/). All grades and credits for courses that are required for graduation must be submitted in time to clear students for graduation.

Each student expecting to graduate will receive a final bill from the university. It is university policy that all outstanding accounts must be paid in full before a student’s diploma may be released.

Students who have not completed degree requirements after eight full-time semesters (or four full-time semesters for transfer students) in college may register for less than 12 credits, and pay for courses on a per credit basis. With approval of the director of the student’s respective academic advising office and the major department (in the case of courses required for the major), these students may take courses elsewhere to meet the remaining graduation requirements, but must observe the 12 credit limit on transfer credit. These students also may have part-time status in the semester when they graduate. If applicable, students should consult with the Office of Financial Aid prior to part-time enrollment. Part-time undergraduate students are not eligible for coverage if enrolled through JHU’s Student Health Benefits.

Graduating students who are taking courses through the Baltimore Student Exchange Program or in other divisions of the university must make arrangements with their instructors on the first day of class to have final grades submitted to the host registrar and then to the Homewood Registrar by the Homewood deadline for submitting grades for graduating students. If such an arrangement cannot be made, students should not remain enrolled in the course.

Students who graduate in December may remain in university housing and/or continue to participate in student organizations only if they enroll for a minimum of 6 credits during the following spring semester. A student will not be graduated with unresolved outstanding charges of misconduct or academic ethics violations.

The university does not guarantee the award of a degree. The award of degrees is conditional upon (1) satisfaction of all degree and instructional requirements in effect at the time of matriculation as a degree-seeking student (as published in the relevant annual catalog), (2) compliance with the current university and divisional regulations, and (3) performance meeting the bona fide expectations of the faculty.

No member of the faculty is obliged to provide students or graduates with an evaluation or letter of recommendation which does not accurately reflect the faculty member’s true opinion and evaluation of the student’s academic performance and conduct.

**Graduating Early (less than 8 semesters)**

Students are eligible to graduate early at the end of the fall or spring semester if they have completed all requirements for graduation, including the residency requirement (p. 7). Students graduating early may not use intersession as a final term to complete remaining graduation requirements. Students may not graduate early during the summer except in the circumstances described below.
Students have at most two incomplete grades in spring semester required courses, or

- Student has one incomplete grade in a spring semester required course and needs one required course in the summer, or

- Student needs one required course in the summer.

These students must meet with their respective academic advising office prior to the May commencement ceremony to file an August conferral plan. This plan requires proof of summer course registration, if applicable.

**Incomplete Grades and Graduation Status**

Students with incomplete grades or missing grades in required courses at the date of conferral will not graduate.

Students who have completed at least eight full-time semesters and have met the residency requirement and who receive one or more incomplete grades in their last semester in attendance, may complete those incomplete grades and are not required to register for additional coursework unless required for their degree.

Students who have completed less than eight full-time semesters and:

- who receive one or two incomplete grades in required course(s) during their intended last spring semester should review the Graduating Early (p. 31) policies.
- who receive three or more incomplete grades during their intended last spring semester are required to register for another full-time fall semester (at least 12 credits) in order to complete all degree requirements, including the residency requirement.
- who receive incomplete grades in required course(s) during their intended last fall semester must resolve these incomplete grades no later than the December degree conferral date or register for another full-time spring semester (at least 12 credits) in order to complete all degree requirements, including the residency requirement.

**Last Semester Option**

In their last semester before graduation, students may request that they be excused from taking the final examination in one or more courses. This option is solely at the discretion of the course instructor. This option is not available to students who are graduating early.

**S/U Option in the Last Semester**

Students in their final semester, who will have completed at least eight full-time semesters in college when they graduate and who are taking more credits than are needed to complete graduation requirements, may take one or more of the extra courses for S/U credit. Engineering students must have the faculty advisor’s permission, indicated by his/her signature on an add/drop form, to request this option. The faculty advisor’s signature indicates that the student will have completed all degree requirements without this course. In addition, a signature from the Engineering advising office is needed to confirm that the senior has applied for graduation in their eighth (or later) semester. Arts & Sciences students must seek approval from the Academic Advising Office.

**Independent Work in the Last Semester**

Students in their final semester, who will have completed at least eight full-time semesters in college when they graduate and who are taking more credits than are needed to complete graduation requirements, may take up to 6 credits of independent academic work, either graded or S/U. In addition, the usual limit of no more than 6 credits per year of independent academic work will be waived if the additional credits are for extra credit work done in the final semester.

**Graduation Closes the Undergraduate Record**

Upon graduation, the undergraduate record is closed. The only permitted changes are the resolution of incomplete grades, missing grades, and grade errors. These changes must be resolved by the first Monday after 30 days have lapsed since the degree conferral date. Students wishing to take additional courses at JHU after graduation should refer to Alumni Enrollment (p. 11) policies.

**General and Departmental Honors at Conferral**

Students may receive general honors, departmental honors, or both at conferral. General Honors are awarded to students with cumulative grade point averages of 3.50 or better. The final determination is made after all grades have been reported. Departments set their own standards for the award of Departmental Honors. Students should consult with the Director of Undergraduate Studies for their major about the requirements for honors.

General and Departmental Honors are noted on a student’s academic record following the student’s last undergraduate semester before conferral. In addition, honors are noted in the Commencement program. However, because the program is printed several weeks before the date of Commencement, not all honors are announced in time for inclusion in the program.

**Completing an Honors Thesis**

Students who are completing an honors thesis for Departmental Honors must complete the thesis before conferral. Students may not stay on after graduation to complete an honors thesis. Similarly, students graduating at midyear may not register part-time in the spring semester to finish an honors thesis.

**Commencement**

The university commencement ceremony is held once each year in May. The student’s respective academic advising office determines whether a student has completed all requirements, and clears the student for conferral and participation in Commencement. Students who graduate in August, December, and May are invited to participate in the Commencement Ceremony in May following their degree completion. Students who graduate in August may receive permission to walk in the May ceremony preceding degree completion if they file an August conferral plan with their respective academic advising office. The diploma and degree will not be awarded until all courses are completed successfully and recorded.

**Student Affairs Resources**

A successful college career is about making sure that what you do to get a degree is enhanced by pursuing interests that complement your studies. Student affairs is dedicated to helping you make your Hopkins experience as life-changing as it is mind-expanding. While our programs start by building community in the place where you live, the residence halls and the surrounding neighborhoods, that work goes a lot further. Whether it is helping you build career skills, work on strategies to succeed in class, embrace a physically and mentally healthy lifestyle, or connect with peers, student affairs has resources available to support you as you explore the many opportunities at JHU. Our dedicated staff members are here to answer your questions and support your journey.
To find out more about the resources available to students visit: http://studentaffairs.jhu.edu/resources/

**University Policies**

Divisional policies and guidelines assist students in understanding expectations, processes, and procedures during their time as JHU students. University policies and guidelines are maintained by the Office of the Vice Provost for Student Affairs.

Please visit https://studentaffairs.jhu.edu/policies-guidelines to view Student Affairs policies and guidelines.

Please visit https://www.jhu.edu/university-policies/ to view JHU's Policy and Document Library, a searchable resource for all university-level policies, statements, and guidelines. JHU community members can access this using their JHED ID.

**Notice of Availability of Annual Security and Fire Safety Report**

In keeping with the mandates of the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act), the University's Annual Report contains statistics of certain crimes that are reported and that occurred on campus, in certain off-campus buildings or property owned or controlled by the University or an officially recognized student organization, and on public property within or immediately adjacent to and accessible from the campus for the three most recent calendar years. Also included are campus security policies including those related to missing student notifications, alcohol and drug use, sexual assault, relationship violence, and stalking, crime prevention, the reporting of crimes, and fire safety policies and statistics. All Johns Hopkins faculty, staff and students are encouraged to read and print out the report at http://security.jhu.edu/compliance-and-crime-statistics/index.html, and to report all criminal incidents promptly to your respective security department.

A printed copy of the annual crime report may be obtained from the security offices of Johns Hopkins:

(jhu.edu/news_info/policy/photography.html)
GRADUATE STUDENTS

Johns Hopkins University is proud to offer a rigorous and interdisciplinary graduate education taught by faculty who are academic and research leaders in their fields. Across the nine divisions of the university there are approximately 20,000 full-time and part-time graduate students working in over 180 fields of study. Combined with exceptional university facilities and resources, the endeavors of graduate students have contributed to groundbreaking discoveries, expansive and innovative collaborations, and the advancement of knowledge throughout the university and beyond.

The policies, procedures, resources, and opportunities included in this section are relevant for graduate students enrolled in the full-time degree programs in the Zanvyl Krieger School of Arts and Sciences (KSAS) and the Whiting School of Engineering (WSE) on the Homewood campus. Please use the links at the left to navigate to your topic of interest.

Student Right to Know Information
The Higher Education Act of 1965, as amended in 2008, includes many student disclosures and reporting requirements by universities. These requirements include statistics and/or information on the following subjects:

1. Retention and graduation rates;
2. Financial assistance available to students and requirements and restrictions imposed on Title IV aid;
3. Crime statistics on campus;
4. Athletic program participation rates and financial support; and
5. Other institutional information including: the cost of attendance, accreditation and academic program data, facilities and services available to disabled students, and withdrawal and refund policies.

For the full Student Right to Know page, please visit: http://homewood.grad.jhu.edu/student-services/student-right-to-know/

Admissions and Finances

Admissions
Admissions for Full-time Graduate Programs
The Office of Graduate Admissions and Enrollment is available to answer questions about the Krieger and Whiting Schools’ full-time graduate program application process and respond to general admissions inquiries and requests for information. Please visit grad.jhu.edu for a complete list of graduate programs offered by the Krieger School of Arts and Sciences (KSAS) and the Whiting School of Engineering (WSE), and for information regarding the admissions process.

Admissions/Information for Visiting Graduate Students and Volunteers
The schools of Arts and Sciences, and Engineering recognize and appreciate the contributions of volunteers and visiting graduate students to its mission of education and research and has policies in place to enable both schools to retain and set forth requirements pertaining to volunteers and visiting graduate students. Interested applicants should visit: http://grad.jhu.edu/apply/visiting-students/ for more information.

Costs of Attendance and Financial Aid

Costs of Attendance
See the Office of Student Financial Services’ website for financial aid information (https://finaid.jhu.edu).

See the Office of Student Accounts’ website for tuition rates and refund schedule (https://studentaffairs.jhu.edu/student-accounts/tuition-fees).

Funding, Financial Aid, and Student Loans
Graduate students should contact their department(s) for information concerning funding support availability. Information for the Whiting School can be found here as well: https://engineering.jhu.edu/graduate-studies/graduate-financial-aid/. Students who are seeking federal financial aid are required to fill out a new FAFSA form every year if they wish to continue receiving financial aid. For more information on student loans and work-study opportunities, go to the Student Financial Services website (http://www.jhu.edu/finaid/grads.html) or visit their office in Garland Hall.

Fellowships

Diversity Fellowships
Johns Hopkins is a community committed to sharing values of diversity and inclusion in order to achieve and sustain excellence. We firmly believe that we can best promote excellence by recruiting and retaining a diverse group of students, faculty and staff and by creating a climate of respect that is supportive of their success. This climate for diversity, inclusion and excellence is critical to attaining the best research, scholarship, teaching, health care, and other strategic goals of the Health System and the University. Taken together these values are recognized and supported fully by the Johns Hopkins Institutions leadership at all levels. Further, we recognize that the responsibility for excellence, diversity and inclusion lies with all of us at the Institutions: leadership, administration, faculty, staff and students.

For more information, please visit: http://grad.jhu.edu/apply/diversity/fellowships/.

WSE-Specific Graduate Fellowship Information
The Whiting School of Engineering offers a number of endowed fellowships that provide supplemental financial aid to incoming and current full-time engineering students. Full-time degree seeking graduate students are automatically considered for the fellowships. See the WSE Graduate Fellowship and Grants (https://engineering.jhu.edu/graduate-studies/fellowships-grants) website for more information.

KSAS-Specific Graduate Fellowship Information
The Krieger School of Arts and Sciences offers an incredible array of opportunities for student researchers in the areas of natural science, social science, and humanities. See the KSAS Research Awards and Opportunities (https://krieger.jhu.edu/research) website for more information.

Veterans Educational Benefits
Johns Hopkins is approved by the Maryland Higher Education Commission for the training of veterans, service members, eligible spouses and dependents under the provisions of the various federal laws pertaining to veterans’ educational benefits. Information about veterans’ benefits and enrollment procedures may be obtained at https://studentaffairs.jhu.edu/registrar/veterans/ or veterans@jhu.edu the Office of the Registrar, 75 Garland Hall, 410-516-6635.
Initial Enrollment

Once admitted to the university, the student must complete an Application for Program of Education or Training (VA Form 22-1990) from the Department of Veteran Affairs (https://benefits.va.gov/gibill). A copy of the Certificate of Eligibility, along with a copy of the DD-214, is sent to the Veterans Desk, Office of the Registrar, 75 Garland Hall, Johns Hopkins University, Baltimore, Maryland 21218. Additional delivery options can be found at https://studentaffairs.jhu.edu/registrar/veterans/.

The student who is transferring from another university or college will need to obtain a Request for Change of Place of Training (VA Form 22-1995) from the Department of Veteran Affairs (https://benefits.va.gov/gibill). The completed form should be submitted to the VA, and a copy sent to the Veterans Desk at the university.

Re-enrollment

Students who received veterans’ benefits at the university the preceding semester and plan to enroll with no change of objective should inform the Veterans Desk, veterans@jhu.edu at the time of registration that they want to be recertified under the provisions of their eligibility.

Students receiving veterans’ benefits must take courses that lead toward the exact objective (usually a specific degree) on the original VA application. Otherwise, they must submit a Request for Change of Program (VA Form 22-1995). Students utilizing veterans’ benefits must let the Veteran School Certifying Official know immediately of any change in their program or status that might affect the amount of their VA payment. If they fail to do so, the Department of Veterans Affairs will seek reimbursement from the student for any overpayment.

Standards of Progress

Continuation of VA payments depends on the student’s meeting the university’s academic standards for all students. The student must also meet any standards of progress which may be established by VA regulations.

Military TA

For guidance with utilizing Military tuition assistance please contact veterans@jhu.edu .

The College Navigator Tool

Veteran students may go to the College Navigator (http://nces.ed.gov/collegenavigator) to access a school comparison tool.

University Policies

Divisional policies and guidelines assist students in understanding expectations, processes, and procedures during their time as JHU students. University policies and guidelines are maintained by the Office of the Vice Provost for Student Affairs.

Please visit https://studentaffairs.jhu.edu/policies-guidelines to view Student Affairs polices and guidelines.

Please visit https://www.jhu.edu/university-policies/ to view JHU’s Policy and Document Library, a searchable resource for all university-level policies, statements, and guidelines. JHU community members can access this using their JHED ID.

Notice of Availability of Annual Security and Fire Safety Report

In keeping with the mandates of the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act), the University’s Annual Report contains statistics of certain crimes that are reported and that occurred on campus, in certain off-campus buildings or property owned or controlled by the University or an officially recognized student organization, and on public property within or immediately adjacent to and accessible from the campus for the three most recent calendar years. Also included are campus security policies including those related to missing student notifications, alcohol and drug use, sexual assault, relationship violence, and stalking, crime prevention, the reporting of crimes, and fire safety policies and statistics. All Johns Hopkins faculty, staff and students are encouraged to read and print out the report at http://security.jhu.edu/compliance-and-crime-statistics/index.html, and to report all criminal incidents promptly to your respective security department.

A printed copy of the annual crime report may be obtained from the security offices of Johns Hopkins:

- Applied Physics Laboratory 443-778-7176
- Homewood Campus 410-516-4631
- Medical Institutions 410-614-3473
- Peabody Institute 410-234-4600
- School of Advanced International Studies, D.C. 202-663-5808

Or, from the deans/directors/coordinators for our JHU Campuses and centers at:

- Baltimore, MD (Harbor East) 410-234-9301
- Bologna, Italy 202-663-5700 or International +39.051.2917.811
- Columbia, MD 410-516-9700
- Montgomery County, MD 301-294-7011

- Washington, D.C. Zanvyl Krieger School of Arts and Sciences 202-663-5808

Photography and Film Rights Policy
(jhu.edu/news_info/policy/photography.html)

Graduate-Specific Policies

UNLESS NOTED SPECIFICALLY OTHERWISE, THE BELOW POLICIES APPLY TO BOTH CONTINUING AND NEW STUDENTS.

NOTE: Students are subject to any and all policies as listed below, and at http://homewoodgrad.jhu.edu/, and at https://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/, and at (https://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate)https://krieger.jhu.edu/, and at https://www.jhu.edu/university-policies/, as well as other JHU policies as defined by academic and/or administrative departments.

- Statement of the Rights and Responsibilities of Ph.D. Students at Johns Hopkins University (p. 36)
• Academic and Research Misconduct Policy (p. 36)
• Assistant Leave Policy (p. 36)
• Annual Review Policy (p. 36)
• PhD Advisor Policy (p. 36)
• Grievance Policy (p. 36)
• Jury and Witness Duty (p. 37)
• Homewood Schools (p. 37) Policy for Graduate Student Probation, Funding Withdrawal, and Dismissal
• Information Technology Policy (p. 37)
• G.W.C. Whiting School of Engineering - Specific Policies (p. 37)
• Zanvyl Krieger School of Arts and Sciences - Specific Policies (p. 37)

Statement of the Rights and Responsibilities of Ph.D. Students at Johns Hopkins University

Ph.D. education is fundamental to the University's teaching and research mission. For an intellectual community of scholars to flourish, it is important to acknowledge the principles that underlie the compact between Ph.D. students, the faculty, and other members of the University community.

It is in this spirit that the Doctor of Philosophy Board, in collaboration with faculty and students from across the University, has articulated a statement of rights and responsibilities for doctoral students at Johns Hopkins. (http://web.jhu.edu/administration/provost/initiatives/phd_board/rights_responsibilities) The principles described in this document are to be realized in policies established by the various Schools of the University; the Schools will also develop mechanisms to monitor and enforce such policies.

Academic Misconduct and Research Integrity Policies

The Krieger School of Arts and Sciences (KSAS) and the Whiting School of Engineering (WSE) full-time programs and Engineering for Professionals have established the Academic and Research Misconduct Policy to address instances of misconduct by all graduate students enrolled in full-time, part-time or non-degree (special student) Krieger School of Arts and Sciences and Whiting School of Engineering graduate programs.

Procedures for handling allegations of research misconduct by full-time and part-time graduate students are available in the The University Research Integrity Policy. (https://www.jhu.edu/assets/uploads/2017/08/university_research_integrity_policy.pdf)

Assistant Leave Policy

To ensure the personal well-being and productivity of our graduate students, safeguard against excessive demands on graduate students' personal time, and introduce a minimum standard across the two Homewood schools regarding leave, the Deans of KSAS and WSE have established guidelines for Research and Teaching Assistants to be able to take leave. A detailed description of the policy can be found here: http://homewoodgrad.jhu.edu/academics/policies/.

Annual Review Policy

Once per academic year, all full-time Homewood graduate programs are required to provide a written review to: (a) all doctoral students, and (b) all master's students conducting thesis research.

Departments should include mention of funding continuation, as appropriate; as well as have a space for discussion about the student's professional development goals and ways to develop strategies to achieve those goals. This review must include the opportunity for the student to offer self-evaluation. Students who fail to attain a program's minimum level of performance may be placed on academic probation or dismissed using the procedures outlined in the Homewood Schools Policy for Graduate Student Probation, Dismissal, and Funding Withdrawal. In making these decisions, particularly that of dismissal, the program will take into consideration extenuating circumstances beyond the student's control.

The Whiting School of Engineering has established a Guide to Effective Annual Reviews (https://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/#accordion-panel-10) to assist both advisors and students make these annual reviews a useful tool in the development of each student.

PhD Advisor Policy

A PhD student conducting research and/or in the writing phase of their degree program will not be able to remain in good standing with their academic and research progress if they do not have a research advisor*. A student who is unable to secure a research/dissertation advisor within 4 months may be placed on probation or terminated from the PhD program. Note that it is typically not the role of a department to find an advisor for a student. Different programs may have specific policies pertaining to the timeline of advisor assignments and grace periods for students switching advisors. Students should consult with their departmental Academic Staff and/or Director of Graduate Studies for guidance.

This policy applies to both continuing and new students.

* A research/dissertation advisor is best defined as a departmentally approved faculty member under whose guidance a student is conducting research and, in many cases, in whose lab/group the student is associated and expected to participate.

Grievance Policy

The WSE and KSAS created a Grievance Policy. Any faculty member, postdoctoral fellow or graduate student of either school may grieve an adverse action or failure to act, or for a violation of University, School or departmental policy. Typically a complaint or dispute is brought to the attention of a department chair or center director and is resolved through informal discussion. In some circumstances, the Dean is asked to help in the informal resolution of grievances. The formal procedure set forth below is not meant to supplant attempts at resolving complaints through informal means. When at all possible, complaints and disputes should be settled through informal discussion, though there are no circumstances under which a grievance must be settled informally.

Please note that nothing in our policy should be construed to impinge upon the responsibilities of any office and/or regularly constituted body of the University, and should be applied only after every effort has been made to settle disputes informally. Moreover, no action may be taken with respect to a grievance that would conflict with or modify any policy approved by the Board of Trustees of the University, any policy of the
University or WSE/KSAS, any federal, state, or local law or regulation, or any contract to which the University is a party.

**Jury and Witness Duty**

A KSAS or WSE graduate student employed by either school (i.e., a teaching assistant, research assistant paid by the university, research assistant paid by an external grant/fellowship or hourly worker) summoned for jury duty or subpoenaed to testify, is authorized to be absent from his/her work for the actual time required by such service. A graduate student employee must present the summons or subpoena to his/her immediate supervisor before a leave can be issued.

Graduate student employees are eligible for paid leave of absence as a juror or court witness. Federal work study funds, however, cannot be used in these instances – departments should fund this work using other resources.

Jury duty or duty as a court witness is service and time spent away from a University position as a result of a subpoena issued by a court. Service as a volunteer expert witness or other volunteer court duty is not included in the provisions in this leave of absence.

**Homewood Schools Policy for Graduate Student Probation, Funding Withdrawal, and Dismissal**

This policy addresses consequences of student underperformance, including funding withdrawal. Students who might lose financial support as a result of the termination of funding from an advisor’s sponsor should be given prompt notice, whenever possible.

For comprehensive information see the Graduate Student Probation Funding Withdrawal and Dismissal Policy (http://homewoodgrad.jhu.edu/wp-content/uploads/sites/35/2014/08/Graduate-Student-Probation-Funding-Withdrawal-and-Dismissal-Policy.pdf).

**Information Technology Policies**

All users of Johns Hopkins University computing resources must comply with the University’s information technology policies. For the comprehensive policies go to http://it.jhu.edu/policies/itpolicies.html.

**G.W.C. Whiting School of Engineering - Specific Policies**

See http://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/

**Zanvyl Krieger School of Arts and Sciences - Specific Policies**

See https://homewoodgrad.jhu.edu/academics/policies/

**Academic Policies**

Much of the material contained in this section gives details pertaining to School-wide [Krieger School of Arts and Sciences (KSAS) and/or Whiting School of Engineering (WSE)] or University-wide policies. However, there are graduate student issues and policies that are department specific.

In those instances, students are referred directly to their department administrator or department handbook for further information.

A Note about PhD Education:

Ph.D. education is fundamental to the University’s teaching and research mission. For an intellectual community of scholars to flourish, it is important to acknowledge the principles that underlie the compact between Ph.D. students, the faculty, and other members of the University community.

It is in this spirit that the Doctor of Philosophy Board, in collaboration with faculty and students from across the University, has articulated a statement of rights and responsibilities for doctoral students at Johns Hopkins. The principles described in this document are to be realized in policies established by the various Schools of the University; the Schools will also develop mechanisms to monitor and enforce such policies. For more information see the Statement of the Rights and Responsibilities of PhD Students (http://web.jhu.edu/administration/provost/initiatives/phd_board/rights_responsibilities).

**Annual Review Policy**

Feedback and Mentoring are crucial to the success of a PhD student. As such, there is an Annual Review policy for all Homewood PhD students. Once per academic year, all full-time Homewood graduate programs are required to provide a written review to: (a) all doctoral students, and (b) all master’s students conducting thesis research.

Departments should include mention of funding continuation, as appropriate; as well as have a space for discussion about the student’s professional development goals and ways to develop strategies to achieve those goals. This review must include the opportunity for the student to offer self-evaluation. Students who fail to attain a program’s minimum level of performance may be placed on academic probation or dismissed using the procedures outlined in the Homewood Schools Policy for Graduate Student Probation, Dismissal, and Funding Withdrawal (http://homewoodgrad.jhu.edu/academics/policies). In making these decisions, particularly that of dismissal, the program will take into consideration extenuating circumstances beyond the student’s control.

The Whiting School of Engineering has established a Guide to Effective Annual Reviews (https://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/#accordion-panel-10) to assist both advisors and students make these annual reviews a useful tool in the development of each student.

**THE BELOW POLICIES APPLY TO BOTH CONTINUING AND NEW STUDENTS, UNLESS NOTED SPECIFICALLY OTHERWISE**

**Student Enrollment Statuses**

Graduate students in the full-time Arts and Sciences and Engineering degree programs based at Homewood are initially enrolled as full-time and are given a Resident status. Other registration statuses include: Graduate Study Abroad, Nonresident, Leave of Absence, Part-time and Visiting. Prior to a student changing his or her registration status, approval from the student’s degree program and appropriate office(s) must first be secured.

**Degree-Seeking Graduate Students, KSAS**

All KSAS full-time students are required to be enrolled in two courses of any level for credit/letter grade, or one course at the 800-level for credit/letter grade. Graduate students who are fulltime students are charged full tuition. The office of the deans must approve any exceptions.
Degree-Seeking Graduate Students, WSE
All WSE Graduate Students enrolled in Homewood-based full-time programs must be enrolled in at least 9 credits to maintain full-time status in each fall and spring semester. Most graduate students enrolled in research-oriented degree programs (M.A., M.S., M.S.E., Ph.D. etc.) in Engineering are full-time students. However, part-time study consistent with residency requirements is common in many engineering departments. Students should consult with individual departments to determine the requirements for part-time study.

- Typically, full-time WSE Ph.D. students will be enrolled in a combination of WSE classes and/or research for a total of at least 20 WSE credits each fall and spring semester.
- Typically, full-time WSE Masters students will be enrolled in a combination of classes and/or research for a total of at least 9-10 credits each fall and spring semester.

Visit [http://homewoodgrad.jhu.edu/academics/wse-graduate-credit-hours/](http://homewoodgrad.jhu.edu/academics/wse-graduate-credit-hours/) for more information and for Frequently Asked Questions.

Visiting (Not Degree-Seeking) Students
In some cases, graduate students from other institutions may participate in a visitation or residency at the Homewood Campus. These students are designated as “Visiting.” Although not candidates for a Johns Hopkins advanced degree, visiting graduate students (those not candidates for a Johns Hopkins graduate degree) may be enrolled on a full- or part-time basis with the approval of the chair of the department and the dean of their respective school. Visiting graduate students will be limited to two consecutive terms of either full- or part-time study.

There are two categories of non-degree (visiting) graduate students: (1) visiting graduate student (primarily taking courses), and (2) visiting graduate scholar (primarily pursuing research). Both categories must apply through their intended program of study and through the online application: [http://grad.jhu.edu/apply/visiting-students/](http://grad.jhu.edu/apply/visiting-students/).

All non-degree visiting graduate students/visiting graduate scholars must register in every semester that they are here for the visiting student course (AS/EN 990.890 'Graduate Research Practicum'); there is no tuition charge for this course. Failure to register may result in the student's removal from payroll, loss of health insurance, visa compliance issues, and/or lapses in university services/access.

Part-Time Graduate Students (in a fulltime, Homewood-based graduate programs)
New Homewood graduate students starting their full-time program in a part-time status are extremely rare, and are only allowed when the chair of a department or the director of a degree program makes a qualified written request to, and receives approval from, their cognizant Dean’s Office of Academic Affairs. Students already matriculated in their degree program who wish to change to a part-time status after completing at least one semester of full-time study may ask for permission of their program, and the Office of International Services (OIS), when applicable, to change status. Students will generally not be eligible to switch to part-time status if they are working primarily on the Homewood campus or working full-time on research for their degree. Part-time graduate students must still meet their degree residency requirements before they receive an advanced degree (WSE need to have two full-time resident semesters, KSAS and WSE PhDs, and KSAS Master’s need to have two consecutive full-time resident semesters).

Part-time has two major components: (1) a student cannot be part-time without prior approval from their department, and from OIS (when applicable), and (2) a part-time student cannot take more than 2 classes in a semester, or they will be automatically put back to full-time status (note that for WSE graduate students, part-time is any credit load below 9 credits (not including 9 credits)).

Costs:
- Part-time tuition charges are by the course in KSAS.
- WSE graduate students who are part-time in a full-time program are charged a minimum tuition fee up to 3 credits. Any additional credits taken by a WSE graduate student who is part-time in a full-time program will be charged by the credit.

For current tuition information, visit Homewood Student Accounts at [https://studentaffairs.jhu.edu/student-accounts/tuition-fees/](https://studentaffairs.jhu.edu/student-accounts/tuition-fees/).

Health Benefits: students in KSAS and WSE full-time programs who are in a part-time status are automatically enrolled in student health benefits, and may be responsible for assessed premium(s). Visit [https://studentaffairs.jhu.edu/registrar/students/student-health-benefits/](https://studentaffairs.jhu.edu/registrar/students/student-health-benefits/) for more information.

Payroll: Generally, students who are part-time cannot be on student payroll. There may be exceptions for final semester international students in certain circumstances. Please consult with the Office of Student Employment Services ([http://studentaffairs.jhu.edu/studentemployment](http://studentaffairs.jhu.edu/studentemployment)) for more information.

International students: Visa-holders (F-1, J-1, etc.) wishing to change their enrollment status to part-time must first meet with OIS to determine eligibility. There are two separate steps to switch an international to part-time status: (1) the student must secure permission from OIS to apply for part-time status (this is a USCIS form, and not an university registration/enrollment form), and (2) the student needs to make sure their department has contacted the registrar’s office on their behalf to make the official switch to part-time status. International students cannot switch to part-time without completing both steps. International students cannot be part-time unless they are in their final semester of their degree program.

Combined Bachelor’s/Master’s Students
The term 'Combined Bachelor's/Master's Student' can be misleading. This status is reserved only for JHU undergraduate students who have been accepted concurrently into a WSE or KSAS Homewood-based fulltime graduate program while still completing their undergraduate requirements. Most Combined Bachelor’s/Master’s undergraduate students will have to switch to graduate status to complete degree requirements. In order for a student's status to change from undergraduate to graduate, a Change of Classification Form for Combined Students must be completed. For students whose status change is due to completion of eight semesters of full-time undergraduate study at JHU (or the equivalent for transfer students), it is the responsibility of the Academic Staff in the student’s chosen graduate program to sign the form and forward it to the Office of the Registrar. For students whose status change is due to completion of undergraduate degree requirements prior to the eighth semester of full-time undergraduate study at JHU (or the equivalent for transfer students), it is the responsibility of the Academic Staff in the student’s
undergraduate program to sign the form first. It then goes to the student's graduate program before it is received by the Office of the Registrar.

Visit the Combined Bachelor's/Master's degree (http://engineering.jhu.edu/academics/combined-bachelors-masters) website for more information.

Postdoctoral Fellow Appointments

Postdoctoral fellows are at the university to undertake a research program in cooperation with a member of the faculty. All appointments are arranged through the individual departments. Proof of successful PhD completion and eligibility for employment will be required before any appointment may begin.

Visit http://postdoc.jhu.edu/ for more information.

Residency Requirements

Every full-time WSE Master's student must register as a full-time Resident graduate student for at least two semesters or satisfy an equivalent requirement approved by the appropriate department. (Combined bachelor's-master's degree students are exempt, as are those who enter a WSE master's degree program after two or fewer semesters following completion of a JHU undergraduate degree.)

Every full-time KSAS Master's student must register for a minimum of two consecutive semesters as a full-time, Resident graduate student.

Every full-time PhD Student (WSE and KSAS) must register for a minimum of two consecutive semesters as a full-time, Resident graduate student.

Back to top

Graduate Study Abroad (KSAS only)

The status of Graduate Study Abroad is usually limited to those students in the departments of Anthropology, Comparative Thought and Literature, and German & Romance Languages and Literatures, who are required as a part of their regular degree program to complete a semester or more of full-time study at a foreign university. While in the case of the History of Art Department study abroad is not a general requirement, many of its graduate students do go abroad to conduct dissertation research. The category of Graduate Study Abroad is considered a full-time status. The use of this category for situations other than those noted above requires the approval of your department chair of the Homewood Graduate Board.

A student on Graduate Study Abroad is required to pay 10% of the full-time tuition rate for each semester abroad. The KSAS Dean’s Office will pay the remaining 90% tuition balance.

Students who are enrolled in the Student Health Benefits Plan are encouraged to contact Consolidated Health Plans (CHP) or the Registrar’s Office prior to leaving campus for coverage details while abroad. Graduate Study Abroad students should discuss all plans with their department/advisor in advance. Additionally, international students should always consult with OIS before making any travel plans or status changes. You may reach CHP at (877)657-5044.

The Graduate Study Abroad Application is available here.

Nonresident Status

Nonresident (NR) status is a full-time status typically reserved for students who have completed all required course work and exams (Internal and GBO, as per degree requirements), and are working on their thesis or dissertation. The nonresident student’s advisor/department is not obligated to cover the cost of tuition nor of the University’s health benefits for Nonresident students. Nonresident students who are enrolled in JHU’s health benefits are responsible for paying the premiums themselves if there is no available support from the student’s department/advisor.

Eligibility

KSAS graduate students may be eligible for Nonresident Status if they:

- Have completed all coursework and requirements for the graduate degree other than the presentation and defense of the master's essay or doctoral dissertation
- Have reached the end of their departmental support period or have exhausted support from grants and cannot be fully supported by the department.
- Work 19.9 hours per week or fewer during the academic year if employed by Johns Hopkins University in any capacity (intersession or summer employment can be full-time, however). If working, students must be on salary (not stipend) and paid hourly. NOTE: Research or teaching assistants expected to work more than 19.9 hours per week do not qualify for Nonresident status.

WSE full-time program PhD and Master's Students are generally only eligible to apply for one of the three WSE PhD/Master's Nonresident Statuses if they have no outstanding coursework (defined as either assignments/tests required for a class in which a student is currently enrolled or coursework in progress towards resolving an Incomplete grade) or exams (internal and preliminary GBOs for example) to complete:

Note that nonresidency is a full-time status intended for students who are primarily not on campus.

- NR WSE PhD/Master's dissertation/thesis/capstone/project completion: Student is very nearly finished—just has some writing up to do and defend—but needs to leave campus to start work. Expectation is one semester, but two may be allowed. Student pays the NR tuition, and typically receives no stipend or health benefits support.
- NR WSE PhD/Master's study away: Student (with or without advisor) has the opportunity to be actively engaged in PhD work but at a non-JHU facility. Student remains fully supported by PI/department/host facility (NR tuition, stipend, health benefits support provided for student).
- NR WSE PhD/Master's internship/co-op: Student voluntarily takes time to pursue other pursuits that may be only tangentially relevant to their degree. The expectation is that they will return to campus in a residential capacity to complete their degree. Student typically pays NR tuition, receives no stipend or health benefits support. Time in this status is typically one year, but can be renewed for a second year.

Students who are enrolled in University Student Health Benefits are encouraged to contact the Registrar’s Office prior to entering into a NR status. Graduate Study Away students should discuss all plans with their department/advisor in advance. Additionally, international students should always consult with OIS before making any travel plans or status changes. The Nonresident PhD/Master's Study Away Application is available here (http://homewoodgrad.jhu.edu/academics/graduate-board/policies-and-forms).
Tuition

Students on Nonresident status are charged 10% of full-time tuition per semester.

Restrictions

Nonresident students are permitted access to campus, faculty advising and JHU services, however, they are not permitted to enroll in courses, with these three exceptions: (1) international students who file for Curricular Practical Training F1 (CPT1) through the OIS may register for a course entitled “Research and Teaching Practicum” (KSAS) or “Engineering Research Practicum” (WSE), and/or (2) enrollment in EN.500.603 Academic Ethics, and/or (3) enrollment in AS.360.625 Responsible Conduct of Research. Exceptions 2 and 3 are granted by the student’s respective Office of Graduate Academic Affairs.

While in Nonresident Status, students are required to online enroll in AS/EN.910.600 Non-Resident Status for each semester. The maximum amount of time that a student may retain Nonresident Status is four semesters for KSAS master’s students and ten semesters for KSAS doctoral students, and 1-2 semesters for WSE doctoral and master’s students (see WSE-specific nonresident statuses for PhDs and Master’s students above). Upon reaching this limit, the student will be required to register for either part-time status (WSE only, as appropriate) or full-time Resident status until degree completion.

Application Procedures

Students are required to complete and sign an Application for Nonresident Status indicating that they meet the requirements as stated above. The form should be signed by the department, the OIS (if applicable), and either the WSE Vice Dean for Education (or WSE designee), or the KSAS Vice Dean for Graduate Education (or KSAS designee).

Students should apply for Nonresident status well in advance of the first semester for which it is desired. Deadlines are posted here [link to application deadlines]. When requesting a change of status for the current term, such petitions should be submitted no later than the end of the second week of the semester.

Leave of Absence

A Leave of Absence (LOA) is an approved absence from the University during which time students are not charged tuition nor are they required to register. Time spent on an LOA is regarded as an approved break in study and is not counted toward the total time-to-degree. If a student fails to register without obtaining an approved LOA the student will be considered withdrawn from their degree program.

Students are encouraged to contact the Registrar’s Office prior to applying for an LOA for details regarding health benefits while on LOA.

International students must contact OIS before filing for LOA.

Eligibility

All KSAS and WSE full-time and part-time program graduate students are eligible for LOA if one of the following conditions prevents them from continuing with their graduate studies:

- A documented physical or mental medical condition.
- Compulsory military service.
- Personal or immediate family hardship.
- NOTE: Financial difficulty alone is not a valid reason for requesting an LOA.

LOA Tuition and Financial Support

Students on LOA are not charged tuition for the semesters they are granted the leave; the period of leave is simply regarded as an approved interruption of the degree program; however, the University cannot guarantee that financial support will be available when students resume their studies. After taking an LOA, students must re-apply for tuition assistance, research assistantships, fellowships and/or teaching assistantships. Such matters are left to the discretion of the department. Before applying for a LOA, students should consult their department for information regarding funding opportunities upon return from LOA.

LOA Restrictions

Graduate students may apply up to four semesters of LOA (summer terms are not counted) when medical conditions, compulsory military service, or personal or family hardship prevents them from continuing their graduate studies.

Continued approval is based on the reason(s) for the request. Additional information may be requested by the department, or either the WSE Vice Dean for Graduate Education (or WSE designee), or the KSAS Vice Dean for Graduate Education, Centers and Programs (or KSAS designee).

Students on LOA are not permitted to use any University student services and/or facilities (e.g., computing labs, library, labs, athletic facilities, etc.) and may not be enrolled at another University.

Students on LOA who wish to continue working at Johns Hopkins are not eligible to be paid through the Student Payroll Office and must therefore be hired through the appropriate divisional Human Resources Department.

No progress toward degree completion or coursework can be made while on LOA.

Students on LOA do not have access to student health benefits. The only exception is for a student on a MLOA (medical leave of absence). Students should consult with their cognizant Dean’s Office of Academic Affairs (Renee Eastwood, KSAS; Christine Kavanagh, WSE) for more information.

Application Procedures

To be granted LOA status, students are required to complete and sign a LOA Application form and provide a letter stating the reason for their application. The form must be signed by the student’s department, the OIS (if applicable), and either the WSE Vice Dean for Graduate Education (or WSE designee), or the KSAS Vice Dean for Graduate Education, Centers and Programs (or KSAS designee).

Students wishing to return from an LOA must complete an Application to Return from LOA form [link to application]. Application deadlines are posted here [link to application].

The departure of a student from one of the Homewood Schools without prior arrangement of Nonresident status or Leave of Absence status will be deemed a permanent withdrawal from the student’s program. Students who withdraw from their program must be formally readmitted, at the discretion of the department, before they may return to the University. If readmitted, they do not pay a second application fee.
but must satisfy the residency requirement for the degree following readmission (even if previously satisfied), and pay all outstanding fees.

**Special Note: LOAs and Academic Probation**

If a student needs to take a LOA while they are on an Academic Probation, their probation is paused for the duration of the approved LOA period. Upon the student’s return from LOA, their probation is reactivated with the same terms, but the clock for the probation is reset from the date of return to the longer of (1) the minimum time period dictated by the policy for the appropriate category as noted on the student’s original probation letter (such as research, coursework, etc.), or (2) the remainder of the student’s probationary period as noted in the student’s original probation letter.

**Satisfactory Progress**

**Homewood Schools Graduate Student Academic Review Policy**

This policy applies to all full-time WSE and KSAS doctoral students and master’s students conducting thesis research. Each graduate program is required to publish its own policies and standards with respect to academic standing. At the end of each semester, all full-time Homewood graduate programs are expected to review the academic records of their graduate students to evaluate academic progress.

Once per academic year, all full-time Homewood graduate programs are required to provide a written review to all doctoral students, and to all master’s students conducting thesis research.

Departments should include mention of funding continuation, as appropriate; as well as include a substantive discussion about the student’s professional development goals and ways to develop strategies to achieve those goals. This review must include the opportunity for the student to offer self-evaluation.

WSE has established a Guide to Effective Annual Reviews (https://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/#accordion-panel-10) to assist both advisors and students make these annual reviews a useful tool in the development of each student.

Students who fail to attain a program’s minimum level of performance may be placed on academic probation or dismissed using the procedures outlined in the Homewood Schools Policy for Graduate Student Probation, Dismissal, and Funding Withdrawal. In making these decisions, particularly that of dismissal, the program will take into consideration extenuating circumstances beyond the student’s control.

**Probation/Dismissal/Withdrawal**

**Academic Probation**

Whenever it is determined that a graduate student has failed to meet minimum academic, research, and/or TA requirements, that student may be placed on academic probation. This change in status requires a formal letter and a meeting between the student and either his/her faculty advisor, chair, and/or departmental director of graduate studies. The letter should clearly outline the student’s academic shortcomings, indicate the corrective measures necessary to remain in the program and state the length of the student’s probationary period. Any funding ramifications for the student should be included as well. Following the conclusion of the stated probationary period, the program must inform the student of his/her status based upon whether the student has met the requirements as stated in the probation letter.

Typical probation outcomes include:

1. removal of the student from probation
2. extension of the probationary period, or
3. dismissal of the student.

While on probation, students maintain their active, enrolled student status and are expected to continue in their obligations, courses, and research, as appropriate. Whatever funding support in place at the start of probation (if any) remains in place during the probation period.

Please see the full policy (http://homewoodgrad.jhu.edu/wp-content/uploads/sites/35/2014/08/Graduate-Student-Probation-Funding-Withdrawal-and-Dismissal-Policy.pdf) for more information on process, appeals, etc.

**Academic Dismissal**

**Dismissal After Probation**

This must be done with a formal letter citing the reason for dismissal and requires a meeting between the student and his/her faculty advisor or the departmental director of graduate studies. Academic dismissal will be noted on the student’s transcript at the request of the program and with the approval of the cognizant Dean. A student may appeal this decision.

**Dismissal Without Probation**

A student may be dismissed without a formal probation period under three circumstances:

1. if he/she meets the conditions for dismissal based on coursework as stated by the academic program in its department handbook or on its website;
2. if he/she fails an oral or written examination for which successful completion is necessary to continue in the program (as stated in the program’s degree requirements), or if he/she fails to meet any condition resulting from a qualifying or GBO exam; or
3. if he/she is found to have committed academic or research misconduct and expulsion is the outcome of the deliberations as outlined in the Homewood Graduate Academic Misconduct Policy (http://homewoodgrad.jhu.edu/wp-content/uploads/sites/35/2018/06/Homewood-WSE_KSAS,-and-WSE-EP-Graduate-Academic-Misconduct-Policy-2018.pdf) or the University Research Integrity Policy (https://www.jhu.edu/assets/uploads/2017/08/university_research_integrity_policy.pdf). Under these circumstances, programs are expected to follow the same procedures for Dismissal After Probation. In addition, students are also subject to immediate dismissal on non-academic grounds in accordance with the Johns Hopkins Student Conduct Code (https://studentsaffairs.jhu.edu/policies-guidelines/student-code) as well as all applicable policies at the university policies page (https://www.jhu.edu/university-policies).

**Academic Dismissal Consequences**

When a student is dismissed from the University, several consequences follow:

- The Office of the Registrar cancels the student's registration for the next semester and authorizes a reversal of tuition assessed for that semester. Note: this doesn't necessarily mean that the student receives a refund. For example, if the student has been funded by the department, the department would be eligible for the refunded funds. Also, any refund amount is subject to the refund schedule published by Student Accounts.
- Notation of dismissal may be placed on the student’s transcript at the request of the program and with the approval of the cognizant Dean.
- The Office of Student Financial Services suspends financial aid to the student and work-study aid.
• The Office of International Services performs duties as required by U.S. federal regulations regarding persons not eligible to study at the University.
• Eligibility for student health benefits will end. Please contact the Registrar’s Office for specific information.
• The Student loses access to university services, property, and nonpublic spaces.

Readmission Following Dismissal
The terms for readmitting a student who has been dismissed for academic reasons are established by individual departments. The readmission process should be described in the dismissal letter, if deemed appropriate. Students who have been dismissed should discuss the readmission process with their advisor. Procedural instructions for this policy can be found at http://homewoodgrad.jhu.edu/academics/policies/. The terms for readmitting a student who has been dismissed for reasons other than academic/research/TA performance are decided by the student’s cognizant Dean’s Office of Academic Affairs.

Voluntary Withdrawal
Students wishing to withdraw from the University must file written notice with their Department. A Termination/Withdrawal Form (http://homewoodgrad.jhu.edu/academics/graduate-board/policies-and-forms) must be generated by the departmental academic staff. Graduate students are encouraged to consult the chair of their department prior to submitting their written notice. Students who withdraw from their program must be formally readmitted, at the discretion of the department, before they may return to the university. If readmitted, they do not pay a second application fee, but must satisfy the residency requirement for the degree following readmission (even if previously satisfied), and pay all outstanding fees. Once a student withdraws from the University, their student transcript is closed – changes to their academic record will not be permitted. International students must consult with OIS to ascertain their visa obligations before withdrawing from the university. The same ramifications as listed under ‘Academic Dismissal Consequences’ apply.

Withdrawal by Lack of Registration
Students who are not registered by the end of the fourth week of a given semester and either (1) have not responded to correspondence from their department, advisor, Office of Academic Affairs, and/or Homewood Registrar’s Office about their intention to remain in the program, OR (2) have responded to correspondence but have made no effort to maintain a valid student status (defined as either enrolled or on an approved leave of absence), will have been deemed to have withdrawn themselves from the university and will be processed as a Withdrawn student in the student system (SIS). It is important to note that paying tuition is not the same as registering for classes. For more information, please see the Student Enrollment Statuses tab under Academic Policies.

Withdrawal Consequences
Any outstanding fees will be followed up with the student/their department by the Office of Student Accounts. Students who withdraw from their program must be formally readmitted, at the discretion of the department, before they may return to the university. If readmitted, they do not pay a second application fee, but must satisfy the residency requirement for the degree following readmission (even if previously satisfied), and pay all outstanding fees. Once a student withdraws from the University, their student transcript is closed – changes to their academic record will not be permitted. International students must consult with OIS to ascertain their visa obligations before withdrawing from the university. The same ramifications as listed under ‘Academic Dismissal Consequences’ apply.

THE BELOW POLICIES APPLY TO BOTH CONTINUING AND NEW STUDENTS, UNLESS NOTED SPECIFICALLY OTHERWISE

Registration
All students must register at the beginning of each term in accordance with instruction issued by the registrar before they can attend classes or use university facilities. Detailed instructions about registration will be provided to all students before the registration period each term. If the student has not been notified at least two weeks before the start of classes for any fall or spring term, the Registrar’s Office should be contacted immediately.

Students who for any reason do not complete their registration until after the prescribed registration period are required to pay a late registration service fee. The late registration fee schedule is posted every semester on the registrar’s website under Term Dates & Deadlines. Graduate students must obtain permission from the chair of their department to register after the second week of classes.

Visit https://studentaffairs.jhu.edu/registrar/students/graduate-registration/ for more information.

Students will not be allowed to register if there are unpaid bills from a previous term. The student is required to pay tuition or make financial arrangements with the Student Accounts Office before registering for a given term.

Withdrawal by Lack of Registration
Students who are not registered by the end of the fourth week of a given semester and either (1) have not responded to correspondence from their department, advisor, Office of Academic Affairs, and/or Homewood Registrar’s Office about their intention to remain in the program, OR (2) have responded to correspondence but have made no effort to maintain a valid student status (defined as either enrolled or on an approved leave of absence), will have been deemed to have withdrawn themselves from the university and will be processed as a Withdrawn student in the student system (SIS). It is important to note that paying tuition is not the same as registering for classes. For more information, please see the Student Enrollment Statuses tab under Academic Policies.

Grades
Grading basis for graduate courses deliberately includes both letter grades and P/F grades. Instructors should have the widest discretion possible in grading graduate students’ work; therefore both grading bases are available to the instructor for courses at the graduate level. While policies in most departments vary, most graduate students receive letter grades or Pass/Fail grades for their coursework. Students should consult their department chairs and instructors to determine their grading requirements.

Registrar deadlines and policies concerning grade changes are as follows:

Letter Grades (A through F)
Changing letter grades of “A” through “F” to a “Passing” grade is not permissible at any time.

All other grade change requests (e.g., “B” to “A”) are acceptable only within one year of semester end date. Change requests beyond one year can only be changed as a result of clerical error, and must be
accompanied by a written explanation/justification from the course instructor.

Incomplete Grades (I)

Students who are confronted with compelling circumstances beyond their control that interfere with the ability to complete their semester’s work during the normal course of a term may request an incomplete grade from the instructor. Approval of such a request is neither automatic nor guaranteed. Procrastination or distraction by other pursuits are not regarded as compelling circumstances, and extensions in these situations are unfair to students who have completed their course requirements within the allotted time.

Students who are in good academic standing have until the end of the third week of the next semester to finish incomplete work. Exceptions to this deadline require a petition from the instructor, and appeal to the student’s respective graduate affairs office before the end of the third week of the following semester. When appealing to change the deadline, faculty members must specify a new date for completion of the work which must be before the end of the current semester. Incomplete grades cannot typically be held over into a third semester in order to complete the missing work, nor can incomplete grades be resolved by retaking the course.

Special Rules for Graduating Students

Students with incomplete grades in required courses at the date of degree conferral will not graduate. Students with incomplete grades in courses that are not required for degree completion may still graduate. However, the deadline for completion is abbreviated; students must resolve incomplete grades within 30 days after the date of degree conferral which is when the university closes their graduate record.

Dropping a course with an “Incomplete” grade is not permissible at any time.

Changing an “Incomplete” grade to a final grade (“A” through “F”, “Pass”) may be done by the instructor if during the designated timeframe. After that deadline passes, grade change requests must be sent via a grade change form to the student’s cognizant Dean’s Office of Graduate Academic Affairs (Renee Eastwood, KSAS/Christine Kavanagh, WSE) for review and approval.

In-Progress Grades (IP)

Reserved for classes in which it is expected that the assigned work will require more that one semester to be completed, but the class itself will meet for only one semester, such as graduate seminar courses.

Dropping a course with an “In-Progress” grade is permissible only with the approval of the instructor, and the Dean’s Office.

Changing an “In-Progress” grade to a final grade (“A” through “F”, “Pass”) is acceptable at any time before the student’s departure from the university, and requires the instructor’s approval.

Missing Grades (MR, X)

A “Missing” grade (denoted by an “MR” or an “X” on the transcript) appears if the instructor has not submitted a grade within the defined grading period for the semester.

An instructor may submit a Grade Change form directly to the Office of the Registrar to change a “MR” or “X” grade to a final grade.

Changing a course with a “MR” or “X” grade to “Audit” is not permissible at any time.

Changing a course with a “MR” or “X” grade to “Audit” is not permissible at any time.

Audit (AU)

When a graduate student enrolls in a course with “Audit” status, he/she must reach an understanding with the instructor as to what is required to earn the “Audit” grade notation. If the student does not meet those expectations (e.g., fails to attend class), the instructor must notify the Registrar’s Office in order for the student to be retroactively dropped from the course. Dropped coursework does not appear on the student’s transcript.

Changing a course registration from “Audit” (student receives no letter grade) to “Credit” (student receives letter grade), or from “Credit” to “Audit” is permissible during the Office of the Registrar’s official deadlines for each semester. Registration changes beyond this deadline are not permissible.

Changing a final grade (“A” through “F”, “Pass”, “I”, “IP”, “MR”, or “X”) to “Audit” is not permissible at any time.

The following ASEN Graduate Courses cannot be taken for AU (Audit):

- Graduate Research
- Dissertation Research
- Master’s Thesis
- Master’s Essay
- Independent Study

These courses can only be taken as P/F or for a letter grade, at the instructor’s purview.

Add/Drop

Prior to the beginning of classes: Returning graduate students may make changes to their registration in-person or online through the SIS system. The SIS system is available for use up to ten weeks prior to the first day of classes.

First four weeks of classes: Graduate students may add classes online (as long as the electronic Advisor Hold has been released) or in-person at the Office of the Registrar. All in-person adds must have a signature from the faculty advisor or department chair.

First six weeks of classes: Graduate students may drop classes online (as long as the electronic Advisor Hold has been released) or in-person at the Office of the Registrar. All in-person drops must have a signature from the faculty advisor or department chair. Any drops within the first six weeks of classes will not be noted on the transcript.

Note: the instructor’s signature must be included on any course add form submitted past the 4 week add deadline and/or past the 6 week drop deadline. Detailed instructions for how to add or drop classes online are available on the Registrar’s website. A calendar with specific dates for adding/dropping courses is also available on their website.

Beginning with week seven of classes: Graduate students have until the end of week eleven to withdraw from a course with the signatures of: (1) course instructor, and (2) department chair, and (3) the student’s respective Dean’s Office personnel (either the Assistant Dean for Graduate and Postdoctoral Academic Affairs for Whiting School of Engineering or the Director of Graduate and Postdoctoral Academic
Affairs in the Krieger School of Arts and Sciences). All withdrawals will be noted with a “W” on the student’s transcript.

Registration Holds
A registration hold will be placed for students who have not obtained clearance from the Office of International Services, Student Accounts, Student Health Insurance or Student Health and Wellness Offices. Students should meet with the office that placed the hold so that the hold can be removed. Students who have an advisor’s hold on their registration must have their advisor release the hold online.

Transferring Courses

WSE Master’s degrees (M.A., M.S., M.S.E) and PhDs
For WSE graduate students who earned an undergraduate degree outside of the Whiting School of Engineering or the Krieger School of Arts and Sciences, no coursework completed outside of Johns Hopkins University before the undergraduate degree was conferred can be applied to a WSE graduate degree, regardless of whether that course was applied to the undergraduate degree.

WSE graduate students may transfer in up to two graduate-level courses from another institution provided the coursework was completed after the undergraduate degree was conferred. The student must obtain approval from the WSE Master’s/PhD program faculty advisor to do so, and a transcript from any relevant academic institution must be included with conferral completion paperwork submitted to the Academic Affairs office. EXCEPTION: WSE master’s students in a department-approved study abroad program can transfer in additional coursework (i.e., beyond two courses), but in total, at least half of the courses/credits applied to the WSE master’s degree must be taken/earned at Johns Hopkins. Individual graduate programs reserve the right to enforce stricter policies.

Double Counting Courses

WSE Master’s degrees (M.A., M.S., M.S.E) and PhDs
The WSE has established the following policies on double-counting coursework for all students in the full-time (Homewood) programs. If an individual program adopts double-counting policies more strict than these, the program’s policies override the school-wide policies. Students are encouraged to refer to individual program policies.

Bachelor’s Master’s Double Counting
Coursework applied to a bachelor’s degree:
Students either in a WSE combined (bachelor’s/master’s) program or seeking a WSE master’s degree after having earned a WSE or KSAS bachelor’s degree may double-count two courses (400-level or higher) to both programs with the permission of the master’s faculty advisor. WSE master’s degree candidates may not double-count courses applied to a bachelor’s degree earned at a different institution. Individual graduate programs reserve the right to enforce stricter policies.

Coursework not applied to a bachelor’s degree:
For students who are either in a WSE combined bachelor’s/master’s degree program, or who have already earned a WSE or KSAS bachelor’s degree and are seeking a WSE master’s degree, any graduate-level coursework (as defined by the WSE graduate program) not applied to the undergraduate degree may be applied to the graduate degree, regardless of when that course was taken (i.e., before or after the undergraduate degree has been conferred) with the permission of the master’s faculty advisor.

For students who earned an undergraduate degree outside of the Whiting School of Engineering or the Krieger School of Arts and Sciences, no coursework completed outside of Johns Hopkins University before the undergraduate degree was conferred can be applied to a WSE master’s degree, regardless of whether that course was applied to the undergraduate degree.

Master’s-Master’s Double Counting
Coursework applied to a master’s degree:
Students pursuing (1) a WSE master’s and a master’s from any JHU school simultaneously, (2) a WSE master’s after having earned a master’s from any JHU school, or (3) a WSE master’s degree after having earned a master’s degree from another institution, may double-count either two semester-length courses or three quarter-length courses across two master’s programs, as long as the courses are equivalent to the 400-level or higher in WSE full-time graduate programs. The student must receive approval from both master’s degree program faculty advisors if both sets of degree requirements will be completed at the same time. For a student to double-count coursework from two master’s degrees whose requirements are met at different times, the student must obtain only the approval of the faculty advisor in the program to be finished second. Individual graduate programs reserve the right to enforce stricter policies.

Declaration of Double-Counted Course:
WSE master’s students wishing to double-count courses must submit these courses to the WSE master’s program for approval. If it is learned that a student has double-counted a course for the WSE master’s degree without permission of the WSE master’s program, this program reserves the right to revoke the degree.

Double-Counting Across Three or More Programs
With bachelor’s-master’s and master’s-master’s double-counting, across any number of degree programs, a student can reduce the number of master’s courses required by up to two (with the approval of each of the programs involved). Beyond that, the remaining courses must be unique to the degree program. For example: with a ten-course master’s degree program, eight of those courses must be unique to the program, and not applied to a different degree at any level. A student can double-count any number of undergraduate courses to the various master’s degrees (but at most, two to each master’s program) and he/she can double-count the same course across any number of degrees pursued (again, with the approval of the programs involved).

Research and Scientific Writing Courses
Through the Center for Leadership Education graduate students may enroll in writing courses designed to assist with dissertation and grant writing. Students may enroll for this course at no additional charge. The course is offered in the fall and spring semesters however, space is limited. For additional information go to https://engineering.jhu.edu/cle/.

Transcripts
Transcripts may be requested from the Registrar’s Office. A request for one copy is normally processed within one to three business days of receipt of the request. Requests for multiple transcripts require additional processing time. Standard delivery of transcripts is by U.S. Mail first-class. Visit https://studentaffairs.jhu.edu/registrar/students/transcripts/ for information on ordering transcripts. Partial transcripts of a student’s record will not be issued.

Transcripts are normally issued only at the request of the student or with his/her consent. However, transcripts may be issued to offices and departments within the university without consent of the student.

Official and/or unofficial transcripts of work at other institutions that the student has presented for admission or evaluation of credit become the property of the university and cannot be copied or reissued. If a transcript
of this work is needed, the student must get it directly from the issuing institution.

**Summer and Intersession Courses**

Summer Courses: While most summer courses offered at the Homewood Campus are undergraduate level courses, graduate students may enroll in these courses with permission from their department chair and the course instructor. No financial assistance is available for graduate students who wish to take summer courses. In special cases, graduate students may also take courses at other divisions of the institution. Visit [https://studentaffairs.jhu.edu/registrar/students/interdivisional-registration/](https://studentaffairs.jhu.edu/registrar/students/interdivisional-registration/), or contact the Registrar’s Office, for more information.

Graduate students may register for the course Summer Independent Research (990.892) with the approval of their department chair. There is no charge for this course as independent research projects conducted during the summer are not graded and carry no academic weight. An NG (“no grade given”) will appear on the student’s transcript.

Intersession Courses: Graduate students are also eligible to enroll in Intersession coursework. Grades are generally given on an P/F scale. Some students use this period to participate in research, independent study, or internships. A list of Intersession offerings is published in late November or early December. A special form, available in the Registrar’s Office, is used for Intersession registration. Students should register before winter break. Students who register for research, independent study, or an internship during Intersession must have the approval signature of their faculty sponsor and academic advising office. This opportunity is offered tuition-free. Visit [https://summerprograms.jhu.edu/program/intersession-program/](https://summerprograms.jhu.edu/program/intersession-program/) for more information.

**Course Re-Take Policy**

At the discretion of the Homewood graduate program, a graduate student may retake a course, but the grade from the initial effort will remain on the transcript. This applies whether the initial effort occurred while the student was an undergraduate student or a graduate student.

**THE BELOW POLICIES APPLY TO BOTH CONTINUING AND NEW STUDENTS, UNLESS NOTED SPECIFICALLY OTHERWISE**

**Graduate Degree Academic Requirements**

**Doctor of Philosophy (KSAS and WSE)**

In addition to any departmental/divisional PhD requirements, PhD students must meet the following to be considered eligible to apply for graduation:

- A minimum of two consecutive semesters as a full-time, resident graduate student.
- Completion of registration in the semester during which degree requirements are met (note: students completing in a Summer term generally should have been registered for the summer graduate research course, but it is allowable if the last official semester of registration is the Spring semester immediately prior to degree conferral).
- Certification by a department or program committee that all departmental, program, and/or committee requirements have been fulfilled.
- A dissertation approved by at least two referees appointed by the department or program committee, and submitted to the Commercial Binding Office.
- Successful completion of a Graduate Board Oral (GBO) examination as determined by the department or program committee. This is classified as either a preliminary or a final examination.
- Though time-to-degree is determined by the department, and may not exceed 12 years, continuation in the program will be based/contingent upon satisfactory academic progress after eight years of enrollment.

**PhD Advisor Policy**

All PhD students conducting research and/or in the writing phase of their degree program must have a research advisor to remain in good standing with their academic and research progress.

Visit [https://e-nextcatalog.jhu.edu/grad-students/graduate-specific-policies/](https://e-nextcatalog.jhu.edu/grad-students/graduate-specific-policies/) for more information.

**KSAS Master’s Degrees (M.A., M.F.A., M.S.)**

- A minimum of two consecutive semesters as a full-time, resident graduate student.
- Completion of registration in the semester during which requirements are met.
- Certification by a department or program committee that all requirements have been fulfilled.
- A thesis approved by at least one referee and submitted to the Commercial Binding Office when the department requires a thesis.
- Meets the requirements of the school’s time-to-degree policy. ([http://homewoodgrad.jhu.edu/academics/graduate-board/degree-requirements](http://homewoodgrad.jhu.edu/academics/graduate-board/degree-requirements))

**WSE Master’s Degrees (M.A., M.S., M.S.E., M.S.E.M.)**

- Every student must register as a full-time graduate student for at least two semesters or satisfy an equivalent requirement approved by the appropriate department. (Combined bachelor’s-master’s degree students are exempt, as are those who enter a WSE master’s degree program after two or fewer semesters following completion of a JHU undergraduate degree.)
- Every student must be registered in the semester during which degree requirements are met; this includes students who have no courses remaining in which to enroll but must resolve coursework for which an “Incomplete” grade was assigned.
- Every student must provide certification by a department or program committee that all departmental or committee requirements have been fulfilled.
- If the student is submitting a formal essay to the MSE Library to help complete master’s degree requirements, the essay must be approved by at least one reader. (See the Homewood Academic Council Faculty Status table, under “Thesis Supervision of Graduate Students,” to determine who may serve as the reader/advisor. Additional readers, if required by program, need only program approval.)
- All courses applied to the master’s degree must be at the 400-level or higher. At their discretion, individual graduate programs may institute a higher course level as the minimum for their own students.
- Every student must earn the master’s degree within five consecutive academic years (10 semesters). Only semesters during which a student has a university-approved leave of absence are exempt from the 10-semester limit; otherwise, all semesters from the beginning of the student’s graduate studies—whether the student is resident or not—count toward the 10-semester limit.
• Every student must complete training on academic ethics (EN.500.603).

• Every student must complete training on the responsible and ethical conduct of research, if applicable. (Please see the WSE Policy on the Responsible Conduct of Research (https://engineering.jhu.edu/wse-research/resources/policies-forms/responsible-conduct-of-research)).

Time to Degree (TTD)
The time-to-degree (TTD) limit for degree candidates is typically determined by a specific program. However, Johns Hopkins University’s general policy requires that TTD not exceed twelve years for Ph.D. candidates, and five years for WSE and KSAS terminal master’s candidates. The TTD count begins with the first semester of registration as a matriculated student. Time spent on an approved LOA will not be counted toward the graduate student’s TTD. Students unable to complete degree requirements within the required time limit are required to withdraw from the University. Full TTD policies for WSE and KSAS can be found at http://homewoodgrad.jhu.edu/academics/graduate-board/new-grad-board-residency-page/.

Co-tutelle de Thèse
It is the University’s current policy that Johns Hopkins will recognize dissertation research and subsequent dissertation submission for the purposes of a degree from Johns Hopkins alone. It will sign no agreement that supports the concept of a student submitting the same work to different universities to receive two distinct degrees.

The University, however, wants to promote international exchange and in this spirit the Graduate Board has agreed to accommodate students with a desire to include faculty from a foreign university to participate in their research and defense process. Upon submission and review of a current curriculum vitae, the Graduate Board will allow one advisor to be a faculty member of a foreign university and in certain cases will allow the committee to be expanded to include other faculty from a foreign university as long as the majority represent Johns Hopkins. The university will provide no funds to cover expenses. Funding for travel would be up to the department or the foreign university.

All proposed co-tutelle agreements are to be submitted to the Graduate Board for review.

THE BELOW POLICIES APPLY TO BOTH CONTINUING AND NEW STUDENTS, UNLESS NOTED SPECIFICALLY OTHERWISE

Commencement and Degree Conferral
There are three official conferral dates each academic year for the University (December, May, August). The conferral date is printed on the diploma. A formal University Commencement Ceremony is held once per academic year, traditionally in May. Students who have not satisfied all graduation requirements by the deadlines determined by the Graduate Board or the WSE Office of Academic Affairs are not eligible to participate in the graduation ceremony. Students who complete the degree requirements prior to the ceremony in May can request an official statement of completion from the Office of the Registrar or the Homewood Graduate Board Office.

Visit https://studentaffairs.jhu.edu/registrar/students/graduation/ for deadlines and official conferral dates.

Application for Graduation
All graduate students must submit an Application to Graduate online through their SIS account in order to generate degree conferral and receive a diploma. Students should consult with their Graduate Coordinator, the Homewood Graduate Board’s website, and the WSE Office of Academic Affairs’ website respectively to determine current deadlines. The dates of these deadlines change each academic year.

In addition to submitting the general application to graduate, engineering students preparing to graduate from a master’s or doctoral program must complete paperwork indicating the courses they intend to apply to their degree. This paperwork is distributed by each department’s Graduate Coordinator and once completed should be returned to them.

Completing Graduation Requirements
Departmental graduation requirements vary; therefore, students are encouraged to speak with their departmental administrator to learn details of their requirements.

Degree Completion Deadlines and Information
The Graduate Board and the WSE Office of Academic Affairs (for WSE master’s students) issues deadlines for submission of theses and essays in the spring semester for the following academic year. These deadlines must be met for a student to be listed as a degree candidate. Students can access the calendar of deadlines on the Homewood Graduate Board’s website (http://homewoodgrad.jhu.edu/academics/graduate-board/deadlines) (for KSAS master’s students, and for KSAS and WSE PhD students), the website of the WSE Office of Academic Affairs (http://engineering.jhu.edu/graduate-studies/academic-policies-procedures-gra) (for WSE Masters), or by contacting their department administrator.

• Students who complete their master’s essay or doctoral dissertation after the end of a semester but before the first day of class of the next semester do not have to register for that next semester. (They will have to file for graduation in that semester, and will not be eligible for student payroll once they are no longer a registered student).

• Graduate students completing a final degree during the first eight weeks of the fall semester or the first four weeks of the spring semester will generate a tuition reimbursement for that semester to whatever entity covered the cost - the student, the department, the advisor, etc. This applies only to students for whom completion of a master’s project, master’s essay, master’s journal submission, or doctoral thesis is the sole remaining degree requirement at the start of the final semester.

• If a student completes a Tuition Deferral Form indicating an expectation to complete the degree within a specific grace period, no payment is required to register for that semester. However, if the grace period deadline is not met that semester’s tuition charge will be added to the student’s account.

• Note that students who complete in the Grace Period for either the fall or spring semesters (or finish in the summer term), and are registered in the semester/term in which they completed are eligible to stay on student payroll until the degree conferral date.

Grades towards Degree Completion
Grades must be submitted in SIS by the posted deadline for each semester, including grades for courses that are required for graduation. Graduating students who are taking courses at cooperative schools or other divisions of the University must make arrangements with their
instructors on the first day of class to have final grades submitted to the host school's Registrar and then to the Homewood Registrar by the Homewood grade submission deadline. If such an arrangement cannot be made, students should not remain enrolled in the course.

Graduate Board
The Homewood Graduate Board (http://homewoodgrad.jhu.edu/academics/graduate-board) is responsible for the administration of policies and procedures for the Doctor of Philosophy, Ph.D. of the Schools of Arts and Sciences and Engineering, and for Masters degrees in the School of Arts and Sciences.

The Graduate Board oversees:

- Graduate Board Oral (GBO) Examinations for ASEN Ph.D. students: with the approval of the department chair, a GBO may be scheduled at any time during the academic year. Requests for a GBO examination must be submitted to the Graduate Board a minimum of three weeks before the examination is to take place.
- Dissertation/Thesis Instructions: The student is responsible for obtaining and observing the detailed instructions concerning submission of their dissertation/thesis from their departmental office, and the Homewood Graduate Board Office. Visit http://homewoodgrad.jhu.edu/academics/graduate-board/degree-candidacy/ for more information.
- Initial Ph.D. Degree confirmation
- Dissertation submissions
- Recommendations for conferral to the Doctor of Philosophy Board
- See the Deadlines for Degree Completion (https://homewoodgrad.jhu.edu/academics/graduate-board/deadlines) website for more information.

Doctor of Philosophy Board
The Doctor of Philosophy Board (http://web.jhu.edu/administration/provost/initiatives/phd_board) advises the Provost about University-wide issues pertaining to the Ph.D. It approves new degree programs and sets guidelines and policies that affect all PhD. students. The Board respects the strong tradition of local autonomy of the Schools, and seeks to enhance the visibility and prominence of PhD. education across the University.

The Homewood Graduate Board submits its list of approved KSAS and WSE PhD conferrals to the Doctor of Philosophy Board for final university approval. No PhD degree is officially conferred until after the Doctor of Philosophy Board has approved and recommended conferral to the President of the University, and the President approves.

KSAS Master's Degree Completion
- Minimum of two consecutive semesters of registration as a full-time, resident graduate student
- Certification by a department or program committee that all departmental or committee requirements have been fulfilled
- Thesis approved by at least one reader when the department or program requires a thesis
- Submission of the thesis to the library when a Master of Arts with essay is being requested
- KSAS Master’s Time to Degree Policy (https://grad.jhu.edu/downloads/KSAS%20Masters%20Time%20to%20Degree%20Policy.pdf)

WSE Master's Degree Completion
All Whiting School of Engineering master's students must complete all of the following steps for the degree to be conferred, and to generate a diploma:

- An Application to Graduate must be submitted to the Office of the Registrar either online or on paper, depending upon status;
- Department-specific certification forms must be submitted to and approved by the department graduate coordinator, and then those forms must then be submitted to the WSE Office of Academic Affairs by the published deadline(s);
- If a formal master's essay is used to complete degree requirements, the student must submit a properly-formatted essay to the MSE Library Electronic Theses and Dissertations system by the date listed on the WSE website; the emailed submission receipt (generated by the library) must be included in paperwork forwarded to the WSE Office of Academic Affairs.

Visit: http://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/ for more information on deadlines and policies.

Dissertation and Thesis/Essay Submission
ETD (Electronic Theses and Dissertations)
An ETD is a digital version of a dissertation that is available to the public via the Internet. Universities and colleges in the United States and abroad have been moving toward this type of publication for the past decade. In the Fall 2013, Johns Hopkins launched its own ETD portal and process. All thesis and dissertation submissions must be through the ETD process and portal. See the ETD page for more information, deadlines, and instructions. (https://www.library.jhu.edu/library-services/electronic-theses-dissertations)

The student is responsible for obtaining and observing the detailed instructions concerning submission of their dissertation/thesis from their departmental office, the Homewood Graduate Board Office (http://homewoodgrad.jhu.edu/academics/graduate-board/degree-candidacy) and ETD guidelines (http://guides.library.jhu.edu/etd) of the Johns Hopkins Libraries and Museums. Students may also contact the ETD coordinator at etd-support@jhu.edu.

After submitting their dissertation to the ETD Submittal Tool (http://etd.library.jhu.edu), the library will check the dissertation for proper formatting and either approve it or contact the student to make required changes. After the ETD is approved the student will receive an approval confirmation from the system. Students are required to forward this approval email to their departmental academic staff and cc either the Assistant Dean for Graduate and Postdoctoral Academic Affairs in WSE (Christine Kavanagh) or the Director of Graduate and Postdoctoral Academic Affairs in KSAS (Renee Eastwood) as appropriate, with the following items:

- The title of their dissertation typed in the body of the email in title case format with correct spelling and punctuation.
- The degree type and program/department
- A single PDF of the dissertation title page and abstract

The degree requirements are not complete unless the final ETD is submitted to the library by the published deadline and the above information and attachments are provided by the student to the Graduate
Board Office via the email to the department and the cognizant Assistant Dean or Director of Graduate and Postdoctoral Academic Affairs.

**Conferral Closes the Graduate Record**
Upon degree conferral, the graduate's record is closed. No changes thereafter can be made to the graduate's transcript.

**Graduate Alumni Enrollment**
After degree conferral, KSAS and WSE Homewood graduate alumni who wish to enroll for coursework that does not lead to a degree are considered Visiting Graduate Students, and should follow the application and enrollment information located at [http://homewoodgrad.jhu.edu/academics/visiting-grad-student-scholar-policies/](http://homewoodgrad.jhu.edu/academics/visiting-grad-student-scholar-policies/)

**Student Life**

Johns Hopkins is an active and supportive community, filled with students of different viewpoints, different cultures, and different backgrounds. The thing that brings them all together is their desire to be here and to celebrate everything Johns Hopkins has to offer. The following section details campus resources specifically relevant to the graduate student experience.

**J-Card**
The J-Card is the multi-use identification card used for Johns Hopkins students, faculty and staff. It is issued to students after registering for the first time. The Office of ID Card Services is located on the lower level of Garland Hall.

The card features typical identification information such as the person's name, photograph, classification (student, faculty or staff) and a randomly generated ID number.

The J-Card acts as the individual's library card for the Sheridan Library network. It allows the student to enter the MSE Library beyond Q-Level, to reserve and borrow books and to pay for photocopies or document printing on library printers.

Students must show their J-Card in order to gain access to any campus computer lab. Additionally, student employees need to present their J-Card to pick up their paychecks from the Student Payroll Office.

The J-Card is also used for identification if a student has purchased a campus dining plan. J-Cash can be used at a number of restaurants and vending machines, on and off-campus. Funds can be added to any J-Card account online, over the phone, or by mail. Monday can also be added in-person at various locations on campus. For more J-Card and J-Cash information, visit [http://studentaffairs.jhu.edu/jcard/](http://studentaffairs.jhu.edu/jcard/).

Lost or stolen J-Cards should be reported to the Office of ID Card Services by calling (410) 516-5121 (weekdays 8:30 A.M. to 5 P.M.) or the Office of Security by calling (410) 516-4600 (all other times). The account will be temporarily suspended and a new J-Card will need to be issued for a nominal fee.

**Bookstore**
The University's bookstore is located at the Barnes & Noble in Charles Commons on Saint Paul Street. Students can purchase textbooks and supplies at this location. Please visit their store website ([http://johns-hopkins.bncollege.com/webapp/wcs/stores/servlet/BNCBHomePage?storeid=18053&catalogId=10001&langId=-1](http://johns-hopkins.bncollege.com/webapp/wcs/stores/servlet/BNCBHomePage?storeid=18053&catalogId=10001&langId=-1)) for hours of operation and other pertinent information.

**Computer Access**
Computers available to all faculty, staff, and students are located in several public computer labs and kiosks across the Homewood Campus. Labs in Krieger Hall and the Milton S. Eisenhower Library feature extensive software allowing users to print, access email, the internet, and perform other general tasks as well as more advanced computing required for coursework and research. Computer kiosk locations in Krieger Hall, the Mattin Center, Hodson Hall, Levering Hall, and throughout the MSE library have more limited functionality.

The largest of all the Homewood labs is the Krieger Academic Computing Lab, located in 160 Krieger Hall. To gain access to the lab, students must swipe their J-Card at the locked gate. A lab consultant can be contacted during working hours by calling (410) 516-4242 or emailing consult@jhu.edu.

**Security, Shuttles and Transportation**

**Security**
The Johns Hopkins University Campus Safety and Security Office is dedicated to establishing and maintaining a safe and secure environment in which to work and visit. The Homewood Communication Center operates 24-hours a day seven days a week at the Homewood Campus. In keeping with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, the Campus Safety and Security Office publishes crime reports and security bulletins. These may be found on their Campus Safety and Security Website ([http://www.jhu.edu/security](http://www.jhu.edu/security)).

Campus Security and local emergency services including Baltimore City Police, Fire or Ambulance can be summoned through Homewood’s Communication Center from any campus phone by dialing 6-7777. The universal 911 number may also be used to reach Homewood’s Communication Center from any on-campus phone. From off-campus, dial (410) 516-4600 to reach security. Crime and safety concerns must be reported to Campus Safety and Security by calling on-campus emergency numbers, (410) 516-7777 or 911. Additional services include the following:

- Anonymous Tip Hotline
- Crime Prevention Tips
- Escorts
- Lost and Found
- Property Registration
- Rape Aggression Defense (RAD)

Visit [http://security.jhu.edu/index.html](http://security.jhu.edu/index.html) for more information.

**Shuttles and Transportation**
Homewood Parking and Transportation provides several services to faculty, staff and students. The primary services include:

- Homewood - Peabody - JHMI Shuttle
- Keswick - Homewood - Eastern - JHMI Shuttle
- Blue Jay Shuttle
- Carey Business School - Homewood (evening) Shuttle
- Disabled Services

Visit [http://ts.jhu.edu/](http://ts.jhu.edu/) for schedules, locations and more information.

**Student Employment**
Student Employment Services is the human resources and employment center for full-time Homewood students who work for, or wish to work for,
the University during their enrollment at Hopkins. Student Employment processes all student paychecks and maintains employment records and supporting documents. The office also supports a web based job search program which students can access through the Student Employment Services website. Students on Nonresident status must keep in mind that they can be paid at an hourly rate only, and the number of hours worked on campus may not exceed 19.9 per week.

A student job fair, hosted by Student Employment, is held annually in September. Students have the opportunity to meet and interview with a variety of on- and off-campus employers at the fair. All tax forms and any other required paperwork must be filed with the Student Employment office before students are eligible to receive their first paycheck from the University. Volunteer opportunities and community-service information can also be found at this office.

Federal Work Study: Graduate students who meet certain financial-aid requirements have the option of applying for Federal Work Study (FWS) positions. FWS is a federally funded program that allocates funds to the University to pay a portion of the student's salary. Approximately one-third of Hopkins students receive FWS funding. Eligibility for FWS positions is based on both the Free Application for Federal Student Aid (FAFSA) and the JHU Application for Financial Aid. The Office of Student Financial Services determines eligibility based on federal regulations. An FWS award is valid for one academic year. Students must reapply each year. The maximum FWS award is $2,000. Awards may be less, depending on the type and amount of other financial assistance a given student receives. FWS employees are limited to 20 hours of work per week.

Jobs posted on the Student Employment Services website indicate whether the position is FWS or non-FWS. Job fairs and student-employment orientations also offer opportunities for students seeking FWS employment. Positions are available both on and off-campus and encompass a wide variety of skills and interests, including lab work, web design, research, and many more. Students in FWS positions are not prevented from working other paying jobs.

For more information about Student Employment or to view current job postings and policies, please visit https://studentaffairs.jhu.edu/studentemployment/.

Travel Resources
As graduate students prepare to go overseas for research, or to attend a conference, it is helpful to consider administrative, health, and safety issues before leaving the country. Graduate students are urged to complete the Johns Hopkins Travel Registry. Though this service is optional, travel registration can facilitate faster support in the event of an overseas emergency.

For more information and resources, visit http://homewoodgrad.jhu.edu/student-services/travel-resources/.

Career Center
The Career Center has services ranging from resume and curriculum vitae development to on-campus recruiting. As graduate students begin thinking about professional opportunities to pursue with their degree, the Career Center can help explore how skills, values, interests, and personality fit into this decision-making process.

For more information, visit https://studentaffairs.jhu.edu/careers/.

Disabilities
Johns Hopkins University does not discriminate on the basis of gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, veteran status, or other legally protected characteristic in any student program, activity administered by the University, admission, or employment.

A person with a disability is defined by the Rehabilitation Act of 1973, and by the Americans with Disabilities Act of 1990, as an individual who has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment.

Student Disability Services Office (SDS)
The SDS Office assists the University in compliance with the provisions of the Americans with Disabilities Act of 1990 (ADA), ADA Amendments Act (2008) and Section 504 of the Rehabilitation Act of 1973 for full-time undergraduate and graduate students in the Krieger School of Arts and Sciences and the Whiting School of Engineering.

The SDS Office is located on the first floor of the Mattin Center, and can be reached at (410) 516-4720 or studentservices@jhu.edu.

Visit http://studentaffairs.jhu.edu/disabilities/ for more information.

Tax Information
Student earnings are NOT automatically exempt from tax withholding, including Federal Work-Study earnings. All students are encouraged to complete and submit Tax Withholding Exemption Forms. Visit http://studentaffairs.jhu.edu/studentemployment/student-information/handbook/tax-information/ for more information.

The JHU Tax Office is available for general questions, and to point students to tax resources. The JHU Tax Office is unable to advise specifically on or prepare tax returns for JHU affiliates. Visit http://www.controller.jhu.edu/depts/tax/about_tax.html for more information.

Parking on Campus
Parking is available on campus for graduate students at the San Martin or Decker Garages at monthly rates. Graduate students receiving a paycheck from the University are eligible for payroll deduction to pay for parking. Hang tags for free evening and weekend parking alongside academic buildings are also available. Hang tags can be purchased for a nominal fee which are valid for a maximum of 3 years. Go to the Parking Office located in the South Garage (under Mason Hall and the Decker Quad), with your J-Card, to pick up your hang tag.

Visit http://ts.jhu.edu/Parking/index.html for more information.

In addition to these spaces, there are a number of metered and timed parking zones around campus. Check the ordinances governing these roadside spaces. Many have two-hour time limits.

Orientation and Welcome Events for New Graduate Students
There are many resources available to assist new students in their acclimation to the Johns Hopkins Community. Orientation and Welcome Events information can be found at http://grad.jhu.edu/student-life/orientation/, and resources on getting settled in Baltimore as a new graduate student can be found here: http://grad.jhu.edu/admitted-students/living-in-baltimore/
Recreation Center

Membership to the O’Connor Recreation Center is open to all faculty, staff, and students of the university. This includes Johns Hopkins University-Homewood, Peabody, School of Medicine, School of Public Health, School of Nursing, School of Education, Carey Business School, Bayview Medical Center, Johns Hopkins Hospital, School of Advanced International Study (SAIS), Johns Hopkins Medical Institutions, and the Applied Physics Lab (APL).

Gym
- Fitness and weight rooms
- Climbing wall
- Fields
- Tennis courts
- Pool (indoor)
- Experiential education
- Fitness classes (yoga, yogalates, pilates, step aerobics, cardio kickboxing, muscle classes and dance-based classes). NOTE: there may be a fee involved for classes.

Visit https://studentaffairs.jhu.edu/recreation/or call (410) 516-5229 for more information.

Campus Ministries

Johns Hopkins University Campus Ministries promotes and supports spiritual development, theological reflections, religious tolerance and social awareness among students, faculty and staff within the university community. At its heart, Campus Ministries is a prophetic and pastoral presence which seeks to enhance the spiritual and ethical educational experience of the whole person mind, body and soul.

Visit https://studentaffairs.jhu.edu/campus-ministries/or call (410) 516-1880 for more information.

Community Engagement

The Center for Social Concern emphasizes the value of service with others. Volunteers and community members enter into an educational process where both benefit from the interaction, and reciprocal learning is the common ground for all of our initiatives. Our programs and efforts are striving to create a strong community in and around the Johns Hopkins campus.

Visit https://studentaffairs.jhu.edu/socialconcern/ or call (410) 516-4777 for more information.

Housing

Johns Hopkins University does not offer graduate student housing. Prior to or upon arrival, graduate students should secure their own independent housing.

The Baltimore City neighborhood immediately surrounding the Homewood campus is called Charles Village. In addition, there are lots of other proximal areas in which students may consider living including Hampden, Waverly, Roland Park, Guilford, Remington, Mt. Vernon and others.

Incoming graduate students in the Krieger School of Arts and Sciences and the Whiting School of Engineering who need housing accommodations while looking for a place to live can contact the Community Living Office for information on temporary housing.

Visit http://studentaffairs.jhu.edu/community-living/ or call (410) 516-8597 for more information.

Dining Services

An assortment of entrees, snacks, coffee beverages and other fare is available at a variety of on-campus locations that are open during all three meals and snack-times. Homewood’s dining services can accommodate students with dietary restrictions whether that would be kosher, vegetarian, vegan, or other requirements. All locations accept J-Cards and cash, and some take credit cards.

Off-Campus Dining: There are many restaurants surrounding the campus and in adjacent neighborhoods. For the “insider’s guide” to these venues, please contact the Graduate Representative Organization (GRO), which publishes information and student reviews on these and other Baltimore eateries. Visit the GRO’s website at https://studentaffairs.jhu.edu/gro/.

Meal Plans: Graduate students may opt to enroll in a meal plan. Meal plans on the Homewood campus are based on a block meal system, designed for both convenience and flexibility. Each block counts as one meal. Blocks expire at the end of each semester. Added to blocks, points allow students to purchase food at the Levering Food Court, and Blue Jay Café. Points have a dollar-for-dollar value, and roll over from the fall to the spring, expiring at the end of the spring semester.

Additional information on specific plans, kosher or other dining options is available through the Community Living Office at http://studentaffairs.jhu.edu/community-living/dining-programs/.

Weather Emergencies

When there is an alteration or curtailment of the operating schedule of the University or a designated unit, an official announcement will be made on the University Emergency Telephone Hotline. As conditions may vary in the geographic areas where Johns Hopkins has campuses, there may be times when the Required Attendance Policy is invoked for some campuses and not others. In addition, conditions may be different on campus than they are in the area where a student lives. In times of bad weather, students should call the University Emergency Telephone Hotline to check on the status of the campus where they work.

- Baltimore - (410) 516-7781
- Outside Baltimore - (800) 548-9004

Each year the University publishes a list of radio and television stations that will be requested to announce operation changes. Because there can be mistakes in the message broadcasted, students can verify the message by calling the University Emergency Telephone Hotline. Students may also check the JHU emergency resources at https://www.jhu.edu/alert/.

Graduate Student Organizations and Advocacy

There are a variety of graduate student organizations on campus, ranging from cultural, athletic, academic and social. For a sample of what is available to graduate students, please visit http://homewoodgrad.jhu.edu/life-at-hopkins/graduate-student-organizations/.

For additional academic, cultural, athletic and social groups/organizations/clubs, please visit https://studentaffairs.jhu.edu/gro/events/list-of-groups/. Every group/organization/club is different, and some may only be open to undergraduate students, or to students from a certain campus, where others may not be bound by similar parameters. For more information, graduate students are encouraged to directly
contact any group/organization/club in which they are interested. There are also several offices and student groups on the Homewood Campus that advocate for graduate students on issues both academic and pertaining to student life.

Graduate Representative Organization
The Johns Hopkins University Graduate Representative Organization (GRO) works with specific divisions to represent graduate student interests (health insurance subsidies, compensation) to various levels of the JHU administration. The GRO organizes graduate student orientation, social events, sports activities, funds campus groups, and much, much more. Indeed, the GRO is proud to have earned the National Association of Graduate-Professional Students’ (NAGPS) 2000 – 2001 Outstanding Graduate Student Association award, its highest honor.

The GRO is made up of graduate student representatives from every department at Homewood. This group of representatives, the GRO General Council, elects an Executive Board for an annual term. Together, the Council and Executive Board are responsible for programming, advocating, and facilitating communication for graduate students on the Homewood Campus. The GRO also holds occasional programs with the student government on the Medical Campus.

Visit the GRO at https://studentaffairs.jhu.edu/gro/.

Baltimore, the largest city in Maryland, is the center of a metropolitan area of 1.5 million people. Baltimore is a vital city long known for its ethnic neighborhoods where each wave of immigration to the United States has added to its character. People of many different backgrounds give the city a melting pot vitality that is reflected in the wide variety of restaurants, shops, and festivals. Information about Living in Baltimore is located at http://grad.jhu.edu/admitted-students/living-in-baltimore/.

3 West, Wyman Park Building

The Office of Institutional Equity
Disability Services and Compliance
The Director of ADA Compliance and Disability Services in the Office of Institutional Equity serves as the central point of contact for information on physical and programmatic access, specific accommodations, resolution of complaints and problems, faculty and staff concerns, and identification of available services. In addition, the office can provide training, consultation, and information regarding disability issues.

Contact: Director (410) 516-8075, studentdisabilityservices@jhu.edu
Graduate students in the Krieger and Whiting Schools can also visit the Disabilities page: http://studentaffairs.jhu.edu/disabilities/.

Discrimination/Compliance
The Office of Institutional Equity Compliance and Education is responsible for the investigation and resolution of discrimination complaints received from faculty, staff, and students at Johns Hopkins University. OIE also provides mediation services for University related issues, as well as, education/training on sexual harassment.

Visit http://oie.jhu.edu/ or call (410) 516-8075 for more information. Information is also available at http://homewoodgrad.jhu.edu/student-services/sexual-assault-and-awareness/.

Health and Wellness
Health Benefits (CHP- Cigna)
It is University policy that all full-time students in the Schools of Arts and Sciences and Engineering maintain adequate health insurance coverage to provide protection against unexpected accidents and illnesses. As a full-time student, you must either purchase the University plan, or sign a waiver indicating you have health insurance coverage comparable to the University plan (International Students are required to purchase the University plan). Details about student health benefits offered by the University is available at https://studentaffairs.jhu.edu/registrar/students/student-health-benefits/. (http://web.jhu.edu/registrar/students/health)

NOTE: all full-time programs graduate students are auto enrolled into coverage, and are responsible for following up with the Office of the Registrar’s Health Insurance Desk if they want to make any changes, or have any questions about enrollment in the plan.

Health and Wellness Center
The Johns Hopkins University Student Health and Wellness Center exists to affirm the clear role of health and wellness in advancing academics. Its primary mission is to maintain and contribute to a healthy and safe learning environment for the student community in the Schools of Arts and Sciences, and Engineering.

Visit https://studentaffairs.jhu.edu/student-health/ or call (410) 516-8270 for more information.

Counseling Center
The Johns Hopkins University Counseling Center serves full-time undergraduate and graduate students from the schools of Arts and Sciences, Engineering, Nursing, and the Peabody Institute. All of these students are encouraged to utilize the services offered by the Counseling Center. All services are confidential and free of charge.

The Counseling Center provides services to assist students in meeting their personal and mental health needs and goals. The Center has the resources to provide individual and group therapy, as well as psychiatric
consultations to meet the needs of most students. These services are free of charge. The Center also offers consultation to students, faculty, staff, and parents on questions about situations and issues related to students and student-life problems.

Visit https://studentaffairs.jhu.edu/counselingcenter/ or call (410) 516-8278 for more information.

**International Graduate Students**

The Office of International Services (OIS) assists Hopkins’ international community with visa status and with the challenges of making a transition from one setting to another.

The OIS staff are prepared to help with daily issues students face in adapting to an academically and culturally different environment. This office should be considered by international students as their primary source for important information regarding their status in the United States.

OIS staff members can answer questions and advise students on immigration regulations, financial concerns, health matters, housing, employment possibilities and other issues relating to an international student’s period of stay in the U.S.

**International Bridge Program**

Studying in a foreign country can be both challenging and exciting. International students often experience a period of cultural adjustment when they first arrive to the United States and specifically Johns Hopkins University.

The International Student Bridge Program (http://ois.jhu.edu/News_and_Events/Presentations/International_Bridge_Program) is designed to better support this transition process for new international graduate students through monthly informational seminars and presentations on practical subjects—such as adjusting to graduate school in the US, taxes, credit in the United States, career preparations and enhancing communication and networking skills.
DEPARTMENTS, PROGRAM REQUIREMENTS, AND COURSES

Course Identification
Courses listed in the catalog are those the departments plan to offer, however, not every course is available during a given year. Necessarily, some courses will be canceled and other courses scheduled. The schedules of graduate and undergraduate courses for a given term are published before the end of the preceding term. In the course listings that follow, the credits shown are for one semester only. Effective Summer 2016, graduate level courses (courses numbered 600 and above) in the School of Engineering are assigned credits. Credit hours are not assigned to graduate level courses in the School of Arts and Sciences; many departments indicate instead the hours of class time per week.

A code number, indicating the department or program; a course number, indicating level; and sometimes a code letter, indicating area, for purposes of the distribution requirements, identify courses.

Zanvyl Krieger School of Arts and Sciences

https://krieger.jhu.edu/

The Zanvyl Krieger School of Arts and Sciences is one of the core divisions of Johns Hopkins University's Homewood campus. Our mission is the creation of new knowledge and the education of our students, undergraduate and graduate alike. Comprising 22 academic departments and more than 30 centers, programs, and institutes, the Krieger School is home to students interested in the humanities, natural sciences, social sciences, and the arts. The excellence of these programs dates back to 1876, when Daniel Coit Gilman assembled a faculty of philosophy of international distinction. Today, inquiry and discovery remain the engine and fuel that drive teaching and learning in the school. The departmental and program descriptions that follow are notable illustrations of the interdisciplinary offerings and opportunities available for a student to structure a unique field of study in the humanities, natural sciences, quantitative studies, and behavioral sciences.

Center for Africana Studies

http://krieger.jhu.edu/africana/

The Center for Africana Studies (CAS) offers a rigorous focus on African-descended peoples and their cultures across the globe. Over the past millennium, the contribution, traditions, and values of African, African-American, and African Diaspora cultures helped create the modern and pre-modern world. Africana Studies, as a field of study, grew from the activist and scholarly traditions of Black Studies and the blending of peoples and ideas between Europe, Africa, and the America. It therefore offers a broad, multidisciplinary approach to history and culture centered on the interests, conditions, philosophies, conceptual schemes, and value systems of African-descended people everywhere. Our courses focus on the human experience in the context of social, political, demographic, cultural, religious, and economic systems. They also offer a unique perspective on racism, colonialism, capitalism, and geography that properly situates the importance of people of color to the making of the modern world.

Africana Studies offers a multidisciplinary curriculum that expands the scope and range of traditional academic disciplines to the presence, roles, cultural contributions, experiences, and particular interests of African peoples and their descendants.

Requirements for a B.A. Degree

Also see Requirements for a Bachelor’s Degree (p. 7).

Students who choose to major in Africana Studies must complete at least 33 credit hours of course work in three areas of African Studies - African and African Diaspora Studies, African American Studies, and Urban Studies. All course must be taken for a letter grade and be completed with a grade of C- or better.

Honors

Students who wish to do honors in Africana Studies are required to take a two-semester research seminar, in which they will prepare an honors thesis in consultation with a faculty advisor in the student’s particular area of interest and the faculty coordinator of the undergraduate research seminar. The research seminar will provide guidance on research design, methodology, and analysis and presentation of findings, and give students an opportunity to discuss one another’s projects, share experiences, and receive constructive comments from their peers as well as the faculty coordinator.

In selecting research topics and collecting materials, students are encouraged to explore resources outside those immediately available on campus. With its rich collection of museums and archives, large and historic African-American communities, and growing populations of recent migrants from Africa, the Baltimore-Washington area offers many opportunities for research in Africana Studies. Students who wish to
undertake research in Africa or in African American or African diasporic communities beyond the local area will be encouraged to take advantage of summer research grants and/or study abroad opportunities available at Hopkins. The center will work with other departments and programs at Hopkins on behalf of students who wish to combine their research in Africana Studies with work in another field or ongoing program, such as the joint Minority Health Program recently established by the School of Public Health and Morgan State University.

**Undergraduate Minor Requirements**

Students who wish to minor in Africana Studies must complete a minimum of 18 credits, including two core courses and electives. Three of the electives must be upper-level courses. All course must be taken for a letter grade and be completed with a grade of C- or better.

**Core Courses (Select two of the following)**

**Courses**

**AS.362.109. Introduction to African American Literature- Part II. 3.0 Credits.**

This course will offer students an introduction to the central novels, plays, short stories, essays and poetry that have constituted African American Literature from 1930-1980. By focusing on representative works that span each of the major periods from the Harlem Renaissance to the Black Arts Movement, we will continue to consider the question of race and representation. How does one represent the race? And, for whom should black authors write – a white audience in order to change their minds about black people, or to black people for their pleasure and edification? Over the course of the semester, we will trace the various ways early- to late- 20th century black writers sometimes borrowed from earlier literary traditions and, at other times, developed new ones. In addition, we will hone in on the major debates and central texts that have come to define African American Literature and explore how it has long served as a creative, political, and intellectual enterprise.

Instructor(s): S. Mott

Area: Humanities, Social and Behavioral Sciences.

**AS.362.110. Colonial Encounters: Artistic Responses. 3.0 Credits.**

This course disrupts conventional ways of seeing, reading, and examining artistic texts. When we read a novel or study a work of art, especially that produced by white people, we tend to treat it as representative of the nation, talk about its aesthetic genius, or discuss it as reflecting its social/historical moment. Black artistic production, on the other hand, is most often treated as “protest,” as that which simply responds to a national narrative. But what would happen if we treated the experience of black people and other people of color as universal? What would happen if we treated colonialism as the dominant social and intellectual problem of our age?

Instructor(s): S. Mott

Area: Humanities, Social and Behavioral Sciences.
AS.362.111. Introduction to African American Studies. 3.0 Credits.
This is an introductory course on the African-American experience. People of African descent were brought by force to the United States (and other parts of the "New World") yet still managed to forge a rich, resilient, and collective existence. Despite the cruelty of the institution of slavery, African Americans carved out their own cultural systems and a complex body of political and social ideas about the significance of their African roots, as well as the contradictory practices of American democracy and the oppression of black people. This course surveys and analyzes a wide spectrum of contributions made by intellectuals, political leaders, organizations, and race-based strategies that interdependently led to African Americans securing a central and unyielding place in American society.
Instructor(s): K. McDonald
Area: Humanities, Social and Behavioral Sciences.

AS.362.112. Introduction to Africana Studies. 3.0 Credits.
Introduction to the core concepts, theories, cultural and intellectual production across the black diaspora. Antiracist, queer, and insurgent black thought welcome here.
Instructor(s): J. Johnson
Area: Humanities, Social and Behavioral Sciences.

AS.362.122. History of Africa (since 1880). 3.0 Credits.
An introduction to the African past since 1880.
Prerequisites: Students are not allow to take both 100.122 and 362.122.
Instructor(s): K. Gallon
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.123. Introduction to African American Literature (Part 1). 3.0 Credits.
In "Introduction to African American Literature," we will examine some of the major debates and central texts of African American literature from the 18th century to the turn of the 20th century. We will focus on the relationship between race and representation and the growing complexities around those representations. In addition to addressing questions of race, we will also consider how gender, sexuality, and class intersected with racial identity and representation in the creation, production, and selling of African American literature. This course is designed to give you a broad sweep of the African American literary landscape, turning our attention to poetry, novels, short stories, plays, and essays. In addition, this course will provide you with the opportunity to explore the diverse nature of black literature and encourage the reading of African American literature with a fine critical understanding and aesthetic appreciation.
Instructor(s): S. Mott
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

'Africa rising' has become an influential, albeit contested, narrative used by institutions like the International Monetary Fund and World Economic Forum to describe the rapid economic growth in 21st century Africa. This rapid 'economic growth has been accompanied by another type of 'Africa Rising' – a mushrooming of social protest and popular uprisings across the continent. The course will introduce important theoretical perspectives, debates, and examples to equip students to critically examine contemporary social dynamics through the interconnected themes of land, labor and environmental rights and struggles that have gripped the African continent. What has given rise to these awakenings? Who are the actors involved in these actions? What are their demands and strategies? What lessons does it hold for social movement theory and development more broadly? The first section focuses on land reclamation movements, the new wave of 'land grabs' and responses from below. The second section presents the role of labour movements and its intersection with popular uprisings. The third section considers responses from communities and movements to the ecological destruction and climate change.
Instructor(s): R. Jacobs
Area: Humanities.

AS.362.175. Freshman Seminar: Remembering the Black Power Movement. 3.0 Credits.
This course explores trends, developments, contradictions, and dilemmas related to the Black Power Movement. The objective of studying this historical movement is not to engage in nostalgia, but to think through and learn the lessons of this historic social movement. An active participant in the Black Power Movement as a university undergraduate and graduate student, I do not approach this subject merely as a set of interesting intellectual issues and dynamics that can be explored with complete dispassion and objectivity. Rather, I seek to examine critically some of the contradictions and dilemmas that I, too, was caught up in, seeking to come to grips with and clarify my own participation and activities. We study these historical events with the expectation of making a positive contribution to the future.
Instructor(s): F. Hayes
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.362.180. History of Black Americans. 3.0 Credits.
This survey course addresses the making and historical experiences of African Americans from the emancipation of slaves in the later nineteenth century to the conclusion of the twentieth century.
Instructor(s): J. Ashton
Writing Intensive.

AS.362.200. Race and Power in American Cinema. 3.0 Credits.
This course will examine changing norms of racial representation in American cinema and consider those images in relation to the operations of the film industry and to specific moments in U.S. history that informed cinematic representations of race. In particular, we will be analyzing film as a social practice that creates meanings that inform both everyday practices and deliberations over many of the most important issues and debates in American society. Ultimately, the goal is to gain a better appreciation for how the stories films tell us shape our personal and collective identities and inform our understanding of political life.
Instructor(s): A. Culver
Area: Humanities, Social and Behavioral Sciences.
AS.362.201. African American Poetry and Poetics. 3.0 Credits.
In this course, we will follow the development of black poetry primarily as it has evolved in the United States. Beginning with the first published African American writers of the eighteenth century and ending with several important poets writing and performing today, we will consider the shape of the African American poetic tradition as commonly anthologized and as defined by our own theoretically-informed readings of the assigned literature. Attention will be given to both canonical and neglected literary movements and groups. Readings will include poetry and essays by Frances E.W. Harper, James Weldon Johnson, Langston Hughes, Gwendolyn Brooks, Amiri Baraka, Harryette Mullen, Tracie Morris, and others.
Instructor(s): N. Nurhussein.
AS.362.202. Colonial Encounters and Literary Responses. 3.0 Credits.
This course considers how black writers of the diaspora engaged the history and realities of colonialism and imperialism. While some novelists wrote specifically about the colonial encounter and its consequences, others chose to critique the enterprise by rewriting—from the perspective of the colonized—the literary tradition of the colonizing nation. Focusing on works by African, Caribbean, and American writers alongside the British tradition to which they respond, we will look at how diasporic writers thought about and constructed ideas about the world, the self, and the racial Other.
Instructor(s): S. Mott
Area: Humanities, Social and Behavioral Sciences.
AS.362.203. Passing in American Culture. 3.0 Credits.
This course will examine film and literary narratives of “passing” in 20th century America. We will study texts that feature people who cross social boundaries of race, class, sexuality, and gender, and consider what “passing” reveals about American social mobility.
Instructor(s): S. Mott
Area: Humanities
Writing Intensive.
AS.362.207. Race and public policy in comparative perspective. 3.0 Credits.
This course will explore the relationship between racial inequality, racial politics, and policy-making in the western world, particularly as it concerns the fight for equality by people of African descent in the US, Canada, Britain, and France. It will cover historical and contemporary struggles over policy, beginning with the African-American civil rights movement, the ensuing War on Poverty and War on Drugs, and followed by contemporary debates over immigration, racial segregation, poverty and racial economic inequality across the four countries. We will take insights from theory and empirical research to study the role that racial constructs and politics play in policy designs, contests over power and resources, electoral representation, public opinion, social movements, and political change. Through case studies of policies aimed at racial inequality (e.g., affirmative action, police reform, urban revitalization), we will examine why and under what circumstances they arise, what form they take, and in what ways they alleviate or reproduce racial inequality. These questions will be considered in light of the broader impact of neoliberalism on normative ideas about policy, race, and inequality.
Instructor(s): A. Livingstone
Area: Humanities.
AS.362.219. Freshman Seminar: Black Narratives and the Archive. 3.0 Credits.
This course will explore the various ways black people have narrated stories. From the slave narrative to fiction, biography to oral history, we will consider the relationship between historical events and the stories that people tell about those events. Where does history and imagination meet in the telling? How does one weave together story material to give it shape? While we will spend the first half of the semester engaging published and more popular narratives about black life, the second half of the course will focus on interviewing and archiving the stories of black workers and staff at JHU. What kinds of stories do they tell? How do they tell them? What do their stories help us understand about the past? Ultimately, this course will concern itself with what it means to be black and the various ways everyday people and artists alike have attempted to narrate their experiences in both writing and oral forms.
Instructor(s): S. Mott
Area: Humanities
Writing Intensive.
AS.362.220. America, Post-Civil Rights. 3.0 Credits.
This course will explore the role of the 1964 Civil Rights Act and mid-twentieth century reform movements in transforming American politics, economy, and culture since the late 1960s.
Instructor(s): N. Connolly
Area: Humanities
Writing Intensive.
AS.362.221. African American Poetry and Poetics. 3.0 Credits.
This seminar explores the literary and political influences of poetry written and published by African Americans from the 18th century to the present (from Phyllis Wheatley to Terrance Hayes).
Instructor(s): H. Robbins
Area: Humanities
Writing Intensive.
AS.362.241. Seeing the Unspeakable: Baltimore, #BLM, and Kara Walker. 3.0 Credits.
The advents of smartphone technology, social media platforms, and the 24-hour cable news cycle has made violent images of Black death and dying ubiquitous. The public consumes these images unremittingly and social movements have used these images to highlight the vulnerable character of Black life globally. However, questions remain as to whether these images work as tools of populist politicization or as sources of entertainment for viewers unsympathetic to the various politics expressed by the Black Lives Matter movement. This course seeks to explore this uncomfortable reality through the artistic renderings of Kara Walker, an acclaimed mixed media artist whose provocative explorations of race, sexuality, and violence offer one lens by which explore this political phenomenon. Additionally, students will spend the semester creating multimedia archival projects that explore these images and their political impact on Baltimore. In doing so, students will explore the politics bound within, pressed upon, and interpreted from the Black body.
Instructor(s): B. Carter
Area: Humanities, Social and Behavioral Sciences.
AS.362.304. Reading and Writing Black Poetry. 3.0 Credits.
This course is an exploration of twentieth and twenty-first century black poetry and poetics. Readings include Paul Laurence Dunbar, Langston Hughes, Gwendolyn Brooks, Amiri Baraka, Sonia Sanchez, Nikki Giovanni, Lucille Clifton, Rita Dove, Natasha Trethewey, Terrance Hayes, Claudia Rankine, and Danez Smith. Texts will be mined for theme as well as formal technique as a basis for poetic experimentation.
Instructor(s): A. Gunn
Area: Humanities
Writing Intensive.
AS.362.305. Black Periodical Studies. 3.0 Credits.
This course explores the ways in which nineteenth- and twentieth-century black periodical culture fostered (and, at times, hampered) the literary and cultural production of the African diaspora. Authors will likely include Frederick Douglass, “Ethiop (William J. Wilson),” Frances E.W. Harper, Pauline Hopkins, W.E.B. Du Bois, Marcus Garvey, Jean Toomer, Langston Hughes, Richard Bruce Nugent, and others.
Instructor(s): N. Nurhussein
Area: Humanities
Writing Intensive.

AS.362.314. Police and Prisons in Comparative Perspective. 3.0 Credits.
This course will examine policing and prisons in the United States and beyond, with a focus on racial inequality. It will consist of two parts. First, we will explore the contemporary state of prisons and policing in the United States and look at debates around the rise of “mass incarceration” and aggressive forms of policing in the final third of the 20th century. Second, we will explore policing and prison in other parts of the globe in the contemporary moment, highlighting similarities and differences from the U.S. case. What can studying the instruments of social control in other societies reveal about our own? Students will develop an understanding of major trends, keywords, and debates in the literature on policing and prisons, with particular reference to race and racism.
Instructor(s): S. Schrader
Area: Humanities.

AS.362.325. The Role of "Place" in Racial Ethnic Health Disparities. 3.0 Credits.
This course will introduce students to racial/ethnic health disparities, the need to examine the role of “place”, how the characteristics of where people live affects individual’s health, and how this leads to racial/ethnic health disparities. The course will first examine large-scale measures of place, then down to smaller scale measures. Students will discuss various theories generally associated with racial/ethnic health disparities, as well as, the extension of “place” theories to this topic. Students will apply this knowledge through various assignments and activities about racial/ethnic health disparities of interest. These activities include class discussions, group assignments and development of interventions and solution-focused policy recommendations. This course is being offered for sophomores, juniors and seniors who have completed a statistic course or who have received permission from the instructor.
Prerequisites: Students may receive credit for AS.280.411 or AS.362.325, but not both.
Instructor(s): C. Bell
Area: Humanities.

AS.362.332. #Digital Blackness. 3.0 Credits.
#BlackLivesMatter, #SayHerName, #ICantBreathe, #IfIDieInPoliceCustody #BlackOutDay are just some of the many hashtags that black people have recently created and used on Twitter to protest police brutality and proclaim their full humanity. Over the past two decades Black people have utilized a variety of digital spaces and media to reconfigure the terms and terrain of debates and discussions on what it means to be Black in the United States and larger world. This course is an interdisciplinary investigation into the relationship between historical and contemporary cultural, social and political expressions of Blackness and the digital. More specifically, lectures, readings and class discussions will deconstruct the cultural, political economy and social construction of Blackness in the digital in an effort to uncover the ways that meanings of race more broadly and Blackness more narrowly influences and shapes Black Americans’ present social status and struggles for social justice. This course is designed to provide a “hybrid” experience, including both face-to-face (F2F) and online class meetings.
Instructor(s): K. Gallon
Area: Humanities.

AS.362.340. Power and Racism. 3.0 Credits.
This course investigates the impact of white supremacy and anti-black racism, as a global system of power, on the political development of the United States of America.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences
Writing Intensive.

AS.362.344. Education Politics in Urban America. 3.0 Credits.
This seminar analyzes trends, developments, and future challenges related to the politics of urban public schooling with a concentration on community political dynamics and the struggle for equal educational opportunity and quality education. The course emphasizes the impact of socioeconomic class inequality, racial/ethnic conflict, and gender politics on the changing character of public school reform since the 1954 Supreme Court decision of Brown v. Board of Education. Cross-listed with Africana Studies.
Instructor(s): F. Hayes
Area: Social and Behavioral Sciences
Writing Intensive.

AS.362.371. Public Health Crisis in Africa. 3.0 Credits.
This course examines the historical and current public health crises in Africa. Topics covered include infectious diseases and viral outbreaks, water and food access, sanitation, education, behavioral health, gender equality, health care and health care access, as well as the link between culture, economics and health. Introduction to Epidemiology is recommended but not required.
Instructor(s): M. Smart
Area: Humanities, Social and Behavioral Sciences.

AS.362.412. Black Political Thought. 3.0 Credits.
This course examines how modern black political thought emerged through a series of critical engagements with Enlightenment ideas about universalism, progress, the authority of reason, and the foundations of citizenship. Course readings include texts by W. E. B. Du Bois, Angela Davis, James Boggs, Frantz Fanon, bell hooks, and others.
Instructor(s): L. Spence
Writing Intensive.
AS.362.413. African American Representations in the Western. 3.0 Credits.
The course will investigate American cinematic representations of African Americans, slavery (and more specifically its absence), the Civil War, and racial formation along the United States' southwestern frontier in films produced from the 1950s through the contemporary period. The course closely examines American cinematic fantasies of the western frontier, frontier violence and the desire to escape or erase the tensions of race and slavery that have deeply permeated the American cultural consciousness, strongly shaping the production of American masculine ideals. The course will also take decided note of the national shift from liberal “Great Society Programs” of the 1960s to the conservative “neoliberal” social and cultural ideals in the 1980s and 1990s. Our purpose is to consider the organization and reformation of hegemonic power by way of the complex morality play the western film evokes, typically considering the interstitial geographies between blackness and whiteness, civilization and savagery, belonging and alienation, and metropolis and colonial outpost. We will privilege in our discussions the contested frontiers of racial dominion. Films include “Buck and the Preacher,” “The Battle of Algiers,” “Sgt. Rutledge,” and “Django Unchained.”
Instructor(s): L. Jackson
Area: Humanities
Writing Intensive.

AS.362.440. Oppression and Revolt. 3.0 Credits.
This seminar examines the history, theory, and practice of oppression and rebellion in Africa, the Caribbean, and the United States of America. The seminar will focus on popular struggles for liberation against systems of slavery, colonialism, sexism, and racism.
Instructor(s): F. Hayes
Area: Humanities
Writing Intensive.

AS.362.450. Critical Thinking in Africana Studies. 3.0 Credits.
This seminar examines various ideas, theories, and practices of thinkers, writers, and activists whose work and practices have constituted an Africana Studies intellectual tradition. The purpose of this seminar is to teach students to read, think, and write critically about questions relative to the formation and history of Africana thought and its intellectual tradition, in particular, and the genealogy of thought and intellectual traditions, in general. We will also think about various fields of knowledge that have shaped Africana Studies. The seminar therefore will work through the different meanings of intellectual work and critical thought and theory in Africana Studies.
Instructor(s): F. Hayes
Writing Intensive.

AS.362.510. Senior Honors in Africana Studies I. 3.0 Credits.
The first semester of Senior Honors in Africana Studies, conducted as an Independent Study. Interested students should submit an application to the CAS Director of Undergraduate Studies.
Instructor(s): Staff
Writing Intensive.

AS.362.590. Independent Study for Africana Studies. 3.0 Credits.
Instructor(s): L. Spence
Writing Intensive.

AS.362.595. Summer Internship. 1.0 Credit.

Cross Listed Courses

History of Art
AS.010.305. Global Modern Art: Africa, Asia, the Pacific and the Americas. 3.0 Credits.
Artists around the world grappled with the modern, working through local concerns and struggles but continually engaged with counterparts in Europe, North America, and across the “global South.” This course will introduce art, artists, movements, and institutions of modernism from approximately 1880 to the present and from outside of the northern Atlantic while critically examining the very notion of “global modernism.”
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

English
AS.060.124. Politics, History and Autobiography. 3.0 Credits.
Students will write a mini-autobiography in the form of seven 3000 word essays, work shopped in class. Readings include A Small Place by Jamaica Kincaid and Brothers and Keepers by John Edgar Wideman.
Instructor(s): L. Jackson
Area: Humanities
Writing Intensive.

AS.060.129. Writing Africa Now. 3.0 Credits.
This course surveys post-2000 literary and cultural production from sub-Saharan Africa. Topics will include debates over genre and fiction’s relevance to African experience, legacies of canonical writing about independence, urban Africa as violent or “tragic” landscape, and problems of scale and geographical context. Readings by authors such as Adichie, Wainaina, Duiker, and Vladislavic, and students will be introduced to the main print and online arteries of African intellectual discussion. This class is for non-majors and does not count towards the English major or minor.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.223. African American Literature from 1900 to Present. 3.0 Credits.
A survey of the major and minor texts written by African Americans during the twentieth century, beginning with Charles Chesnutt’s The Marrow of Tradition and concluding with Toni Morrison’s Beloved.
Instructor(s): L. Jackson
Area: Humanities.

AS.060.335. Black Satire. 3.0 Credits.
In this course, we will explore the use of satire in black literary and artistic traditions. Reading will likely include poems and novels by Paul Laurence Dunbar, George S. Schuyler, Claude McKay, William Melvin Kelly, Ishmael Reed, Fran Ross, Percival Everett, and others. In addition, we will venture into the genres of film (“Get Out”) and visual art (work by Glenn Ligon and Kara Walker, the latter currently on exhibit at the BMA). The politics of satire emerge in these texts particularly through the treatment of racial uplift and respectability ideologies, race relations, the legacies and histories of slavery, visions of utopia and dystopia, and the concept of the “post-racial.” With attention to the historical and cultural conditions under which these works were produced, we will address the ways in which satire can (or cannot) effect change in the world.
Instructor(s): N. Nurhussein
Area: Humanities
Writing Intensive.
AS.060.340. The Literature of Atlantic Slavery. 3.0 Credits.
This seminar will trace the historical development of the slavery debate in the Atlantic world through examination of key texts from a host of genres and locations—Quaker religious tracts, political documents like the Haitian Declaration of Independence, Cuban antislavery novels, slave narratives, and "classics" of American literature like Melville’s Benito Cereno. We will consider how the institution of Atlantic slavery was variously represented, justified, and criticized, discovering in the process the deep structures of modern slavery discourse. Texts may include: Aphra Behn, "Oroonoko"; John Woolman’s “Journal”; Robert Wedderburn, "The Horrors of Slavery and Other Writings"; Gertrudis Gomez de Avellaneda, "Sab"; Frederick Douglass, "My Bondage and My Freedom"; Herman Melville, "Benito Cereno"; Harriet Beecher Stowe, "Dred"; Antonio Castro Alves, "The Slaves".
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.349. Clint Eastwood, Race, and the American Western. 3.0 Credits.
Drawing from the body of work reflecting the Hollywood gunfighter and outlaw folk-hero Clint Eastwood, the course will investigate American cinematic representations of slavery (and more specifically its absence), the Civil War and racial formation along the United States’ southwestern frontier in films produced from the 1950s through the contemporary period. A focus on the cultural icon Clint Eastwood enables a close examination of American cinematic fantasies of the frontier, frontier violence and the desire to escape or erase the tensions of race and slavery that have deeply permeated the American cultural consciousness, particularly the creation of American masculine ideals. The course will also take decided note of the national shift from liberal “Great Society Programs” of the 1960s to the conservative “neoliberal” social and cultural ideals in the 1980s and 1990s. Our purpose is to consider the organization and reformation of hegemonic power by way of the complex morality play the western film evokes, typically considering the interstitial geographies between civilization and savagery, belonging and alienation, and metropolitan and colonial outpost. We will privilege in our discussions the contested frontiers of racial domination. The curriculum is complicated by several significant points of departure from the traditional category of the Hollywood-based American western: a film to frame the question of colonialism and resistance, as well as examples of black cinematic efforts re-drawing boundaries of the racial frontier. (Are they formed at the Caribbean, the easternmost littoral? The postindustrial city? Do they correspond to the romance of organized crime and its fantasy of empire?)
Instructor(s): L. Jackson
Area: Humanities
Writing Intensive.

AS.060.353. World Literature in Theory and Practice. 3.0 Credits.
This course takes stock of how the current hot topic of “world literature” has evolved from Immanuel Wallerstein’s work on world-systems theory over the course of the last three decades. We will read work by a wide range of literary critics engaged with the topic of world literature, including Franco Moretti, Pascale Casanova, David Damrosch, Emily Apter, and Alex Beecroft, as well as major “world” novels by Herman Melville, Amitav Ghosh, and Chimamanda Adichie. Students will also be introduced to critical approaches that offer a conceptual alternative to the world literature framework, for example, Edward Said’s ideas on worldliness and contrapuntalism, Gaston Bachelard’s phenomenology of the home, Fredric Jameson’s concept of cognitive mapping, and Eric Hayot’s work on literary “world-creation.” We will ask just how broadly the field can be defined before it loses its critical cohesion. In other words, does world literature exist?
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.356. Gordimer and Coetzee: Politics and Form. 3.0 Credits.
A comparative study of major works by the South African Nobel Laureates Nadine Gordimer and J.M. Coetzee. Special attention to critical essays by both writers about each other, as well as about issues of shared historical and literary concern. Topics will include the role of the public intellectual in apartheid-era South Africa, competing scales of literary reception and evaluation (e.g. national, international, and universal), and the relationship between politics, form, and genre.

among others. We’ll pay some attention, too, to critical trends and "Song of Lawino" (Okot p’Bitek); and "The Promised Land" (Grace "Chaka" (Thomas Mofolo); "The Wrath of the Ancestors" (A.C. Jordan); Primary texts will include "Ethiopia Unbound" (J.E. Casely Hayford); are the descriptive and institutional limitations of "African Literature"? exist for theorizing African literature as a corpus, and what, conversely, relation among selfhood, collectivity, and narration? What possibilities literary genres. How do seminal moments in African literary history texts will be clearly placed in an historical context, the emphasis in across the continent, focusing on long-form prose and poetry. While

This course reaches beyond the much-taught postcolonial African realist canon to explore less-studied, more formally challenging works from across the continent, focusing on long-form prose and poetry. While texts will be clearly placed in an historical context, the emphasis in our readings will be on the inception, evolution, and intermingling of literary genres. How do seminal moments in African literary history complicate our received understandings of periodicity, mimesis, and the relation among selfhood, collectivity, and narration? What possibilities exist for theorizing African literature as a corpus, and what, conversely, are the descriptive and institutional limitations of “African Literature”? Primary texts will include "Ethiopia Unbound" (J.E. Casely Hayford); "Chaka" (Thomas Mofolo); "The Wrath of the Ancestors" (A.C. Jordan); "Song of Lawino" (Oktok p’Bitek); and "The Promised Land" (Grace Ogot), as well as poetry by ShaaBan bin Robert and H.I.E. Dhlomo, among others. We’ll pay some attention, too, to critical trends and contextualization.

AS.060.378. Advanced Introduction to African Literature. 3.0 Credits.
This course examines the transnational visions of Black Empire as articulated and framed by black thinkers, writers, and visual artists around the world, roughly between 1850 and 1950. We will consider how both individuals and groups (such as the United Negro Improvement Association) responded to imperialist maneuvers through discourses of Ethiopianism, Pan-Africanism, and anti-colonialism, and how these discourses interacted with one another in surprising ways, ways that reveal the black world’s simultaneous attraction to and rejection of the imperial model in the nineteenth and twentieth centuries. Our reading will include novels, poems, essays, and critical texts—at least two of which share a title with this course—by W. E. B. Du Bois, Pauline Hopkins, Sutton E. Griggs, J. A. Rogers, Langston Hughes, George S. Schuyler, Claude McKay, Brent Hayes Edwards, Paul Gilroy, Wilson Jeremiah Moses, Michelle Ann Stephens, and others.

Instructor(s): N. Nurhussein

Film and Media Studies
AS.061.328. Gangster Films. 3.0 Credits.
The bad guy as hero from Little Caesar to Goodfellas. Film screenings Th 7:30-10:00 PM, Sun 7:00-9:30 PM. Lab fee: $40.

Instructor(s): L. Bucknell
Area: Humanities.

AS.061.369. The 1930s in Jazz, Film, and Poetry. 3.0 Credits.
The 1930s in Jazz, Film, and Poetry will focus on three art forms, jazz, film, and poetry, both separately and in conversation with each other during a decade of political, economic, technological, and cultural upheaval. A decade after the invention of amplifiers and public address systems, advances in sound recording and synchronized sound revolutionized film and recording arts. Jazz musicians, filmmakers, and poets collaborated on innovative and radical projects, often funded by the New Deal Federal Writers Project. Team-taught by faculty in Film and Media Studies, the Department of Jazz (Peabody), and the Center for Africana Studies, this course will bring together students from Peabody and the Krieger School of Arts & Sciences to engage with issues of art, culture, and politics during a turbulent decade.

Prerequisites: AS.061.140 OR AS.061.141

Instructor(s): H. Robbins
Area: Humanities.

Anthropology
AS.070.109. Introduction to Environmental Anthropology. 3.0 Credits.
What is an "environment," socially speaking? How have pipelines, animals, conservation, and capitalism shaped the way we talk about "nature" and "society" in the present day? This course examines the mutual transformation of humans and their environments through ethnography, environmental history, cultural and political ecology, human geography, and social theory.

Instructor(s): T. Ozden-schilling
Area: Humanities, Social and Behavioral Sciences.
AS.070.202. Economic Anthropology. 3.0 Credits.
How do the abstract principles of economics play out in a diversity of times and places? This course surveys anthropological research on the social organization of labor, the political institutions that underlie wealth and property, and the cultural meanings of money and commodities. Through these topics, we will look at enduring debates about the rationality of markets and the nature of capitalism.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive

AS.070.222. Africa in the 21st Century. 3.0 Credits.
Rapid urbanization has created new needs, occupations, entertainments, etc., outside the "formal sector". We use anthropological studies, African literature, film and the press on-line to understand making a living.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive

AS.070.233. Africa as Laboratory. 3.0 Credits.
Africa, as anthropologists have noted, has long been a "laboratory of the future." By tracing the intersections of art and politics, this class considers the various experiments in oppression and liberation that have unfolded within it. Following a broad historical arc, we begin with colonial medicine, racial science, and urban planning; move to national infrastructures and postcolonial resource extractions; and finally consider contemporary African engagements with consumer technology.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive

AS.070.241. African Cities. 3.0 Credits.
Over the past two decades, African cities have absorbed rapid population increase without accompanying economic growth. Students will review the major challenges of this mode of urbanization and explore the vibrant ways residents have sought to meet them. Following anthropology's commitment to lived experience, we will track these issues through the twists and turns of everyday life, and consider what they may say about urbanity more broadly in the 21st century. Topics include livelihood, the built environment, conflict and membership, and popular culture.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive

AS.070.294. Political Anthropology of Africa. 3.0 Credits.
The course will explore classical and contemporary ethnographies of the political in Africa, examining how their authors address issues of power, hierarchy and symbol. We will study various articulations of state, ethnicity and community that are analyzed by observing relations between power and resistance or between law, economy and violence through war, custom and ritual. The seminar will also address the way in which Africa has been constituted as a key source of the sub-field of political anthropology through colonial trajectories, postcolonial detours and the political imagination of the past and the future.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences

AS.070.302. Crisis and Futurity: New Ethnographies of Africa. 3.0 Credits.
"Africa Rising" or "The Hopeless Continent?" Within the span of a decade, The Economist magazine famously declared each to be true. In this class we turn to the genre of ethnography, with its focus on lived experience and critical nuance, to make sense of this seeming contradiction. We explore the themes of crisis and futurity through new works by Mbembe, De Boeck, Obarrio, and others.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive

AS.070.318. The Atlantic World. 3.0 Credits.
This seminar explores the formation of the South Atlantic through a reading of historical and ethnographic texts. We examine the making of history and culture as contentious fields of struggle.
Instructor(s): A. Angelini
Area: Humanities, Social and Behavioral Sciences
Writing Intensive

This seminar will address contemporary questions of state and citizenship in the light of colonial and imperial dynamics at the beginning of the twenty-first century: transnational and national sovereignty in relation to local configurations of law, capital and political violence; processes of subsumption, extraction and financialization. Authors include Negri, Arrighi, Harvey, Chakrabarty, Mbembe, Mamdani, Chatterjee, Corinol, Dussel.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences

History

AS.100.108. Making America: Black Freedom Struggles to 1896. 3.0 Credits.
From slave revolts on the West African coast to national conventions and civil war, people of African descent have defined freedom and struggle in terms of kinship, diasporic connection, and fighting antiblack violence. This course explores the arc of that history and its role in the making of America.
Instructor(s): J. Johnson
Area: Humanities, Social and Behavioral Sciences

AS.100.109. Making America: Slavery, Violence, and the Coming of the Civil War. 3.0 Credits.
An examination of violence - primarily racial and political - in the decades between the American Revolution and Civil War (1789 to 1861).
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences
Writing Intensive

AS.100.112. Introduction to History of Africa (since 1880). 3.0 Credits.
Instructor(s): E. Thornberry
Area: Humanities, Social and Behavioral Sciences
Writing Intensive

AS.100.122. Introduction to African History. Diversity, Mobility, Innovation. 3.0 Credits.
An introduction to African history with emphasis on diversity, mobility, and innovation. Considers both early and modern times.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive
AS.100.202. Conflict and Co-Existence: The Early Modern Mediterranean. 3.0 Credits.
This course explores the dynamic and fluid world of the early modern Mediterranean (1453-1650), where Christians, Jews, and Muslims met, fought, traded with, and enslaved each other.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.203. Freshman Seminar: From Columbus to Calypso: The Caribbean and the Wider World. 3.0 Credits.
This course examines the history of the Caribbean and how five hundred years of colonization, slavery, piracy, rebellion, and revolution have shaped the politics and culture of the islands today.
Instructor(s): L. MacDonald
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.205. Freshman Seminar: Health, Healing, and Medicine in Africa. 3.0 Credits.
A freshman seminar introducing students to the history of health, healing, and forms of medical practice in Africa over the last two centuries.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.206. Freshman Seminar: Law, Society, and Power in America, 1500-1877. 3.0 Credits.
This course examines the relationship between law, governance, and social structures in America between the start of European settlement and the era of the Civil War. Topics will include Native American and European land claims, the regulation of family life, economic and commercial disputes, and the legal regimes of race and slavery. Throughout, we will consider both the aims of governing officials and how ordinary men and women maneuvered within the legal system. Freshman only.
Instructor(s): S. Damiano
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.211. Freshman Seminar: American Slavery. 3.0 Credits.
This seminar explores the history of American slavery, tracing developments over time and across space, probing the impact of this iniquitous and dynamic institution on societies and individuals, and examining a variety of sources that historians use to construct their narratives. Freshman only
Instructor(s): P. Morgan
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.251. From Columbus to Calypso: The Caribbean and the Wider World. 3.0 Credits.
This course examines the history of the Caribbean and how five hundred years of colonization, slavery, piracy, rebellion, and revolution have shaped the politics and culture of the islands today.
Instructor(s): L. MacDonald
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.255. The Haitian Revolution in World History. 3.0 Credits.
This introductory seminar examines the revolution that transformed the slave colony of Saint-Domingue into the first black republic and second independent nation in the Americas, and its repercussions around the world. Non-Majors welcome.
Instructor(s): N. Marvin
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.282. Race & Power in Modern South Africa. 3.0 Credits.
South African history from 1800 to the present, with focus on the rise and fall of the apartheid racial state
Instructor(s): E. Thornberry
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.311. National Pastimes: Sports, Culture, and American History. 3.0 Credits.
National Pastimes examines the development of sports in the United States over the course of the 20th century with a particular interest in the relationship between sports and politics as well as issues of race, gender, sexuality and class.
Instructor(s): A. Davis
Area: Humanities, Social and Behavioral Sciences.

AS.100.316. American Foreign Policy in the Age of Human Rights. 3.0 Credits.
American Foreign Policy in the Age of Human Rights examines competing narratives about the origins of modern international human rights, and explores how those narratives historically informed American foreign policy from the American Revolution up to the present, with an emphasis on the twentieth century.
Instructor(s): K. Sohasky
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.320. Writing U.S. Empire. 3.0 Credits.
Attends to the composition and interpretive problems raised by studying the history of American imperialism, 1880s-1930s.
Instructor(s): N. Connolly
Writing Intensive.

AS.100.321. From Ferguson to Cape Town: The Global Black Freedom Struggle since Slavery. 3.0 Credits.
This seminar underscores the global and historical dimensions of the black freedom struggle through a series of case studies spanning North America, Africa and Latin America. Major themes addresses include race, diaspora, and movement(s) from slavery to the present.
Instructor(s): J. Levy
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.323. America in the 1960s. 3.0 Credits.
The years between 1959, when the course begins, and 1971, when it ends, were tumultuous and divisive. This course explores the political, racial, and cultural struggles of a half century ago.
Instructor(s): R. Walters
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.334. Billie Holiday and American Culture. 3.0 Credits.
A course examining introducing students to the life, times and music of Billie Holiday. We will read biographies, autobiographies, novels, and listen to music.
Instructor(s): L. Jackson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.343. Diaspora, Nation, Race, and Politics. 3.0 Credits.
For millions of people across the globe, political fate in the 20th century was defined at the intersection of diaspora, race, and nation — and this may be true in the 21st century as well. This course, a collaborative effort involving a historian and a political scientist, explores the parallels and divergences in the deployment of these terms in nationalist and transnational mobilization, literature and aesthetics, and group identity formation in Eastern Europe, Africa and the New World of the Americas. Set against the backdrop of the fall of significant empires in the late 19th and early 20th centuries, we will explore themes of migration, human rights, the nation-state system, and racism through history, political sociology, and political and social theory. We will pay particular attention to the theoretically exemplary Jewish and Black experiences of diaspora, race, and nation, engaging both with how those experiences were specially shaped by the imposition of national and racial logics and with Black and Jewish politics and thought in relation to those categories. Readings include Max Weber, W. E. B. Du Bois, Booker T. Washington, Theodor Herzl, Hannah Arendt, Benedict Anderson, Rogers Brubaker, Andrew Zimmerman, Michele Mitchell, David Scott.
Instructor(s): K. Moss; M. Hanchard
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.356. W.E.B. Du Bois and the Problem of the Color-Line. 3.0 Credits.
This seminar will introduce students to the ideas and legacy of the renowned American scholar, journalist, and activist, W.E.B. Du Bois (1868-1963), asking students to locate Du Bois in his historical context and in our own. Through readings and discussions of his key works in various forms, we will assess Du Bois’s impact on major debates in American politics, African-American affairs, and academic disciplines like sociology and history. We will track changes in Du Bois’s thinking over time, including in his views of racism, class, gender, liberalism, radicalism, imperialism, and war. Finally, we will consider the ways in which Du Bois’s work continues to shape our understanding of these issues and debates in contemporary American society.
Instructor(s): A. Brann
Area: Humanities.

AS.100.358. Black Code Studies: Black History and Digital Media. 3.0 Credits.
This course explores doing histories of people of African descent in an age of digital and social media. The focus will be on African-descended communities in the United States, but content will range across time space. Examples include: West African digital art communities; the use of slave trade databases to write Caribbean history; and the use of social media in social justice organizing from Paris to Baltimore. Students will explore questions of blackness, race, ethnicity, sex and sexuality, violence and justice while creating digital content using platforms like Wordpress, Omeka, Twitter, and Tumblr. Students will be evaluated on their acquisition of African American and Afro-Diasporic history; their knowledge of digital and social media platforms; and their ability to creatively and accurately relate the histories of blackness and black people to their representation and discussion online.
Instructor(s): J. Johnson
Area: Humanities, Social and Behavioral Sciences.

AS.100.382. Early Modern African Atlantic. 3.0 Credits.
This course examines the history of West and Central Africa and its diasporic people and cultures during the early modern period (c. 1400-1750) in disparate parts of the Atlantic world, including Europe, Latin America, the Caribbean, and Anglo-America. Themes include: West and Central African political and religious cultures; trans-Atlantic slavery; African Christianity; and the question of cultural survivals.
Instructor(s): E. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.385. Mobility and Encounter in the Medieval Indian Ocean. 3.0 Credits.
This seminar discusses forms of mobility and exchange-trade and travel, conquest and religious transformation, diasporas and migration, the spread of practices and technologies across the Indian Ocean from the 8th to 16th centuries.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.399. Decolonization and Citizenship in Africa, 1945-2015. 3.0 Credits.
Critically explores issues of decolonization and citizenship in Africa from WWII to the present. Emphasis on political inclusion and exclusion, and violence, fostered by nationalist movements and postcolonial African governments.
Instructor(s): P. Larson
Area: Humanities
Writing Intensive.

AS.100.403. Law & Custom in Colonial Africa. 3.0 Credits.
Examines how colonial rule transformed African legal systems, while Africans used European law for political resistance and personal gain. Research project based on colonial South African court records.
Instructor(s): E. Thornberry
Area: Humanities, Social and Behavioral Sciences.
AS.100.411. Readings in the History of Public Health in the 20th and 21st Centuries. 3.0 Credits.
The students will read major and some minor works in the history of global public health and will each develop their own concept of how and why the major institutions, professions, and practices associated with public health have evolved over the past long century. To help the students focus on their ideas, they will write three essays on particular aspects of the history.
Instructor(s): L. Galambos
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.445. African Fiction as History. 3.0 Credits.
An exploration of Modern African history through the African historical novel.
Instructor(s): P. Larson
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.100.486. Jim Crow in America. 3.0 Credits.
Explores the history of legalized racial segregation in the United States from the nineteenth and twentieth centuries.
Instructor(s): N. Connolly
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

Near Eastern Studies
AS.130.126. Gods and Monsters in Ancient Egypt. 3.0 Credits.
To provide a basic introduction to Egyptian Religion, with a special focus on the nature of the gods and how humans interact with them. We will devote particular time to the Book of the Dead and to the “magical” aspects of religion designed for protective purposes.
Instructor(s): R. Jasnow
Area: Humanities.

AS.130.203. Archaeology of Africa: From Human Origins to the Emergence of Civilizations. 3.0 Credits.
This course examines Africa’s ancient past from the emergence of biologically modern humans, ancient hunter-gatherers, the earliest animal herding and farming populations, to cities and civilizations. While Egypt plays an undeniably central role in world history, this course concentrates in particular on ancient geographies other than Egypt.
Instructor(s): M. Harrower
Area: Humanities.

AS.130.400. Introduction To Middle Egyptian. 3.0 Credits.
Introduction to the grammar and writing system of the classical language of the Egyptian Middle Kingdom (ca. 2055-1650 B.C.). In the second semester, literary texts and royal inscriptions will be read. Course meets with AS.133.600.
Instructor(s): R. Jasnow
Area: Humanities.

AS.131.613. Archaeology of Africa: From Human Origins to the Emergence of Civilizations.
This course examines Africa’s ancient past from the emergence of biologically modern humans, ancient hunter-gatherers, the earliest animal herding and farming populations, to cities and civilizations. While Egypt plays an undeniably central role in world history, this course concentrates in particular on ancient geographies other than Egypt.
Instructor(s): M. Harrower
Area: Humanities.

AS.133.611. Middle Egyptian Texts.
In this course we read a variety of Middle Egyptian hieroglyphic compositions and documents. Knowledge of Middle Egyptian Required.
Instructor(s): B. Bryan; R. Jasnow
Area: Humanities.

History of Science Technology
AS.140.163. Jungle Doctors: Medical Missions in Africa from David Livingstone to Paul Farmer. 3.0 Credits.
Freshman seminar using a variety of primary and secondary sources, students will explore the motivations and activities of expatriates practicing medicine in Africa from the 19th century to the present.
Instructor(s): J. Cummiskey
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.328. Science and Technology in Slave Regimes. 3.0 Credits.
What does science and technology look like in slave regimes? This seminar explores this question from a trans-national perspective by comparing cases in the Antebellum US, Cuba, Brazil and other countries.
Instructor(s): M. Portuondo; R. Kargon
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.140.379. Health and the City: Urban Public Health In Historical Perspective. 3.0 Credits.
This course examines the history of cities as spaces of public health concern since the nineteenth century, and seeks to understand how social, political, and economic contexts have shaped urban public health interventions.
Instructor(s): E. Anders
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

Philosophy
AS.150.404. The Idea of Power. 3.0 Credits.
The Idea of Power surveys seminal texts in the history of political thought on the nature, promise, and dangers of political and social power; it also critically engages contemporary texts on race and gender power relations.
Instructor(s): C. Lebron
Area: Humanities.

AS.150.440. The Making of Black Lives Matter. 3.0 Credits.
This course explores the history of black thought that informs the ethics of the contemporary movement for black lives.
Instructor(s): C. Lebron
Area: Humanities Writing Intensive.
Economics
AS.180.252. Economics of Discrimination. 3.0 Credits.
This course examines labor market discrimination by gender, race and ethnicity in the United States. What does the empirical evidence show, and how can we explain it? How much of the difference in observed outcomes is driven by differences in productivity characteristics and how much is due to discrimination? How have economists theorized about discrimination and what methodologies can be employed to test those theories? What has been the impact of public policy in this area; how do large corporations and educational institutions respond; and what can we learn from landmark lawsuits? The course will reinforce skills relevant to all fields of applied economics, including critical evaluation of the theoretical and empirical literature, the reasoned application of statistical techniques, and analysis of current policy issues. Seniors by Permission Only.
Prerequisites: AS.180.102
Instructor(s): B. Morgan
Area: Social and Behavioral Sciences
Writing Intensive.

AS.180.355. Economics of Poverty/Inequality. 3.0 Credits.
This course focuses on the economics of poverty and inequality. It covers the measurement of poverty and inequality, facts and trends over time, the causes of poverty and inequality with a focus on those related to earnings and the labor market, and public policy toward poverty and inequality, covering both taxation and government expenditure and programs. By the nature of the material, the course is fairly statistical and quantitative. Students should have an intermediate understanding of microeconomic concepts. Basic knowledge of regression analysis is also helpful.
Prerequisites: AS.180.301
Instructor(s): R. Moffitt
Area: Social and Behavioral Sciences.

Political Science
AS.190.284. Classics of Political Theory. Political Freedom. 3.0 Credits.
This course investigates core questions of what constitutes political freedom, what limits on freedom (if any) should be imposed by authority, and the relationship between freedom, responsibility and political judgment. Spanning texts ancient, modern and contemporary, we shall investigate how power inhabits and invigorates practices of freedom and consent. Among the questions we will consider: Can we always tell the difference between consent and coercion? Are morality and freedom incompatible? Is freedom from the past possible? By wrestling with slavery (freedom's opposite) we will confront the terrifying possibility that slavery can be both embodied and psychic. If our minds can be held captive by power, can we ever be certain that we are truly free? The political stakes of these problems will be brought to light through a consideration of issues of religion, gender, sexuality, civil liberties, class and race.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.311. Disposable People: Race, Immigration and Biopolitics. 3.0 Credits.
This course will explore theories and practices of race and immigration in order to illuminate the proliferation of populations regarded as disposable in contemporary politics. We will pay special attention to the contestable criteria used to determine eligibility for membership in the human race. We shall also examine how political power influences the relays between citizenship status and those whose lives are worthy of protection, and those who should be allowed to die.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.339. American Racial Politics. 3.0 Credits.
Recommended Course Background: AS.190.214
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.340. Black Politics I. 3.0 Credits.
This course is a survey of the bases and substance of politics among black Americans and the relation of black politics to the American political system up to the end of Jim Crow. The intention is both to provide a general sense of pertinent issues and relations over this period as a way of helping to make sense of the present and to develop criteria for evaluating political scientists' and others' claims regarding the status and characteristics of black American political activity.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.342. Black Politics II. 3.0 Credits.
Recommended Course Background: AS.190.340.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.360. Power and Democracy in the American City. 3.0 Credits.
How do race and class intersect to shape how democracy works in American cities? In this innovative course students will learn about urban citizenship, authority, and activism using Baltimore as a case. The class, co-taught with Baltimore organizers, will use a community based learning approach.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.365. Black Politics: Black Lives Matter. 3.0 Credits.
Over the past two years the #blacklivesmatter movement has transformed the discussion about policing in American cities. In this course we will examine the broad movement against police brutality through the lens of black politics.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences
Writing Intensive.
AS.190.380. The American Welfare State. 3.0 Credits.
This course analyzes the distinctive US welfare state in historical and comparative perspective. We begin with a survey of the policy context, an historical overview from the poorhouses through the Great Society, and a tour of welfare states across the rich democracies. We then survey developments — and explain the actual workings of policy — across jobs, education, welfare, pensions, and health care. We explore the institutional and political factors behind their divergent trajectories through conservative revival and the age of Obama. Students will write a seminar paper exploring policy development over time in a program or area of their choosing. Enrollment restricted to Social Policy minors only. Prerequisites: Students may take AS.190.380 or AS.360.380, but not both.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.384. Urban Politics & Policy. 3.0 Credits.
An analysis of public policy and policy-making for American Cities. Special attention will be given to the subject of urban crime and law enforcement, poverty and welfare, and intergovernmental relations. Cross-listed with Africana Studies
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.385. Urban Politics and Policy. 3.0 Credits.
An analysis of public policy and policy-making for American Cities. Special attention will be given to the subject of urban crime and law enforcement, poverty and welfare, and intergovernmental relations. Cross-listed with Africana Studies.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.190.391. Time to Kill: Race, Punishment, Death and Desire. 3.0 Credits.
This course examines the role of race in determining who deserves to be punished, the timing and occasions of punitive action and how long punishment should endure. Key to our inquiry is how racialized presumptions about human desire might justify punitive logics of power. The class explores inequalities in the distribution of punishment and death in order to illuminate how race shapes questions of whose time is more valuable, who lives and who dies, and ultimately whose lives count as human.
Instructor(s): P. Brendese
Area: Social and Behavioral Sciences.

AS.190.404. Race and Debt: Living on Borrowed Time. 3.0 Credits.
This is an advanced undergraduate seminar that explores how racial stigma functions as a marker of being always already in debt. In view of the legacies of settler-colonialism, imperialism and chattel slavery, how is it that those from whom so much has been taken are nevertheless regarded as perpetually in debt? We shall examine the moral, economic and racialized logics of power through which a range of political subjects come to be regarded as ungrateful “takers” as opposed to “makers,” and owing a debt to society. In so doing, we will investigate how temporality functions as a tool of power by considering how the indebted are made vulnerable to precarity, discipline, and disposability—in effect, forced to live life on borrowed time.
Instructor(s): P. Brendese
Writing Intensive.

AS.190.479. Imag(in)ing Cities. 3.0 Credits.
Cities exert a substantial degree of control over American life. Throughout the 20th and early years of the 21st Century they have been centers of industry, of social change, of political change. And in part because of their status, scholars have begun to theorize about cities. The purpose of this class is to interrogate these theories through a filmic lens. Students will be exposed to readings and then in the second half of the semester, to films about cities that implicitly and explicitly speak to and about these theories. Some coursework in urban studies preferred, though not necessary.
Instructor(s): L. Spence
Area: Social and Behavioral Sciences.

AS.191.389. The Politics of Race and Ethnicity in the Postcolonial Society. 3.0 Credits.
The postcolonial society offers a unique terrain for the study of comparative racial politics, providing a setting for which racial and ethnic politics often take place between predominately non-white groups. In this course, students will examine contemporary understandings of the concepts of race and ethnicity and how they are deployed politically in the postcolonial society, enabling students to make deeper explications about the relationship between race, ethnicity and national inclusion as global phenomena that are the persistent and widespread legacies of colonialism, nationalism and white supremacy. Specifically, students will become familiar with the processes of colonization and decolonization—as well as postcolonial theories of resistance—that structure group politics today, drawing upon theoretical sources from Africa, Asia and the Caribbean. These theoretical and historical tools will be used to study racial and ethnic politics across a range of postcolonial cases, including Indonesia, Mauritius, Fiji, Trinidad, Colombia and Brazil.
Instructor(s): E. Thornton
Writing Intensive.

German Romance Languages Literatures

AS.210.391. Advanced Portuguese Language & Literature I. 3.0 Credits.
This three-year course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read two complete works by major Brazilian, Portuguese, and/or Afro-Portuguese writers each semester, followed by intense writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. All classes are conducted in Portuguese. Prereq: 210.278 or placement test. Permission required
Prerequisites: AS.210.278 or equivalent score on placement test or instructor approval.
Instructor(s): M. Spiker
Area: Humanities
Writing Intensive.
AS.211.319. ¡Salsa! The Afro-Antillean song. 3.0 Credits.
¡Salsa! The Afro-Antillean song surveys Caribbean music in an international Spanish-speaking context. As a language course, it reviews grammar and instills vocabulary acquisition through the close analysis of the biggest hits of salsa from the past one hundred years. On completion of this course the student will have developed the ability to read and critically discuss music and its history in the Spanish-speaking Caribbean and will have examined cultural roots, market dominance, and media crossovers in the musical universe of the Spanish-speaking archipelago of the Antilles. In completing the course's final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own personal musical interests. Concepts learned in this course will be directly applicable to careers linked to intercultural and international relations while also apply to multiple careers in media, music industry and dance. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Instructor(s): M. Ramos
Area: Humanities.

AS.211.341. Power and Resistance in French Political Thought. 3.0 Credits.
Even as a strong, divine-right monarchy emerged in France, following the Renaissance wars of religion, rebellious French thinkers never stopped questioning the foundations of power. They focused critically not only on the claims of authority issuing from the top, but also on the submissiveness of the governed and the reach of propaganda. This course examines how power shapes minds and bodies, from absolutism to the Revolution, to democratic laïcité. Readings include works by La Boétie, Montaigne, Loyseau, Bayle, Rousseau, Saint-Just, Maistre, Tocqueville, Foucault, Lefort, Rancière and the Assemblée Nationale. Readings and discussion in English.
Instructor(s): E. Russo
Area: Humanities.

AS.211.394. Brazilian Culture & Civilization. 3.0 Credits.
The course is taught in English. No knowledge of Portuguese is required. This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor's permission required)
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.

AS.215.458. Cuba and its Culture Since the Revolution. 3.0 Credits.
We will study the visual and textual arts, cinema, political culture, and blogosphere; reaching back to the first phases in the building of the revolutionary state apparatus and its sovereign mandate. Taught in Spanish.
Prerequisites: AS.210.312[C]
Instructor(s): E. Gonzalez
Area: Humanities.

Readings from colonial times to the present from three cultural legacies, Hispanic, English and French. Centered on slavery and its sequels.
Instructor(s): E. Gonzalez.

Writing Seminars
AS.220.438. Readings in Poetry: Of Late: Poetry & Social Justice. 3.0 Credits.
In this Community-Based Learning course, students will explore poetry of social and political engagement in partnership with high-school age writers from Writers in Baltimore Schools. Participants will put learning into practice by organizing community conversation, reflection, and collaboration. Participation in some events outside of class time will be required.
Instructor(s): D. Malech
Area: Humanities.

AS.220.439. Readings in Fiction: Caribbean Voices. 3.0 Credits.
Caribbean history is reflected in the literature of emigration and collapse of empire. We'll study novels by Naipaul, Rhys, and other 20th century authors.
Instructor(s): W. Biddle
Area: Humanities
Writing Intensive.

Sociology
AS.230.205. Introduction to Social Statistics. 4.0 Credits.
This course will introduce students to the application of statistical techniques commonly used in sociological analysis. Topics include measures of central tendency and dispersion, probability theory, confidence intervals, chi-square, anova, and regression analysis. Hands-on computer experience with statistical software and analysis of data from various fields of social research. Special Note: Required for IS GSCD track students.
Prerequisites: Statistics Sequence restriction: students who have completed any of these courses may not register: EN.550.211 OR EN.550.230 OR EN.550.310 OR EN.550.311 OR EN.550.413 OR EN.550.420 OR EN.550.420 OR EN.550.420 OR EN.560.435 OR AS.280.345 OR AS.200.314 OR AS.200.315 OR EN.560.348;Statistics Sequence Restriction: Students who have completed EN.550.111 OR EN.550.113 may not enroll.
Instructor(s): J. Grigg
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.230.222. Land, Labor, Environmental Rights and Struggles in Contemporary Africa. 3.0 Credits.
The course examines the new wave of social protest and popular uprisings in contemporary Africa through the interconnected themes of land, labor and environmental struggles. Attention will be placed on the early 21st century.
Instructor(s): R. Jacobs
Area: Social and Behavioral Sciences.

AS.230.244. Race and Ethnicity in American Society. 3.0 Credits.
Race and ethnicity have played a prominent role in American society and continue to do so, as demonstrated by interracial and interethnic gaps in economic and educational achievement, residence, political power, family structure, crime, and health. Using a sociological framework, we will explore the historical significance of race and its development as a social construction, assess the causes and consequences of intergroup inequalities and explore potential solutions.
Instructor(s): M. Greif
Area: Social and Behavioral Sciences.
AS.230.265. Research Tools for Global Sociology and Development. 3.0 Credits.
This course will introduce students to a range of software programs that are critical for conducting social scientific research in the 21st century. Students will develop competency in the use of computer programs for statistical analysis, database management, the creation of maps and timelines, and the presentation of research reports. The course uses examples from ongoing social science faculty research projects at Johns Hopkins on global inequality and international development. Required for GSCD track students. Course previously titled “Research Tools and Technologies for the Social Sciences”
Instructor(s): M. Kang
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.230.313. Space, Place, Poverty & Race: Sociological Perspectives on Neighborhoods & Public Housing. 3.0 Credits.
Is a neighborhood just a grouping of individuals living in the same place, or do neighborhoods have collective meanings and impacts on children and families? We will capitalize on research methodologies used to define and describe neighborhoods and their effects on economic and educational outcomes. These include case studies, census data, surveys, quasi/experimental data. Focus is on how research measures neighborhood effects and incorporates community level processes into models of social causation (e.g., social capital/control, community efficacy, civic engagement). Also examined: patterns in residential mobility, segregation, and preferences within black and white populations; development of housing policy in the U.S.; programs to determine how neighborhoods affect issues of social importance. Statistics and public policy background is helpful but not required.
Instructor(s): S. Deluca
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.316. African American Family. 3.0 Credits.
This course is an examination of sociological theories and studies of African-American families and an overview of the major issues confronting African-American family life. The contemporary conditions of black families are explored, as well as the historical events that have influenced the family patterns we currently observe. Special attention will be given to social policies that have evolved as a result of the prominence of any one perspective at a given point in time.
Instructor(s): K. McDonald
Area: Social and Behavioral Sciences.

AS.230.332. Race, Racism & Racial Privilege. 3.0 Credits.
This course will examine the concepts of race, racism, racial privilege in contemporary America, and the West in general. Examples from other countries will be integrated as well. Historical contexts such as the colonialism, the Civil War and Reconstruction, the Civil Rights movement, and the post Civil Rights era will help to provide an understanding of the social, political, economic, and cultural forces processes that have constructed and shaped the concepts of race and the racialized subject over time.
Instructor(s): K. McDonald
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.357. Baltimore and Beyond. 3.0 Credits.
This course uses the city of Baltimore as a lens through which to explore issues of urban inequality. We will focus on Baltimore's history of racial segregation and concentrated poverty, and its effect on the social and economic well-being of the city and its residents, with attention to education, employment, health and crime. Students will learn how to employ Census data, GIS approaches, and sociological research to inform questions about population change, inequality and the distribution of resources across the city and metropolitan region. Students will also work on one or more policy relevant studies based in Baltimore, including: a project on abandoned and vacant housing, a desegregation intervention, and a longitudinal study of inner city youth. Finally, students will become familiar with Baltimore City's programs and policy approaches to addressing the city's most pressing problems, and will design innovative and effective and innovative solutions as part of their course assignments. Enrollment restricted to Social Policy minors only.
Prerequisites: Students that took AS.360.357 may not take AS.230.357
Instructor(s): S. Deluca
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.374. Poverty and Public Policy. 3.0 Credits.
This course examines the causes and consequences of U.S. urban poverty, its implications for health and wellbeing, and explores strategies for addressing it. We cover the major theoretical explanations scholars have advanced to explain the persistence of urban poverty including labor markets, residential segregation, welfare policy, family structure, and the criminal justice system. Within each topic area, students are introduced to a range of interventions aimed at alleviating urban poverty. Students will conduct a formal policy analysis of 20 pages and participate in a mock congressional hearing. Enrollment restricted to Social Policy minors only.
Prerequisites: Students that took AS.360.372 may not take AS.230.374.
Instructor(s): K. Edin
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.377. Colonialism and Anti-Colonialism. 3.0 Credits.
This seminar examines the theories and historiography of colonialism and anti-colonial movements. It focuses on the establishment of the colonial division of labor, comparative colonialism, identity formation, and nationalism as well as anti-colonial movement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

AS.230.381. Sociology of the Middle East and North Africa. 3.0 Credits.
This course takes a sociological approach to the contemporary Middle East and North Africa. Topics include urbanization and demographic change; rentier welfare states and the global political economy of oil; women in higher education and the labor force; the 2011 Arab Spring; conflict in Syria, Libya, and Yemen; Amazigh (Berber) identity in northwest Africa; Israel-Palestine; “Dubai, Inc.” and the sociology of migrant labor; neoliberal Islamic politics in Turkey; cinema and everyday life in Iran; conservative monarchy in Morocco and Saudi Arabia; and the role of the United States in the MENA region. Students will give presentations, write memos, and submit two papers. One aim of the course is to turn students into clear, polished academic writers and thinkers.
Instructor(s): R. Calder
Area: Social and Behavioral Sciences
Writing Intensive.
AS.230.383. Courts, Housing, and the City: A Research Seminar on Social Justice in Baltimore. 3.0 Credits.
This course will join an existing survey of the Housing Court in Baltimore City by the Public Justice Center (PJC) of Maryland to examine the role and process of evictions in the Baltimore civil litigation system. The course will examine the history of housing in Baltimore and the changing role of the courts in housing rights and law from the mid-20th century to the present. Working with the PJC's Human Right to Housing Project, students will be expected to participate in the survey collection process by attending Rent Court and participating in the data collection process, followed by cleaning and analysis of the data. Counts as American Politics/Sociology of the United States for GSCD Track.
Prerequisites: AS.230.205 AND AS.230.265 or permission of instructor
Instructor(s): D. Pasciuti
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.230.385. Schooling, Racial Inequality and Public Policy in America. 3.0 Credits.
After examining alternative explanations for why individuals obtain different amounts and types of educational training, the course focuses on how an individual's family background and race affect his or her trajectory through the educational system. The course covers the specific challenges that have confronted urban schooling in America since the 1960s, including the classic literature on the effects of school and community resources on student achievement as well as the development and later evaluation of school desegregation policies.
The course also considers case studies of current policy debates in the US, such as housing segregation and school resegregation, voucher programs for school choice, and the motivation for and consequences of the establishment of state-mandated testing requirements. Throughout the course, emphasis is placed upon the alternative modes of inquiry and writing which opposing scholars, policymakers, and journalists use to address these contentious topics.
Instructor(s): S. Morgan
Area: Social and Behavioral Sciences
Writing Intensive.

Public Health Studies
AS.280.120. Lectures on Public Health and Wellbeing in Baltimore. 1.0 Credit.
An introduction to Urban Health with Baltimore as a case study: wellbeing, nutrition, education, violence and city-wide geographic variation. Lectures by JH Faculty, local government/service providers and advocates.
Instructor(s): P. Leaf
Area: Social and Behavioral Sciences.

Humanities Center
AS.300.327. Introduction to Comparative American Cultures: Obama and Philosophy. 3.0 Credits.
This course will investigate the philosophical as well as theological, juridical and political, and rhetorical and literary backgrounds that have informed and shaped Barack Obama's writings, speeches, and policy strategies leading up to and during his presidency. While paying minute attention to a few selected controversial debates in domestic and international governance and relations, and while discussing the question of Obama's legacy in and after the upcoming elections, our primary focus will be on understanding the curious blend of Christian realism, influenced by the theologian Reinhold Niebuhr, the tradition of American civic republicanism and pragmatism, and Obama's specific brand of post-Civil Rights, if not necessarily post-racial, politics. All these tenets coalesce in a vision and politics that may well be described as one of "deep" pragmatism. Attention will be paid to Obama's early appeal to "simple ideas" and "small miracles," each of them yielding the Biblical and sobered injunction of a "hope against hope." But extensive consideration of his thought and impact in the assessment of biographers and intellectual historians, legal scholars and political theorists, cultural critics and pundits will add to our attempt to understand and take stock of the Obama phenomenon as well.
Instructor(s): H. de Vries
Area: Humanities.

East Asian Studies
AS.310.308. The Frontier in Late Imperial China. 3.0 Credits.
The tremendous expansion of Chinese frontiers during the late imperial period forced the state and those who lived within it to grapple with complex problems of governance, ethnicity, and the geographic extent of "China". Issues and concerns associated with the massive Chinese frontiers have extended into the present; hence, no one can appreciate the current problems plaguing China's northwestern, southwestern, or coastal regions without an understanding of its historical antecedents. This seminar is designed to introduce major scholarly works and theoretical frameworks on the Chinese frontier.
Instructor(s): J. Bandy
Area: Humanities
Writing Intensive.

Interdepartmental
AS.360.372. Poverty and Public Policy. 3.0 Credits.
This course examines the causes and consequences of U.S. urban poverty, its implications for health and wellbeing, and explores strategies for addressing it. We cover the major theoretical explanations scholars have advanced to explain the persistence of urban poverty including labor markets, residential segregation, welfare policy, family structure, and the criminal justice system. Within each topic area, students are introduced to a range of interventions aimed at alleviating urban poverty. Students will conduct a formal policy analysis of 20 pages and participate in a mock congressional hearing. Permission of instructor required.

Writing Intensive.
Program in Latin American Studies

AS.361.207. Afro-Latin American Biography. 3.0 Credits.
In this course, we will examine biographical accounts of men and women of African descent in Latin America and in the broader Black Atlantic. These individuals include conquistadors and slaves, saints and sinners, revolutionaries and ordinary people. In their life stories, we will not only examine questions of race, gender, and religiosity that were central to the construction of identity in the early modern Atlantic world, but also the nature of the sources that allow us to tell their stories.
Instructor(s): J. Clark
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Study of Women, Gender, Sexuality

AS.363.336. The Poetics & Politics of Sex: Feminist Separatism & Its Afterlives. 3.0 Credits.
In 1977, feminist theorist Marilyn Frye asked, “What is it about separation, in any or all of its many forms and degrees, that makes it so basic and so sinister, so exciting and so repellent?” Her essay, “Some Reflections on Separation and Power” was a response to the emergence and persistence in the 1960s of a feminist separatist politics, as well as its many detractors, both from outside the feminist movement and within (many black feminists, for example, critiqued the movement’s essentialism and its positioning of gender and sexuality above considerations of race). Today, Frye’s question still remains a live one; think, for example, of the now commonplace exclamation that one will “move to Canada” (or “leave Earth” as Tina Fey has it) in the face of an ominous political possibility. In a less facetious form, one might consider the separatism latent in the emergence of queer futurity politics, safe space discourse, and a more general pessimism about reform and assimilation as satisfying answers to a continually oppressive status quo. In this course, we will consider the ongoing salience of the idea of separatism, particularly as it is engaged within politics of gender and sexuality.
Instructor(s): N. Dubay
Area: Humanities.

AS.363.417. Internship/Practicum: Critical Theory and the Possibility of Social Justice. 4.0 Credits.
This course combines a weekly seminar with 4 hours per week in a Baltimore social justice organization, coordinated by the JHU Center for Social Concern. Class discussions draw on readings in ethnography and feminist, queer and critical race studies to address topics such as; race, class and gender inequality, neoliberal development, health, institutional violence and politically engaged research.
Instructor(s): A. Krauss
Area: Humanities, Social and Behavioral Sciences.

Program in Museums and Society

AS.389.376. Enslaved at Homewood: Slavery in 19th Century Maryland. 3.0 Credits.
Students consider the representation of slavery in historic house museums of the late 20th century through the present, and use the university’s Homewood Museum as a laboratory for the development, production and mounting of an exhibit about the men, women and children who labored at Homewood in the nineteenth century. Museums and Society Practicum course.
Instructor(s): A. Schreiber
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.389.377. Black Artists in American Art Museums: Correcting the Canon. 3.0 Credits.
Students are invited to examine critically the history of Black artists exhibiting within American museums. With the help of BMA staff, class will develop interpretation for an installation to accompany a major retrospective of artist Jack Whitten that considers the “canon” of art history as a site of ongoing negotiation between taste-makers, artists, dealers, and critics, as well as art institutions that include the market and the museum. Students will take advantage of archives at the BMA, the Library of Congress and Howard University. Students will help select the artworks and themes for the show; research individual participants in the social networks that facilitated the success of some artists over others; and research the biographies of individual artworks - some that have entered the canon and some that should. M&S Practicum. CBL Course. Cross-listed with Africana Studies.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.378. Collections Remix: Black at Hopkins. 3.0 Credits.
We turn a critical eye on our university’s material culture and memory under the guidance of local experts on collecting and interpreting materials that represent the African-American experience. Students will develop a strategic plan to guide future collecting on campus and will stage creative interventions with or around objects to reveal hidden stories and rethink existing interpretation. M&S Practicum. CBL course.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

Anthropology

http://anthropology.jhu.edu/

The Anthropology Department specializes in socio-cultural anthropology: the study of social and cultural forms of human life using ethnographic, historical, and comparative methods. Faculty in our department are engaged in research that addresses topics considered traditional such as the study of ethnicity, language, religion, family and kinship, or medical pluralism, and also new and emergent issues such as those relating to childhood, technological imaginaries, biomedicine, ecology, state, violence, and popular economies. In all cases, the acute awareness of shifting contexts in which institutions are embedded and the impact of global, regional, and national politics on social life is built into the methodology and the theory engaged by faculty and students. Faculty in our department have research expertise in the Americas, South Asia, the Middle East, and sub-Saharan Africa. Our research is oriented toward the investigation of a number of cross-cutting themes of trans-regional concern rather than a comprehensive coverage of global cultural areas.

The department’s distinctive orientation to anthropology can be characterized in terms of its orientation to non-European anthropological and philosophical traditions, alongside the dominant anthropologies which have been seen as definitive of the discipline in the past. In terms of specific topics, faculty in our department are engaged in research on violence, social suffering and theories of everyday life; the material and moral force of the state; money and value; environments; new kinship; anthropology of religion and secularism; anthropology of medicine; media and visual anthropology; health and well-being; and anthropology of language.

The department offers a B.A. program and a Ph.D. program. The B.A. prepares students either to continue to various employment opportunities or degree in anthropology (and related fields) or to develop anthropological skills and imagination as complementary to pre-
professional training, such as medicine, engineering, and international relations. Undergraduate course work offers an introduction to the basic methodologies and theories of contemporary anthropology through discussion and directed research on these and other topical issues. Student advising helps interested students to develop concentrations, through sequences of complementary courses tailored to their own interests, including electives outside the department. In addition, majors have the option to pursue an honors program.

Undergraduate majors in anthropology are required to do ten courses, four of which are required courses and an additional four must be taken at 300-level or higher, in addition to a language requirement. Students wishing to write an honors thesis are also required to do two additional courses in which they work on their dissertation topics. Minors are required to take seven courses, four of which are required courses.

The core curriculum for majors develops a step-wise sequence from the freshman seminar to the senior honors option. We offer an elective 100-level Freshman Seminar that introduces anthropological approaches to a broad range of contemporary issues. Here, we hope to develop curiosity in anthropology as a way of knowing the world, and to encourage critical reflection by students on their own life experiences. Our 100-level introductory course, Invitation to Anthropology, is geared toward freshmen and sophomores. The objective of this course is twofold: to offer anthropological knowledge and analytic skills to a broad range of students, and to prepare potential majors for further training in social theory and fieldwork methods. Following from this introductory course, our 200-level Ethnographies course furthers student understanding of essential themes through close attention to classic and contemporary ethnographic works in the discipline. The 300-level Methods course is an additional requirement for majors, deepening students’ capacity to link theory and method, preparing students to carry out field research, and guiding students in the writing up and presentation of original research. Building on these foundations, the 400-level Logic of Anthropological Inquiry course, also required of majors, is a thematic capstone course that demands an extended engagement with classic debates and encourages integrative thinking across the range of anthropology courses taken. Majors in anthropology may decide to pursue an honors thesis based on an extended research project. They should discuss their interest in writing a thesis with their faculty advisor in their sophomore year and before the summer of their junior year. Drawing from their previous course preparation and working closely with a faculty advisor, such students spend one summer conducting field research, one semester conducting secondary literature review, and the final semester writing their honors thesis.

Outside of the core curriculum, both majors and minors may take a wide variety of courses. Thematic courses are highly varied and reflect faculty interests, usually including (in any one year) courses in religion and philosophy; medical, legal, economic and linguistic anthropology; and study of diverse areas of the world. Courses on the state, law, and money offer a critical and comparative approach for students aiming toward political, economic, and legal careers. Courses in medical anthropology serve pre-med and public health students. Philosophical and theoretical courses are attractive to humanities students. We see teaching and research as integrally linked, and invite undergraduate students to envisage research as they take introductory and advanced courses in anthropology.

The training of graduate students focuses on providing students with a vocabulary and grammar to engage in anthropological reasoning in socio-cultural anthropology and with skills in research methods. The department emphasizes training in anthropological theory in relation to new developments in other disciplines within the social sciences; understanding of regions in terms of cross-cutting questions rather than geographical questions alone; and the capability to place a problem within a broad history of anthropology that is engaged through multiple national and regional traditions.

Our faculty brings into the classroom an extraordinary range of personal and professional experiences. We are proud to have one of the most diverse faculties in the discipline worldwide, both in terms of gender and ethnic or national origins. Their collective fieldwork experience spans the world, including the Americas, the Middle East, sub-Saharan Africa, and South Asia.

Facilities
In addition to the regular departmental colloquium where invited speakers from Hopkins and other campuses around the world present their ongoing research, the department holds one or two special symposia every year, including one organized by graduate students. The department also invites a distinguished scholar each year to present the Sidney W. Mintz Lecture. The purpose of the Mintz lectures is to integrate scholarly and social concerns, focusing on questions of political and economic inequality, racism, gender, and ethnic differences from an interdisciplinary perspective. Previous lectures have subsequently been published in Current Anthropology.

The Baltimore-Washington area is unusually rich in library, archival, and museum resources relating to anthropology. In addition to the excellent collection in the Milton S. Eisenhower Library, the William H. Welch Medical Library, and other libraries at Johns Hopkins, major anthropological holdings are available at the Smithsonian Institution, the Library of Congress, and the other specialized libraries and museums in nearby Washington, D.C. Students can use the Smithsonian Institution’s ethnological and library collection through a cooperative arrangement.

Financial Aid
Undergraduate majors and non-majors are eligible to apply for a Provost’s Undergraduate Research Award to support special research and write-up projects in their senior year.

Graduate fellowships and teaching assistantships are available, and most students admitted receive support. Stipends are currently offered at $29,000 per year plus fellowships that cover tuition and health insurance. Some additional funds are usually available on a competitive basis for summer field research (including travel grants from the Institute for Global Studies, the Program for the Study of Women, Gender, and Sexuality, and the Program for Latin American Studies), and for special language-learning needs. Write-up students may apply for a Dean’s Teaching Fellowship.

Undergraduate Programs
Courses in the department are open to all students in the university, regardless of their majors. Although there are no formal prerequisites, students with no previous courses in Anthropology are encouraged to consider courses at the 100- or 200-level. Freshman seminars are designed to introduce students to different perspectives within anthropology through close examination of a contemporary issue.

Requirements for the B.A. Degree
(Also see Requirements for a Bachelor’s Degree (p. 7))

To fulfill B.A. degree requirements with an anthropology major, students must complete a total of 30 credits (10 courses) in Anthropology and foreign language through the intermediate level. Only with permission of
the director of undergraduate studies may students use one class taken at another institution towards the major. Students must take completed course materials to the director of undergraduate studies to discuss this exception. Majors must receive a grade of C or better in all major requirements and no major requirements may be taken satisfactory/unsatisfactory. Complete major requirements are:

**Anthropology Electives**

- Two 100-400 level courses in the Anthropology Department: 6
- Four 300- or 400-level courses in the Anthropology Department: 12

**Foreign Language**

- Foreign language through the second semester of the intermediate level

- One cross-listed course taught outside the Anthropology Department may apply towards the major. With permission, one independent study may apply towards the major.

**Honors Thesis in Anthropology**

Students with at least a 3.5 GPA (major GPA) by their junior year are encouraged to write a senior thesis by registering for the two-semester Senior Essay (AS.070.561 Senior Essay-Fall and AS.070.562 Senior Essay-Spring) under the guidance of a faculty advisor.

**Minor in Anthropology**

A minor in anthropology is available to undergraduate students in any major. One independent study may apply towards minor requirements. Minors must receive a grade of C or better in all minor requirements and all course must be taken for a letter grade (no satisfactory/unsatisfactory grading). One cross-listed course taught outside the Anthropology Department may apply towards the minor; all other courses must be taken in the department. Only with permission of the director of undergraduate studies may students use one class taken at another institution towards the minor. Students must take completed course materials to the director of undergraduate studies to discuss this exception. If one of these is accepted, the student may not take a cross-listed course.

**Requirements for the minor are:**

**Anthropology Electives**

- One 100-400 level course in the Anthropology Department: 3
- Two 300- or 400-level courses in the Anthropology Department: 6

**Graduate Program**

**Ph.D. in Anthropology**

The graduate program in anthropology leads to the Ph.D. degree. By admitting a small cohort each year, the Department of Anthropology encourages close working relationships between students and faculty and the opportunity for students to develop their anthropological interests in ways that are uniquely suited to them to become researchers, scholars, and teachers. We also encourage and help develop students wishing to pursue non-academic research careers in keeping with the needs of the contemporary world.

**Requirements for the Ph.D. Degree**

Students will usually spend three years in residence, one year or more conducting field research, and a final year completing the dissertation. Requirements include:

- A total of twelve courses to be completed in the first three years. The first of these courses is Proseminar and is a requirement for incoming students.
- Students will sit a three-hour exam near the end of their first year. Incoming graduate students will be provided with a reading list at the start of the summer before the academic year to initiate their self-directed growth as anthropologists and to help them prepare for the exam.
- Students are expected to conduct exploratory fieldwork during the first summer. They are to write a proposal for this fieldwork and discuss their work upon return in a departmental methodology.
**Faculty**

**Chair**
Niloofar Haeri  
Professor & Chair: Islamic prayers and experiences of religiosity, gender, ritual and language, public appearance and notions of modesty among Jews, Christians and Muslims, social history of moral values in Iran since early 20th century; language ideology, vernacularization and modernity.  
Egypt, Iran and the Middle East

**Professors**
Veena Das  
Krieger-Eisenhower Professor: Feminist movements, gender studies, sectarian violence, Medical Anthropology, post-Colonial and post-Structural theory; South Asia, Europe

Deborah Poole  
Professor: Political, legal, environmental, and visual anthropology; anthropology of the state and expertise; visual technologies; photography and racial thought in Latin America; Mexico; Peru

**Associate Professors**
Clara Han  
Associate Professor and Director of Graduate Studies: Anthropologies of health, well-being, and care; violence; poverty; moral community; subjectivity; law; specifically in relation to incarceration; kinship; and science and technology; Latin America, specifically Chile, and the United States

Naveeda Khan  
Associate Professor: Bangladesh: riparian society, engineered landscapes and the theology of ecological consciousness and climate change; Pakistan: Islam and everyday life; urban anthropology; religion and theology; law and literature; techniques and technologies of perception; US and South Asia: temporality and emergent rationalities.

Juan Obarrío  
Associate Professor and Director of Under Graduate Studies: political, law and temporality; theology in relation to state and the economy, memory and subjectivity, magic, violence, value, experimental writing. Southern Africa, Latin America.

Anand Pandian  
Associate Professor : philosophical anthropology / postcolonial and posthumanist ecology / sensory ethnography / experimental writing / anthropological methods / Baltimore / India / Earth

**Assistant Professors**
Alessandra Angelini  
Assistant Professor: Politics and aesthetics of urban maps, models, and simulations. He uses ethnographic and historical data to show that different representations of the city inflect debates over how we imagine and manage it. South America, specifically Brazil, Rio de Janeiro.

Michael Degani  
Assistant Professor: Africa, Economic Anthropology, Energy, Infrastructure, Urbanism

Tom Özden-Schilling  
Assistant Professor: First Nations, political ecology, cartography, science and technology studies, expertise, forestry, climate change, media. Canada, specifically, British Columbia.

**Professors Emeriti**
Jane I. Guyer  
Social and economic anthropology, money and culture, household and gender, West Africa

Pamela Reynolds  
Ethnography of children and youth—labor, healing, ethics; state violence; the political actions of the young and their involvement in armed conflict; ending war—truth, justice, and the archive; philosophers on the young; Southern Africa

**Joint Appointments**
Jeremy Greene  
Professor and Chair of History of Science: Twentieth century clinical medicine; pharmaceuticals; medical technology; medical anthropology; global health; history of disease.

Paola Marrati  
Professor of Humanities, joint appointment in Dept. of Philosophy, Director of the Program for the Study of Women, Gender, and Sexuality

Erica Schoenberger  
Professor (Environmental Health and Engineering): Economic Geography, Regional Development

Todd Shepard  
Associate Professor, History, Co-Director, Program in the Study of Women, Gender, and Sexuality

Dimitrios Yatromanolakis  
Associate Professor (Department of Classics): research centers upon both technical and more cross-disciplinary fields: archaic and classical

**Interdisciplinary Ph.D. Degrees**
Students may petition the department and the graduate board to create joint Ph.D. courses of study. Past cases have included Anthropology/ Public Health and Anthropology/Intellectual History (in the Humanities Center).

For current faculty and contact information go to http://anthropology.jhu.edu/people/

For further information about graduate study in anthropology, contact the academic program administrator in the Department of Anthropology or visit the departmental website at http://anthropology.jhu.edu.
Greek literature and performance cultures, sociocultural history, vase-painting and vase-inscriptions; Greek papyrology and epigraphy; and historical and comparative anthropology.

For current course information and registration go to https://sis.jhu.edu/classes/

Courses

**AS.070.104. Special Opportunities in Undergraduate Learning: Anthropology of Sound. 1.0 Credit.**
This course explores recent discussions on the possibilities of sound to challenge and expand conventional methods used in the humanities, contemporary social research, and the natural sciences. Drawing from a range of philosophical, historical, psychoanalytic, linguistic, anthropological, artistic, and scientific sources; students will discuss the ways sound has been historically experienced, represented, produced, classified, cancelled, and circulated in different parts of the world. These topics will be examined through reading assignments, listening sessions, and weekly sound recording assignments.

Instructor(s): G. Valdivia Corrales
Area: Humanities, Social and Behavioral Sciences.

**AS.070.109. Introduction to Environmental Anthropology. 3.0 Credits.**
What is an “environment,” socially speaking? How have pipelines, animals, conservation, and capitalism shaped the way we talk about “nature” and “society” in the present day? This course examines the mutual transformation of humans and their environments through ethnography, environmental history, cultural and political ecology, human geography, and social theory.

Instructor(s): T. Ozden-schilling
Area: Humanities, Social and Behavioral Sciences.

**AS.070.113. Freshman Seminar:. 2.0 Credits.**
Various topics.

Instructor(s): A. Angelini
Area: Humanities, Social and Behavioral Sciences.

**AS.070.122. Climate Change in Everyday Life. 3.0 Credits.**
Climate change is the average of weather over long periods of time. It is usually studied by means of global simulation models. More recently human activity affecting the climate has also begun to be studied and with it the effects of climate change on the human body, activity and society. In this course we will draw upon film, scientific reportage, ethnography, literature and philosophy to explore the human embodiment of climate change within everyday life.

Instructor(s): N. Khan; R. Tobias
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.070.126. Photography in Anthropology. 3.0 Credits.**
We will examine historical uses of photographs, critiques of them and more recent creative uptakes of photography in anthropology. We will learn from the use of photographs by anthropologists in the Hopkins department. We will also undertake independent projects. Students will learn to critically engage and mobilize images through the history of its use in anthropology.

Instructor(s): D. Poole; N. Khan
Area: Humanities, Social and Behavioral Sciences.

**AS.070.129. Introduction to the Anthropology of the Middle East. 3.0 Credits.**
This course introduces the students to some of the main themes and debates shaping the anthropology of the Middle East. It will begin by critically analyzing the definition of the ‘Middle East’ and of the ‘Orient’ and by presenting an overview of the ‘zones of theory’ which characterized the discipline at its inception. It will then explore the contemporary re-articulations of such themes and the emergence of new themes and debates, such as the secular/religious divide, the modernity debate, the anthropology of Islam and the ethical turn, gender and feminism, neoliberalism, consumerism, cosmopolitanism, migration and mediation. The objective is to convey the main lines of anthropological inquiry within each theme, and to show their relevance to the understanding of contemporary Middle Eastern societies.

Instructor(s): P. Abenante
Area: Humanities, Social and Behavioral Sciences.

**AS.070.132. Invitation to Anthropology. 3.0 Credits.**
Click. The screen that brings you last night’s Instagrams and celebrity gossip also flashes glimpses of melting icecaps and burning rubble. These are complex times for human beings, both exciting and unsettling. This course introduces anthropology as a way of reflecting on the challenges of contemporary life around the globe, focusing on themes such as migration, warfare, ecology, inequality, and addiction.

Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.070.133. Studying the HIV/AIDS Epidemic. 3.0 Credits.**
This course will introduce students to the study of the HIV/AIDS epidemic as scholars in the social science and humanities have undertaken it. The readings will include ethnographies of the disease in the non-west and short theoretical readings to complicate notions of health, pleasure, healing and cure. Furthermore, by focusing on the various regions of Africa, the course hopes to demonstrate the manner in which the social and cultural landscape change the experience of the epidemic.

Instructor(s): V. Saria
Area: Humanities, Social and Behavioral Sciences.

**AS.070.134. Chemical Pollution and Social Life. 3.0 Credits.**
The present is marked by a ubiquitous exposure to different sorts of toxic chemicals: from disasters that affect entire communities to the built environments in which we live and work, from the traces of pesticides in our food to the worldwide disrupting effects of oil production. Drawing from social theory, ethnography, environmental history, policy documents, newspaper articles, commercial ads, and documentaries, this course will introduce anthropology as a way of thinking through the interactions between processes of chemical pollution and social worlds.

Instructor(s): J. Moreno Garcia
Area: Humanities, Social and Behavioral Sciences.

**AS.070.138. Thinking Through Pain. 3.0 Credits.**
Despite being a common experience, pain remains a mystery for both medicine and the humanities. Can it be described? Measured? Eliminated? Is it the same for everyone? This course explores some of the ways in which pain is represented, interpreted and addressed in contemporary clinical and social settings, combining ethnographic and testimonial literature with fiction and film to illuminate key ethical and political issues at stake in defining and treating pain.

Instructor(s): P. Madariaga Villegas
Area: Humanities, Social and Behavioral Sciences.
AS.070.139. Markets and Morals. 3.0 Credits.
This course studies forms of exchange as they are imagined and experienced across diverse political and religious settings. The aim is to understand the cultural rationalities and moral dimensions of economic ideas and activities, such as gifts, commodities, sacrifice, investment, credit, debt and value.
Instructor(s): A. Saraf
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.143. Anthropology of Markets and Capitalism. 3.0 Credits.
Capitalism is built on social and cultural processes. In this course, we explore the culture of capitalism across diverse settings — a fish market in Tokyo, an investment bank in Wall Street, and the organ donation economy in China, among many others. We ask what motivates the makers of markets today, as well as their critics.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.144. Anthropology and Visual Media. 3.0 Credits.
This course examines the production of visual media within anthropology. We look at the particular ways in which visual media such as film, television, and photography shape anthropological practice.
Instructor(s): C. Venkataramani
Area: Humanities, Social and Behavioral Sciences.

AS.070.154. Maps and Mapping. 3.0 Credits.
This course explores maps as cultural documents and ethnographic sites. Students will learn how cultural understandings of space, time, and the visible world shape cartographic conventions. Through mapping exercises we will explore how ethnographer can use maps to theorize the nature of political, cultural, and economic life.
Instructor(s): D. Poole; V. Procupez
Area: Humanities, Social and Behavioral Sciences.

AS.070.189. Islamic Critique: Ethical and Political Reasoning. 3.0 Credits.
This course investigates the concepts and practices of critique available in contemporary Muslim societies. Focusing on moral and political dimensions of critique, we examine genealogies and exchanges among Islamic traditions and those of the European Enlightenment. Dean's Prize Freshman Seminar.
Instructor(s): J. Bush
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.202. Economic Anthropology. 3.0 Credits.
How do the abstract principles of economics play out in a diversity of times and places? This course surveys anthropological research on the social organization of labor, the political institutions that underlie wealth and property, and the cultural meanings of money and commodities. Through these topics, we will look at enduring debates about the rationality of markets and the nature of capitalism.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.203. Healing: Politics and Poetics. 3.0 Credits.
Metaphors of health and illness; individual and social. The body in pain and the body politic. Ethnographies of historical memory vis-à-vis medicine, epidemics, sacredness, shamanism, terror, humanitarianism, truth and reconciliation.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.204. An introduction to Islamic Intellectual History. 3.0 Credits.
This course will study the vibrant world of the Seljuks, an Islamic empire that flourished between 1037 and 1157 AD, from Khorasan across Baghdad to Hijaz and Anatolia. As an exploration in intellectual history, we will attempt to understand the social world of the Seljuk Turks through political, religious, and literary texts. We will first read a political treatise, Siyasatnama (The Book of Government), written by Nizam al-Mulk (1018-1092), the formidable minister of the Seljuk Empire, who oversaw the reign of three successive sultans during the second half of the eleventh century and created a strong bureaucratic state for the Seljuks. During his administration, he commissioned the development of madrasas, colleges dedicated to the teaching of Islamic law, theology, literature, and history. The most famous of these madrasas was the Baghdad Nizamiyya where Al-Ghazali (1058-1111) taught from 1190 and 1194. We will read Al-Ghazali’s Deliverance from Error in order to explore the state of religious learning at the peak of the Islamic Golden Age. Having discussed the political and religious foundations of Islamic orthodoxy in the eleventh century, next we turn to the rise of heterodox movements that challenged the authority of the Seljuk state. We will briefly examine the history of the Ismaili branch of Shia Islam, focusing on the politico-religious ideas of its most potent representative, Hassan-i Sabbah (1050s-1124). Finally, we will end our class with the Rubaiyat of Omar Khayyam (1048-1131), the prominent poet and polymath of the eleventh century.
Instructor(s): B. Polat
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.205. Post-Soviet Russia: An Anthropological Perspective. 3.0 Credits.
This course is designed to introduce students to anthropology’s contribution to ongoing conversations about Russia’s political and economic system, social life, as well as Russia’s place in the world since the fall of the Soviet Union. Students will be encouraged to think beyond easy distinctions between socialism and post-socialism, Putin’s Russia and the West, often starkly and unreflectively established by commentators and in the media. Topics will include post-socialist transition, memory, violence and war, gender and sexuality.
Instructor(s): G. Hervouet-Zeiber
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.211. The Production of European Culture. 3.0 Credits.
This course is an introduction to the anthropological study of “cultural production” in Europe, from literature and performance to museums and public art.
Instructor(s): A. Brandel
Area: Humanities, Social and Behavioral Sciences.

AS.070.222. Africa in the 21st Century. 3.0 Credits.
Rapid urbanization has created new needs, occupations, entertainments, etc., outside the “formal sector”. We use anthropological studies, African literature, film and the press on-line to understand making a living.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.224. Plastic. 3.0 Credits.
Plastic is a ubiquitous substance in the contemporary world. Ideas about the plasticity or malleability of human nature are also pervasive. Drawing on anthropology, history of science, environmental studies, art, design, films and other media, this course will examine the plastic dreams and nightmares that haunt our lives today.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.226. Chemical Pollution and Social Life. 3.0 Credits.
The present is marked by a ubiquitous exposure to different sorts of toxic chemicals: from disasters that affect entire communities to the built environments in which we live and work, from the traces of pesticides in our food to the worldwide disrupting effects of oil production. Drawing from social theory, ethnography, environmental history, policy documents, newspaper articles, commercial ads, and documentaries, this course will introduce anthropology as a way of thinking through the interactions between processes of chemical pollution and social worlds.
Instructor(s): J. Moreno Garcia
Area: Humanities, Social and Behavioral Sciences.

AS.070.228. Photography and Writing: Crafting an Anthropological Text. 3.0 Credits.
This course explores resonances between photography and anthropological writing. Students will be introduced to basic techniques in photographic composition. How do photography and anthropology share techniques of rendering people, places, and things? Other topics include the role of sensation, reflection, and creativity in depicting a scene, as well as care and ethics. Students will develop an individual project that folds photographic sensibilities into the writing process.
Instructor(s): M. Sehdev
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.230. From Jihad to Revolution: The Political Struggles of Women in the Middle East. 3.0 Credits.
The course explores the role of women as political prisoners, combatants and activists in the modern history of the Middle East using a multidisciplinary approach. It explores the history of women's engagement in political struggles in the Middle East over the long durée starting with anti-colonial movements in the 20th century up until the recent uprisings known as the “Arab Spring”. The course is geared towards the examination of the ways in which politics, in a broad sense, is gendered in the Middle East by examining how the social and political construction of women as political subjects influence the nature and practice of political life, as well as the ways in which sexual difference has served as a basis for social and political organization.
Instructor(s): F. Halbouni
Area: Humanities, Social and Behavioral Sciences.

AS.070.231. Housing Matters. 3.0 Credits.
This course will collectively craft an anthropological critique of housing, both as a social concern and as an object of public policy and urban planning. As a key component of the structure and functioning of cities, housing is instrumental to urban governmentality, segregation, and citizenship, as well as to cultures of consumption and class formation, identities, solidarities and the imagination of alternative social orders. We will examine how the material and social effects of housing shape the politics of difference, rights, markets and property relations, consumption and activism in the US urban context, as well as social experiences in other regions of the world.
Instructor(s): V. Procupez
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.233. Africa as Laboratory. 3.0 Credits.
Africa, as anthropologists have noted, has long been a “laboratory of the future.” By tracing the intersections of technology and politics, this class considers the various experiments in oppression and liberation that have unfolded within it. Following a broad historical arc, we begin with colonial medicine, racial science, and urban planning; move to national infrastructures and postcolonial resource extractions; and finally consider contemporary African engagements with consumer technology.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.235. Anthropology of Christianity. 3.0 Credits.
This course introduces students to the study of Christianity from the Anthropological perspective. Among the themes discussed are: Christian conversion, theology, practice, and knowledge in a range of national contexts. The course considers broad trends in global Christianity, including the retreat of traditional Catholicism and the surge of charismatic forms of Christianity, such as Pentecostalism and Charismatic Catholicism.
Instructor(s): J. Richlin
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.237. Conflict and Environment. 3.0 Credits.
How do conflicts in and over environments shape our understandings of identity and belonging? Violence, resource loss, and resettlement may shape landscapes through physical infrastructures or sites of extraction, but they also live on in memory, art, and other social practices. From the fencing of the American west to attempts to save Andean glaciers through the legal recognition of “earth beings,” this course examines the many ways environments and conflict co-shape one another.
Instructor(s): T. Ozden-schilling
Area: Humanities, Social and Behavioral Sciences.

AS.070.241. African Cities. 3.0 Credits.
Over the past two decades, African cities have absorbed rapid population increase without accompanying economic growth. Students will review the major challenges of this mode of urbanization and explore the vibrant ways residents have sought to meet them. Following anthropology’s commitment to lived experience, we will track these issues through the twists and turns of everyday life, and consider what they may say about urbanity more broadly in the 21st century. Topics include livelihood, the built environment, conflict and membership, and popular culture.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.249. Latin American Cities: Public Spaces and Private Lives. 3.0 Credits.
This course will explore the relationship between public space and forms of political expression as well as the cultural implications of various senses of privacy and domesticity in contemporary Latin American cities. Drawing on recent anthropological and historical texts, we will study the formation of urban public space in the region, as well as its use and representation by different social, political and ethnic groups.
Instructor(s): V. Procupez
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.251. Aliens, iPads, and Neurotribes: An Introduction to the Anthropology of Autism. 3.0 Credits.
This course is an overview of the emerging anthropology of autism. It surveys the history of the autism diagnosis – from its original formulation at Johns Hopkins in 1943 to its rapid expansion into a "spectrum" condition in the late 1990s – and the ways in which social scientists of different disciplines have tried to analyze the role of social and cultural factors in its evolution. The course also looks at a range of ethnographic studies that have asked what it means be autistic in today's world.
Instructor(s): D. Platzer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.253. Introduction to Medical Anthropology. 3.0 Credits.
Is illness bound within an individual body, or is it entangled with our relations? What are the ethics and politics of the doctor/patient relation? How are medical technologies changing the way we experience illness and healing? How have global institutions responded to the problems posed by disease and development? Drawing on ethnography, film, and literature, this course introduces students to how anthropologists have explored and researched problems related to health and illness.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.255. Gift and Sacrifice. 3.0 Credits.
How do gifts become the foundation of society? How does the fetish take control over a person? What is the meaning of the ritual sacrifice of living beings and things? The course will explore classical and contemporary anthropological explorations of circulation, exchange, of power, dread and desire.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.259. Cuban Intellectuals, Cinema, and the State. 3.0 Credits.
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences.

AS.070.264. What is Scientific Experimentation?. 2.0 Credits.
How do scientists design and conduct experiments? In what ways experimental results advance our understanding of scientific theories? In this introductory course, we will discuss how experimentation contributes to scientific knowledge making. Reading a number of key articles, we will explore the ways in which an experimental model is developed in behavioral neuroscience. We will discuss how neurobiologists interpret psychological concepts and theories by drawing on animal experimentation.
Instructor(s): B. Polat
Area: Humanities, Natural Sciences.

AS.070.267. Culture, Religion and Politics in Iran. 3.0 Credits.
This is an introductory course for those interested in gaining basic knowledge about contemporary Iran. The focus will be on culture and religion and the ways they in which they become interwoven into different kinds of political stakes.
Instructor(s): N. Haeri
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.268. Police in Ethnographic Perspective. 3.0 Credits.
This course examines policing throughout history and across the world. Course readings will provide an empirical account of the many diverse forms of police and the issues associated with them.
Instructor(s): V. Kumar
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.273. Ethnographies. 3.0 Credits.
What does it mean to translate the field onto the page? This course explores the craft of ethnography and its relationship to anthropological knowledge. Reading a series of classic and contemporary works, and engaging in our own writing experiments, we attend to the knotty problem of rendering lived experience, attending to narrative, voice, structure, and the relationship between description and analysis.
Instructor(s): T. Ozden-schilling
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.275. Reproduction, Kinship, and the State. 3.0 Credits.
What makes a relative? How are reproductive futures made and unmade? This course takes reproduction as site to examine the interplay of kinship relationships and the state. We will take topics including adoption, gay parenting, the medical and social aspects of childbirth, and reproductive technologies to explore how reproductive futures are unevenly distributed, endured, aspired to, and re-made.
Instructor(s): C. Han, C. Sufrin
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.277. Contested Indigeneity. 3.0 Credits.
This course will introduce students to the diversity of indigenous peoples and their situations globally, as well as to their agency and innovation in grappling with challenges across a range of social systems, political contexts, and ecological conditions. Cross-list: PLAS
Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.278. “Cutting (out) the Middleman”? 3.0 Credits.
Middleman are popularly conceived as a person who acts as an interface between two parties, usually for a fee. The figure of the middleman, however is seen in a negative light as an exploitative element. Rather than assume the middleman to be a given entity, this course takes a detour into ethnography, fiction and film to rethink how specific social milieus shape practices, politics and networks of mediation that exceed the physical figure itself. This course will thus, cut the middleman “out” of everyday life and draw mediation into our field of vision.
Instructor(s): Staff
Area: Humanities, Social and Behavioral Sciences.

AS.070.279. Ecological Anthropology. 3.0 Credits.
This course explores questions of nature, ecology, and environment from an anthropological perspective, drawing on case studies from around the globe. Topics will include human and animal relations, forest and marine livelihoods, industrial development and activist politics, as well as the urban ecology of Baltimore.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.281. Home and Belonging. 3.0 Credits.
In this course we will examine different conceptions and experiences of "home" through studies of domesticity, kinship and household in diverse cultural settings. Reading anthropological analysis of urban built environment and locality, we will explore the notions of home and homeland, as realms of care, intimacy and belonging yet also as sites of subjection, discrimination and gender/racial inequality.
Instructor(s): V. Procupez
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.285. Understanding Aid: Anthropological Perspectives for Technology-Based Interventions. 3.0 Credits.
This course combines anthropological perspectives with the discussion and examination of technology-based interventions in the field of development and aid policies, with particular focus on activities related to water resources, sanitation, and hygiene. Readings and discussions analyze some of the theoretical, historically rooted, and practical issues that challenge those who hope to provide effective aid. A key aim of this course is to provide students with better understanding of cultural, social, environmental and economic issues relevant to technical intervention in developing countries.
Instructor(s): E. Cervone; W. Ball
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.290. Modern South Asia: Bangladesh/Pakistan. 3.0 Credits.
Bangladesh and Pakistan, two major regional players in South Asia, originate in the 1947 Partition of India and shared nationhood between 1947 and 1971, ending with the War of Independence in 1971 in which Bangladesh separated from Pakistan. Since that time the two nation-states have been on different paths that have sometimes mirrored each other. This course brings together contemporary works of national histories, social movements and cultural production to consider the politics of self-differentiation and the points of convergences.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.292. Landscape and Power. 3.0 Credits.
How does the production and public interpretation of maps, photographs, and other visual media shape struggles over resources, political power, and public health? Surveying approaches from political ecology and environmental history, this course will expose students to a range of ethnographic strategies for analyzing media amidst environmental conflicts.
Instructor(s): T. Ozden-schilling
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.293. Anthropology of Material Worlds. 3.0 Credits.
This course explores how anthropologists study material forms and objects in relationship to social, political and cultural life. Topics to be considered include, totemism, art, engineering, garbage, display, collection, and the fetish.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.294. Political Anthropology of Africa. 3.0 Credits.
The course will explore classical and contemporary ethnographies of the political in Africa, examining how their authors address issues of power, hierarchy and symbol. We will study various articulations of state, ethnicity and community that are analyzed by observing relations between power and resistance or between law, economy and violence through war, custom and ritual. The seminar will also address the way in which Africa has been constituted as a key source of the sub-field of political anthropology through colonial trajectories, postcolonial detours and the political imagination of the past and the future.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.295. Conflict and Security in a Global World. 3.0 Credits.
Students will be introduced to problems of global governance in the context of transnational conflicts, changing nature of war, new epidemics and pandemics, and the threats of planetary extinction. What are the ways security is imagined and what kinds of political passions are mobilized for security of people versus security of states?
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.296. Introduction to Migration Studies. 3.0 Credits.
How can we understand the city from positions of marginality and risk? What challenges does urban living pose to its most vulnerable residents? We will examine these questions, and methodological and conceptual issues they raise, with anthropological research from five cities: Johannesburg, São Paulo, Ibadan, New York, Kuala Lumpur. We will explore each city from the perspective of particular residents and the specific struggles they face, including crime and security, economic uncertainty, and sexual discrimination.
Instructor(s): J. Richlin
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.297. Discover Hopkins: Medicine, Sports, and Culture. 1.0 Credit.
This course examines how medicine is practiced in different cultures around the world. In particular, we draw on theories and concepts from medical anthropology to study how these differences reveal alternative perspectives on the body, its health and its capabilities. To sharpen our inquiries into cultural differences surrounding bodily health, we look comparatively at the anthropology of sports and bodily performance. In looking at how concepts including illness, wellness, and injury differ across cultures, we consider, for example, how the bodily experience of pain not only varies according to societal beliefs and behaviors, but also changes as one encounters the limits of athletic performance. In addition to introducing how cultural anthropology engages with medicine and sports performance, this course enriches scientific interest in medicine by teaching students techniques of critical reasoning that powerfully investigate both how medicine is practiced and the cultural phenomenon of bodily health. Prior study in anthropology is not required. We anticipate talks from two current medical residents who were undergraduate majors in anthropology, a high-level athlete, and a field trip to speak with physicians at the Maryland Medical Center.
Instructor(s): T. Thornton
Area: Social and Behavioral Sciences.

AS.070.298. The Family at War: Crisis & Ambivalence in the Study of Kinship. 3.0 Credits.
This course will introduce students to one of the foundational concerns of anthropology and bring to the fore critiques that bear upon what it means to relate to one another. Students will be introduced to theories of kinship and the myriad challenges to fixed notions of the family. Specifically, course readings will consider interventions in anthropological studies of kinship, such as in studies of new reproductive technologies and queer kinship. In addition, course readings will consider the notion of the family in colonial and "post"-colonial contexts, as well as in "post"-conflict societies. A primary concern of the course will also be to encourage students to think critically about the ways in which knowledge is produced, institutionalized, and disseminated.
Instructor(s): M. Banahi
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.300. The Global Artwork. 3.0 Credits.
This course is about art practice in a postcolonial context, where the techniques and pictorial concepts formed by a European history of art are confronted by other traditions of representation, beset by different kinds of political struggles, and posed against the background of religious traditions other than that of Christianity. What problems of history, difference and the self arise in this context, and what forms of art practice emerge to address these problems? In what ways do these forms of art practice draw upon religious traditions, and how do we think about the displacement of religious traditions in modern art? In this course, we will explore these questions by examining the modern art of the Middle East, South Asia, and China, in conjunction with readings from anthropology, art history, comparative literature, philosophy and religious studies.
Instructor(s): S. Al-Bahloly
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.302. Crisis and Futurity: New Ethnographies of Africa. 3.0 Credits.
"Africa Rising" or "The Hopeless Continent?" Within the span of a decade, The Economist magazine famously declared each to be true. In this class we turn to the genre of ethnography, with its focus on lived experience and critical nuance, to make sense of this seeming contradiction. We explore the themes of crisis and futurity through new works by Mbembe, De Boeck, Obarrío, and others.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.303. The Romantic Legacy of Anthropology. 3.0 Credits.
The word "romantic" has long carried negative connotations within anthropology meaning the tendency to idealize, exoticize, or seek out the irrational. Instead, through a focus on the themes of science, nature, art, intuition, systematicity and creativity, we suggest that romantic philosophy has offered and continues to offer much of interest for contemporary anthropology. Drawing on readings in philosophy, anthropology, science and literature, we explore the long suppressed romantic legacy of anthropology.
Instructor(s): A. Brandel; N. Khan
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.307. Markets and Morals. 3.0 Credits.
This course studies markets across diverse religious and political settings to explore the cultural rationalities and moral dimensions of economic activities such as exchange, circulation, investment, credit, debt and value.
Instructor(s): A. Saraf
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.070.308. Norms and Emotions: Anthropology of Psychiatric Knowledge. 3.0 Credits.
This course will introduce students to anthropological understandings of therapeutic and scientific practices in contemporary psychiatry. Through a selection of seminal readings in anthropology and history, we will explore the integral relationship between psychiatric knowledge and social and economic contexts. The course material will expose students to diverse approaches in the scholarship, which explore the role that psychiatric knowledge plays in the administration of social life and in shaping present cultural understandings of self and interpersonal relationships.
Instructor(s): B. Polat
Area: Humanities, Social and Behavioral Sciences.

AS.070.313. The Anthropology of Belief: Religious Experience, Publics, and Personhood. 3.0 Credits.
The aim of this course is to enable you to ask intelligent questions about the ways individuals are called upon as "religious", and more specifically, to allow to you to engage in a reflection on the publics of which they are a part, and the means by which they come to cultivate a sense of personhood. Closely reading theory, ethnography, and literature in relation to each other, we will try to develop a nuanced understanding of the many ways in which human beings have imagined and conducted themselves as religious persons. How do ideas of imagination, habit, desire, and the senses play into our understanding of cultures of faith?
Instructor(s): M. Wilson
Area: Humanities, Social and Behavioral Sciences Writing Intensive.
AS.070.314. Activism and Assembly, Local and Global Connections. 3.0 Credits.
This course offers an anthropological perspective on political mobilization and struggles for social change and citizenship rights in several regions of the world. It charts collective action among the urban poor, indigenous peoples, queer rights activists, feminists, environmentalists and grassroots groups in various cultural and political contexts, to examine methodologies, representations, and local and global networks.
Instructor(s): V. Procupez
Area: Humanities, Social and Behavioral Sciences

AS.070.317. Methods. 3.0 Credits.
This course aims to teach basic fieldwork skills: Choosing and entering a community; establishing contacts; learning to listen and to ask questions and locating archival material that might be relevant. It is a hands-on course that increases student familiarity with various neighborhoods such as the Arts District in Baltimore. Recommended Course Background: two or more prior courses in anthropology (not cross-listed courses).
Course is a requirement for anthropology major.
Instructor(s): V. Procupez
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.318. The Atlantic World. 3.0 Credits.
This seminar explores the formation of the South Atlantic through a reading of historical and ethnographic texts. We examine the making of history and culture as contentious fields of struggle.
Instructor(s): A. Angelini
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.320. Anthropology of Time. 3.0 Credits.
The course is a cross-cultural exploration of ideas of time and temporality found in ethnographic, philosophical and literary sources: Anthropological perspectives on relations among past, present and future; Ritual, imagination and social practice in the contexts of religion, development, finance, catastrophe, crisis, democracy, revolution; Analysis of representations of time and the Other in anthropological works and media reports; the contemporary and the untimely.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.327. Poverty's Life: Anthropology of Health & Economy. 3.0 Credits.
Medicine, economics, and ethics have profoundly shaped debates on poverty. This course analyzes these debates and tracks the relationships between body, economy, and the everyday. How can anthropological reasoning and methods inform approaches to health and economic scarcity and insecurity?
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.331. Anthropology of Poetry and Prayer. 3.0 Credits.
What kind of activity is prayer? Are we talking to God(s), to our ancestors, to ourselves? What do poetry and prayer share? The course will explore these and similar questions with particular attention to questions of repetition, memory, meaning and presence.
Instructor(s): N. Haeri
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.333. Theologies of Political Life. 3.0 Credits.
This course explores the relationship between modern political forms and theological traditions. Looking at developments both in the West and the postcolonial world, we will examine the multiple ways in which theological traditions have continued to inform how political life is conceived and pursued. In particular, we will focus on the relation between liberalism and the Christian tradition; the turn to messianism in critical theory; the transformation of the shari?a into a legal form; and its imbrication in anti-colonial politics.
Instructor(s): S. Al-Bahily
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.335. Anthropology of Science and Medicine. 3.0 Credits.
This course will introduce students to a number of key concepts and methods in anthropology of science and medicine. Providing a general introduction and a systematic survey of the scholarship, the course seeks to shed light on the medico-scientific problems of modern life from the viewpoint of social-scientific inquiry. Through seminal publications within the field, we will explore the effects of scientific research and science-based medicine on human life, social relations, and cultural understandings of self. We will also discuss the ways in which cultural norms and values inform and shape the recent developments in science and medicine.
Instructor(s): B. Polat
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.337. Digital Media, Democracy, and Control. 3.0 Credits.
This course examines how digital technologies enable new publics that circumvent state and social controls as well as how they are mobilized to confirm existing racial, gendered, and political hierarchies.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.340. The Elementary Forms of American Religious Life. 3.0 Credits.
In the United States, the nation that in its infancy so famously erected a "wall between Church and State," religion remains a persistent, and insistently public concern today, occupying our literary imagination, filling dockets and riding the national airwaves. Far from dropping out of a rapidly secularizing public sphere, specific forms of religious life have become deeply embedded in America, while the nation has also impressed its own particular institutional character upon religious expression. This course takes an anthropological lens to the particularity of American forms of religious life, asking what claims they make on the liberal subject, and through what enduring institutional forms and channels.
Instructor(s): C. Block
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.070.343. On Seeing: Between Religion and Art. 3.0 Credits.**
This course reflects on what it is to see, by examining how different religious traditions have conceived of seeing, and then considering how seeing is organized by modern forms of art practice. Our inquiry will range across a variety of cases—from devotional practices in Christianity and Hinduism; to concepts of vision in the Islamic tradition; to the critique of images during the Protestant Reformation and the legacy of that critique in modernism; and to the development of new technologies like photography and film—and it will draw on readings from anthropology, art history, critical theory and religious studies.

Instructor(s): S. Al-Bahloly
Area: Humanities, Social and Behavioral Sciences.

**AS.070.346. Cinema and Ethnography. 3.0 Credits.**
Films, like ethnographies, stage encounters with foreign worlds. We will investigate this parallel by examining, side-by-side, cinematic and anthropological representations of subjects like environmental conflict, urban poverty, religious pilgrimage and media culture.

Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

**AS.070.347. Anthropology and Public Action. 3.0 Credits.**
Anthropologists have used their expertise in public debates, legal cases, advisory roles and so on, and have studied the “public sphere”. General and case studies, following of our professional association, shows how anthropological knowledge has been mobilized.

Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.070.348. Anthropology of Mental Illness. 3.0 Credits.**
This course explores how the institutions of the family, state, and neighborhood respond to and shape mental illness; how the normal, abnormal, and pathology are experienced and defined; and how disease categories circulate in social worlds.

Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.

**AS.070.352. Evolution, Ecology, Becoming. 3.0 Credits.**
The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orients anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others.

Co-listed with AS.070.610
Instructor(s): A. Goodfellow; N. Khan
Area: Humanities, Social and Behavioral Sciences.

**AS.070.354. Religion and Media. 3.0 Credits.**
This course examines the ways in which conventional and non-conventional media recreate or transform religious experience in modern life. Increasingly, religion is experienced not only in sacred spaces and as ritual prescriptions, but also through the information that is disseminated through radio, TV, and the Internet, as well as in consumer culture and political speeches. Beginning with this proposition that our ideas about religion are shaped not only by historical and scriptural legacies, but as well as by material practices and other sundry conditions of mediation, of which our present times supply many, we will reexamines how questions of revelation, belief, spirituality, ethereality, and ritual practice are constituted by these irreducible ways, thus complicating the neat separation of religion and secularism, or, for that matter, religion and culture.

Instructor(s): S. Bagaria
Area: Humanities, Social and Behavioral Sciences.

**AS.070.372. Religion and Media. 3.0 Credits.**
We will closely examine the narrative form and force of a few major works of anthropological writing, and pursue experiments of our own in ethnographic description and expression. Co-listed with AS.070.603.

Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.070.377. Ethnographic Writing. 3.0 Credits.**
We will explore this speculative dimension by looking at crossovers between anthropology and contemporary art, science fiction, philosophy, and environmental politics. Working with texts, films, drawings and other media, we will examine the experimental and imaginative nature of anthropology.

Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.070.366. Speculative Anthropology. 3.0 Credits.**
Anthropology has always been a speculative enterprise, an attempt to think beyond some familiar idea of the human. We will explore this speculative dimension by looking at crossovers between anthropology and contemporary art, science fiction, philosophy, and environmental politics. Working with texts, films, drawings and other media, we will examine the experimental and imaginative nature of anthropology.

Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.070.380. Slumworld: Life in Informal Settlements. 3.0 Credits.**
One quarter of the planet’s urban population lives today in slums, shantytowns, favelas, chawls, colonias and other forms of rudimentary settlements (according to UN Habitat). Despite their prevalence throughout the world, these places are still depicted as spaces of informality and abjection, rather than as sites of emergence of innovative -even if disadvantaged- makeshift ways of producing the city. This course will combine ethnographic and geographical literature, as well as works of fiction and film to explore the lives of squatters and slum-dwellers in many regions of the world and examine in what way their practices, forms of dwelling, sociality, conflict and cooperation are constitutive of the urban experience.

Instructor(s): V. Procupez
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.385. From Sexual Nature to Sexual Politics. 3.0 Credits.
This course traces anthropological concern with questions of sexuality. Students will explore anthropological notions of primitive promiscuity, cultural configurations of the correspondence between sex, procreation, and birth, and ideas about sexual rites of passage. The course will end with a discussion of sexual politics in Euro-America and public concern over HIV/AIDS. The course draws on the work of Freud, Malinowski, Meade, Herdt, Povinelli, Rubin, Bersani and Halperin. Cross-listed with Women Gender Studies
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.405. Urban Ecologies. 3.0 Credits.
Description: This course will explore the city from the vantage point of nature/culture relations and political imagination. It will engage a range of topics including the built environment, urban infrastructure, industrialization and the ways in which urban space shapes and is shaped by power relations, racial dynamics, housing markets, domesticity and the body. As part of the coursework, students will carry out small guided research projects in Baltimore City.
Instructor(s): V. Procopuez
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.407. The Anthropology of Design. 3.0 Credits.
From casinos to canoes, algorithms to animal traps, our worlds are bursting with intentional objects. The word design has come to evoke the prestige of such objects, and their power to shape our collective habits and sensations. This course explores the anthropology of designed artifacts and their complex social trajectories. Beginning with philosophical investigations into the relationship between materials, form, and craft, we will proceed through ethnographic case studies of design as expert discourse and ordinary practice. Ultimately we will consider the affinities between the ethnography and design as open-ended and not entirely predictable engagements with the world.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.414. Kinship at the Core. 3.0 Credits.
It is often said that the study of kinship defines anthropology as a distinct discipline within the social sciences. This course tracks the emergence of kinship as a subject and object of anthropological inquiry, and traces some of the transformations that mark the effort to develop theories of kinship (genealogical method, social contract, structural-functionalism, structuralism, psychoanalysis, etc). A sample of authors to be read include: Morgan, Rivers, Malinowski, Radcliffe-Brown, Leach, Levi-Strauss, Pateman, Schneider, Trawick, and Povinelli. Open to Graduate Students.
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences.

AS.070.417. Political Spirituality. 3.0 Credits.
This course explores forms of political action that have emerged at the interface of modern revolutions with religious traditions. It focuses on the Middle East during the twentieth century and the civil rights struggle in the American south. We will attempt to trace the genealogy of these forms of action in the Islamic and Christian traditions, as well as examine their influence on the political thought of our own time.
Instructor(s): S. Al-Bahloly
Area: Humanities, Social and Behavioral Sciences.

AS.070.418. The Comparative Tradition in Anthropology. 3.0 Credits.
Anthropology is often imagined as the study of a particular place and people. But comparative methods date back to the beginnings of the discipline, efforts that are echoed in recent works of global and ambitious scope. In this seminar, we examine the theory and practice of comparison in anthropology, drawn in historical as well as contemporary studies on themes such as art, economy, science, and belief
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.419. Logic of Anthropological Inquiry. 3.0 Credits.
Anthropology is an endeavor to think with the empirical richness of the world at hand, a field science with both literary and philosophical pretensions. This course grapples with the nature of anthropological inquiry, reading classic works in the discipline as well as contemporary efforts to reimagine its foundations. Required for anthropology majors.
Prerequisites: Prereqs: AS.070.273 OR AS.070.317
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.420. Anthropology of Death and Dying. 3.0 Credits.
This course is organized around understanding the experience, representation and management of death and dying at different scales of social life connecting individual biographies with institutional settings.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.422. Infrastructure. 3.0 Credits.
This course surveys ethnographies of built networks such as roads, power grids, and water pipelines as sites of cultural meaning, political struggle, and social interaction. We will consider the kinds of collective existence they make possible today, and their relationship to anthropological thought.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.423. Anthropology of Poetry and Prayer. 3.0 Credits.
What kind of activity is prayer? Are we talking to God(s), to our ancestors, to ourselves? What are the differences between choosing our own words and repeating the words of an established prayer? The course will explore these and similar questions with particular attention to the language of prayers across a number of religious traditions.
Instructor(s): N. Haeri
Area: Humanities, Social and Behavioral Sciences.

AS.070.426. Kinship: Old and New. 3.0 Credits.
We will track the transformations in kinship theory in relation to wider changes in legal theory, biomedicine, and the relation between state and family. In particular we will ask how the concepts of sovereignty, gift, exchange, human and non-human milieus affect notions of relations. Cross-listed with AS.070.639
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.070.430. Violence and Non-Violence: Anthropological Explorations. 3.0 Credits.
What are the conceptual challenges in thinking about violence and non-violence? We will examine these through ethnographies of war, collective violence, and domestic violence.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.431. Senses of the State. 3.0 Credits.
This course examines ethnographic approaches to the study of state power and organization. How does a "traditional" ethnographic focus on locality and place help us to theorize the scalar qualities of the "global" neoliberal state? How do anthropologists study the temporal, material and sensory domains through which people make sense of the state as a bureaucratic, governmental and sovereign presence in their lives?
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.436. Vulnerability. 3.0 Credits.
Many in the contemporary world live in states of acute vulnerability. In this course, we will look closely at situations like forced displacement, experience of poverty and injury, environmental devastation, and the politics of social protest. Thinking with ethnography, feminist philosophy, fiction, and film, we will explore whether vulnerability may be taken as a condition to live with rather than one to overcome at any cost.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.445. Health, Disease, Poverty: New Ethnographies from India. 3.0 Credits.
We will study the multiple dimensions of health and disease in the context of poverty and vulnerability in India. The course will focus on institutions and experiences, and ask how the lives of patients and healers connect in local worlds. We will end with some recent controversies on reforming health care in India.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.473. Readings of Foucault. 3.0 Credits.
We will do a close reading of selected texts of Foucault to track the concepts of power, subjectivity, government, and care of the self.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.485. About Time. 3.0 Credits.
This course will explore time from an anthropological perspective. What is time? An object, a dimension, a sensation? Can we "have" time? What is the relation between power and the control of time? Through readings and discussions of classical and current anthropological theories and ethnographies, we will analyze the meaning, experience and textures of time in different cultural settings. Case studies will explore the US, the West and the Global South, with special emphasis on conceptions of the future: expectations, anticipations, preemption, emergence, possibility.
We will study imaginations of temporality and futurity in relation to fields such as politics, custom, finance, security, labor, climate change and so on, looking into the role that emotions play in relation to time.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.493. Precarity. 3.0 Credits.
How do we understand and engage precariousness and vulnerability in the contemporary world? This seminar explores the notion of precarity in anthropology and social theory. We will explore this notion genealogically asking such questions as: what are the forms of politics arising in relation to new transformations of labor? What are the regional debates in which the notion of precarity has arisen? We will then explore how anthropology has responded to ongoing destruction of whole forms of life, through war, settler colonialism, displacement, and poverty.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.503. Independent Study. 3.0 Credits.
Instructor(s): Staff.

AS.070.504. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.070.505. Directed Research-Fall. 3.0 Credits.
Instructor(s): Staff.

AS.070.506. Directed Research. 0.0 - 3.0 Credits.
Instructor(s): C. Han; J. Obarrio; M. Degani; N. Haeri; V. Das.

AS.070.507. Directed Readings. 3.0 Credits.
Instructor(s): Staff.

AS.070.508. Directed Readings. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.070.551. Internship-Fall. 1.0 Credit.
Instructor(s): J. Gueyr; N. Haeri.

AS.070.552. Internship - Spring. 1.0 Credit.
Instructor(s): D. Poole; J. Gueyr; V. Das.

AS.070.561. Senior Essay-Fall. 3.0 Credits.
Instructor(s): Staff.

AS.070.562. Senior Essay - Spring. 3.0 Credits.
Instructor(s): Staff.

AS.070.594. Internship-Anthropology. 1.0 Credit.
Instructor(s): D. Poole; M. Degani; N. Khan.

AS.070.595. Directed Research. 3.0 Credits.
Instructor(s): J. Obarrio; V. Das.

AS.070.596. Independent Study. 3.0 Credits.
Instructor(s): Staff.

AS.070.603. Ethnographic Writing.
We will closely examine the narrative form and force of a few major works of anthropological writing, and pursue experiments of our own in ethnographic description and expression. Co-listed with AS.070.377.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

AS.070.605. Anthropology and the Everyday.
Analysis of the everyday groans under the theological weight of concepts such "modernity," "governmentality," "capitalism," "globalization" and more recently "security." What might a sharper focus on the everyday yield in terms of its own analytical frameworks and empirical descriptions? We read some contemporary greats (Foucault, Derrida, Cavell, de Certeau, Lefebvre). Simultaneously we look at how each has been received within ethnography by reading anthropologists in engagement with them (Mahmood, Ivy, Das, Siegel, Harvey). We ask what critical stakes anthropology maintains in relation to the everyday.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.
AS.070.606. Professionalization.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.608. First Year Proposal Writing.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

What are the conceptual challenges in thinking about violence and non-violence are categories of thought and practice? We will examine these issues through ethnographies of war, collective violence, and domestic violence.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

This course will address contemporary questions of state and citizenship in the light of colonial and imperial dynamics at the beginning of the twenty-first century: transnational and national sovereignty in relation to local configurations of law, capital and political violence; processes of subsumption, extraction and financialization. Authors include Negri, Arrighi, Harvey, Chakrabarty, Membre, Mamdani, Chatterjee, Corolini, Dussel.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.612. Self, Narrative, and Autobiography.
This seminar takes insight from the idea that the "I" is not simply a pronoun. We will read texts on the self, the fragment, and narrative in anthropology, along with texts that make available different pictures of the self.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.

AS.070.615. The Comparative Tradition in Anthropology.
Anthropology is often imagined as the study of a particular place and people. But comparative methods date back to the beginnings of the discipline, efforts that are echoed in recent works of global and ambitious scope. In this seminar, we examine the theory and practice of comparison in anthropology, drawing on historical as well as contemporary studies on themes such as art, economy, science, and belief.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences.

The seminar will offer a forum for students to reflect on preliminary field research and think further about problems of ethnographic method. We will proceed in the manner of a workshop for ongoing projects. Open to anthropology graduate students only.
Instructor(s): C. Han.

AS.070.620. Space and Place.
This course explores how concepts of emplacement, location, space, place, and belonging shape—and are shaped by—cultural formations and political imaginations. Readings and class discussions include ethnographies and theoretical texts on planning and struggles over territory, aspirations regarding land and the environment, nature/culture distinctions, housing and the right to the city by authors such as Lefebvre, Massey, Harvey, Foucault, Ingold, Virilio, Bachelard, Tsing, Escobar, and others.
Instructor(s): V. Procuyez.

AS.070.621. An Ontological Turn?.
Recent years have seen a number of ambitious and controversial efforts to find, in ontology, a means of surpassing the inherited humanism, culturalism, and essentialism of anthropology. This course will critically examine this proposition of a fundamental "turn" in our thinking, juxtaposing recent work on matters of perspectivism, materialism, relationality, and divinity with earlier attempts in anthropology to grasp being and becoming otherwise.
Instructor(s): V. Das.

AS.070.622. Infrastructure.
This course surveys ethnographies of built networks such as roads, power grids, and water pipelines as sites of cultural meaning, political struggle, and social interaction. We will consider the kinds of collective existence they make possible today, and their relationship to anthropological thought.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences.

What kind of activity is prayer? Are we talking to God(s), to our ancestors, to ourselves? What are the differences between choosing our own words and repeating the words of an established prayer? The course will explore these and similar questions with particular attention to the language of prayers across a number of religious traditions.
Instructor(s): N. Haeri
Area: Humanities, Social and Behavioral Sciences.

AS.070.630. Senses of the State.
This course examines how anthropologists study the temporal, material and sensory domains through which people make sense of the state as a bureaucratic, governmental and sovereign presence in their lives.
Instructor(s): D. Poole.

AS.070.634. The End of Nature?.
The End of Nature? We have been hearing critiques of the concept of nature as too pristine since at least Donna Haraway’s Cyborg Manifesto and Bruno Latour’s We Have Never Been Modern. The call has been for a mode of ecological thinking without the encumbrance of nature. Through an examination of some of the tracks that nature has left within the anthropological archives and kindred debates within philosophy, this course attempts a revivification of nature for our present. Readings include Mauss, Rappaport, Levi-Strauss, Bateson, Emerson and Whitehead.
Instructor(s): N. Khan.
AS.070.636. Vulnerability.
Many in the contemporary world live in states of acute vulnerability. In this course, we will look closely at situations like forced displacement, experience of poverty and injury, environmental devastation, and the politics of social protest. Thinking with ethnography, feminist philosophy, fiction, and film, we will explore whether vulnerability may be taken as a condition to live with rather than one to overcome at any cost.
Instructor(s): A. Pandian
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

We will track the transformations in kinship theory in relation to wider changes in legal theory, biomedicine, and the relation between state and family. In particular, we will ask how the concepts of sovereignty, gift, exchange, human and non-human milieus affect notions of relations. Open to undergraduate anthropology majors with instructors approval.
Co-listed with AS.070.426
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.642. Anthropology of Design.
From casinos to canoes, algorithms to animal traps, our worlds are bursting with intentional objects. The word design has come to evoke the prestige of such objects, and their power to shape our collective habits and sensations. This course explores the anthropology of designed artifacts and their complex social trajectories. Beginning with philosophical investigations into the relationship between materials, form, and craft, we will proceed through ethnographic case studies of design as expert discourse and ordinary practice. Ultimately we will consider the affinities between the ethnography and design as open-ended and not entirely predictable engagements with the world.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.650. Post-fieldwork.
Open to Anthropology graduate students only.
Instructor(s): N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.655. Intimacy and Corruption.
Course takes problem of corruption as an ethnographic site from which we can explore how concepts of visibility, secrecy, intimacy and transgression inform political life. We will examine how ideas of intimacy and propriety are expressed in public scandals of corruption, as well as the forms of anxiety that surround routine practices of bribery, influence-peddling and enticement.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.659. Proposal Writing.
The seminar will offer a forum for students to discuss research projects, prepare grant proposals and think further about issues of ethnographic methodology and writing. Open to Anthropology graduate students only.
Instructor(s): N. Khan
Writing Intensive.

AS.070.671. Political Anthropology.
This course explores anthropological debates regarding politics and the political. Through readings drawn from both recent and "classic" ethnographies of the political, we will trace how anthropologist have engaged issues of hierarchy, differentiation, power, suasion, command, collectivity, and voice in their accounts of social and cultural worlds.
Instructor(s): D. Poole
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.673. Readings of Foucault.
We will do a close reading of selected texts of Foucault to track the concepts of power, subjectivity, government, and care of the self.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.675. Before the Law.
Foundations of law and the political in classical political anthropology and postmodern philosophy. Kinship, custom, magic, sacrifice and war as prepolitical realms. State of nature, exception, and force of law; biopolitics, micropolitics and segmentarity. Readings: Africanist ethnography; Clastres, Sahlins, Deleuze, Derrida, Agamben, Benjamin, Kafka.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences.

AS.070.677. Anthropology of Death and Dying.
This course is organized around understanding the experience, representation and management of death and dying at different scales of social life connecting individual biographies with institutional settings.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.

AS.070.680. Reading Course in the History of Anthropology: Revolutions and Recuperations.
This course provides a selective, disciplinary overview of anthropological theory as both a plural field of knowledge and as a distinctive mode of formulating questions about history, society and life.
Instructor(s): J. Guyer
Area: Humanities, Social and Behavioral Sciences.

How do different ways of harnessing energy shape life and environment? This course delves into the social, political, even philosophical properties of oil, coal, sunlight sugar, and other sources that fuel human activity. Through these topics, we will consider the cultural meaning of concepts such as charge and expenditure, work and waste.
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.070.682. Readings in Anthropology.
In this course we will engage classical texts from the anthropological archives and explore debates and contemporary salience.
Instructor(s): V. Das
Area: Humanities, Social and Behavioral Sciences.
**AS.070.685. About Time.**
This course will explore time from an anthropological perspective. What is time? An object, a dimension, a sensation? Can we "have" time? What is the relation between power and the control of time? Through readings and discussions of classical and current anthropological theories and ethnographies, we will analyze the meaning, experience and textures of time in different cultural settings. Case studies will explore the US, the West and the Global South, with special emphasis on conceptions of the future: expectations, anticipations, preemption, emergence, possibility. We will study imaginations of temporality and futurity in relation to fields such as politics, custom, finance, security, labor, climate change and so on, looking into the role that emotions play in relation to time.
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.070.693. Precarity.**
How do we understand and engage precariousness and vulnerability in the contemporary world? This seminar explores the notion of precarity in anthropology and social theory. We will explore this notion genealogically asking such questions as: what are the forms of politics arising in relation to new transformations of labor? What are the regional debates in which the notion of precarity has arisen? We will then explore how anthropology has responded to ongoing destruction of whole forms of life, through war, settler colonialism, displacement, and poverty.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

**AS.070.698. Defining Region.**
This course is open to anthropology graduate students only and is to be run on a workshop model. It is to help those students writing their regional essay for the comprehensive exams to acquire expertise in regional debates and literature relevant to their field research. Our understanding of regions is one of cross-cutting concepts and questions rather than geographical framings alone. After identifying a concept or question, each student will create an annotated bibliography, trace the shape of arguments as they emerge within the readings, create an outline and work toward a draft of the final essay.
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences.

**AS.070.719. Suspicious Interlocutors Part II: Psychoanalysis and Anthropology.**
This course is a continuation of Anthropology AS.070.718, offered in Spring 2013. Students will continue the previously begun investigation of the conversation between anthropology and psychoanalysis, which proves long-standing and often as contentious as it is complementary. The course will tack back and forth between ethnographic materials inspired and informed by psychoanalytic insights, and the use of ethnographic sources and anthropological materials in psychoanalytic writings. Students will engage works from such scholars as Freud, Lacan, Cavell, Klein, Derrida, Siegel, Das, Reynolds, Levi-Strauss, Seremetakis.
Instructor(s): A. Goodfellow
Area: Humanities, Social and Behavioral Sciences.

**AS.070.801. Dissertation Research.**
Instructor(s): Staff.

**AS.070.802. Dissertation Research.**
Instructor(s): Staff.

**AS.070.866. Directed Readings and Research.**
Instructor(s): A. Pandian.

**AS.070.867. Directed Reading and Research.**
Instructor(s): C. Han; N. Khan.

**AS.070.869. Directed Reading and Research.**
Instructor(s): A. Pandian.

**AS.070.870. Directed Readings and Research.**
Instructor(s): M. Degani
Area: Humanities, Social and Behavioral Sciences.

**AS.070.871. Directed Reading and Research.**
Instructor(s): V. Das.

**AS.070.872. Directed Readings and Research.**
Instructor(s): V. Das.

Instructor(s): J. Obarrio.

**AS.070.885. Directed Reading and Research.**
Instructor(s): D. Poole.

**AS.070.886. Dir Readings & Research.**
Instructor(s): D. Poole.

**AS.070.892. Directed Readings and Research.**
Instructor(s): N. Khan.

**AS.070.893. Directed Reading and Research.**
Instructor(s): J. Obarrio.

**EN.601.685. Probabilistic Models in the Visual Cortex. 3.0 Credits.**
The course gives an introduction to computational models of the mammalian visual cortex. It covers topics in low-, mid-, and high-level vision. It briefly discusses the relevant evidence from anatomy, electrophysiology, imaging (e.g., fMRI), and psychophysics. It concentrates on mathematical modelling of these phenomena taking into account recent progress in probabilistic models of computer vision and developments in machine learning, such as deep networks. [Applications or Analysis]. Programming experience (Python preferred).
Instructor(s): A. Yuille
Area: Quantitative and Mathematical Sciences.

**Cross Listed Courses**

**History of Art**

**AS.010.382. The Politics of Display in South Asia. 3.0 Credits.**
Through examining collecting, patronage, colonial exhibitions, and museums, this course examines how South Asia has been constructed in practices of display. Themes: politics of representation, spectacle, ethnography, and economies of desire related to colonialism and the rise of modernity. Cross-list with Anthropology, Museums and Society and Political Science.
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.
AS.010.410. The Epistemology of Photography. 3.0 Credits.
This seminar will ask how photography produces ways of knowing: how does photography’s reality-effect shape its dissemination and absorption? Is photography’s emergence during the colonial era coincidental or catalytic? How is memory (re)constituted in a photography-saturated world? What kinds of histories does photography encourage and discourage? Is a photograph an object? We will read across disciplines (literature, anthropology, history, history of art, political science, theory) to investigate the epistemology of photography and the photograph.
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

AS.010.607. The Epistemology of Photography.
This seminar will ask how photography produces ways of knowing: how does photography’s reality-effect shape its dissemination and absorption? Is photography’s emergence during the colonial era coincidental or catalytic? How is memory (re)constituted in a photography-saturated world? What kinds of histories does photography encourage and discourage? Is a photograph an object? We will read across disciplines (literature, anthropology, history, history of art, political science, theory) to investigate the epistemology of photography and the photograph.
Instructor(s): R. Brown.

History
AS.100.355. Islam between History and Anthropology. 3.0 Credits.
Co-taught by an anthropologist and a historian, this course will explore recent scholarly debates about—and critiques of—the representations of Islam and Muslim societies.
Instructor(s): N. Khan; T. Shepard
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.365. Culture & Society in the High Middle Ages. 3.0 Credits.
This course will treat the flourishing of culture and society in the High Middle Ages (11-14th centuries). Topics covered include the emergence of feudal society and literature, the economic, social and cultural revival of Europe in the 11th and 12th centuries, the Renaissance of the twelfth century and the growth of scholasticism and the University, and the development of feudal monarchies in England and France..
Instructor(s): G. Spiegel
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Near Eastern Studies
AS.130.126. Gods and Monsters in Ancient Egypt. 3.0 Credits.
To provide a basic introduction to Egyptian Religion, with a special focus on the nature of the gods and how humans interact with them. We will devote particular time to the Book of the Dead and to the “magical” aspects of religion designed for protective purposes.
Instructor(s): R. Jasnow
Area: Humanities.

AS.130.351. The Emergence of Civilization: A Cross-Cultural Examination. 3.0 Credits.
A comparative study of the origins of urban, literate civilizations in five culture areas: Mesopotamia, China, the Indus Valley, Egypt, and Mesoamerica. For each area, we will review the physical setting, the archaeological and textual evidence for the development of states and urban civilization, and theories advanced to explain the rise (and eventual collapse) of these complex societies.
Instructor(s): G. Schwartz
Area: Humanities, Social and Behavioral Sciences.

AS.130.376. Ancient Magic and Ritual. 3.0 Credits.
This course will introduce students to the vast body of rituals that were practiced and performed in antiquity, with a particular emphasis on rituals from ancient Mesopotamia, Egypt, and the Hebrew Bible. In addition to examining rituals from a comparative perspective, anthropological and sociological studies of ritual will be read and discussed to shed light on the social, cultural, and political significance of ritual in the ancient world and beyond.
Instructor(s): P. Delnero
Area: Humanities.

AS.130.387. The Poetics of Biblical Prose and Verse. 3.0 Credits.
An exploration of how ancient Israelite techniques of literary textual and inter-textual patterning contributes to cohesion and meaning in biblical prose and verse. Attention will be given to the distinguishing characteristics of Hebrew verse in relation to prose, and to a range of different kinds of prose in Israelite literature. These poetic will be exemplified in close readings of selected texts from the Hebrew Bible in English.
Instructor(s): D. Gropp
Area: Humanities.

AS.131.635. Seminar: Near East Archaeology.
Topic varies but can include the archaeology of Mesopotamia, Syria, or Palestine, or thematic discussions (e.g., on ideology, state collapse, etc.).
Instructor(s): G. Schwartz
Area: Humanities.

Archaeology
AS.136.101. Introduction To Archaeology. 3.0 Credits.
An introduction to archaeology and to archaeological method and theory, exploring how archaeologists excavate, analyze, and interpret ancient remains in order to reconstruct how ancient societies functioned. Specific examples from a variety of archaeological projects in different parts of the world will be used to illustrate techniques and principles discussed.
Instructor(s): G. Schwartz
Area: Humanities, Social and Behavioral Sciences.

History of Science Technology
AS.140.346. History of Chinese Medicine. 3.0 Credits.
Students will study the most recent anthropological, philosophical, and historical scholarship on medicine in traditional and modern Chinese society. They will approach the topic from several angles including medical pluralism, the range of healers, domestic and literate medicine, gender, emergence of new disciplines, public health and the history of disease. The course relies on secondary sources and primary sources in English translation. Cross-listed with East Asian Studies.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
Political Science

AS.190.608. Influx and Efflux.

"While many contemporary philosophies of the self, and of human agency, tend to emphasize the activity of expression – the enactment or externalization of an intention, desire, will, or purpose, this course will explore the process through which the outside comes in. Influence: the default condition of intrinsically porous and relational bodies. We will examine different models of the process through which individuals are psychically and physiologically affected by forces, shapes, ideas, affects, and tendencies coming from the "outside." Readings include Walt Whitman's experimentation with the democratic potential of "sympathy," Alfred North Whitehead's theory of "affective tone" (which focuses on unconscious and in-sensible modes of influence), Roger Caillois's theory of the "instinct of abandon" (developed at the time of an emergent fascism in Europe), and contemporary theories (in behavioral psychology and cognitive science) of embodied cognition."

Instructor(s): A. Pandian; J. Bennett.

AS.190.609. Law, Critique, Genealogy.

This course will offer a survey of classical and contemporary trends in critical theory through the prism of the law. The readings will trace the development of two modes of critical reflection emerging from Kant’s philosophical project, critique and genealogy, exploring the tensions between them through the study of categories such as judgment, case, and jurisdiction. We will examine how these categories themselves reflect the question of "modernity" and the Enlightenment as that question is posed and answered by thinkers from Kant to Foucault and Habermas and beyond. To ground this study, we will focus on critical engagements with human rights, property, and institutional justice around the world. Within an arch of readings that goes from Kant to Butler, the course will include key texts by Hegel, Marx, Benjamin, Horkheimer, Adorno, Marcuse, Habermas, Foucault, and Nancy, as well as texts drawn from critical legal studies and the anthropology of law and justice. There are no prerequisites for this interdisciplinary course. To receive credit, students will be required to attend seminar, prepare for class discussions, and turn in a 20-30 page final research paper, a draft of which will be presented at a workshop at the end of the year.

Instructor(s): J. Culbert; J. Obarrio.

AS.191.344. Belonging to Nature in the Anthropocene. 3.0 Credits.

This course explores debates in contemporary environmental political thought concerning humanity’s relationship to nature in the Anthropocene. The Anthropocene refers to the era in which "human" activity becomes a force of "nature"—when the impact of human activity on natural processes manifests itself in the stuff of the Earth. For many of us, these planetary transformations are hardly noticeable in day-to-day life, but they are dramatic: we are living through the Earth’s sixth mass extinction. What is our relationship to these transformations? Do we have the power to stop them, or at least to minimize their harmful effects? Course readings and films introduce multiple visions of human/nature relationship and examine the responses they recommend to these and other questions. The political stakes of these visions are brought to light as we consider: How do visions of the human/nature relationship shape and texture core political concepts like freedom, agency, responsibility, and progress? What do they suggest about the strategies most likely to motivate action amid the uncertainty of the Anthropocene? How do these visions subtly (and not so subtly) relegate some to the realm of "nature" so that others can be classified as "human"?

Instructor(s): S. Erev
Writing Intensive.

German Romance Languages Literatures

AS.211.174. Media of Propaganda. 3.0 Credits.

Today, promoting a particular political or personal point of view is not viewed as "propaganda," but rather as building a community of equally minded people. But where do we draw the line, and when does the use of a medium in service of a certain message become intrusive and misleading? What role do democracy and cultural values play in this use or abuse of media? In this class the term "propaganda" will be evaluated carefully and applied to such historical media case studies as the informational use of the radio in World War One, Leni Riefenstahl’s Nazi propaganda films, the legendary success of advertisement campaigns in the 1950s and 1960s, the AIDS movement and other mobilization strategies from the 1980s to the 1990s, and the new values of friendship and propaganda in our current facebook nation.

Instructor(s): B. Wegenstein
Area: Humanities

AS.211.337. Wandering Jews? Jewish Migration in Film and Literature. 3.0 Credits.

Migration in all its forms has played a major role in shaping Jewish identity throughout history. From the Biblical exodus from Egypt through the beginnings of the diaspora under the Romans to the massive European Jewish immigration to America in the late 19th and early 20th centuries to the founding of the state of Israel, the migrations of Jews have also had a major place in Jewish literature. Going all the way back to the Bible, but focusing on the 20th century, this course will explore the ways in which literature and film represent the experience of migration, whether negative (compelled by expulsion or violence); positive (lured by economic or social opportunity); or somewhere in-between. We will examine poetry, plays, prose and film in Yiddish, German, Hebrew, and English (all in translation) on aspects of Jewish migration including the social and political factors motivating migration from the countryside to the shtetl (town) to the city and from Central and Eastern Europe to the Americas, Palestine, and Israel. Issues under discussion will include: adaptation and assimilation; minority rights; what is the relationship of old and new or major and minor languages and literatures?; what is the place of tradition and heritage in a diasporic context? We will also consider the resonances between contemporary debates on migration and historical examples of these issues as they are reflected in literature and film.

Instructor(s): S. Spinner
Area: Humanities
Writing Intensive.

AS.211.641. Women Filmmakers from the Margins.

Filmmaking remains an overwhelmingly male-dominated profession, but women are making significant inroads, and in so doing are leaving their distinctive mark on the medium. In this seminar we will examine the films of a group of women auteurs (those who write and direct their own films) who have endeavored to speak from the margins—be they social, geographical, or sexual—and whose work has challenged mainstream cinematic norms. The filmmakers whose work we will analyze may include Jane Campion, Australia; Aurora Guerrero, Mexico-USA; Claudia Llosa, Peru; Mira Nair, India-USA; Marialy Rivas, Chile; So Yong Kim, Korea.

Instructor(s): B. Wegenstein
Area: Humanities
Writing Intensive.
AS.211.754. Modernist Primitivism.
This course will explore the aesthetics and politics of primitivism in European modernity, focusing on the visual arts and literature in German and Yiddish, but looking at the wider European context, including France and Russia. We will begin with the backgrounds of primitivism in Romanticism, looking especially at its ethnographic and colonial sources. We will then focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. Our central concerns will include: the attempt to create a modernist aesthetics grounded in ethnography; the primitivist critique of modernity; the place of primitivism in the historical avant-garde; the development of the notion of “culture” in modernity; and the aesthetics of modern ethnic and national identity. &nbsp;Key thinkers, artists, and writers to be considered include Herder; Gauguin; Picasso; Wilhelm Worringer; Carl Einstein; Hannah Höch; and Emil Nolde.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.635. Anthropology and Modernism.
This course will examine the reciprocal relationship between modernism and anthropology in Western and Central Europe, including examples from French, German, and Yiddish contexts. We will focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. We will also consider attempts by ethnographers to shape their practice in a modernist mold. Our central concerns will include the attempt to create a modernist poetics grounded in ethnography and the relationship between anthropological theory and ethnographic praxis in the modernist understanding of “culture.”
Instructor(s): S. Spinner
Area: Humanities.

AS.215.315. Literature of the Great Recession. 3.0 Credits.
The Great Recession—sometimes called the financial crisis or the economic crisis of 2008—brought financial markets to a halt and created significant political turmoil across the North Atlantic. But its impact on culture, and literature especially, has often been ignored. This seminar will travel across Europe, from Dublin to Madrid, from London to Reykjavík in order to examine how literature has registered this most recent economic crisis. We will focus on how crisis is narrated and the ways in which literary works have managed to provide a voice for marginalized social, economic, and political demands.
Instructor(s): B. Seguin
Area: Humanities.

AS.215.406. Novelist Intellectuals. 3.0 Credits.
What does a novelist's op-ed about economics have to do with her literary writing? In what ways does a fiction writer's essays on the environment inform how we read her novels? What happens when we find the political opinions of a writer objectionable? This undergraduate seminar will consider what the Spanish writer Francisco Ayala termed “novelist intellectuals,” that is, literary writers who actively participate in society's public sphere. Considering writers from Madrid to New York, from London to Buenos Aires, we will ask how one should hold a novelist’s fictional and non-fictional writings in the balance and explore ways of reading that allow us to consider the public intellectual side and the aesthetic side of a novelist together.
Instructor(s): B. Seguin
Area: Humanities.

AS.215.412. Populism. 3.0 Credits.
What do Hugo Chávez, Marine Le Pen, and Donald Trump have in common? According to many from across the political spectrum, they are all populists. But what is populism, exactly, and how can it describe such disparate phenomena as left-wing social movements, xenophobic anti-immigrant policies, and economic redistribution? This advanced seminar will examine the history, culture, and political theory of populism. We will pay special attention to the resurgence of populism after the Great Recession and examine a number of cases from Latin America, Europe, and the United States.
Instructor(s): B. Seguin.

How should one study contemporary literature and culture? Is “the contemporary” a period in and of itself? Does it require a distinct conceptual approach? This graduate seminar will examine various approaches that have emerged since Michel Foucault called his genealogies a “history of the present.” We will pay special attention to contemporary literature and culture’s most distinguishing feature today: crisis. Considering theories of crisis and “the contemporary” together, the course will explore how living in a time of overlapping crises—economic, political, social, cultural, environmental, and others—affects the way we interpret the world.
Instructor(s): B. Seguin
Area: Humanities.

Sociology
AS.230.367. Islamic Finance. 3.0 Credits.
Today, Islamic finance is a global industry comprising nearly $2 trillion in assets, with hubs from Kuala Lumpur to Dubai to London. But half a century ago, nothing called “Islamic finance” existed. So where did Islamic finance come from? Why is it growing so fast? And what does it mean for finance to be Islamic? We discuss the ban on riba in the Quran and hadith, finance in early and medieval Islamic societies, petrodollars and the birth of Islamic banking in the 1970s, the rise of Islamic capital markets since 2000, contemporary shariah-compliant financial structures, and the constitution of piety through financial practice.
Instructor(s): R. Calder
Area: Social and Behavioral Sciences.

Comparative Thought and Literature
AS.300.320. Lover's Discourse. 3.0 Credits.
Much of what we know about love and desire we owe to fiction's ability to evoke these experiences. Consider for example that the publication, in Germany, of The Sorrows of Young Werther inspired young men across Europe to dress and behave just like him. We will study in this course a selection of love stories chosen because they break the mold and question their conventions. Taking a critical distance from these tales of seduction, we will examine not only the manifestations and meanings of love, but also the configurations of gender they inspire and reflect. Indeed, just as nowadays film and television represent, as well as mold, our identities as desiring subject, fictions from the eighteenth-century onwards have shaped our current understanding of gendered subjectivities. The readings for this seminar (all available in English) include: Austen, “Persuasion”; Balzac, "The Girl with the Golden Eyes" and "Sarrasine"; Barthes, "Lover's Discourse"; Goethe, "The Sorrows of Young Werther"; Mann, "Death in Venice"; Rousseau, excerpts from "Julie or The New Heloise"; Sulzer, "A Perfect Waiter"; Winterson, "Written on the Body".
Instructor(s): E. Ender
Area: Humanities.
East Asian Studies
AS.310.108. Introduction to Chinese Fiction and Drama. 3.0 Credits.
This course will introduce Chinese fiction and drama from the Tang dynasty (618-906) to the early Republican period (1911-1949), such as the romantic dramas of Tang Xianzu and the uncanny tales of Pu Songling. Students will draw connection between these vibrant literary genres and the cultural and socio-historical events that shaped imperial China. Key topics include story-telling, romance, urban culture, gender, reincarnation, and many more. Students will acquire skills in how to read, analyze and discuss the rich legacy of Chinese fiction and drama in translation and to think critically about these writings. Reading materials are all in English.
Instructor(s): F. Joo
Area: Humanities.

AS.310.309. Monsters, Demons, and Ghosts: Folklore and Festival in Japan. 3.0 Credits.
This course examines popular narratives and festivals from historical through contemporary Japan. Rather than traditional sources (canonical works, philosophical doctrines, and high art), it focuses on non-elite modes of expression: oral histories, epic tales, local legends, stories of the supernatural, music, religious festivals, manga, anime, and film. Through analyses of these mediums, students explore the underlying belief structures that have shaped ideas concerning death and the afterlife, moral ethics, and the spiritual realm in Japan. The course also tackles issues concerning the intellectual construct of the 'folk' and folk religion. Who are the folk? How does this concept relate to regional versus national identity, civilized versus so-called primitive populations, premodern versus modern categories? Students will engage these questions through active discussions in the classroom, in-class writing exercises, mini-presentations, and two papers.
Instructor(s): C. Carter
Area: Humanities
Writing Intensive.

Program in Latin American Studies
AS.361.331. Drug wars, violence and illicit lifeworlds in Latin America. 3.0 Credits.
Drawing on ethnographic and historical sources, this course will introduce anthropology as an invitation for students to re-conceptualize and deepen their understanding of the so-called "War on Drugs" as a cultural, social and political formation in Latin America.
Instructor(s): J. Moreno Garcia
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Study of Women, Gender, Sexuality
AS.363.350. Gender, Sexuality, and Religion: Muslim (In)Visibilities. 3.0 Credits.
"Muslim (In)Visibilities" focuses on gender and sexuality through Orientalism. It considers representations of Muslim bodies within popular Western discourses and what such (in)visibilities are productive of.
Instructor(s): M. Banahi
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.363.417. Internship/Practicum: Critical Theory and the Possibility of Social Justice. 4.0 Credits.
This course combines a weekly seminar with 4 hours per week in a Baltimore social justice organization, coordinated by the JHU Center for Social Concern. Class discussions draw on readings in ethnography and feminist, queer and critical race studies to address topics such as; race, class and gender inequality, neoliberal development, health, institutional violence and politically engaged research.
Instructor(s): A. Krauss
Area: Humanities, Social and Behavioral Sciences.

Program in Museums and Society
AS.389.302. The Virtual Museum. 3.0 Credits.
Course draws on both classic readings in material culture and emerging theories of the digital to consider how the internet has changed objects and the institutions that collect, preserve, display and interpret them. Students will contribute to an established virtual museum and create their own.
Instructor(s): J. Kingsley
Area: Humanities.

AS.389.335. Recreating Ancient Greek Ceramics. 4.0 Credits.
This hands-on course in experimental archaeology brings together undergraduate and graduate students across disciplines to study the making of Athenian vases. Students work closely with expert ceramic artists, and in consultation with art historians, archaeologists, art conservators, and materials scientists to recreate Greek manufacturing processes.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.440. Who Owns Culture?. 3.0 Credits.
This seminar explores the complicated, often explosive concept of cultural property, including questions surrounding the ownership, preservation, and interpretation of artifacts, monuments, heritage sites, and living traditions. Cross-listed with Anthropology and History of Art.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.

AS.389.450. Readings in Material Culture. 3.0 Credits.
Objects, things, "stuff"- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.

AS.389.650. Readings in Material Culture.
Objects, things, "stuff"- this seminar will pursue classic texts and emerging methodologies to explore the myriad ways materials and materiality have been theorized across disciplines. For graduate/advanced undergraduate students.
Instructor(s): E. Rodini; R. Brown
Area: Humanities.
Environmental Health and Engineering
EN.570.285. Understanding Aid: Anthropological Perspectives for Technology-Based Interventions. 3.0 Credits.
This course combines anthropological perspectives with the discussion and examination of technology--based interventions in the field of development and aid policies, with particular focus on activities related to water resources, sanitation, and hygiene. Readings and discussions analyze some of the theoretical, historically rooted, and practical issues that challenge those who hope to provide effective aid. A key aim of this course is to provide students with better understanding of cultural, social, environmental and economic issues relevant to technical intervention in developing countries.
Instructor(s): E. Cervone; W. Ball
Area: Humanities, Social and Behavioral Sciences.

Archaeology

http://krieger.jhu.edu/archaeology/

The major in archaeology is an interdepartmental program that introduces students to archaeological theory, the analysis of archaeological materials, and the results of archaeological research in prehistoric and early historic periods in the Old and New Worlds. Archaeology studies human societies through examination of their material culture (physical remains), considering such issues as human subsistence, interaction with climate and physical environment, patterns of settlement, political and economic organization, and religious activity and thought. The field allows for the study of the entirety of human experience from its beginnings to the present day, in every region of the world and across all social strata.

Students in the major will have the opportunity to study and conduct research on materials stored in The Johns Hopkins Archaeological Museum, which consists of a diverse and extensive assemblage of artifacts from ancient Greece, Rome, Egypt, Mesopotamia, Palestine, and Mesoamerica. Opportunities may also be available to study materials in the Classical, Egyptian, and Near Eastern collections in the Walters Art Museum.

Requirements for the B.A. Degree
Requirements for the major include 13 courses (39 credits). These can be selected from a diversity of offerings available from different departments. In addition, students must take a core of three courses consisting of Introduction to Archaeology, World Prehistory, and Archaeological Method and Theory. Except for some field experiences, majors must complete all courses required for the major for a letter grade and receive a grade of C- or higher.

Honors Program
Archaeology majors have the option of writing an honors thesis under the supervision of a faculty member. The thesis is based on an original research problem developed in conjunction with that faculty member. Successful completion of the thesis (B+ or higher) will result in the conferring of a BA with honors.

Students entering Fall 2014 and later must pass 6 credits (2 semesters: 130.510 and 130.511) of honors thesis to earn honors in the Archaeology Major. These credits are in addition to and exceed the number of credits needed for the major.

Students who are interested in pursuing an honors thesis should begin to discuss possibilities with a faculty advisor as early as possible and no later than during the second semester of Junior year. A proposal for the thesis must be approved by the faculty advisor before the student registers for the courses and no later than the end of the second semester of the Junior year.

The student will work closely with the faculty advisor, setting a timeline for completing research and submitting drafts of the thesis. A full draft of the thesis is due by the end of March of the Senior year; if the student wants to be listed as receiving honors on the commencement program.

Sample Program of Study
In addition to the example plan as shown below, students are required to complete significant archaeological field experience. This is commonly done during the summer(s) after sophomore and/or junior year(s).

Total Credits: 39
The final version of the thesis must be handed in by the last day of classes.

Program Learning Goals for the Archaeology Major
1. Acquire the basic skills for understanding theory, interpretation, and methods in archaeology.
2. Develop an ability to analyze archaeological data through the reading and interpretation of archaeological publications and study of primary data.
3. Conduct analyses and interpretations of material culture in precise, well-organized, and persuasive language, both orally and in writing.
4. Acquire interdisciplinary knowledge of different past human cultures.
5. Gain significant knowledge of the material culture of at least one region or thematic issue.
6. Acquire on-site experience and expertise in archaeological method through fieldwork.

Courses
AS.136.101. Introduction To Archaeology. 3.0 Credits.
An introduction to archaeology and to archaeological method and theory, exploring how archaeologists excavate, analyze, and interpret ancient remains in order to reconstruct how ancient societies functioned. Specific examples from a variety of archaeological projects in different parts of the world will be used to illustrate techniques and principles discussed.
Instructor(s): G. Schwartz
Area: Humanities, Social and Behavioral Sciences.

Cross Listed Courses
History of Art
AS.010.105. Art of the Ancient Americas. 3.0 Credits.
This course provides a basis for the study of ancient Americas art and architecture and a broad exposure to the issues relevant to its study. Select visual arts within the primary regions of Mexico and Central America will be emphasized. In conjunction with the Baltimore Museum of Art (BMA) and the JHU Archaeological Museum (JHAM), students will participate in on-site study of the collections.
Instructor(s): L. Deleonardis
Area: Humanities.

AS.010.236. Palaces, Temples and Tombs in Mesopotamia. 3.0 Credits.
Mesopotamia, the “land between the rivers,” is considered the cradle of civilization. Its earliest urban centers appeared by 3500 BCE in the region of modern-day Iraq, Iran, and Syria. Along with urbanism came the emergence of temples and palaces as large-scale elite institutions (along with written records). Their arts manifest some of the earliest complex representations and follow a vibrant course for several millennia. The first empires marshaled large armies and amassed fabulous riches. Complex religious and ritual ideologies were expressed in the art and architecture. And all has been revealed by the archaeologist’s spade. This class explores the art and architecture of Mesopotamia (ancient Sumer, Babylonia and Assyria) from 3500 to 330 BCE. Emphasis is placed on the relationship between the arts and ancient society in order to enable students to acquire the skills for accessing and appreciating ancient civilizations.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.315. Art of the Assyrian Empire, 1000-600 BCE. 3.0 Credits.
The Assyrian Empire dominated the ancient world from 1000-612 BCE, stretching from Iran to Egypt and laying the foundation for the later Persian and Macedonian empires. With imperial expansion came an explosion of artistic production ranging from palace wall reliefs to small-scale luxury objects. This course provides an integrated picture of the imperial arts of this first great empire, situating it within the broader social and political contexts of the first millennium BCE.
Instructor(s): M. Feldman
Area: Humanities.

AS.010.365. Art of the Ancient Andes. 3.0 Credits.
The ancient visual arts of Andean South America and their respective cultural contexts form the basis of this course. In conjunction with the Baltimore Museum of Art and the Johns Hopkins Archaeological Museum students will have access to collections for study.
Instructor(s): L. Deleonardis
Area: Humanities.
AS.010.366. Native American Art. 3.0 Credits.
The works of Native American artists are examined and discussed in their respective social and historical contexts. Such works include Hopewell stone sculpture, Mimbres pictorial painting, and Tlingit guardian figures. We examine the concept of sacred landscape through analysis of monumental earthworks and effigy mounds, Anasazi architecture, and rock art. In conjunction with the Baltimore Museum of Art (BMA), and Johns Hopkins Special Collections, students will have access to collections for study.
Instructor(s): L. DeLeonardis
Area: Humanities

AS.010.389. The Stone and the Thread. 3.0 Credits.
Inka architecture in its social, historical and cultural contexts forms the basis of this course. Shared forms and ideas implicit in the fiber arts offer comparative points for analysis and discussion.
Instructor(s): L. DeLeonardis
Area: Humanities
Writing Intensive.

AS.010.407. Ancient Americas Metallurgy. 3.0 Credits.
Centering on a series of case studies, this course addresses the technology, aesthetics, and social significance of metals. We trace the development of metals from 1500 BCE in Chile and Peru, to the 16th century in Colombia and central Mexico, pausing to examine its forms and meanings in various cultural contexts, and the ideas that inform its value. In conjunction with the Baltimore Museum of Art (BMA), the Walters Art Museum (WAM), and the Johns Hopkins Archaeology Museum (JHUAM), students will have access to ancient metal works for study.
Instructor(s): L. DeLeonardis
Area: Humanities

AS.010.421. Creating Sacred Space in the Ancient and Medieval World. 3.0 Credits.
What makes a space sacred? How is it different from other spaces? This seminar explores the various means - visual, artifactual, architectural, and performative - of creating sacred space in the ancient and medieval worlds of the Near East and Mediterranean. Possible cases for study include early Sumerian temples, state-sponsored Assyrian temples, votive deposits, Greek sanctuaries, sanctuaries and landscape, early medieval Jewish, Christian, and Islamic cult buildings, cave sanctuaries, pilgrim sites, icons and sacred space.
Instructor(s): M. Feldman
Area: Humanities
Writing Intensive.

AS.010.470. Power and Politics in Assyrian Art. 3.0 Credits.
Assyria, centered in northern Iraq, created one of the world’s first great empires that dominated the ancient Near Eastern world from around 900 to 612 BCE. In concert with imperial expansion came an explosion of artistic production ranging from palace wall reliefs to small-scale luxury objects. This seminar examines the close relationship between the arts and politics in the Assyrian empire. Some themes that will be explored are: historical narrative, text and image, portable luxury arts and gender, politics and religion. The course will engage in close visual analysis of the ancient materials and readings of critical scholarship.
Instructor(s): M. Feldman
Area: Humanities
Writing Intensive.

Biology

AS.020.365. Intro To Human Skeleton. 3.0 Credits.
This course will provide a basic understanding of human skeletal biology, including bone composition and bone growth, recognition of skeletal elements, functional anatomy of different skeletal systems, comparative anatomy, and forensic anthropology (sexing and aging, body size reconstruction, bone pathology). Lectures will be combined with hands-on experience with bone models and real bone specimens.
Instructor(s): C. Ruff
Area: Natural Sciences.

AS.020.379. Evolution. 3.0 Credits.
This course takes a broad look at the impact of natural selection and other evolutionary forces on evolution. Emphasis is placed on what we can learn from genome sequences about the history of life, as well as current evolutionary pressures. Recommended Course Background: AS.020.306, AS.020.330, or permission required
Instructor(s): C. Norris
Area: Natural Sciences.

Classics

AS.040.111. Ancient Greek Civilization. 3.0 Credits.
The course will introduce students to major aspects of the ancient Greek civilization, with special emphasis placed upon culture, society, archaeology, literature, and philosophy.
Instructor(s): J. Smith
Area: Humanities.

AS.040.137. Freshman Seminar: Archaeology at the Crossroads: The Ancient Eastern Mediterranean through Objects in the JHU Archaeological Museum. 3.0 Credits.
This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influenced one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.040.140. Gender and Sexuality in Early Greece and the Eastern Mediterranean. 3.0 Credits.
In this course we will explore evidence and interpretations of gender and sexuality in the region of the Aegean and eastern Mediterranean during the third and second millennia BCE. Material investigated will include the “snake goddess” figures from Minoan Crete, anthropomorphic figurines from the Cyclades and Cyprus, wall paintings, etc. In each case we will consider the history of interpretation as well as investigate the objects’ archaeological and sociocultural contexts. Discussion topics will include representational ambiguity, the specific materialities of objects, and their possible roles in activities constraining gender. The course will incorporate material from the JHU Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.
AS.040.150. Island Archeology: Land and Sea in Ancient Crete, Cyprus and the Cyclades. 3.0 Credits.
Islands present highly distinctive contexts for social life. We examine three island worlds of the ancient eastern Mediterranean. These are places where water had a unique and powerful meaning and boat travel was part of daily life, where palaces flourished and contact with other societies implied voyages of great distance. Class combines close study of material and visual culture with consideration of island-specific interpretive paradigms; trips to Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.218. Celebration and Performance in Early Greece. 3.0 Credits.
Surviving imagery suggests that persons in Minoan and Mycenaean societies engaged in various celebratory performances, including processions, feasts, and ecstatic dance. This course explores archaeological evidence of such celebrations, focusing on sociocultural roles, bodily experience, and interpretive challenges.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.221. Art and Archaeology of Early Greece. 3.0 Credits.
This course explores the origins and rise of Greek civilization from the Early Bronze Age to the Persian Wars (ca. 3100-480 B.C.), focusing on major archaeological sites, sanctuaries, material culture, and artistic production.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.348. Worlds of Homer. 3.0 Credits.
Through texts, art, and archaeological remains, this course examines the various worlds of Homer—those recalled in the Iliad and Odyssey, those within which the epics were composed, and those born of the poet’s unique creative work. Class will make museum visits. Ancient texts read in translation.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.366. The Archaeology of Ancient Cyprus: Investigating a Mediterranean Island World in the JHU Museum. 3.0 Credits.
This course explores the visual and material worlds of ancient Cyprus from the earliest human evidence through the Iron Age. Course topics will include the island’s unique position between the Aegean and Near East and how this has impacted both Cyprus’ ancient past and the way in which it has been conceived in the modern world. Class involves regular analysis of artifacts based in the Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.373. Propaganda and the Art of Visual Politics during the Roman Empire. 3.0 Credits.
We will examine visual expressions of propaganda in the city of Rome, considering how emperors used public art to promote their political agendas and their ideological vision of power. Dean’s Teaching Fellowship course
Instructor(s): A. Tabeling
Area: Humanities.

AS.040.376. The Archaeology of Ancient Cyprus: Investigating a Mediterranean Island World in the JHU Museum. 3.0 Credits.
This course explores the visual and material worlds of ancient Cyprus from the earliest human evidence through the Iron Age. Course topics will include the island’s unique position between the Aegean and Near East and how this has impacted both Cyprus’ ancient past and the way in which it has been conceived in the modern world. Class involves regular analysis of artifacts based in the Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.383. The Art and Archaeology of Early Greece. 3.0 Credits.
This course explores the origins and rise of Greek civilization from the Early Bronze Age to the Persian Wars (ca. 3100-480 B.C.), focusing on major archaeological sites, sanctuaries, material culture, and artistic production.
Instructor(s): E. Anderson
Area: Humanities.

AS.070.132. Invitation to Anthropology. 3.0 Credits.
Anthropology is an endeavor to think with the empirical richness of the world at hand, a field science with both literary and philosophical pretensions. This course grapples with the nature of anthropological inquiry, reading classic works in the discipline as well as contemporary efforts to reimagine its foundations. Required for anthropology majors.
Prerequisites: Prereq: AS.070.273 OR AS.070.317
Instructor(s): J. Obarrio
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Near Eastern Studies

AS.130.101. Ancient Near Eastern Civilizations. 3.0 Credits.
Review of important issues in ancient Near Eastern history and culture from the Neolithic era to the Persian period. Included will be an examination of the Neolithic agricultural revolution, the emergence of cities, states and writing, and formation of empires. Cultures such as Sumer and Akkad, Egypt, the Hittites, Israelites, Assyrians, Babylonians, and Persians will be discussed.
Instructor(s): G. Schwartz
Area: Humanities.

AS.130.102. From the Neanderthals to the Neolithic. 3.0 Credits.
Emphasizing theories about human biological and cultural development, this course consists of an in-depth survey of Neanderthal morphology and culture, a brief discussion of evolutionary theory and our fossil ancestors, and concludes with an exploration of the mechanisms and results of the shift from hunting and gathering to farming. (Course formerly known as Introduction: Human Prehistory.) Cross-listed with Anthropology.
Instructor(s): S. McCarter
Area: Humanities.

AS.130.109. Freshman Seminar: Ancient Homes and Houses. 3.0 Credits.
What will your bedroom tell future archaeologists? What can ancient houses tell archaeologists of past societies? This course explores methods/theories of Household Archaeology in the Near East and beyond.
Instructor(s): J. Swerida
Area: Humanities.

AS.130.110. Introduction To Archaeology. 3.0 Credits.
An introduction to archaeology and to archaeological method and theory, exploring how archaeologists excavate, analyze, and interpret ancient remains in order to reconstruct how ancient societies functioned. Specific examples from a variety of archaeological projects in different parts of the world will be used to illustrate techniques and principles discussed.
Instructor(s): E. Anderson
Area: Humanities, Social and Behavioral Sciences.
AS.130.122. Freshman Seminar: The Archaeology of Death, Burial, and the Human Skeleton. 3.0 Credits.
This course will introduce students to the archaeological investigation of past human populations through their mortuary and physical human remains. To this end, major theories and methodologies will be introduced, along with pertinent case studies for discussion.
Instructor(s): C. Brinker
Area: Humanities.

AS.130.126. Gods and Monsters in Ancient Egypt. 3.0 Credits.
To provide a basic introduction to Egyptian Religion, with a special focus on the nature of the gods and how humans interact with them. We will devote particular time to the Book of the Dead and to the "magical" aspects of religion designed for protective purposes.
Instructor(s): R. Jasnow
Area: Humanities.

AS.130.135. Pyramids, Temples and Tombs. 3.0 Credits.
Introduction to the monuments and culture of Egypt from 3500 B.C. to 100 A.D. From the pyramids at Giza to Hellenistic Alexandria, this course surveys in slide illustrated lectures the remains of one of the world's greatest early cultures.
Instructor(s): B. Bryan
Area: Humanities
Writing Intensive.

AS.130.177. World Prehistory: An Anthropological Perspective. 3.0 Credits.
How and why did our nomadic hunting and gathering ancestors become farmers? What led agricultural societies to build cities, develop writing, religious institutions, wage war, and trade for exotic goods? This course surveys prehistory and ancient history from the origins of human culture to the emergence civilization. Although prehistory and ancient history yield evidence of tremendous cultural diversity this course emphasizes common elements of past human experience, culture, and culture change. These include the origins of modern humans and their adjustment to a variety of post-ice age environments, shifts from hunting and gathering to agricultural lifeways, and the initial development of the world's earliest cities and civilizations.
Instructor(s): R. Wanner
Area: Humanities, Social and Behavioral Sciences.

AS.130.203. Archaeology of Africa: From Human Origins to the Emergence of Civilizations. 3.0 Credits.
This course examines Africa's ancient past from the emergence of biologically modern humans, ancient hunter-gatherers, the earliest animal herding and farming populations, to cities and civilizations. While Egypt plays an undeniably central role in world history, this course concentrates in particular on ancient geographies other than Egypt.
Instructor(s): M. Harrower
Area: Humanities.

AS.130.213. Introduction to Ancient Egyptian Art. 3.0 Credits.
This class is a combination of illustrated lecture and discussion, punctuated with visits to museums with Egyptian collections. Participants must be able to join at least one overnight trip to New York and/or Boston (weekend) and be available for two half day visits to Philadelphia and Washington, D.C . or elsewhere (TBA as best for participants) , in addition to visiting Baltimore institutions with the class as part of the course. Discussion of sculpture will take place in front of the objects, so attendance is important for the visits.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.333. Ancient Egypt and Her Neighbors. 3.0 Credits.
An introduction to ancient Egypt's portrayals of and interactions with foreign lands and peoples, including Syria-Palestine to the east and Nubia to the south. Topics include trade, travel, warfare and diplomacy. Textual, iconographical and archaeological sources will be considered.
Instructor(s): A. Arico
Area: Humanities.

AS.130.334. Egyptian Funerary Arts in the Archaeological Museum. 3.0 Credits.
This class will aim to cover the production and choice of funerary objects for Egyptian elite tombs in several eras of antiquity: the Middle and New Kingdoms, the Third Intermediate Period, and the Late Periods. Students will work with specific objects after learning generally about them, and they will carry out analyses of materials, pigments, construction methods, and erosion and degradation effects. They will create a virtual exhibition for the Museum's website and present their results for inclusion in the museum cataloguing project.
Instructor(s): B. Bryan; S. Balachandran

AS.130.351. The Emergence of Civilization: A Cross-Cultural Examination. 3.0 Credits.
A comparative study of the origins of urban, literate civilizations in five culture areas: Mesopotamia, China, the Indus Valley, Egypt, and Mesoamerica. For each area, we will review the physical setting, the archaeological and textual evidence for the development of states and urban civilization, and theories advanced to explain the rise (and eventual collapse) of these complex societies.
Instructor(s): G. Schwartz
Area: Humanities, Social and Behavioral Sciences.

AS.130.353. Space Archaeology: An Introduction to Satellite Remote Sensing, GIS and GPS. 3.0 Credits.
This course introduces technologies archaeologists use to map ancient landscapes. These include Geographic Information Systems (GIS) mapping software, advanced Global Positioning System (GPS) receivers, and various types of satellite imagery. Taught together with AS.131.653.
Instructor(s): M. Harrower
Area: Natural Sciences, Social and Behavioral Sciences.

AS.130.354. Archaeological Method and Theory. 3.0 Credits.
Climate change, population growth, war - what questions do archaeologists ask about the ancient past, how do they collect relevant evidence, and how do they arrive at satisfying answers to their questions? This course will review major theoretical currents in archaeology including evolutionary, cultural-historical, processual and post-processual approaches and discuss the future of archaeology as a scientific and humanistic discipline. Basic techniques for analyzing major categories of artifacts such as lithics, ceramics, archaeobotanical, and zooarchaeological materials will also be introduced.
Instructor(s): M. Harrower
Area: Humanities, Social and Behavioral Sciences.
AS.130.357. Geographic Information Systems in Archaeology. 3.0 Credits.
Applications of GIS in archaeology have recently expanded dramatically and GIS has now become an indispensable tool for archaeological research worldwide. This course will introduce the major applications of Geographic Information Systems (GIS) in archaeology. These include the history of GIS in archaeology, air photography and satellite imagery, predictive modeling, hydrological modeling, viewsheds, and least-cost routes. It will grapple with theoretical issues manifest in archaeological GIS including conflicts between environment and social understandings of the ancient past, and will foster discussion of issues that affect outcomes of analyses including spatial scale and boundary delineation choices that can dramatically influence results. Students will learn the basics of ESRI's ArcGIS software. Taught with AS.131.657.
Instructor(s): M. Harrower
Area: Humanities, Natural Sciences.

AS.130.368. Nomads, Tyrants and Kings: Water in the Ancient Near East. 3.0 Credits.
This course explores economic and social histories of water in the ancient Near East. It examines water's diverse roles in ancient Mesopotamian, Egyptian, Levantine and South Arabian agriculture, politics, ritual and religion, including water's interconnected significance in Judaism, Christianity, and Islam. Taught jointly with AS.131.615.
Instructor(s): M. Harrower
Area: Humanities.

AS.130.376. Ancient Magic and Ritual. 3.0 Credits.
This course will introduce students to the vast body of rituals that were practiced and performed in antiquity, with a particular emphasis on rituals from ancient Mesopotamia, Egypt, and the Hebrew Bible. In addition to examining rituals from a comparative perspective, anthropological and sociological studies of ritual will be read and discussed to shed light on the social, cultural, and political significance of ritual in the ancient world and beyond.
Instructor(s): P. Delnero
Area: Humanities.

AS.130.377. Creating an Egyptian Temple. 3.0 Credits.
This class will challenge every participant to plan a temple environment for a particular deity. The readings, lectures, and discussions will cover the mythology around specific gods and how it influenced temple architecture, location, ritual, and festivals. It will survey the history of temple building in Egypt, the role of architecture and art – particularly wall reliefs – in communicating the functions of particular parts of temples. The aim is to help students understand what requirements an Egyptian temple needed to fulfill. Then each student will plan a temple for a chosen deity and explain to peers how it meets the ancient requirements.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.378. Geoarchaeology: Applications of Earth Science to Archaeology. 3.0 Credits.
Geoarchaeology is a multidisciplinary subfield that applies the tools and techniques of earth science to understand ancient humans and their interactions with environments. This course examines basic topics and concepts, including archaeological site formation, paleoenvironmental reconstruction, raw materials and resources, soil science, deposition and erosion of wind and water-borne sediments in different environments such as along rivers, lakes and coastlines, radiocarbon and other chronometric dating methods, and ground-based remote sensing, including ground penetrating radar.
Instructor(s): M. Harrower
Area: Natural Sciences, Social and Behavioral Sciences.

AS.130.384. Old Kingdom Art. 3.0 Credits.
This course will explore the artistic expression of Egyptian culture from the 3rd through the 6th Dynasties, ca. 2700-2100 B.C. Tombs, temples, statuary, and two-dimensional wall decoration provide a large visual vocabulary of Egyptian concepts. This class will look at these elements, separately and in combination in order to consider the intentions behind the art and evaluate the degree to which religious and ideological symbolism, known from later Egyptian art, should be understood in the early pyramid-building era.
Instructor(s): B. Bryan
Area: Humanities.

AS.130.395. Being in Ancient Egypt: Ethnicity, Sexuality, and Gender. 3.0 Credits.
What was it like to live in ancient Egypt? At first this question may seem deceptively straightforward. But with further thought, its complexity becomes clear. Who are we concerned with? How the king lived? A poor farmer? His wife or children? A foreign immigrant? Moreover, what is our evidence for life in Egypt? Do all of the sources support similar interpretations? This course will begin to tackle these questions by considering the experiences of different people in ancient Egypt.
Instructor(s): T. Prakash
Area: Humanities.

AS.130.420. Seminar in Research Methods in Near Eastern Studies: (Auto)biography in the Ancient Near East. 3.0 Credits.
Just as in our time, the peoples of the ancient Near East were greatly interested in their own pasts. One of the most vibrant manifestations of this interest was the writing of biographies, in which ancient authors told the stories of individual lives. These biographies present an enormous challenge to contemporary historians. On the one hand, they offer a wealth of evidence – sometimes our only evidence – about some of the most famous persons of antiquity. On the other hand, the biographies were seldom written according to what we might consider “proper historical method.” How, as modern historians, do we approach these biographies in studying the ancient past? Using a variety of case studies, students will develop skills in specific research skills such as critical reading, analysis, and interpretation. AS.130.420 is required of NES Majors, but is also open to non-majors who have taken at least one 100-level and one 300-level Near Eastern Civilization course, or with the consent of the instructor.
Instructor(s): J. Lauinger
Area: Humanities
Writing Intensive.

AS.133.615. Representation and Identity in Ancient Egypt.
Using artistic, archaeological, and textual data, this course will apply recent anthropological and archaeological theories for understanding identity to ancient Egypt. In order to successfully approach such a broad concept, which could easily encompass many other topics, we will focus specifically on three different types of identity: ethnic (and cultural), gender, and sexual. Throughout the semester, we will explore how scholars identify past identities and the issues associated with this process. We will also consider the ways in which these identities were fluid, socially or culturally restricted, and self-defined.
Instructor(s): T. Prakash
Area: Humanities.
Earth Planetary Sciences 
AS.270.205. Introduction to Geographic Information Systems and Geospatial Analysis. 3.0 Credits.
The course provides a broad introduction to the principles and practice of Geographic Information Systems (GIS) and related tools of Geospatial Analysis. Topics will include history of GIS, GIS data structures, data acquisition and merging, database management, spatial analysis, and GIS applications. In addition, students will get hands-on experience working with GIS software.
Instructor(s): X. Chen
Area: Engineering, Natural Sciences.

Behavioral Biology 
AS.290.101. Human Origins. 3.0 Credits.
This course examines the origins of human structure, function and behavior from an evolutionary perspective. It includes study of the evolution, behavior and behavioral ecology of nonhuman primates, hominid evolution (including the paleontological and archaeological records), and the origins of human cognition, social behavior and culture.
Instructor(s): P. Holland
Area: Natural Sciences, Social and Behavioral Sciences.

Program in Museums and Society 
AS.389.201. Introduction to the Museum: Past and Present. 3.0 Credits.
This course surveys museums, from their origins to their most contemporary forms, in the context of broader historical, intellectual, and cultural trends including the social movements of the 20th century. Anthropology, art, history, and science museums are considered. Cross-listed with History and History of Art.
Instructor(s): J. Kingsley
Area: Humanities, Social and Behavioral Sciences.

AS.389.205. Examining Archaeological Objects. 3.0 Credits.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists’ studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.250. Conservation of Material Culture: Art, Artifacts and Heritage Sites. 3.0 Credits.
This course will introduce students to the field of art conservation through the study of paintings, paper, books, objects, contemporary sculpture and historic preservation. Topics covered will include: methods of manufacture, agents of deterioration, preservation initiatives, conservation treatment and ethics, and conservation science. Cross-listed with History of Art. Class usually meets at 1:30 - 3:50 PM, except for days with field trips.
Instructor(s): L. Trusheim
Area: Humanities.

AS.389.315. Ancient Color: The Technologies and Meanings of Color in Antiquity. 3.0 Credits.
What role did the colorful surfaces of sculptures, vessels and textiles play in the ancient world? We examine historical texts and recent scholarly and scientific publications on the technologies and meanings of color in antiquity, and use imaging and analytical techniques to study polychromed objects from the Johns Hopkins Archaeological Museum.
Instructor(s): S. Balachandran
Area: Humanities, Social and Behavioral Sciences.

AS.389.336. Heritage at Work. 3.0 Credits.
Working with the Catoctin Furnace historic site, students will gain hands-on experience connecting archaeology with interpretive exhibitions, public outreach, and community engagement. Several field trips to Catoctin required. M&S practicum course.
Instructor(s): E. Comer
Area: Humanities, Social and Behavioral Sciences.

AS.389.340. Critical Issues in Art Conservation. 3.0 Credits.
The course examines recent controversies in the conservation of major global art works and sites, raising questions concerning the basic theoretical assumptions, practical methods and ethical implications of art conservation. Cross-listed with History of Art and Anthropology.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.349. Art, Museums and the Law. 3.0 Credits.
This course will introduce and examine the legal systems that structure and guide museums’ management of collections and relationships with artists, employees, the public, the state, and the international community.
Instructor(s): W. Levandusky
Area: Humanities.

AS.389.440. Who Owns Culture?. 3.0 Credits.
This seminar explores the complicated, often explosive concept of cultural property, including questions surrounding the ownership, preservation, and interpretation of artifacts, monuments, heritage sites, and living traditions. Cross-listed with Anthropology and History of Art.
Instructor(s): E. Rodini
Area: Humanities, Social and Behavioral Sciences.

Environmental Health and Engineering 
EN.570.205. Ecology. 3.0 Credits.
Introduction to processes governing the organization of individual organisms into populations, communities, and ecosystems. Interactions between individual organisms, groups of organisms, and the environment, including adaptation, natural selection, competition.
Instructor(s): G. Brush
Area: Natural Sciences.

EN.570.406. Environmental History. 3.0 Credits.
Environmental history explores the interactions between social change and environmental transformation, or the ways in which societies modify landscapes and are themselves affected by geological, climatological and changing ecological conditions. Topics include the relationship between climate change and human evolution, the environmental impacts of market-based commodity production and regional economic specialization; the relationship between urbanization and environmental change; how warfare affects and is affected by environmental conditions.
Instructor(s): E. Schoenberger
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

Behavioral Biology Program 
http://krieger.jhu.edu/behavioralbiology

The David S. Olton Behavioral Biology Program seeks to establish a greater understanding of the relations of brain and behavior through an interdisciplinary program of study. Students in the Behavioral Biology Program examine the complex interplay between environment and behavior, and the processes and mechanisms that underlie behavior. One goal of the program is for students to learn how to integrate scientific discoveries from the wide array of scientific fields of inquiry that
contribute to the study of behavioral biology, from molecular biology to sociology.

The interdisciplinary characteristics of the Behavioral Biology Program provide an excellent preparation for post-graduate work. For those interested in the health professions, behavioral biology can be integrated into a premedical curriculum that will provide a broad, humanistic perspective. For those who wish to pursue scientific careers in psychopharmacology, behavioral neuroscience, and physiological psychology, the program provides excellent preparation. Students interested in the fields of organismal or integrative biology should also consider this major.

Many students ask about the similarities and differences between the behavioral biology major and the neuroscience major. Both of these programs are interdepartmental, and a majority of professors teach courses that are listed for both majors. Behavioral Biology majors can explore many aspects of the biology of behavior, including the neural mechanisms of behavior (which obviously overlaps with the neuroscience major), but also biomechanical, evolutionary, ecological, and social aspects of behavior. The behavioral biology major also has fairly liberal course requirements which provide students with an opportunity to explore more choices in their liberal arts education. Students majoring in neuroscience focus directly on the brain and on neural function/mechanisms. Generally speaking, the systems Neuroscience focus area in the neuroscience major has the most overlap with behavioral biology.

The core program of the behavioral biology major provides background and breadth in

1. The life sciences (e.g., biology and neuroscience)
2. The natural sciences (e.g., chemistry and physics) and mathematics (e.g., calculus and statistics)
3. The social and behavioral sciences (e.g. psychology and anthropology)

The exact courses to be taken are determined by the student in conjunction with the faculty adviser. A grade of C- or better is required for courses fulfilling major requirements and courses may not be taken satisfactory/unsatisfactory. Hopkins undergraduates may enter the Behavioral Biology Program at any time, provided all requirements can be completed before graduation.

Additional information regarding the Behavioral Biology Program is available through our website at http://krieger.jhu.edu/behavioralbiology. You may also contact our Academic Program Administrator, Linda White, linda.m.white@jhu.edu or 410-516-6196.

Requirements for the B.A. Degree

Also see Requirements for a Bachelor’s Degree. (p. 7) Requirements for the behavioral biology major are as follows:

Behavioral biology research or internship (one semester)
For students with AP Biology credit, they may use only one course and its lab from those credits towards this requirement. Therefore, these students must take at least one biology course and its lab at JHU. Students who elect to take General Biology I or II with its lab will lose the corresponding AP credits. Students should also refer to AP credit policies for additional details around the use of AP Biology credits.

Students should refer to the program website (http://krieger.jhu.edu/behavioralbiology/courses) or the schedule of classes to identify elective choices.

**Sample Program**

This is only one of many possible course sequences that students may elect to follow; it assumes that students do not have any AP/IB/TR courses to apply toward their degrees.

Total Credits: 7.5-11.5

* AS.080.250 Neuroscience Laboratory can be taken anytime after AS.200.141

** AS.290.490 Senior Seminar: Behavioral Biology can be taken either Fall or Spring of senior year.

### Honors in the Major

To receive honors in behavioral biology, students must have met the following criteria:

1. Earn a GPA of 3.5 or better in major requirements
2. Conduct research and give a research presentation
3. Receive a recommendation from research mentor

For current faculty and contact information go to http://krieger.jhu.edu/behavioralbiology/faculty_directory/

Courses

AS.290.101. Human Origins. 3.0 Credits.
This course examines the origins of human structure, function and behavior from an evolutionary perspective. It includes study of the evolution, behavior and behavioral ecology of nonhuman primates, hominid evolution (including the paleontological and archaeological records), and the origins of human cognition, social behavior and culture.
Instructor(s): P. Holland
Area: Natural Sciences, Social and Behavioral Sciences.

AS.290.303. Animal Communication. 3.0 Credits.
This course examines animal communication in all modalities (especially sound, sight, and scent) across taxa. Production, perception and evolution of signals will be discussed. Students will learn how to conduct research and write scientific papers in publication form.
Prerequisites: (AS.200.208 OR AS.200.141) AND (AS.171.102 OR AS.171.104)
Instructor(s): K. Bohn
Area: Natural Sciences, Social and Behavioral Sciences.

AS.290.304. Comparative Neuroanatomy. 3.0 Credits.
This course examines the phylogenetic and developmental history of the central nervous system across the vertebrate tree of life, with emphasis on the deep history of those features that characterize the human brain. We will study how our understanding of non-human vertebrates (both model and non-model organisms) can provide important insights into the structure and function of the modern human brain.
Prerequisites: (AS.080.305 AND AS.080.306) OR AS.200.141
Instructor(s): A. Balanoff
Area: Natural Sciences.

AS.290.420. Human Sexual Orientation. 3.0 Credits.
This course will examine the historical and current theories of sexual orientation and sexual variation development by examining the biological, psychological and social contributing factors that influence the development of sexual orientations and variations along with treatment and modification of problematic sexual behaviors. Please note that the use of electronic devices is not permitted during this class, in order to promote the full interactive potential of this engaging seminar-style offering. Students may enroll in both AS.200.204 and AS.290.420, but cannot do so in the same semester. Enrollment is limited to Senior Majors & Minors in Behavioral Biology, Biology, Cognitive Science; Medicine, Science & the Humanities; Molecular & Cellular Bio; Neuroscience; Psychology; Public Health; Sociology; Study of Women, Gender, & Sexuality.
Corequisites: Students may enroll in both AS.200.204 and AS.290.420, but cannot do so in the same semester.
Instructor(s): C. Kraft
Area: Social and Behavioral Sciences.

AS.290.490. Senior Seminar: Behavioral Biology. 1.0 Credit.
Great ideas in Behavioral Biology. Discussion of classic and cutting edge articles in the original literature. Student presentations and reaction papers. Capstone course for senior Behavioral Biology majors.
Prerequisites: (AS.290.101 AND AS.290.208 AND AS.290.141) or Instructor permission.
Instructor(s): C. Moss; P. Holland
Area: Social and Behavioral Sciences.

AS.290.500. Connections in Behavioral Biology. 0.5 Credit.
A small group of students will meet two times in the semester to share experiences and information on research, internship and volunteer activities in Behavioral Biology. This course is designed to 1) help Behavioral Biology majors obtain real world experiences that can lead to opportunities after graduation, 2) provide an informal setting to develop oral and written communication skills, and 3) build community among students in the major. Students will make oral presentations to the group about activities they wish to pursue or have already completed. Students will also write a short paper/news piece or prepare a webpage on an internship, research or volunteer experience.
Instructor(s): Staff.

AS.290.501. Research-Freshmen. 3.0 Credits.
Instructor(s): Staff.

AS.290.502. Research-Freshmen. 1.0 - 3.0 Credits.
Instructor(s): Staff.

AS.290.503. Research-Sophomores. 3.0 Credits.
Instructor(s): Staff.

AS.290.504. Research-Sophomores. 1.0 - 3.0 Credits.
Instructor(s): Staff.

AS.290.505. Research-Juniors. 3.0 Credits.
Instructor(s): Staff.

AS.290.506. Research-Juniors. 1.0 - 3.0 Credits.
Instructor(s): Staff.

AS.290.507. Research-Seniors. 3.0 Credits.
Instructor(s): Staff.

AS.290.508. Research-Seniors. 1.0 - 3.0 Credits.
Instructor(s): Staff.

AS.290.519. Independent Study. 3.0 Credits.
Instructor(s): L. Gorman.

AS.290.520. Independent Study. 1.0 - 3.0 Credits.
Instructor(s): C. Moss; K. Bohn; L. Gorman.

AS.290.590. Behavioral Biology Internship. 1.0 - 3.0 Credits.
Instructor(s): L. Gorman.

AS.290.594. Behavioral Biology Internship. 1.0 Credit.
Instructor(s): C. Moss; L. Gorman.

AS.290.596. Behavioral Biology Internship. 1.0 - 3.0 Credits.
Instructor(s): L. Gorman.

AS.290.597. Research - Summer. 3.0 Credits.
Instructor(s): C. Moss; E. Fortune; F. Madison; K. Bohn; L. Gorman.

Cross Listed Courses

Biology

AS.020.151. General Biology I. 3.0 Credits.
This course is an introduction to biology from an evolutionary, molecular and cellular perspective. Specific topics and themes include evolutionary theory, the structure and function of biological molecules, mechanisms of harvesting energy, cell division, classical genetics and gene expression. This section will involve in-class problem solving and the use of assigned pre-class videos and questions.
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.
Writing Intensive. Area: Natural Sciences
Instructor(s): L. Gorman
Prerequisites: Pre-req: AS.020.151
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.152. General Biology II. 3.0 Credits.
This course builds on the concepts presented and discussed in General Biology I. The primary foci of this course will be on the diversity of life and on the anatomy, physiology, and evolution of plants and animals. There will be a special emphasis on human biology.
Prerequisites: Prereq: AS.020.151
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.153. General Biology Laboratory I. 1.0 Credit.
This course reinforces the topics covered in AS.020.151. Students participate in a semester-long project, identifying bacteria from Homewood campus soils using molecular biology techniques. Other laboratory exercises cover aspects of evolution, genomics and biochemistry. Cross-listed with Behavioral Biology. Student must have enrolled in AS.020.151 either this term or in past terms. Students who have credit for AP Biology but take General Biology Lab I will lose four credits of AP Biology credit. Cross-listed with Behavioral Biology.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class. To access the tutorial, login to myLearning and enter 458083 in the Search box to locate the appropriate module; AS.020.151
Instructor(s): R. Pearlman
Area: Natural Sciences.

Anthropology
AS.070.352. Evolution, Ecology, Becoming. 3.0 Credits.
The concept of evolution is central to social theory. Originating in the question of the species, it has moved into questions of human ecology, cultural forms and modes of thought. While it remains a deeply contested, often criticized concept, particularly in its neo-Darwinian manifestation, it orients anthropological thinking in ways that are as yet to be examined. Reaching into the archives of anthropology and other cognate disciplines, this course will examine the writings of Lyell, Darwin, Marx, Morgan, Boas, Steward, Bateson, Ingold among others. Co-listed with AS.070.610
Instructor(s): A. Goodfellow; N. Khan
Area: Humanities, Social and Behavioral Sciences.

AS.070.330. Brain Injury & Recovery. 3.0 Credits.
This course investigates numerous types of brain injuries and explores the responses of the nervous system to these injuries. The course’s primary focus is the cellular and molecular mechanisms of brain injury and the recovery of function. Discussions of traumatic brain injury, stroke, spinal cord, and tumors, using historical and recent journal articles, will facilitate students’ understanding of the current state of the brain injury field. Cross-listed with Psychological and Brain Sciences and Behavioral Biology.
Prerequisites: (AS.080.305 AND AS.080.306) OR (AS.020.312 OR AS.020.306) OR (200.141 and 020.306) OR Permission of Instructor
Instructor(s): L. Gorman
Area: Natural Sciences
Writing Intensive.

AS.080.348. Science of Learning. 3.0 Credits.
Can what we know about the brain guide how we learn or teach in our schools? This seminar course is designed to address this question. In this course we will focus on the science of what we know about learning and teaching (and not the politics) to see if we can actually use the research to “optimize learning in society”. As we read the literature, we will look at some of the “neuromyths” that have been propagated thus far and discuss how to avoid creating new neuromyths by effectively communicating the research.
Prerequisites: Pre-reqs: AS.080.306 OR AS.200.141
Instructor(s): L. Gorman
Area: Natural Sciences, Social and Behavioral Sciences Writing Intensive.

Psychological Brain Sciences
AS.200.141. Foundations of Brain, Behavior and Cognition. 3.0 Credits.
A survey of neuropsychology relating the organization of behavior to the integrative action of the nervous system. Cross-listed with Behavioral Biology and Neuroscience.
Instructor(s): L. Gorman
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.208. Animal Behavior. 3.0 Credits.
Examines basic principles of animal behavior (orientation, migration, communication, reproduction, parent-offspring relations, ontogeny of behavior and social organization). Evolution and adaptive significance of behavior will be emphasized.
Prerequisites: AS.200.141 OR AS.200.152 OR Permission of Instructor.
Instructor(s): K. Bohn
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.344. Behavioral Endocrinology. 3.0 Credits.
An examination of the effects of hormones on behavior in non-human and human animals. Topics will include the effects of hormones on sexual differentiation, reproductive behavior, parental behavior, homeostasis and biological rhythms, regulation of body weight, learning and memory. Cross-listed with Behavioral Biology and Neuroscience.
Prerequisites: Pre-reqs: (AS.200.141 OR AS.080.306) OR (AS.020.151 AND AS.020.152) OR (AS.020.305 AND AS.020.306) or instructor’s permission
Instructor(s): K. Bohn
Area: Natural Sciences, Social and Behavioral Sciences.

AS.200.376. Psychopharmacology. 3.0 Credits.
Designed to provide information about how drugs affect the brain and behavior. The course focuses on biological concepts underlying structures and functions of the brain that relate to mental disorders. An introduction to neurobiology and brain function is presented as it applies to the interaction of various classes of drugs with the individual neurotransmitter systems in the brain. A brief historic review is followed by a discussion of clinical relevance. Cross-listed with Behavioral Biology and Neuroscience. Enrollment limited to juniors and seniors.
Prerequisites: AS.200.141 OR AS.020.306 OR AS.080.305 or Instructor Permission
Instructor(s): H. Adwanikar; S. Sterbing-d’angelo
Area: Natural Sciences, Social and Behavioral Sciences.
AS.200.386. Animal Cognition. 3.0 Credits.
Examine relations between brain, mind, and behavior in nonhuman animals, focusing on topics such as learning, memory, attention, decision-making, navigation, communication, and awareness. We will take a variety of approaches, including behavioral, computational, evolutionary, neurobiological, and psychological perspectives.
Prerequisites: AS.200.141 OR AS.200.208 OR AS.290.101 or Instructor permission.
Instructor(s): P. Holland
Area: Social and Behavioral Sciences.

Bioethics Program
http://www.bioethicsinstitute.org/

The practice of medicine, the development of public health policies, and advances in the biomedical sciences raise fundamental moral and philosophical issues. The bioethics program is designed to provide students with an understanding of these issues, and the background and the conceptual tools to think about them clearly. The program is a collaboration between the Johns Hopkins Berman Institute of Bioethics and the Department of Philosophy, and draws on the resources of both.

At least two upper-level (300- or 400-level) seminars offered by the bioethics program (AS.150.3xx+ with POS-Tag PHIL-BIOETH) 6
Two additional bioethics seminars not counted in fulfillment of the previous requirement approved by the program’s advisory committee. * 6

Total Credits 26

* Pre-approved courses fulfilling this requirement will have the POS-Tag PHIL-BIOETH in their course description.

All courses must be taken for letter grades and receive a grade of C- or higher.

Biology
http://www.bio.jhu.edu

The Department of Biology offers a broad program of undergraduate, graduate, and postgraduate study in the biological sciences. Included among the areas in which instruction and research opportunities are available are biochemistry and biophysics, cell biology, molecular biology, microbiology, developmental biology, genetics, neuroscience, and immunology.

Undergraduate Programs
The Biology Department offers two degree options for undergraduate students, a Bachelor of Arts degree for biology majors and a Bachelor of Science degree for molecular and cellular biology majors.

Requirements for the B.A. Degree
(Also see Requirements for a Bachelor’s Degree. (p. 7))

The B.A. degree in biology is designed to provide students with a thorough grounding in modern biology, with special emphasis on the molecular aspects of the discipline.

All courses required for the biology major must be taken for a letter grade (not S/U) and be passed with a grade of C- or better with one exception. The department will accept one passing grade below C- in the senior year provided that the average for all formal lecture and laboratory courses is at least 2.0. http://bio.jhu.edu/undergraduate/ba-requirements/

**B.S. Degree in Molecular and Cellular Biology**

The Biology Department offers a B.S. degree in molecular and cellular biology. The B.S. program is designed to provide a rigorous preparation for advanced study in the biomedical sciences. The program is tailored not only to students planning to enter Ph.D. programs or obtain employment in the biotechnology industry but also for premedical students.

All courses required for the molecular and cellular biology major must be taken for a letter grade (not S/U) and be passed with a grade of C- or better with one exception. The department will accept one passing grade below C- in senior year provided that the average for all formal lecture and laboratory courses is at least 2.0. http://bio.jhu.edu/undergraduate/bs-requirements/

**Requirements**

Same as BA except:

- 6 credits of research required
- 2 additional electives (2 total electives must be AS.020.xxx courses)
- General Biology is not required

The B.S. degree in molecular and cellular biology requires, in addition to the requirements for the B.A. degree in biology, at least two additional upper level elective courses totaling five additional credits or more (for a total of at least 13 credits) from the elective list, and two of those electives must be at least 3 credit hours and have an 020 number. The B.S. degree also requires six credits of research supervised or sponsored by a faculty member in Biology. The supervised research will include participation in group meetings and writing a summary of accomplished work at the end of the year. General Biology I and II are not required for the B.S. degree.

**Honors in Biology**

Students completing either a biology major or molecular and cellular biology major are eligible to receive their degree with honors. http://www.advising.jhu.edu/honors.php

The B.A. in biology with honors requires, in addition to the regular requirements for the B.A. in biology, a 3.5 GPA for natural sciences and quantitative studies courses, two semesters of research, a presentation of a poster describing the independent research, and a recommendation from the research sponsor.

The research requirement must be completed under the direction of a faculty member in a department associated with the Johns Hopkins University or the Johns Hopkins Medical Institutions. If the student’s research director for independent research is not a member of the Department of Biology, a Biology faculty member must serve as a sponsor and approve the recommendation from the research director.

**B.A./M.S. Degree in Molecular and Cellular Biology**

The Biology Department offers a B.A./M.S. (or B.S./M.S.) degree in Molecular and Cellular Biology. The combined degree is open only to Johns Hopkins University undergraduates majoring in Biology or Molecular and Cellular Biology.

Students must complete all requirements for the B.A. or B.S. degree and the following requirements.

Four additional advanced or specialized courses, at least two of which are at the 600-level or above.*

Total Credits: 75-80

**Teaching**

* Eligible courses are listed on the Biology Department website.

** The Mentored Research Program culminates in the preparation of a written report of the research project in the form of a thesis. The written report and an oral presentation of the work are evaluated by a Thesis Committee. Passing performance, as judged by the committee, is required for the M.S. degree.

*** Teaching is an integral component of the master’s degree. The teaching requirement is fulfilled as a teaching assistant for lecture and/or lab courses) for two semesters.

Students admitted to the combined program will be awarded the M.S. degree if they complete the requirements listed above, receive a grade of B or better in all courses during the duration of the program, and achieve passing performance on the final written report and oral presentation of the research project completed during the research year as judged by the Thesis Committee.
Admission

Admission to the Molecular and Cellular Biology M.S. program is selective. Hopkins Biology majors and Molecular and Cellular Biology majors who have achieved a minimum overall grade point average of 3.2, and a minimum natural science grade-point average of 3.0, and have had at least two semesters of previous research experience may apply for admission during their junior or senior year. Students with a GPA below the minimum requirement will be considered under special circumstances. Admission decisions are made by the Molecular and Cellular Biology M.S. Program Committee, on the basis of:

1. academic record,
2. a written proposal for a project to be completed in the Mentored Research Program,
3. letters of support and recommendation,
4. an interview if required.

Requirements for the Ph.D. Degree in Cellular, Molecular, Developmental Biology and Biophysics (CMDB Program)

A program of study leading to the Ph.D. degree is open to students who are candidates for, or who already have, the bachelor’s or master’s degree in the biological or physical sciences. To be admitted, the applicant should have had either a thorough training in the fundamentals of biology and both organic chemistry and general physics, or a broad training in the physical sciences and mathematics. Special attention is given to the applicant’s quality of scholarship and his or her promise as an investigator.

In addition to the general university requirements for an advanced degree (see Academic Information for Graduate Students (p. 45)), doctoral candidates must meet the following departmental requirements:

- Four core courses and four 600- and 700-level electives.
- At least one year of laboratory teaching during the period of graduate residence.
- A high level of achievement in a comprehensive written proposal and oral examination covering proficiency in the field of the student’s research interest and various areas of biology and related fields.
- A dissertation based on a program of independent research, a public seminar followed by an oral examination by the thesis committee.

All graduate students are required to complete the four core courses during the first year. In addition, students are required to complete four elective courses before graduation chosen from the list below of 600-level electives and 700-level seminars offered each semester. At least two out of the four courses must be 600-level.

Teaching Opportunities

Since most biology Ph.D.s will teach at some time during their careers, experience in teaching is considered an essential part of the Ph.D. program. The minimum teaching requirement is three contact hours a week for one year in the laboratory sections of undergraduate courses. Further teaching experience is gained through the preparation and presentation of reports in seminars and journal clubs. The department stresses organization of material and clarity of presentation.

Facilities

The lecture rooms, teaching laboratories, and research facilities of the Biology Research Complex (consisting of Seeley G. Mudd Hall and Undergraduate Teaching Laboratories) offer a thoroughly modern research facility for molecular biology.

Financial Aid

The department has fellowship funds for the support of graduate students. Awards are granted for tuition and living expenses. Laboratory fees and research expenses are paid by the department.

Carnegie Institution for Science, Department of Embryology

The Carnegie Institution’s Department of Embryology is located on the Homewood campus, close to the Biology research complex. Members of this group hold part-time appointments in the Department of Biology and participate in the training of graduate students. With the approval of both the department and the Carnegie staff, a number of graduate students in biology conduct thesis research in the Carnegie laboratory. The interests of the Carnegie staff include developmental and molecular biology.

For current faculty and contact information go to http://www.bio.jhu.edu/ Directory/TenuredPlusTenureTrack.aspx

Faculty

Chair

Vincent J. Hilser
Professor: thermodynamics, protein structure and dynamics, molecular recognition, protein folding.

Professors

Karen Beemon
retroviral RNA processing and transport; avian leukosis virus tumorigenesis.

Kyle W. Cunningham
calcium transport and signaling mechanisms in yeast.

Ernesto Freire

Edward M. Hedgecock
developmental genetics of the nervous system of Caenorhabditis elegans.

M. Andrew Hoyt
genetics of chromosome segregation and signal transduction in yeast.

Evangelos N. Moudrianakis
assembly and dynamics of nucleoproteins and chromosomes, bacterial, and chloroplast bioenergetics.

Joel F. Schildbach
Vice Dean for Undergraduate Studies: structural biology of bacterial conjugation.

Robert Schleif
protein-DNA interactions and regulation of gene activity.

Trina Schroer
microtubule-based motors, organelle transport.

James Taylor
genomics of gene regulation, chromatin structure and organization, computational genomics and bioinformatics

Mark Van Doren
gonad development and the formation of sexual dimorphism in the soma and germline.

Beverly R. Wendland
James B. Knapp Dean, Arts and Sciences: molecular mechanisms of endocytosis in yeast

Haiping Zhao
cellular and molecular mechanisms underlying the development and function of olfactory sensory neurons.

**Associate Professors**

Xin Chen
understanding how genes are expressed in an ordered way to regulate germ cell differentiation; epigenetic mechanisms that participate in regulation.

John Kim
Deputy Director of Graduate Studies; deciphering the epigenetic mechanisms of small RNA-mediated gene regulation and their collaboration with RNA binding proteins.

Reiji Kuruvilla
William Gill Associate Professor; Director of Graduate Studies: local retrograde signaling by target-derived neurotrophins in neuronal development.

**Assistant Professors**

Andrew Gordus
Understanding how novel and innate behaviors are encoded at the cellular and genetic level

Robert Johnston
stochastic and long-range gene regulatory mechanisms that diversify neuronal subtypes.

Christian Kaiser
single-molecule biochemistry studies of the machines and processes in protein translation, translocation, and folding.

Yumi Kim
molecular mechanisms of chromosome segregation during meiosis

Rajiv McCoy
computational genomics; human evolution and functional genetic variation

**Professors Emeriti**

Maurice J. Bessman
biochemistry and enzymology, synthesis of nucleic acid derivatives, biochemical basis of spontaneous mutations.

Ludwig Brand
fluorescence studies of protein and membrane dynamics.

Michael Edidin
immunology, membrane organization and dynamics, immunology.

Douglas Fambrough
membrane proteins, targeting, structure, function, and regulation, Na, K-ATPase, Ca-ATPase.

Richard E. McCarty

Allen Shearn
developmental genetics, imaginal disk development in Drosophila studied in lethal and temperature-sensitive mutants.

**Research Professor**

Ru Chih Huang
William D. McElroy Research Professor: gene regulation and chromosomal structure and function, principles of cancer biology and control of cancer and viral growth.

Yuan Chuan Lee
glycoproteins, glycolipids, carbohydrate receptors, and cell-surface substances.

Young-Sam Lee
Assistant Research Professor

J. Michael McCaffery
Integrated Imaging Center Director

Peter Privalov
physics of protein structure.

**Academy Professor**

Ludwig Brand
fluorescence studies of protein and membrane dynamics.

Yuan Chuan Lee
glycoproteins, glycolipids, carbohydrate receptors, and cell-surface substances.

**Lecturers**

Anna Coppola
Eric Johnson
Richard Shingles

**Associate Research Professor**

Jocelyn DiRuggiero
genomic diversity, DNA repair mechanisms and environmental stress responses in extremophiles.

**Senior Lecturer**

Robert Horner
Adjunct Professor (NIH): genetic recombination and chromosome structural changes that occur during meiosis and DNA damage repair, using budding yeast as a model system.

George Scangos
Professor.

Allan Spradling
Professor: molecular genetics of Drosophila.

Yixian Zheng
Professor and Interim Director of Carnegie Institution for Science: cell division, cell morphogenesis, and cell fate specification.

### Associate Teaching Professor

Emily Fisher
Director of Undergraduate Studies

For current course information and registration go to https://sis.jhu.edu/classes/

## Courses

**AS.020.104. Freshman Seminar: From Genes to DNA and Back. 1.5 Credits.**

A course consisting of introductory lectures followed by student presentations in the form of seminars. The issues we usually analyze are: How did we arrive at the concept of the “gene”? What are the early observations that gave substance to this concept? How did we arrive at the “one gene, one enzyme” dogma? What is the chemical nature of the gene? Is DNA enough for regulated gene expression? Is it “all in our genes”? What is genetic plasticity and epigenetics? What about genomics and proteomics? In the course of our analyses we bring together observations, and experimental results and ideas not only from biological sciences (Genetics, Cell and Developmental Biology and Genetics) but also from Physics, Sociology, Politics and Philosophy. We do all this in order to clarify how observations turn to ideas, then dogmas and even biases that distort the true meaning of objective Sciences.

Instructor(s): E. Moudrianakis

Area: Natural Sciences.

**AS.020.106. Freshman Seminar: Tuberculosis. 1.0 Credit.**

Mycobacterium tuberculosis is an extremely successful intracellular bacterial pathogen able to manipulate phagocytic cells and its own metabolism to survive within a host. The molecular mechanisms of this survival and resistance to antibiotics will be studied. Freshmen only.

Instructor(s): R. Horner

Area: Natural Sciences.

**AS.020.111. Freshman Seminar: The "Nobels" in Medicine and Chemistry. 2.0 Credits.**

Key events in our understanding of the life sciences will be traced with the aid of Nobel awards.

Instructor(s): L. Brand

Area: Natural Sciences.
AS.020.115. Bioenergetics. 2.0 Credits.
This course is a combination of lectures, student presentations and group discussions that address fundamental principles and also contemporary issues examining the way all forms of Life on Earth are ultimately dependent on sunlight to satisfy their food and energy requirements. We examine the steps from the capture of Physical energy (photons), to the development of electrochemical potentials and finally, to their utilization by cellular organelles towards the synthesis of the chemical "currency" that fuels all biological processes (biosynthesis, cell communication, movements, etc.). Special emphasis will be on current developments in biotechnologies that utilize microbial populations to supply us with fuels and also to clean up environmental hazards. The course will also consider ways to extract lessons from Nature's successful designs and harmonious adaptations so that we, in the long run, can utilize them towards a minimization of our negative impact on the environment. Note: Freshmen and Sophomores only, with good foundations in any two of the following: Physics, Chemistry, Biology, Biophysics.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.120. Introduction to Laboratory Research. 1.0 Credit.
This course will introduce students to a variety of biochemical and molecular biological laboratory techniques. These will include DNA analysis by restriction enzyme mapping, amplification of DNA segments by PCR, lipid analysis by chromatography. Additionally, students will visit a variety of biological laboratories to observe actual research projects. *Prerequisites: High school biology and chemistry.
Instructor(s): Staff
Area: Natural Sciences.

AS.020.126. Techniques in Molecular Biology. 1.0 Credit.
This course is designed to supplement the scientific classroom experience of students by providing hands on experience with the essential core molecular biology techniques of bacterial DNA cloning, DNA analysis, and protein analysis. Students will be able to understand and explain how these methodologies work scientifically and will develop the basic laboratory skills necessary for the successful completion of the assays.
Instructor(s): J. Gordy.

AS.020.127. Concepts in Cancer Research I: Pre-Diagnosis. 1.0 Credit.
This course will introduce current topics in cancer research with a focus on the current state of knowledge regarding pre-diagnosis concepts in cancer research. We will first provide students with the context in which to interpret the latest findings in cancer research by giving a brief overview of cancer biology and descriptive epidemiology of the most common cancers in the United States. We will then discuss the current state of knowledge regarding cancer etiology and primary prevention strategies, providing specific examples from research currently being conducted at the National Cancer Institute along with other emerging research in the field of cancer prevention. Finally, we will introduce students to concepts and research in cancer screening. We will employ multiple formats to promote student learning and to introduce different tools for research. These may include lectures, case studies, in-class discussions, online discussions, and select film and Internet resources.
Instructor(s): M. Patel; S. Nash.

AS.020.128. Concepts Cancer Research II:Diagnosis through Recovery. 1.0 Credit.
This course will introduce current topics in cancer research with a focus on "life after cancer," including research questions about medical and psychosocial issues at diagnosis, during treatment and throughout recovery for patients that have been diagnosed with cancer. Health recommendations for cancer survivors will be discussed. Throughout the course, we will hear from researchers at the National Cancer Institute (and other research entities) who represent a variety of disciplines, applied in many settings (e.g., laboratory, clinics and communities). We will also use multi-media to promote active learning and to introduce tools for research. These may include lectures, case studies, in-class discussion, online discussion, and select film (including clips from the recent PBS documentary "Cancer: The Emperor of All Maladies") and internet resources. Active participation and peer learning will enhance the value of this course for students.
Instructor(s): S. Bluethmann.

AS.020.129. Discover Hopkins: Introduction to Biology & Medicine. 1.0 Credit.
Introduction to Biology & Medicine: from Textbook to Application. Biology is the study of life dynamics, and medicine is the application of biology to enhance human health. With a particular emphasis on imaging approaches from the scale of the cell to that of the whole body, this course explores how biology research is designed to improve our knowledge and health. The goal is to show students the possible ways of using information learned in textbooks as a starting point to explore new application frontiers and careers in academic research, industrial/biotech development, and medicine. Course is highly interactive and includes lectures, readings, field trips, and guest lectures by professors involved in the scientific advancements. Grades determined by class participation, attendance, quizzes, and oral presentation.
Instructor(s): D. Georgess; N. Neumann.

AS.020.131. Bacterial Evolution Project Lab. 2.0 Credits.
In this project-based laboratory course, students will conduct research into mechanisms of bacterial adaptation to conjugative plasmids. In the wet-lab portion of the course, students will learn standard laboratory techniques for bacterial culture and DNA extraction and will carry out experiments to assess phenotypic differences between different laboratory-evolved bacterial populations. In the computational portion of the course, students will learn how to analyze whole-genome sequencing data and will identify mutations present in laboratory-evolved bacteria. This project-based course is part of a larger research project investigating co-evolution of conjugative plasmids and their bacterial hosts. Students will be exposed to fundamental questions concerning the mechanisms of evolution and will learn about current research in the rapidly expanding field of Experimental Evolution. No previous experience with bacterial culture, genomics, or computer programming is required.
Instructor(s): K. Cox
Area: Natural Sciences.
AS.020.132. Biology, Policy, and the Media. 3.0 Credits.
We live in the age of information. Through various forms of media we are constantly being inundated by data—whether or not we are aware of it. This information includes science as the media presents it to us. We will examine different topics in biology that are discussed in different forms of media. We will also look at how scientific research, and the way that it is reported to the layperson, is used to inform policy decisions. Some of the biological topics that we will discuss include human diseases and their treatment, stem cells and cloning, and genetically modified organisms. All of these topics have a significant effect on how we live our lives. The choices that we make based on the science we see affects our decisions when it comes to medical care, what we choose to eat, the manner in which we interact with our environment, and how we vote to enact science policy.
Instructor(s): J. Winger; R. Gupta
Area: Natural Sciences.

AS.020.135. Project Lab: Phage Hunting. 2.0 Credits.
This is an introductory course open to all freshman regardless of intended major. No science background is required. This is the first semester of a year-long research-based project lab course in which students will participate in a nation-wide program in collaboration with undergraduates at other colleges. Students will isolate and characterize novel bacteriophages (viruses that infect bacteria) from the environment using modern molecular biological techniques. The course includes two lab meetings per week. Continues in the spring. Each semester provides 2 credit hours of Natural Sciences (N) distribution credits and/or counts 2 hours toward the research requirement for the Molecular and Cellular Biology degree. No textbook is required. Freshmen only
Instructor(s): E. Fisher
Area: Natural Sciences.

AS.020.136. Phage Hunting II. 1.0 Credit.
This is an introductory course open to all freshman regardless of intended major. No science background is required. This is the second semester of a year-long research-based project lab course in which students will participate in a nation-wide program in collaboration with undergraduates at other colleges. In the spring semester, students will annotate the genome of a bacteriophage isolated and characterized by a student in AS.020.135, in preparation for submission to a database and eventual publication. Enrollment by permission of the instructor only.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): E. Fisher; M. Mefford
Area: Natural Sciences.

AS.020.137. Project Lab: Phage Discovery. 1.0 Credit.
In this small-section introductory research lab course, students are introduced to basic microbiological techniques as they isolate and characterize a bacteriophage, a virus that infects bacteria, from an environmental sample. One meeting per week. No textbook required. Modeled after the Phage Hunting project lab course, but with a focus on benchwork Students cannot receive credit for both AS.020.135 and AS.020.137.
Prerequisites: Not open to anyone who has taken AS.020.135
Instructor(s): E. Fisher
Area: Natural Sciences.

AS.020.140. Emerging Infectious Diseases. 3.0 Credits.
This class will investigate the infectious agents and evolutionary drivers of disease emergence and its consequences on public health. Additionally, the class will address epidemiological characteristics in settings of demographics, as well as surveillance mechanisms used to control disease emergence. We will focus on the underlying infectious diseases, factors governing microbial emergence, resistance, and endemics. Instruction format will include a combination of lectures, open discussions and student presentations to encourage broad participation.
Instructor(s): S. Winans
Area: Natural Sciences.

AS.020.151. General Biology I. 3.0 Credits.
This course is an introduction to biology from an evolutionary, molecular and cellular perspective. Specific topics and themes include evolutionary theory, the structure and function of biological molecules, mechanisms of harvesting energy, cell division, classical genetics and gene expression. This section will involve in-class problem solving and the use of assigned pre-class videos and questions.
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.152. General Biology II. 3.0 Credits.
This course builds on the concepts presented and discussed in General Biology I. The primary foci of this course will be on the diversity of life and on the anatomy, physiology, and evolution of plants and animals. There will be a special emphasis on human biology.
Prerequisites: Prereq: AS.020.151
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.153. General Biology Laboratory I. 1.0 Credit.
This course reinforces the topics covered in AS.020.151. Students participate in a semester-long project, identifying bacteria from Homewood campus soils using molecular biology techniques. Other laboratory exercises cover aspects of evolution, genomics and biochemistry. Cross-listed with Behavioral Biology. Student must have enrolled in AS.020.151 either this term or in past terms. Students who have credit for AP Biology but take General Biology Lab I will lose four credits of AP Biology credit. Cross-listed with Behavioral Biology.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class. To access the tutorial, login to myLearning and enter 458083 in the Search box to locate the appropriate module.;AS.020.151
Instructor(s): R. Pearlman
Area: Natural Sciences.

AS.020.154. General Biology Laboratory II. 1.0 Credit.
This course reinforces the concepts presented and discussed in General Biology I. The primary foci of this course will be on the diversity of life and on the anatomy, physiology, and evolution of plants and animals. There will be a special emphasis on human biology.
Prerequisites: Prereq: AS.020.151
Instructor(s): R. Pearlman
Area: Natural Sciences.
AS.020.161. Current Events in Biology I. 1.0 Credit.
In this lively and collaborative course, students discuss current events and controversies in biology ranging from bioterrorism to the health of the Chesapeake Bay.
Instructor(s): R. Pearlman
Area: Natural Sciences.

AS.020.162. Current Events in Biology II. 1.0 Credit.
Students will discuss current events and controversies in biology, ranging from genetic engineering to nanotechnology in medicine.
Instructor(s): R. Pearlman
Area: Natural Sciences.

AS.020.205. Introduction to Biological Molecules. 3.0 Credits.
This course presents an overview to biochemistry and molecular biology, especially focusing on biotechnology and medicine. Students will have classroom and laboratory experience and group presentations.
Prerequisite: High school level Chemistry and Biology (both with a grade of A).
Instructor(s): R. Horner; R. Shingles
Area: Natural Sciences.

AS.020.214. Self Organizing Patterns in Nature. 1.5 Credits.
The manifestations of all biological structures and related functions are the end effect of the formation and maintenance of complex molecular and cellular patterns. These patterns (macromolecules, cellular organelles, cells, and tissues) are assembled from their constituent parts under fundamental rules not too dissimilar to those that govern the formation of snowflakes or the dewdrops on a spider web. This course (lectures and student presentations) attempts to describe these common rules and to explain the formation and function of significant biological assemblies.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.229. Introduction to Immunology. 2.0 Credits.
This course is designed to introduce students to the cells, major receptors and signals critical for understanding more advanced concepts in immunology. They should leave with a basic understanding of the players and events leading to an effective immune defense against pathogens. They should also begin to recognize disease consequences of certain immune malfunctions. Recommended Course Background: Biology
Instructor(s): A. Geis
Area: Natural Sciences.

AS.020.244. The Biology of Cancer. 2.0 Credits.
This course runs from June 30 - July 11. This course provides an overview of cancer and its diagnosis and treatment. Lectures, demonstrations, and discussions will explore the roles that genetic errors, growth factors, oncogenes, tumor suppressors, genetic caretakers, cell survival and death, angiogenesis, and metastasis play in cancer development. Covered topics also include cancer diagnosis, cancer prevention, genetic testing, treatment and patient self-advocacy. Course will include several guest experts to discuss topics of interest.
Instructor(s): M. Safford.

AS.020.303. Genetics. 3.0 Credits.
Presentation of the principles of heredity and variation, and their application to evolution and development; physico-chemical nature of the gene; problems of recombination; gene action.
Prerequisites: AS.020.330: Students may receive credit for AS.020.330 or AS.020.303, but not both.
Instructor(s): E. Fisher; K. Cunningham; M. Hoyt
Area: Natural Sciences.

AS.020.305. Biochemistry. 4.0 Credits.
The molecules responsible for the life processes of animals, plants, and microbes will be examined. The structures, biosynthesis, degradation, and interconversion of the major cellular constituents including carbohydrates, lipids, proteins, and nucleic acids will illustrate the similarity of the biomolecules and metabolic processes involved in diverse forms of life. Sophomores, Juniors, and Seniors Only.
Prerequisites: AS.030.206 OR AS.030.212 OR EN.540.202, may be taken concurrently.
Instructor(s): A. Coppola; C. Kaiser; J. Schildbach; K. Tifft Oshinnaiye; V. Hilser
Area: Natural Sciences.

AS.020.306. Cell Biology. 4.0 Credits.
How the molecules of living systems are organized into organelles, cells, tissues, and organisms will be explored, as well as how the activities of all of these are orchestrated and regulated to produce “life”—a phenomenon greater than the sum of its parts. Considerable emphasis is placed on experimental approaches to answering these questions. Topics covered include biological membranes, cytoskeletal elements, cell locomotion, membrane and protein traffic, the nucleus, second messengers, signal transduction, cell growth, the cell cycle, the extracellular matrix, cell contacts and adhesion, intercellular communication, epithelial structure and function, and the cell biology of early development and organ function. Sophomores, juniors, and seniors only. Recommended Course Background: (AS.020.151 or AS.020.305) or equivalent knowledge of biomolecules or AS.020.303.
Prerequisites: Cell Biology restriction: students who have completed EN.540.307 may not enroll.
Instructor(s): E. Fisher; K. Tifft Oshinnaiye; Y. Kim
Area: Natural Sciences.

AS.020.307. Enzymes, Metabolism and Metabolic Disorders. 3.0 Credits.
This course will cover basic and advanced concepts in enzymology and metabolic processes while focusing on how these processes contribute to human health and diseases. This course is composed of lectures, discussion sessions, and student presentations.
Instructor(s): Y. Lee
Area: Natural Sciences.

AS.020.312. Introduction to the Human Brain. 3.0 Credits.
This course explores the outstanding problem of biology: how knowledge is represented in the brain. Relating insights from cognitive psychology and systems neuroscience with formal theories of learning and memory, topics include (1) anatomical and functional relations of cerebral cortex, basal ganglia, limbic system, thalamus, cerebellum, and spinal cord; (2) cortical anatomy and physiology including laminar/columnar organization, intrinsic cortical circuit, hierarchies of cortical areas; (3) activity-dependent synaptic mechanisms; (4) functional brain imaging; (5) logicist and connectist theories of cognition; and (6) relation of mental representations and natural language.
Instructor(s): E. Hedgecock
Area: Natural Sciences.
**AS.020.315. Biochemistry Project lab. 1.0 Credit.**
This research project laboratory investigates the flow of energy through biological systems using focused examination of key cellular energy-conversion processes. Students will be introduced to the broad field of biochemistry research through computational structural analysis, directed mutation, recombinant protein production, and enzymatic analysis. Participants will be trained in biochemical laboratory techniques and expected to contribute their findings to the scientific community using formal, academic communications.

**Prerequisites:** Students must have completed Lab Safety training prior to registering for this class. To access the tutorial, login to myLearning and enter 458083 in the Search box to locate the appropriate module. AS.020.305 OR AS.250.307 OR AS.250.315. These may be taken concurrently.

**Instructor(s):** E. Johnson  
Area: Natural Sciences.

**AS.020.316. Cell Biology Lab. 1.0 Credit.**
The Cell Biology Laboratory will use projects with the nematode C. elegans and mouse 3T3 cells in culture to illustrate experimental systems which are used in cell biology. Light microscopy, fluorescence microscopy, RNA interference, fluorescence-activated cell sorting, Western blotting and the culture of nematodes and cells are techniques which will be used. Because we will be using growing organisms, there will be at least one week when students will have to visit the lab the day after their section meets to complete an experiment.

**Prerequisites:** Students must have completed Lab Safety training prior to registering for this class. AS.020.306 may be taken concurrently with AS.020.316 OR students can have completed EN.540.202 and EN.540.307 prior to enrolling in AS.020.316.

**Corequisites:** Students must have completed EN.540.307 prior to enrolling in AS.020.316.

**Instructor(s):** R. Horner  
Area: Natural Sciences.

**AS.020.317. Signaling in Development and Disease. 3.0 Credits.**
An advanced undergraduate level seminar on current topics on signal transduction mechanisms underlying neuronal morphology, development and function. The proper functioning of the nervous system relies on the establishment of precise neuronal circuits through a developmental program including proliferation, neuronal migration, axonal growth, and neuronal survival. This course pertains to the extracellular cues and downstream neuronal signaling pathways that coordinate these key events during neuronal development. The course will also cover the role of aberrant signaling mechanisms in neuronal degeneration and disease. Recommended Course Background: AS.020.305, AS.020.306, and AS.080.306

**Instructor(s):** R. Kuruvilla  
Area: Natural Sciences.

**AS.020.328. Genomics: Theory and Practice. 2.0 Credits.**
This course is designed to introduce the students to all facets of genomics and provide a hands-on approach to genomics research. The core of the course will be to introduce a biological problem that requires a genomics solution, design experiments, conduct them, obtain sequencing data and analyze them. In addition to this, lectures will also cover the current topics in and future of genomics. This course is conceived as an interactive one and student participation is required.

**Prerequisites:** AS.020.305 OR AS.020.303

**Instructor(s):** V. Balagopal  
Area: Natural Sciences.

**AS.020.329. Microbiology. 3.0 Credits.**
This course explores the physiology and genetics of microorganisms within an evolutionary and ecological framework. Concepts in microbiology will be supported by molecular studies of microbial evolution and microbial communities including that of the human microbiome. Recommended Course Background: AS.020.305

**Instructor(s):** E. Fisher; J. Diruggiero  
Area: Natural Sciences.

**AS.020.331. Human Genetics. 2.0 Credits.**
Will examine the growing impact of human genetics on the biological sciences, on law and medicine, and on our understanding of human origins. Topics include structure and evolution of human genome, genetic and physical mapping of human chromosomes, molecular genetics of inherited diseases and forensic genetics.

**Instructor(s):** E. Hedgecock  
Area: Natural Sciences, Social and Behavioral Sciences.

**AS.020.332. Photosynthesis by Land and Aquatic Organisms. 2.0 Credits.**
This course analyzes the fundamental process of photosynthesis, the process on which all life on Earth depends for its existence. We begin from the level of the structural organization of the photosynthetic machinery and progress to the essentials of the photosynthesis of light capture by the primary pigments. Next we follow the conversion of photon flow to electron flow through the electron transport chain, and finally we study the formation of chemical gradients that serve as temporary "energy stores" utilized in the synthesis of the essentials chemicals that are consumed to drive carbon dioxide and nitrogen fixation and yield biomass. Finally, we compare the specializations of land and aquatic photosynthetic systems that serve the two different ecosystems. Recommended Course Background: AS.020.305 or AS.020.306 or special permission by the instructor.

**Instructor(s):** E. Moudrianakis; R. Horner  
Area: Natural Sciences.

**AS.020.335. Bioenergetics. 2.0 Credits.**
This course is a combination of lectures, student presentations and group discussions that address fundamental principles and also contemporary issues examining the way all forms of Life on Earth are ultimately dependent on sunlight to satisfy their food and energy requirements. We examine the steps from the capture of Physical energy (photons), to the development of electrochemical potentials and finally, to their utilization by cellular organelles towards the synthesis of the chemical "currency" that fuels all biological processes (biosynthesis, cell communication, movements, etc.). Special emphasis will be on current developments in biotechnologies that utilize microbial populations to supply us with fuels and also to clean up environmental hazards. The course will also consider ways to extract lessons from Nature's successful designs and harmonious adaptations so that we, in the long run, can utilize them towards a minimization of our negative impact on the environment.

Note for Juniors and Seniors: in addition to attending the lectures they are expected to analyze assigned relevant research articles and submit reports of their analyses and conclusions. Admission, by approval of instructor.

**Instructor(s):** E. Moudrianakis  
Area: Natural Sciences.
AS.020.337. Stem Cells & the Biology of Aging & Disease. 2.0 Credits.
This will be a team-taught lecture course that focuses on the properties of stem cells, their possible role in cancer (breast and prostate), stem cell aging, and the potential utilization of stem cells for therapy. Topics will include: mechanisms of stem cell renewal, stem cell potency, the impact of the stem cell niche, stem cells and the hematopoietic system, stem cells and the neural system, stem cells in the male and female gonads, induced pluripotent stem cells and cellular reprogramming, stem cell changes with aging, and ethical and policy issues in stem cell research and use. Most lectures will be research-oriented. Students will be expected to read and critically analyze current literature, with an emphasis on the experimental bases from which our current understandings derive.
Prerequisites: AS.020.305 (Biochemistry) or AS.020.306 (Cell Biology) or EN.580.221 (Molecules and Cells) or EN.540.307 (Cell Biology for Engineers) or permission of instructor.
Instructor(s): B. Zirkin
Area: Natural Sciences.

AS.020.340. Developmental Genetics Lab. 2.0 Credits.
This laboratory explores the genetics of living organisms, and students in each section will therefore be required to return to lab on succeeding days to observe and record the results of their experiments. Recommended Course Background: AS.020.316
Prerequisites: Students must have completed Lab Safety training prior to registering for this class. To access the tutorial, login to myLearning and enter 458083 in the Search box to locate the appropriate module.; AS.020.303 can be taken prior to or during enrollment in AS.020.340.
Instructor(s): C. Norris
Area: Natural Sciences.

AS.020.341. Quantitative Methods in Biology. 3.0 Credits.
This course reviews a variety of quantitative tools commonly applied in biological research. The course is divided into three sections. The first section covers dynamical modeling of biological processes, with an emphasis on chemical kinetics and cell signaling. The second section is devoted to statistical tools used to analyze datasets, as well as techniques to reduce data complexity and clustering. The third section applies the learned statistical tools to image processing, as well as techniques to reduce data complexity and clustering. For each topic, one class will be a lecture/discussion, and apply these concepts in lab sections where they will use MATLAB to apply the learned tools to biological problems.
Prerequisites: AS.020.305 AND AS.020.305 and one year of calculus.
Instructor(s): A. Gordus
Area: Natural Sciences.

AS.020.344. Virology. 3.0 Credits.
This course will cover basic principles of viral replication and pathogenesis, as well as the host response to viral infection. It will then focus on several viruses of interest, including HIV-1, Influenza, Human Papilloma Virus, Hepatitis C, Ebola Virus, and Zika Virus.
Prerequisites: AS.020.305 OR AS.250.315
Instructor(s): K. Beemon
Area: Natural Sciences.

AS.020.346. Immunobiology. 3.0 Credits.
A course for upper level undergraduates that introduces the molecules, cells, systems and biology of the immune system.
Prerequisites: AS.020.306 AND (AS.020.303 OR AS.020.330)
Instructor(s): J. Schildbach
Area: Natural Sciences.

AS.020.347. AIDS. 3.0 Credits.
AIDS is the world’s deadliest infectious disease. This course will cover the biology of human immunodeficiency virus (HIV, the infectious agent that causes AIDS), the effects of HIV on the immune system, the pharmacology of the anti-viral agents that are used to suppress HIV infection, and the ongoing quest for an HIV vaccine. Because HIV drugs cannot cure HIV-infected individuals and no HIV vaccine yet exists, we will also study the long-term consequences of HIV infection including opportunistic infections, comorbid conditions, and the HIV-related cancers Kaposi’s Sarcoma and AIDS-Related lymphoma. Recommended Course Background: AS.020.306
Prerequisites: AS.020.306
Instructor(s): T. Schroer
Area: Natural Sciences.

AS.020.350. Introduction to Clinical Medicine. 2.0 Credits.
Perm. Req’d. Post-Bac Students Only
Instructor(s): E. Ruiz; M. Brady; W. Merritt; W. Ziai
Area: Natural Sciences.

AS.020.351. Cancer Biology. 3.0 Credits.
While the “war on cancer” has produced modest victories with respect to clinical outcomes, our knowledge of the cellular mechanisms of cancer is now vast and represents one of the most significant scientific achievements of the past 40 years. Key aspects of cancer biology will be covered with a combination of textbook and original literature readings. Topics will include cancer cell characteristics, oncogenes, tumor suppressor genes, apoptosis, metastasis and immuno-surveillance of cancer cells. Application of our knowledge to the rational treatment of cancer will also be discussed.
Prerequisites: Cell Biology 020.036 or permission of instructor
Instructor(s): M. Hoyt
Area: Quantitative and Mathematical Sciences.

AS.020.355. Fundamentals of Genome Informatics. 3.0 Credits.
This course will cover fundamental methods used in the analysis of genomic sequencing data, with a particular focus on recent developments in comparative and functional genomic assays. In particular, we will cover approaches for 1) genomic sequencing and assembly, including resequencing and personal genomes, 2) comparing genomes and modeling genome evolution, 3) identifying functional elements using both functional genomics and computational models. While the course will focus on particular problems in genomics, we will emphasize core algorithmic concepts that generalize to the analysis of other types of biological data.
Prerequisites: General Biology 020.151-152 and (Calculus I 110.106 or Calculus I 110.108)
Instructor(s): J. Taylor
Area: Natural Sciences.

AS.020.360. Gene Regulation During Development and Disease. 3.0 Credits.
This course examines how regulation of gene expression impacts development and disease. The course will focus on the mechanisms controlling transcriptional, post-transcriptional, translational, and post-translational regulation. For each topic, one class will be a lecture/discussion of key concepts and experimental approaches followed by a class with student-led presentations of related publications.
Recommended Course Background: AS.020.303 and AS.020.305.
Instructor(s): R. Johnston
Area: Natural Sciences.
AS.020.361. Advanced Research Lab in Cell and Molecular Biology. 3.0 Credits.
An intensive research laboratory course on single-molecule, live-cell imaging of chromatin factors designed for undergraduate students with interests in biochemistry, molecular, cellular and computational biology. The course introduces the use of advanced fluorescence microscopy to visualize the single-molecule dynamic behaviors and spatial distributions of important nuclear proteins and chromatin factors in living cells of the model eukaryote Saccharomyces cerevisiae (baker's yeast). Students will learn and apply imaging and computational tools to localize and track single protein molecules in real time and calculate their dynamics. Students are expected to interpret and integrate data to acquire conceptual insights on chromatin functions, e.g. how chromatin proteins, enzymes, and very large protein complexes are organized in nuclear space and time, and how the accessibility of chromatin targets is influenced by changes in the epigenetic landscape. Students will also gain practical experience in yeast molecular genetics by engineering protein tags on designated nuclear and chromatin factors, and evaluating protein functionality under natural levels of expression. Students will have 24/7 access to laboratory facilities and are expected to commit ~12 hours/week to their projects.
Prerequisites: AS.020.305 AND AS.020.306 and 1 year of calculus.; Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): C. Wu
Area: Natural Sciences.

AS.020.362. Single Molecule Approaches to Biology. 3.0 Credits.
This course examines how recently developed single-molecule methods have enhanced our understanding of cellular processes. The ability to observe and manipulate individual biological macromolecules has revolutionized our understanding of the machines and processes that enable life. The course will provide an overview of single-molecule approaches and discuss relevant publications that exemplify how these methodologies are applied to biological problems. For each approach, key concepts will be introduced in a lecture/discussion, followed by a student-led presentation of a related publication. Recommended coursework: Physics II.
Prerequisites: AS.020.305 OR AS.250.316
Instructor(s): C. Kaiser
Area: Natural Sciences.

AS.020.363. Developmental Biology. 3.0 Credits.
This class will explore the development of animals from a single fertilized egg into a fully formed organism. We will emphasize experimental methods to understand the molecular mechanisms controlling development.
Prerequisites: AS.020.306 AND (AS.020.330 OR AS.020.303)
Instructor(s): C. Norris; M. Van Doren
Area: Natural Sciences.

AS.020.365. Intro To Human Skeleton. 3.0 Credits.
This course will provide a basic understanding of human skeletal biology, including bone composition and bone growth, recognition of skeletal elements, functional anatomy of different skeletal systems, comparative anatomy, and forensic anthropology (sexing and aging, body size reconstruction, bone pathology). Lectures will be combined with hands-on experience with bone models and real bone specimens.
Instructor(s): C. Ruff
Area: Natural Sciences.

AS.020.367. Primate Adaptation and Evolution. 3.0 Credits.
A close look at our closest relatives, the primates. Topics include: evolutionary theory, primate evolution, primate behavior and ecology, human evolution, and modern human variation.
Instructor(s): J. Perry
Area: Natural Sciences.

AS.020.373. Develop Biology Lab. 2.0 Credits.
This laboratory is designed to give students exposure to the different techniques and organisms used in Developmental Biology research. Our primary goal in this course is to help you learn to think like a scientist and gain a better understanding of how scientists study development. With that goal in mind, students design and execute an independent project during the second half of the semester. The independent projects will culminate with a poster session in which the project and its outcome will be shared with the other students. Please be aware that because we are working with live developing embryos, you will sometimes be required to return to lab between scheduled class times.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.; AS.020.363
Instructor(s): C. Norris.

AS.020.374. Comparative Animal Physiology. 3.0 Credits.
This class examines animal physiology from an evolutionary and comparative viewpoint. The goal is to examine the commonalities, as well as unique differences, in how various animal organisms address the necessary life functions. Topics will include metabolism, neural systems, respiration, muscle systems, water and salt homeostasis, thermal regulation, and reproduction.
Prerequisites: AS.020.305 OR AS.020.306
Instructor(s): A. Coppola; E. Fisher
Area: Natural Sciences.

AS.020.377. Comparative Physiology Lab. 1.0 Credit.
This course examines the physiological principles that guide animal life processes. As a complement to the Comparative Animal Physiology lecture course, this Laboratory examines fundamental physiological principles through hands-on investigations of animal physiology using zebrafish and mussel as model systems and research-grade data acquisition systems.
Prerequisites: AS.020.374, students enroll concurrently.
Instructor(s): A. Coppola
Area: Natural Sciences.

AS.020.379. Evolution. 3.0 Credits.
This course takes a broad look at the impact of natural selection and other evolutionary forces on evolution. Emphasis is placed on what we can learn from genome sequences about the history of life, as well as current evolutionary pressures. Recommended Course Background: AS.020.306, AS.020.330, or permission required.
Instructor(s): C. Norris
Area: Natural Sciences.
AS.020.380. Chromatin, Chromosomes and The Cell Nucleus. 3.0 Credits.
The course will present analysis of the structural basis of the genome organization in a eukaryotic nucleus and the utilization of its genomic content. We start with the analysis of the fluctuations of the structure of the double helix in response to its cellular microenvironment that yield DNA structural and functional polymorphism. Next we will deal with the mechanics of DNA compaction into chromatin and the differentiation of the chromatin structure at the level of the nucleosome via histone variants and posttranslational modifications and chromatin-based epigenetics. We will next move to chromosomal territories, chromosomal imprinting and chromosome inactivation. Finally, a few lectures will focus on selected topics of special interests that bridge current basic discoveries with potential medical applications such as the nature of telomeres and telomerase-related diseases; the role of histone octamer tails in epigenetics; transcription factors and the regulated expression of the genome. Whenever possible, paradigms will be used that correlate chromatin differentiation to certain human diseases.
Prerequisites: AS.020.305 OR AS.020.306; AS.020.303 with approval of the instructor only.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

AS.020.385. Epigenetics. 3.0 Credits.
Course description: This course emphasizes epigenetic regulatory mechanisms including DNA methylation, histone modifications, histone variants, non-coding RNA regulation, and chromatin remodeling, etc. We will discuss the broad impact of epigenetic regulation in various biological events, ranging from stem cell activity, small RNAs’ and long non-coding RNAs’ function, to transgenerational epigenetic inheritance and human diseases. We will mainly use recent literatures to discuss various topics. There are both students’ presentation and writing components for this course. Students will be assigned a series of papers for their presentation and faculty will meet with student presenters ahead of the time to go through the presentation content.
Prerequisites: AS.020.303 OR AS.020.330
Instructor(s): J. Kim; X. Chen
Area: Natural Sciences.

AS.020.392. Anatomy & Physiology. 3.0 Credits.
Lectures will cover descriptive and functional anatomy and should leave students with a better understanding of anatomical terminology and the relationship of structure to biological function within the human body. Additionally, students will gain perspective on human disease as they study the anatomical and functional basis of clinical symptoms.
Instructor(s): A. Ramos Amigo; L. Abalde-Atristain; M. Iglesias Lozano
Area: Natural Sciences.

AS.020.401. Advanced Seminar: Molecular and Cellular Biology. 3.0 Credits.
This is a weekly seminar designed for graduate students enrolled in the B.A./M.S. and Ph.D. programs. The seminar involves student presentations of research and discussion of topics of current interest in the field. BA/MS candidates only.
Instructor(s): K. Tifft Oshinaiye
Area: Natural Sciences.

AS.020.402. Seminar: Molecular & Cellular Biology. 3.0 Credits.
This is a weekly seminar designed for students enrolled in the BA/MS program. The seminar involves student presentations of research and discussion of topics of current interest in the field. BA/MS students only.
Instructor(s): K. Tifft Oshinaiye
Area: Natural Sciences.

AS.020.415. Advanced Biomedical Research. 3.0 Credits.
This course for advanced undergraduates includes classroom instruction in interdisciplinary research approaches and lab work on an independent research project in the lab of a Bloomberg Distinguished Professor. Lectures will focus on cross-cutting techniques such as data visualization, statistical inference, and scientific computing. In addition to two 50-minute classes per week, students will commit to working approximately 3 hours per week in the lab of one of the professors. The student and professor will work together to schedule the research project. Students will present their work at a symposium at the end of the semester. This course can be used as 1 credit of independent research for the MCB major requirement.
Instructor(s): M. Schatz
Area: Natural Sciences.

AS.020.420. Build-a-Genome. 4.0 Credits.
In this combination lecture/laboratory "Synthetic Biology" course students will learn how to make DNA building blocks used in an international project to build the world’s first synthetic eukaryotic genome, Saccharomyces cerevisiae v. 2.0. Please study the wiki www.syntheticyeast.org for more details about the project. Following a biotechnology boot-camp, students will have 24/7 access to computational and wet-lab resources and will be expected to spend 15-20 hours per week on this course. Advanced students will be expected to contribute to the computational and biotech infrastructure. Co-listed with EN.580.420, AS.020.451 and EN.540.420. Successful completion of this course provides 3 credit hours toward the supervised research requirement for Molecular and Cellular Biology majors, or 2 credit hours toward the upper level elective requirement for Biology or Molecular and Cellular Biology majors. Must understand fundamentals of DNA structure, DNA electrophoresis, and analysis, Polymerase Chain Reaction (PCR), and must be either a) Experienced with molecular biology lab work or b) Adept at programming with a biological twist.
Instructor(s): J. Bader; K. Zeller
Area: Natural Sciences.

AS.020.441. Mentoring in General Biology. 1.0 Credit.
This course provides students who have taken General Biology I & II the opportunity to mentor new students in General Biology I & II. Mentors collaborate with faculty on how to lead effective sessions, help student teams complete team assignments, and generally help students understand difficult concepts and principles in biology. Mentors must have a firm command of the topics covered in biology and must meet with both faculty and students through the course of the semester. To become a mentor, students must have successfully completed AS.020.151/152, must apply using the form on the Biology Dept. Website, and must be accepted by the instructors. The deadline to apply is April 1st. S/U only. Perm. Req’d
Instructor(s): C. Roberson; R. Pearlman; R. Shingles
Area: Natural Sciences.
AS.020.442. Mentoring in General Biology. 1.0 Credit.
This course provides students who have taken General Biology I & II the opportunity to mentor new students in General Biology I & II. Mentors collaborate with faculty on how to lead effective sessions, help student teams compete team assignments, and generally help students understand difficult concepts and principles in biology. Mentors must have a firm command of the topics covered in biology and must meet with both faculty and students through the course of the semester. To become a mentor, students must have successfully completed AS.020.151/AS.020.152, must apply using the form on the Biology Department website, and must be accepted by the instructors. The deadline to apply is April 8th. Recommended Course Background: AS.020.151/AS.020.152
Instructor(s): R. Pearlman; R. Shingles
Area: Natural Sciences.

AS.020.451. Build-a-Genome Mentor. 4.0 Credits.
In this combination lecture/laboratory, "Synthetic Biology" course students will learn how to make DNA building blocks used in an international project to build the world's first synthetic eukaryotic genome, Saccharomyces cerevisiae v. 2.0. Please study the wiki www.syntheticyeast.org for more details about the project. Following a biotechnology boot-camp, students will have 24/7 access to computational and wet-lab resources and will be expected to spend 15-20 hours per week on this course. Advanced students will be expected to contribute to the computational and biotech infrastructure. Must understand fundamentals of DNA structure, DNA electrophoresis, and analysis. Polymerase Chain Reaction (PCR) and must be either a) Experienced with molecular biology lab work or b) Adept at programming with a biological twist.
Instructor(s): J. Bader; K. Zeller
Area: Natural Sciences.

AS.020.501. Introduction Independent Study. 3.0 Credits.
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses. Freshmen and Sophomores only. Perm. Req’d.
Instructor(s): Staff.

AS.020.502. Introduction Independent Study. 0.0 - 3.0 Credits.
Instructor(s): B. Kondo; K. Cunningham; R. Horner.

AS.020.503. Introduction To Research. 3.0 Credits.
Perm. Req’d. Freshmen and Sophomores only
Instructor(s): Staff.

AS.020.504. Introduction to Research. 0.0 - 3.0 Credits.
Perm. Req’d. Freshmen or Sophomores only
Instructor(s): Staff.

AS.020.505. Internship - Biology. 0.0 - 3.0 Credits.
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses. Consent of adviser required.
Instructor(s): C. Roberson; H. Zhao.

AS.020.506. Internship - Biology. 1.0 Credit.
Instructor(s): Staff.

AS.020.511. Independent Study. 3.0 Credits.
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses. Perm. Req’d.
Instructor(s): Staff.

AS.020.512. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.020.513. Research Problems. 3.0 Credits.
Planning and conducting original laboratory investigations on biological problems, collection and analysis of data, reporting of results. Juniors and Seniors Only. Recommended Course Background: Permission of full-time faculty member in Biology dept.
Instructor(s): Staff.

AS.020.514. Research Problems. 0.0 - 3.0 Credits.
Perm. Req’d. Juniors and Seniors only
Instructor(s): Staff.

AS.020.551. Mentored Research. 9.0 Credits.
This courses provide BA/MS students with intensive research experience for a full academic year. Students in the program work under the direction of a research mentor on an original research project, produce a written report in the form of a thesis, and make a presentation of the work to the Biology Department. BA/MS or BS/MS candidates only.
Instructor(s): R. Horner.

AS.020.553. Mentored Research. 9.0 Credits.
BA/MS candidates only.
Instructor(s): H. Zhao; K. Beemon; M. Bessman; R. Horner.

AS.020.554. Mentored Research Program in Cellular and Molecular Biology. 3.0 Credits.
BA/MS Candidates Only
Instructor(s): R. Horner.

AS.020.591. Summer Research Experience. 0.0 - 3.0 Credits.
Instructor(s): J. Schildbach.

AS.020.594. Internship - Summer. 1.0 Credit.
Instructor(s): Staff.

AS.020.597. Research. 3.0 Credits.
Instructor(s): Staff.

AS.020.599. Independent Study. 3.0 Credits.
Instructor(s): C. Norris; M. Bessman; R. Horner; T. Schroer.

This course involves 30 minute sessions with each member of the training faculty. It is designed to acquaint incoming graduate students with the research topics and research philosophy of each laboratory. This should help students choose future rotations. More generally the course provides a range of perspectives on the future of specific fields and strategies for success in science. First year Biology Graduate students only
Instructor(s): Staff.

AS.020.607. Quantitative Biology Bootcamp.
Quantitative and computational methods have become essential to modern biological research. The goal of this course is to provide an introduction to basic skills that will enable students to employ these methods. Students will learn how to work in a command line shell and use software to perform analyses of large biological datasets. Students will learn basic programming using the Python language. Throughout the course students will apply the skills learned to practical analysis problems emphasizing parsing and working with biological data formats, exploratory data analysis and visualization, and numerical and statistical methods. This course is only open to first-year students in the CMBD program and will be held from September 2nd through September 5th, 2014.
Instructor(s): F. Tan; J. Taylor.
AS.020.612. Introduction to the Human Brain.
This course explores the outstanding problem of biology; how knowledge is represented in the brain. Relating insights from cognitive psychology and systems neuroscience with formal theories of learning and memory, topics include (1) anatomical and functional relations of cerebral cortex, basal ganglia, limbic system, thalamus, cerebellum, and spinal cord; (2) cortical anatomy and physiology including laminar/columnar organization, intrinsic cortical circuit, hierarchies of cortical areas; (3) activity-dependent synaptic mechanism; (4) functional brain imaging; (5) logicist and connectist theories of cognition; and (6) relation of mental representations and natural language. Co-listed with AS.020.312.
Instructor(s): E. Hedgecock.

AS.020.613. Biology Science Writing.
Students will learn how to write abstracts and grant proposals, organize scientific manuscripts and thesis dissertations by writing and rewriting about their own research and editing other students’ work. Focus will be on structure, substance, accessibility, and clarity of writing. Biology Graduate students only. Permission Req’d.
Instructor(s): A. Huang.

AS.020.614. Signaling in Development and Disease.
A seminar on current topics on signal transduction mechanisms underlying neuronal morphology, development and function. The proper functioning of the nervous system relies on the establishment of precise neuronal circuits through a developmental program including proliferation, neuronal migration, axonal growth, and neuronal survival. This course pertains to the extracellular cues and downstream neuronal signaling pathways that coordinate these key events during neuronal development. The course will also cover the role of aberrant signaling mechanisms in neuronal degeneration and disease.
Instructor(s): R. Kuruvilla
Area: Natural Sciences.

AS.020.615. Planets, Life and the Universe.
This multidisciplinary course explores the origins of life, planets’ formation, Earth’s evolution, extrasolar planets, habitable zones, life in extreme environments, the search for life in the Universe, space missions and planetary protection. Grad Students Only. Co-listed with AS.020.334, AS.171.333 and AS.270.335
Instructor(s): J. Diruggiero; N. Levin
Area: Natural Sciences, Social and Behavioral Sciences.

AS.020.616. Quantitative Biology Lab 1.
This computer lab is designed for first year CMDB graduate students to enhance their quantitative skills for fall core courses. This course will cover quantitative and computational analysis of biological datasets, emphasizing molecular biology. In a hands on lab setting, students will learn to perform essential analyses including assembly of genomes, detection of DNA methylation, analysis of transcription factor binding and motifs, detecting genome variation, measuring expression of genes, and understanding genome evolution.
Instructor(s): J. Taylor.

AS.020.617. Quantitative Biology Lab II.
This computer lab is a continuation of the fall quantitative biology lab for CMDB graduate students. This semester will cover quantitative and computational modeling of selected topics from biophysics, cellular biology, and developmental biology
Instructor(s): B. Clarkson.

"Communicating Science" is a required course for 2nd year students in the CMDB program. It will be held at the Carnegie Institution for Science Bldg., 3520 San Martin Drive commencing August 30th, 2018. The course is intended to provide students with practical experience organizing oral presentations, preparing science manuscripts, and writing an application for an NIH National Research Service Award (F31). Participants will also learn about critically reviewing grants and papers. Instructor: Dr. M.E. Halpern.
Instructor(s): A. Huang; M. Halpern.

AS.020.620. Microbiology.
This course explores the physiology and genetics of microorganisms within an evolutionary and ecological framework. Concepts will be supported by primary literature exploring microbial evolution and microbial communities including that of the human microbiome.
Instructor(s): J. Diruggiero.

AS.020.630. Human Genetics.
Will examine the growing impact of human genetics on the biological sciences, on law and medicine, and on our understanding of human origins. Topics include structure and evolution of human genome, genetic and physical mapping of human chromosomes, molecular genetics of inherited diseases and forensic genetics.
Instructor(s): E. Hedgecock
Area: Natural Sciences, Social and Behavioral Sciences.

AS.020.637. Genomes & Development.
This course covers gametogenesis, embryogenesis, post-embryonic development, genetic analysis, developmental genetics, model developmental systems, and cell determination. Biology graduate students only except with written permission from the instructor.
Instructor(s): Staff.

Instructor permission required for undergraduate students
Instructor(s): K. Beemon
Area: Natural Sciences.

AS.020.644. RNA.
A graduate seminar course that will explore RNA from its beginning in the primordial RNA world to its present-day roles in gene regulation in bacteria, mammals, and viruses. Topics will include: The early RNA world, Riboswitches, Ribozymes, evolution of protein synthesis, splicing, telomerase, RNA interference, microRNAs, long non-coding RNAs, Viral non-coding RNAs, and RNA therapeutics. Biology PHD students only.
MCB MS students with instructor's permission during ADD/DROP Period.
Instructor(s): K. Beemon
Area: Natural Sciences.

AS.020.645. Graduate Science Writing.
Instructor permission required for graduate students
Instructor(s): A. Huang; M. Halpern
Area: Natural Sciences.

MCB MS students with instructor's permission during ADD/DROP Period.
The course will present analysis of the structural basis of the genome organization in a eukaryotic nucleus and the utilization of its genomic content. We start with the analysis of the fluctuations of the structure of the double helix in response to its cellular microenvironment that yield DNA structural and functional polymorphism. Next we will deal with the mechanics of DNA compaction into chromatin and the differentiation of the chromatin structure at the level of the nucleosome via histone variants and posttranslational modifications and chromatin-based epigenetics. We will next move to chromosomal territories, chromosomal imprinting and chromosome inactivation. Finally, a few lectures will focus on selected topics of special interests that bridge current basic discoveries with potential medical applications such as the nature of telomeres and telomerase-related diseases; the role of histone octamer tails in epigenetics; transcription factors and the regulated expression of the genome. Whenever possible, paradigms will be used that correlate chromatin differentiation to certain human diseases.
Instructor(s): E. Moudrianakis
Area: Natural Sciences.

This course examines how recently developed single-molecule methods have enhanced our understanding of cellular processes. The ability to observe and manipulate individual biological macromolecules has revolutionized our understanding of the machines and processes that enable life. The course will provide an overview of single-molecule approaches and discuss relevant publications that exemplify how these methodologies are applied to biological problems. For each approach, key concepts will be introduced in a lecture/discussion, followed by a student-led presentation of a related publication.
Instructor(s): C. Kaiser
Area: Natural Sciences.

AS.020.664. Advanced Graduate Biophysical Chemistry.
This is a computer-assisted course that requires each student to bring a laptop to class AND lab each day they meet. The class will be taught in the Mathematica programming language and/or UNIX, but familiarity with the programs are NOT a requirement. The course is divided into two parts. In the Class portion (Tuesdays and Thursdays) students will be given instruction in the concepts of physical and quantitative biology. Students will learn to simulate biological processes, identify the relationship between data and models, and will learn to fit biological data. In the Lab portion (Mondays) students will learn to operate in the UNIX environment using standard UNIX commands and shell scripting. Database searches applicable to research questions of interest will be performed. The data will be processed and analyzed with UNIX and Mathematica. Must be taken in the same semester as 020.607. Biology graduate students only.
Instructor(s): K. Fleming; V. Hilser.

AS.020.668. Advanced Genetics and Molecular Biology.
This course examines modern concepts in genetics and molecular biology. The course focuses on the mechanisms controlling replication, recombination, transcriptional, posttranscriptional, translational, and posttranslational regulation. Lectures will have three parts: a student-led paper presentation, a discussion about the concepts surrounding a topic, and a discussion of modern techniques to experimentally probe the topic.
Instructor(s): J. Kim; R. Johnston.

AS.020.674. Graduate Biophysical Chemistry.
This course will provide an overview of protein and nucleic acid structure, fundamentals of thermodynamics and kinetics, ligand binding, folding and stability of macromolecules, and the principles of biophysical methods such as fluorescence spectroscopy, NMR, and X-ray crystallography. Biology PhD students only. Monday Discussion Session is optional. Recommended Course Background: AS.020.305, AS.020.306
Instructor(s): E. Freire; R. Schleif.

AS.020.679. Advanced Biological Microscopy.
This course is intended to build upon the basic skills students acquired in the previous course. Students will be required to work on actual ongoing research projects. The course will emphasize the integration and use of various light and electron microscopic techniques and their application to various research related questions. The course will have primarily a practical "hands-on" component; but will also include theoretical considerations as students will read, analyze, and discuss current journal articles.
Instructor(s): J. McCaffery
Area: Natural Sciences.

The creation and implementation of new approaches to the drug discovery and development process is a very active area of research. Currently, only one compound out of 5,000 that enter preclinical studies becomes a drug. Moreover, the development process is time consuming, lasting more than ten years on average. The rate of failure is extremely high. It has become evident that this field is in urgent need of revolutionary changes. This course will cover drug discovery issues ranging from the identification of hits to their optimization as drug candidates. Current as well as novel and proposed approaches aimed at accelerating discovery, potency optimization, selectivity, pharmacokinetics and other drug properties will be discussed. Grad students only.
Instructor(s): E. Freire
Area: Natural Sciences.

All aspects of cell biology are reviewed and updated in this intensive course through critical evaluation and discussion of the current scientific literature. Topics include protein trafficking, membrane dynamics, cytoskeleton, signal transduction, cell cycle control, cell physiology, and the integration of these processes in neurons. Recommended Course Background: AS.020.306
Instructor(s): R. Kuruvilla.

AS.020.687. Foundations & Applications of Molecular Biology.
An advanced course for graduate students in the biological sciences, although undergraduates are welcome, that stresses fundamental principles and analysis. It is generally focused on gene and protein structure and function.
Instructor(s): R. Schleif
Area: Natural Sciences.

AS.020.699. CMDB Responsible Conduct in Research.
This course involves discussions of ethical conduct and the responsible practice of scientific research. Department signature only; restricted to graduate students in Biology PhD students only.
Instructor(s): Staff.
AS.020.731. Critical Thinking in Biology.
In this course, students will critically analyze modern and seminal primary research papers in molecular, cellular and developmental biology. This analysis will emphasize the logic and experimental design of a selected set of outstanding research publications from diverse fields. Graduate students enrolled will develop the skills needed to efficiently understand and critique the rapidly expanding literature and growing diversity of biological research methods. In preparation for each class, all course participants will be expected to read and thoroughly critique the assigned paper(s). All students will submit a short, critical analysis of each paper in advance of the class session in which the paper(s) will be covered. A student will lead each discussion (once per semester, dependent upon enrollment). Recommended Course Background: AS.020.637, AS.020.668, AS.020.674, and AS.020.686
Instructor(s): D. Zappulla; R. Johnston.

AS.020.739. Topics in Biochemistry.
The course is open to graduate students and advanced undergraduates - Undergraduates with instructor's permission - "Topics in Biochemistry" deals with minireviews taken from the Journal of Biological Chemistry. Students select a topic of their choice from the "Compendium of Minireviews" for the current year, and present it before the class for discussion.
Instructor(s): M. Bessman.

AS.020.753. Logic and Methods in Modern Biology.
The purpose of this course is to gain experience in critical thinking about the logic and methods used in modern biological research. The main approach will be the critical reading, presentation, and discussion of primary research papers, and the preparation and presentation of a research proposal. It is held once a week on the NIH Bethesda campus. Grad students only.
Prerequisites: AS.020.637 AND AS.020.668 AND AS.020.674
Instructor(s): M. Lichten; O. Cohen-Fix
Area: Natural Sciences.

AS.020.801. Research – Biological Problems.
Independent research for the Ph.D. dissertation. Biology Ph.D. students only
Instructor(s): V. Hilser.

AS.020.802. Research-Biological Problems.
Biology Graduate students only.
Instructor(s): Staff.

AS.020.823. Introduction to Biology Research.
First year Biology Graduate Students only
Instructor(s): Staff.

AS.020.824. Introduction to Biology Research.
First year Biology Graduate Students only
Instructor(s): Staff.

AS.020.825. Introduction to Research.
Open to first year Biology graduate students only.
Instructor(s): Staff.

AS.020.826. Introduction to Biology Research.
Open to first year Biology graduate students only.
Instructor(s): Staff.

Cross Listed Courses
Chemistry
Principles and methods for the design and optimization of new biological systems, from a molecular perspective. Topics include: introduction to genetic parts and modern methods for their assembly; synthesis and incorporation of nucleic acids at the level of nucleotides, genes, and genomes; design of genetic programs; library generation and screening; directed evolution and its application to create new proteins and metabolic pathways; computational design of protein and RNA?using physical and bioinformatic approaches; non-canonical amino acids and genetic code expansion. This course will also feature critical evaluation of the primary literature in this fast-paced field, and practical experience with relevant software and computational tools.
Instructor(s): S. Fried.

Neuroscience
AS.080.305. Neuroscience: Cellular and Systems I. 3.0 Credits.
(Formerly Nervous Systems I) Neuroscience: Cellular and Systems I is a fully integrated, two-semester course that surveys the cellular and molecular biology of neurons as well as the structure and function of the nervous system. Students must register for Neuroscience: Cellular and Systems II offered in the second term. Course open to JHU undergraduates only.
Prerequisites: AS.080.203 OR AS.050.203 OR AS.200.141 or 080.105 or Permission
Instructor(s): H. Zhao; S. Hendry
Area: Natural Sciences.

Biophysics
AS.250.351. Reproductive Physiology. 2.0 Credits.
Focuses on reproductive physiology and biochemical and molecular regulation of the female and male reproductive tracts. Topics include the hypothalamus and pituitary, peptide and steroid hormone action, epididymis and male accessory sex organs, female reproductive tract, menstrual cycle, ovulation and gamete transport, fertilization and fertility enhancement, sexually transmitted diseases, and male and female contraceptive methods. Introductory lectures on each topic followed by research-oriented lectures and readings from current literature.
Instructor(s): B. Zirkin
Area: Natural Sciences.

Interdepartmental
AS.360.101. Discover Hopkins: Physiology & Disease. 1.0 Credit.
An understanding of physiology is an invaluable part of any budding physicians repertoire. In this, the second of a two-part course introducing classical physiology in the human body, and how it functions in both health and disease, we will cover guts (renal, digestive, and immune systems), as well as hormones (basic endocrinology) and sex/reproductive physiology. In addition to classroom study, students will be challenged to synthesize their newfound knowledge by taking part in immersive afternoon activities. While this represents a wholly separate course, students should also consider taking the first part of this series ("Physiology & Disease: Core Systems") to bolster their understanding. Ultimately, knowledge of basic physiological processes should impact the student’s future research and serve as a foundation for all future scientific and biomedical endeavors. There are no prerequisites for the course, but a background in biology is help.
Instructor(s): C. Ciarleglio
Area: Natural Sciences.
AS.360.163. Discover Hopkins Medical School Intensive. 1.0 Credit.
The 2-week program is designed to engage bright high school students who are interested in medicine. Taught and guided by Johns Hopkins University School of Medicine faculty post-docs and fellows, students will learn basic knowledge and techniques related to surgery, internal medicine, pediatrics, emergency medicine, and biomedical science by participating in interactive lectures and labs, experiencing hands-on medical trainings at Johns Hopkins Medical Simulation Center, interviewing and networking with diverse medical professionals, and visiting the world-renowned hospital.
Instructor(s): Staff
Area: Natural Sciences.

Biomedical Engineering
EN.580.220. the Science of Medicine: Thinking Critically. 3.0 Credits.
This course investigates some of the most pressing issues in biomedical science with direction from leading clinicians, scientists, policy experts, and industry professionals. The underlying science and ethical implications for topics such as "Rogue Clinics and Designer Babies: How can I decide the genotype of my offspring — and should I?" "Mosquito-borne Diseases: Fighting an enemy that outnumbers us 15,000 to one with genetics," and "HIV. Pushing for a cure versus settling for a treatment: What makes healthcare sufficient" are explored. The class is taught in a flipped method: students will be expected to listen to presentations at home so that class time can be devoted to problem solving activities, experimental design, debates, and discussion. The goal of this course is to teach students how to think critically and to expose students to the great unknowns that remain in science today.
Instructor(s): C. Hanlon; E. Haase; H. Goldberg
Area: Natural Sciences.

Computer Science
EN.601.448. Computational Genomics: Data Analysis. 3.0 Credits.
Genomic data has the potential to reveal causes of disease, novel drug targets, and relationships among genes and pathways in our cells. However, identifying meaningful patterns from high-dimensional genomic data has required development of new computational tools. This course will cover current approaches in computational analysis of genomic data with a focus on statistical methods and machine learning. Topics will include disease association, prediction tasks, clustering and dimensionality reduction, data integration, and network reconstruction. There will be some programming and a project component. [Applications] Prerequisites: EN.601.226 or other programming experience, probability and statistics, linear algebra or calculus. Prerequisites: Students may receive credit for EN.600.438 or EN.600.638, but not both.]
Instructor(s): A. Battle
Area: Engineering.
EN.601.749. Computational Genomics: Applied Comparative Genomics. 3.0 Credits.
The goal of this course is to study the leading computational and quantitative approaches for comparing and analyzing genomes starting from raw sequencing data. The course will focus on human genomics and human medical applications, but the techniques will be broadly applicable across the tree of life. The topics will include genome assembly & comparative genomics, variant identification & analysis, gene expression & regulation, personal genome analysis, and cancer genomics. The grading will be based on assignments, a midterm & final exam, class presentations, and a significant class project. [Applications] Expected course background: familiarity with UNIX scripting and/or programming. Instructor(s): M. Schatz.

Biophysics
http://biophysics.jhu.edu/
The Department of Biophysics offers programs leading to the B.A., M.A., and Ph.D. degrees. Biophysics is appropriate for students who wish to develop and integrate their interests in the physical and biological sciences.
Research interests in the Department cover experimental and computational, molecular and cellular structure, function, and biology, membrane biology, and biomolecular energetics. The teaching and research activities of the faculty bring its students in contact with biophysical scientists throughout the university. Regardless of their choice of research area, students are exposed to a wide range of problems of biological interest. For more information, and for the most up-to-date list of course offerings and requirements, consult the department web page at biophysics.jhu.edu.

Research Activities of Primary Faculty
Protein Engineering and Biophysics (Dr. Garcia-Moreno)
To understand how biological macromolecules work, or to design and engineer new ones, it is necessary to understand in detail the relationship between structure and energetics. We study this problem in our lab by analysis of the connection between structure, thermodynamic stability, and dynamics of proteins with a combination of computational and experimental methods. The approach depends heavily on the application of NMR spectroscopy, X-ray crystallography, and equilibrium thermodynamics. The experiments contribute the physical insight needed to guide the development of computational methods for structure-based energy calculations, as well as the data required to benchmark these methods. We are focused on problems of protein electrostatics because electrostatic energy is the most useful metric for correlating structure with function in all the most important energy transduction processes in biological systems. We focus on the engineering of proteins with pH sensing.

Biophysics of RNA (Dr. Woodson)
The control of cell growth and type depends on the ability of RNA to fold into complex three-dimensional structures. RNA catalysts are good models for studying the physical principles of RNA folding, and the assembly of protein-RNA complexes such as the ribosome. Changes in RNA three-dimensional structure are monitored by fluorescence spectroscopy, “X-ray footprinting,” and neutron scattering. Bacterial and yeast expression systems are used to study intracellular folding of RNA.

Protein Folding, Notch Signaling (Dr. Barrick)
The folding of proteins into their complex native structures is critical for proper function in biological systems. This spontaneous process
of self-assembly is directed by physical chemistry, although the rules are not understood. We are using repeat-proteins, linear proteins with simple architectures, to dissect the energy distribution, sequence-stability relationship, and kinetic routes for folding. In addition, we are studying the molecular mechanisms of Notch signaling, a eukaryotic transmembrane signal transduction pathway. The transmission of information across the membranes of cells is essential for cell differentiation and homeostasis; signaling errors result in disease states including cancer. We are focusing on interactions between proteins involved in Notch signaling using modern biophysical methods. Thermodynamics of association and allosteric effects are determined by spectroscopic, ultracentrifugation, and calorimetric methods. Atomic structure information is being obtained by NMR spectroscopy. The ultimate goal is to determine the thermodynamic partition function for a signal transduction system and interpret it in terms of atomic structure.

NMR Spectroscopy (Dr. Lecomte)
Many proteins require stable association with an organic compound for proper functioning. One example of such “cofactor” is the heme group, a versatile iron-containing molecule capable of catalyzing a broad range of chemical reactions. The reactivity of the heme group is precisely controlled by interactions with contacting amino acids. Structural fluctuations within the protein are also essential to the fine-tuning of the chemistry. We are studying how the primary structure of cytochromes and hemoglobin codes for heme binding and the motions that facilitate function. The method of choice is nuclear magnetic resonance spectroscopy, which we use to obtain detailed structural and dynamic representations of proteins with and without bound heme. The ultimate goal is to understand the evolution of chemical properties in heme proteins and how to alter them.

Structural and Energetic Principles of Membrane Proteins (Dr. K. Fleming)
Membrane proteins must fold to unique native conformations and must interact in specific ways to form complexes essential for life. Currently, the chemical principles underlying these processes are poorly understood. Thermodynamic and kinetic studies on membrane proteins with diverse folds and oligomeric states are carried out with the goal of discovering the physical basis of stability and specificity for membrane proteins. Our research results in a quantitative understanding of sequence-structure-function relationships that can ultimately be used to describe membrane protein populations in both normal and disease states, to design novel membrane proteins, and to develop therapeutics that modulate membrane protein functions in desirable ways.

Chromatin Remodeling (Dr. Bowman)
Chromatin, the physical packaging of eukaryotic chromosomes, plays a major role in determining the patterns of gene silencing and expression across the genome. Chromatin remodelers are multicomponent protein machines that establish and maintain various chromatin environments through the assembly, movement, and eviction of nucleosomes. At present, the molecular mechanisms by which chromatin remodelers alter chromatin structure are not understood. Our long-term goal is to gain a molecular understanding of the remodeling process and in particular how remodeling is coupled to the transcriptional machinery. Our strategy is to couple structure determination with functional studies to determine how different components of a chromatin remodeler cooperate and interact with the nucleosome substrate.

Physical Systems Biology (Dr. Roberts)
The laboratory is devoted to understanding and modeling the behavior of cells as complex systems. We are using tools from the general area of biological physics: potential- and probability-based computational modeling along with limited applications of single-cell, single-molecule experimental techniques (split roughly 80% theoretical/computational and 20% experimental). We term this approach “Physical Systems Biology” and it lies at the interface of biology, computer science, and physics. While this approach absolutely requires in-depth characterization of particular components, an equally critical step is then stepping back to consolidate the knowledge gained into a model of the entire cellular system. Incorporating many varied types of biological data into a genuine in silico model for the cell is the long-range goal of the laboratory.

Theoretical Biophysics (Dr. Johnson)
Protein interaction networks capture the cooperation required by proteins to carry out complex functions in the cell. The ability of proteins to assemble to form transient or permanent complexes and transmit signals or nutrients depends on their concentrations, their binding partners, and their spatial and temporal dynamics in the cell. Using computation and theory, we are building models to accurately simulate these multi-protein assembly processes, such as those occurring in endocytosis, that are critical to cell survival. We complement these detailed simulations with coarse-grained models to extend to larger protein interaction networks and characterize the role of network topology on protein binding specificity and dynamics.

Single Molecule Biophysics (Dr. Ha)
Our research is focused on pushing the limits of single-molecule detection methods to study complex biological systems. We develop state-of-the-art biophysical techniques (e.g., multicolor fluorescence, super-resolution imaging, combined force and fluorescence spectroscopy, vesicular encapsulation, single-molecule pull-down) and apply them to study diverse protein–nucleic acid and protein-protein complexes, and mechanical perturbation and response of these systems both in vitro and in vivo.

Quantitative analysis of gene expression in single molecule and single cell (Dr. Myong)
Our research is focused on dissecting biological pathways that control and modulate gene expression profiles that are pertinent to human diseases. We develop single molecule and single cell platforms to examine potential rate-limiting steps that contribute to modulating transcription and translation. In particular, we investigate RNA interference pathway and G-quadruplex DNA mediated promoter activity. In collaboration, we are also studying telomeric DNA processing and chromatin remodeling. Together, we seek to shed light on molecular orchestration and mechanism that govern the Central Dogma of Biology.

Cellular Physics (Dr. Camley)
I work on the physics of cell biology, trying to understand how cells can respond to signals, crawl through complex environments, and work together to move and measure signals. I am also interested in the dynamics of subcellular processes like the cell membrane’s motion and intracellular transport. These problems link the physics of soft, fluctuating materials to biological questions like how a white blood cell can find a wound. My group uses a wide range of computational and analytical methods to model organelles, cells, and tissues, ranging from stochastic hydrodynamics to phase field and reaction-diffusion modeling.

Facilities
The department shares state-of-the-art equipment for X-ray diffraction analysis, NMR spectroscopy, solution biophysical studies, and numerically intensive computer simulations with other biophysics units and departments within the University. In addition, the Department
houses a full complement of equipment for molecular biological and biochemical work, and for various kinds of spectroscopy.

**Undergraduate Program**

The undergraduate major in biophysics is intended for the student interested in advanced study of biophysics or the related fields of biochemistry, quantitative or computational biology, molecular biology, physiology, pharmacology, and neurobiology. The biophysics major fulfills all typical science premedical requirements with the exception of Organic Chemistry Lab (AS.030.225 Introductory Organic Chemistry Laboratory or AS.030.227 Chemical Chirality: An Introduction in Organic Chem. Lab, Techniques). The student majoring in biophysics, with the advice of a member of the department, chooses a program of study that will include foundation courses in biology, chemistry, and physics followed by advanced studies in biophysics, and independent research. The biophysics major requires that students earn a grade of "C" or greater for all courses required in the major. A student who earns a grade of "C-" or below must repeat the course and earn a better grade.

For additional information on academic requirements and department events for majors, check the undergraduate website (http://biophysics.jhu.edu/undergraduate).

**Requirements for the B.A. Degree**

(See also Requirements for a Bachelor’s Degree (p. 7).)

**Major requirements are:**

**Chemistry**

Total Credits: 93-99

A Note on Writing Courses
The Krieger School of Arts & Sciences requires 12 credits of writing-intensive coursework. Although many humanities and social science courses have a writing designation, a few courses within the major also fulfill the requirement. Current examples include:
AS.250.335 Single Molecule & Cell Biophysics
AS.250.383 Molecular Biophysics Laboratory
AS.250.401 Advanced Seminar in Structural and Physical Virology
AS.250.403 Bioenergetics: Origins, Evolution and Logic of Living Systems
AS.250.411 Advanced Seminar in Structural Biology of Chromatin
AS.250.421 Advanced Seminar in Membrane Protein Structure, Function & Pharmacology
Fulfilling some of the writing requirement with one or more biophysics courses requires advanced planning because not all of these courses are offered every year.

Honors in Biophysics
The Jenkins Biophysics department offers outstanding students the opportunity to earn departmental honors in Biophysics. This honors distinction appears on the student’s transcript upon graduation. If
the honors requirements are approved prior to early April, an “Honors” distinction will additionally appear in the commencement program.

The requirements for departmental honors in biophysics are two-fold:

The student must maintain an overall GPA of 3.5 or greater
The student must write and receive approval of an Honors paper that is based on their 6 credits of required research.

Generally, the Honors paper must be submitted no later than March 1 of the senior year to meet the commencement deadline. Details on the format of the Honors paper can be found on the departmental website. Schedule a meeting with your Jenkins faculty adviser if you are interested in seeking departmental honors.

Ete Z. Szüts Undergraduate Research Travel Award
This award, named in honor of a Ph.D. graduate student from this department, will provide funds for up to 80 percent of the transportation costs of undergraduate research students in biophysics to attend a scholarly meeting. Recipients must be sponsored by a member of the departmental faculty who will be at the same meeting. Schedule a meeting with your Jenkins faculty adviser if you are interested in the Szuts Travel Award.

H. Keffer Hartline Award for Excellence in Undergraduate Research in Biophysics
This award honors a senior Biophysics Major for excellence in undergraduate research in Biophysics. Recipients are selected by Biophysics Faculty.

Detlev W. Bronk Award for Outstanding Scholarship in Biophysics
This award honors a senior Biophysics major for outstanding academic achievement in Biophysics. Recipients are selected by Biophysics Faculty.

Graduate Programs
Fifth-Year Master’s Degree
The T. C. Jenkins Department of Biophysics offers outstanding undergraduate biophysics majors the opportunity to advance their education through a combined, 5-year B.A., M.A. program. Candidates for this program must be current biophysics undergraduates with a departmental GPA of 3.5 or greater and a strong research history. All bachelor’s requirements must be completed before matriculating into the Master’s program.

Students in this program will be required to take courses such as:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.250.685</td>
<td>Proteins &amp; Nucleic Acids</td>
<td>3</td>
</tr>
<tr>
<td>AS.250.689</td>
<td>Physical Chemistry of Biological Macromolecules</td>
<td>3</td>
</tr>
<tr>
<td>AS.250.690</td>
<td>Methods in Molecular Biophysics</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td><strong>Total Credits</strong></td>
<td><strong>9</strong></td>
</tr>
</tbody>
</table>

These courses account for about half of the student’s time. The remaining effort is spent on a substantial research project. A Master’s thesis describing the research being carried out is also required.

Doctoral Programs
The Thomas C. Jenkins Department of Biophysics offers three Ph.D. programs (Jenkins, PMB and CMDB, see below). The annual application deadline is January 15.

Jenkins Biophysics Program
The Jenkins Biophysics Program is designed for students interested in obtaining a doctorate in biophysics. Students joining this program carry out their doctoral research with a faculty member in the Department of Biophysics (http://biophysics.jhu.edu/people). This program is financially supported through departmental funds, and therefore can support international students who are ineligible for NIH training grants.

Admission
Please see the Biophysics website (http://biophysics.jhu.edu/graduate/jenkins-biophysics-program/admissions) for requirements and how to apply to the Jenkins program.

Requirements for the Ph.D.
The following courses are required:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>

</tbody>
</table>

In addition to classes, students are required to attend seminars given by outside speakers invited by the Biophysics Department, given on a weekly basis. Meeting and hearing about the work of others provides an excellent opportunity to observe different styles of communicating science, learn about career paths of others, and of course find out what key scientific questions are being pursued in different fields.

Teaching is an important mission of the Department of Biophysics. Students in the Jenkins Biophysics Program are required to serve as teaching assistants (TAs) for four semesters, which lasts the first two years. The TAs provide essential help in running laboratory and computer-based undergraduate courses, and it is through these assistantships that graduate students can be given financial support necessary for tuition and stipends.

After being admitted to the program, students must pass a Graduate Board Oral (GBO) exam to continue their dissertation research at Johns Hopkins University. This exam is traditionally taken in the spring of the second year. The exam committee consists of five faculty members, and the student provides oral answers. While generally focused on biophysics, questions can also extend to topics in biology, chemistry, and physics. Students who feel they may lack a strong background in certain areas are encouraged to improve their knowledge by taking elective classes and self-study during the first two years.

Program in Molecular Biophysics
The Program in Molecular and Biophysics (PMB), which began in 1990, brings together Johns Hopkins faculty at the Homewood and Medical School campuses. Its goal is to prepare students to deal with
Completion of an original investigation and presentation of a dissertation are required. The dissertation must be accepted by the program and be considered worthy of publication by the referees. Students must then pass an oral examination on their dissertation and related topics.

The Program in Cell, Molecular Developmental Biology and Biophysics

The Program in Cell, Molecular Developmental Biology and Biophysics (CMDB) gives students a strong background in modern biology and physical biochemistry. This combination prepares students to study complex biological phenomena using quantitative physical methods. The training faculty reside in the T. C. Jenkins Department of Biophysics, the Biology Department, and the Carnegie Institutions Department of Embryology, all located on the Johns Hopkins Homewood campus. Students take core graduate courses in cell, molecular, and developmental biology, and in biophysics, and complete four eight-week rotations their first year. Other requirements include the Graduate Board Oral Preliminary Examination, given before the end of the second year, and successful defense of the dissertation.

For more information about CMDB, please check its website (cmdb.jhu.edu). Interested applicants can apply online via the program website or by U. S. mail to:

Ms. Joan Miller (joan@jhu.edu)
Graduate Admissions Coordinator
CMDB Program
Department of Biology
Johns Hopkins University
3400 N. Charles Street
Baltimore, MD 21218
410-516-5502

Financial Aid

Two National Institutes of Health training grants currently provide stipend and tuition support: one is for students who enroll in PMB and the other is for those who enter CMDB. Students supported by these training grants must be U.S. citizens or permanent residents. In addition, several research assistantships funded by grants and contracts awarded to faculty by outside agencies may be available to qualified students. University fellowships providing remission of tuition are also available. Graduate students in biophysics are eligible for and encouraged to apply for various nationally administered fellowships, such as National Science Foundation fellowships. Information on these and other support mechanisms can be obtained through the fellowship advisor at the applicant’s college or from the National Research Council:

Attn: Fellowships
1000 Thomas Jefferson St.
Washington, D.C., 20007.

It is anticipated that financial support covering normal living costs and tuition will be made available to accepted students. Support for foreign students is extremely limited.

For current faculty and contact information go to http://biophysics.jhu.edu/people/

Faculty

Doug Barrick
Thomas C. Jenkins Professor: energetic and structural basis of Notch signal transduction, protein energetics, repeat protein folding.

Gregory Bowman
Associate Professor: biophysical and biochemical characterization of chromatin-remodeling proteins; X-ray crystallography.

Brian Camley
Assistant Professor (Physics & Astronomy): theoretical and computational studies of single and collective cell motility; soft matter in cell biology

Richard Cone
Professor: mucosal protective mechanisms, contraception and prevention of sexually transmitted diseases, cellular and molecular mechanics.

Bertrand Garcia-Moreno E.
Professor (Chair): experimental and computational studies of protein energetics and electrostatics.

Karen G. Fleming
Professor: energetics and folding of membrane proteins.

Taekjip Ha
Bloomberg Professor: single molecule biophysics, Fluorescence imaging and spectroscopy, mechanobiology

Margaret Johnson
Assistant Professor: computational and theoretical studies of protein-protein interactions; protein assembly and dynamics.

Juliette T. J. Lecomte
Professor: structure and dynamics of proteins in solution; NMR spectroscopy.

Sua Myong
Associate Professor: quantitative analysis of gene expression in single molecule and single cell

Elijah Roberts
Assistant Professor: development and application of in-silico cell models.

George Rose
Krieger-Eisenhower Professor, Research Professor, Professor Emeritus: modeling and simulation of protein folding and protein structure.

Sarah A. Woodson
Thomas C. Jenkins Professor: folding and assembly of RNA and RNA-protein complexes.

Research/Teaching Faculty

Ana Damjanovic
Associate Research Scientist: computational studies of protein structure, dynamics and function.

Carolyn Fitch
Senior Lecturer: computational and experimental studies on protein structure, function, and energetics.

Patrick Fleming
Senior Lecturer: computational studies of protein folding, structure and solvation.

Maria Procopio
Lecturer: Computational and theoretical studies of low magnetic field effects in biology via the radical-pair mechanism, magnetic sensing in animals, quantum biology

Jaime Sorenson
Lecturer

Secondary Appointments, Biology

Ernesto Freire
Professor: biophysical chemistry, thermodynamics of macromolecular assemblies in membranes protein-lipid interactions, microcalorimetry.

Vincent J. Hilser
Professor: conformational fluctuations in function, disease, and evolution.

Christian Kaiser
Assistant Professor: Single-molecule biochemistry studies of the machines and processes in protein translation, translocation, and folding

Evanuelos Moudrianakis
Professor: mechanisms of enzyme action, especially of chloroplast and mitochondrial coupling factors. Human chromosome structure and function, self-assembly of chromosomal components.

Robert Schleif
Professor: protein-DNA interactions and regulation of gene activity.

Secondary Appointments, Chemistry

Christopher Falzone
Teaching Professor: NMR spectroscopy of proteins.

Craig A. Townsend
Professor: organic and bioorganic chemistry, biosynthesis of natural products, stereochemical and mechanistic studies of enzyme action, application of spectroscopic techniques to the solutions of biological problems.

Secondary Appointments, Advanced Academic Programs

Alexandra Tan
Program Director, Advanced Academic Programs and Lecturer, Biophysics

Joint Appointments

P. C. Huang
Professor (Biochemistry and Molecular Biology): organization and regulation of stress inducible genes and their gene products.

Affiliations with the School of Medicine

L. Mario Amzel
Professor: X-ray diffraction studies of biological macromolecules; enzymes involved in oxidate reductions and phosphorylation; experimental and modeling studies of binding proteins.

James M. Berger
Professor: structural and mechanistic biochemistry of protein/nucleic acid machines and assemblies.

Dominique Frueh
Assistant Professor: NMR studies of protein dynamic modulations and conformational changes in active enzymatic systems.

Albert Lau
Assistant Professor: characterization of receptor-ligand interactions and macromolecular conformational transitions using computational and crystallographic approaches.

Jungsan Sohn
Assistant Professor: structure and function of biological stress sensors.

Herschel Wade
Assistant Professor: structural, functional, and energetic treatments of ligand-activated molecular switches.

Cynthia Wolberger
Professor: three-dimensional structure of protein-DNA complexes, X-ray crystallography.

Bin Wu
Assistant Professor: single molecule imaging, RNA biology, and gene expression

Jie Xiao
Assistant Professor: dynamics of molecular process at single molecule and single cell level.

Visiting Faculty
Krastan Blagoev
Adjunct Associate Research Scientist: Theoretical and experimental biological physics

For current course information and registration go to https://sis.jhu.edu/classes/

Courses
AS.250.106. Introduction to Biomedical Research and Careers I. 1.0 Credit.
Lecture Series designed for those curious about a career in life sciences, medicine and public health. A novel format combining presentation with didactic interviews gives a broad view of a range of research topics, experimental approaches and logistics, and practical applications as well as career paths. Emphasis is on the excitement of scientific explorations not an abundance of the technical facts and figures. Freshmen and non-science majors. Co-listed with AS.250.300 and AS.250.306.
Instructor(s): P. Huang
Area: Natural Sciences.

AS.250.131. Freshman Seminar in Biophysics. 1.0 Credit.
Introduction of contemporary biophysics research topics through presentations, discussion and hands-on exercise. Freshmen and sophomores only. S/U grading only.
Instructor(s): K. Fleming
Area: Natural Sciences.

AS.250.205. Introduction to Computing. 3.0 Credits.
This course is useful for many disciplines not only the life sciences. It will introduce students to basic computing concepts and tools useful in many applications. Students learn to work in the Unix environment, to write shells scripts, and to make use of powerful Unix commands (e.g grep, awk, and sed). They will learn to program using the Python programming language, graphing software, and a package for numerical and statistical computing, such as Mathematica or MATLAB. At the end of the semester students will complete a project coupling all components of the semester together. Brief lectures followed by extensive hands-on computer laboratories with examples from many disciplines. No prerequisites. Course offered every semester.
Prerequisites: You cannot take AS.250.205 if you have already taken AS.250.206.
Instructor(s): A. Damjanovic; M. Procopio
Area: Natural Sciences.

AS.250.206. Introduction to Computing. 4.0 Credits.
This course is useful for many disciplines not only the life sciences. It will introduce students to basic computing concepts and tools useful in many applications. Students learn to work in the Unix environment, to write shells scripts, and to make use of powerful Unix commands (e.g grep, awk, and sed). They will learn to program using the Python programming language, graphing software, and a package for numerical and statistical computing, such as Mathematica or MATLAB. At the end of the semester students will complete a project coupling all components of the semester together. Brief lectures followed by extensive hands-on computer laboratories with examples from many disciplines. No prerequisites. Course offered every semester.
Prerequisites: You cannot take AS.250.206 if you have already taken AS.250.205.
Instructor(s): C. Fitch
Area: Natural Sciences.

AS.250.253. Protein Engineering and Biochemistry Lab. 3.0 Credits.
This laboratory examines the relationship between genes and proteins in the context of disease and evolution. It is a research project lab in which the structural and functional consequences of mutations are determined for a model protein. Students will learn basic protein science and standard biochemical techniques and methods in protein engineering. They will perform experiments in site-directed mutagenesis, protein purification, and structural, functional and physical characterization of proteins. No prerequisites. Courses offered in Fall and Spring semesters.
Prerequisites: You cannot take AS.250.253 if you have already taken AS.250.254.
Instructor(s): C. Fitch; J. Sorenson
Area: Natural Sciences.

AS.250.254. Protein Biochemistry and Engineering Laboratory. 4.0 Credits.
This laboratory examines the relationship between genes and proteins in the context of disease and evolution. It is a research project lab in which the structural and functional consequences of mutations are determined for a model protein. Students will learn basic protein science and standard biochemical techniques and methods in protein engineering. They will perform experiments in site-directed mutagenesis, protein purification, and structural, functional and physical characterization of proteins. No prerequisites. Courses offered in Fall and Spring semesters.
Prerequisites: You cannot take AS.250.254 if you have already taken AS.250.253.
Instructor(s): C. Fitch
Area: Natural Sciences.

AS.250.256. Introduction to Bioinformatics. 3.0 Credits.
Algorithms and databases for biological information. A mostly computer lab course covering basic programming; algorithms for comparison of sequence, protein structure and gene expression; protein structure prediction and an introduction to major databases. Students will complete a genomics database project and will prepare and discuss online presentations on topics related to the use of genomic information. No programming experience necessary. Preference to Biophysics majors.
Instructor(s): P. Fleming
Area: Natural Sciences.
AS.250.300. Introduction to Biomedical Research and Careers II. 1.0 Credit.
Lecture Series designed for those curious about a career in life sciences, medicine and public health. A novel format combining presentation with didactic interviews gives a broad view of a range of research topics, experimental approaches and logistics, and practical applications as well as career paths. Emphasis is on the excitement of scientific explorations not an abundance of the technical facts and figures. Freshmen and non-science majors. Co-listed with AS.250.106 and AS.250.306
Instructor(s): P. Huang
Area: Natural Sciences.

AS.250.301. Laboratory in Molecular Evolution: Using ancestral. 3.0 Credits.
The availability of genomic sequences from a vast number of species has enabled the reconstruction of ancestral proteins. In this course we will reconstruct the genes of ancestral proteins and study the physical properties of proteins coded for by “extinct” genes. To examine the evolutionary mechanisms whereby modern proteins obtained their remarkable physical and functional properties, we will focus on understanding how the physical properties of proteins evolved hand-in-hand with changing environmental conditions such as pH, temperature, pressure, ionic strength, oxidative stress, etc.
Instructor(s): A. Robinson.
Area: Natural Sciences.

AS.250.302. Modeling the Living Cell. 4.0 Credits.
Previously titled "Models and Algorithms in Biophysics." Introduction to physical and mathematical models used to represent biophysical systems and phenomena. Students will learn algorithms for implementing models computationally and perform basic implementations. We will discuss the types of approximations made to develop useful models of complex biological systems, and the comparison of model predictions with experiment.
Instructor(s): M. Johnson
Area: Natural Sciences.

AS.250.306. Introduction to Biomedical Research and Careers III. 1.0 Credit.
Lecture Series designed for those curious about a career in life sciences, medicine and public health. A novel format combining presentation with didactic interviews gives a broad view of a range of research topics, experimental approaches and logistics, and practical applications as well as career paths. Emphasis is on the excitement of scientific explorations not an abundance of the technical facts and figures. Freshmen and non-science majors. Co-listed with AS.250.106 and AS.250.300
Instructor(s): P. Huang
Area: Natural Sciences.

AS.250.310. Exploring Protein Biophysics using Nuclear Magnetic Resonance (NMR) Spectroscopy. 3.0 Credits.
NMR is a spectroscopic technique which provides unique, atomic level insights into the inner workings of biomolecules in aqueous solution. A wide variety of biophysical properties can be studied by NMR. For example, we can use the technique to determine three dimensional structure of biological macromolecules such as proteins and nucleic acids, probe their dynamical properties in solution, study their interaction with other molecules and understand how physico-chemical properties (such as electrostatics and redox chemistry) affects and modulates structure-function relationships. NMR exploits the exquisite sensitivity of magnetic properties of atomic nuclei to their local electronic (and therefore, chemical) environment. As a result, biophysical properties can be studied at atomic resolution. That is to say, we can deconstruct global properties of a molecule in terms of detailed, atomic level information. In addition, interactions between nuclei can be exploited to enhance the information content of NMR spectra via multi-dimensional (2D and 3D) spectroscopy. Since these properties can be studied in solution, NMR methods serve as an effective complement to X-ray crystallography, which also provides detailed, atomic level information in the solid state. In this course, we will learn about the basics of NMR spectroscopy, acquire 1D and 2D NMR spectra and use various NMR experiments to characterize and probe biophysical properties of proteins at an atomic level. Juniors and Seniors Only.
Prerequisites: ((AS.030.101 AND AS.030.105) OR (AS.030.103 OR AS.030.204)) AND (AS.030.370 OR AS.250.372) AND (AS.020.305 OR AS.030.315 OR AS.250.315) AND AS.030.205 or permission of the instructor.
Instructor(s): A. Majumdar.

AS.250.313. Molecular and Cellular System Biology. 4.0 Credits.
This course covers the principles of biological networks, with an emphasis on computational analysis. Networks ranging from simple biochemical pathways to genome-scale metabolic, regulatory, and signaling networks will be studied. Topics include dynamic modeling of biochemical pathways, steady-state analysis of cellular metabolic networks, inference of gene regulatory networks using –omics data, and systems biology approaches to studying signal transduction. Recommended Course Background: Calculus (AS.110.106 and AS.110.107), Biochemistry (AS.250.315 or AS.020.305 or equivalent), Computational Biology (AS.250.353) or Introduction to Bioinformatics (AS.250.265) or prior exposure to programming.
Instructor(s): E. Roberts.

AS.250.314. Research in Protein Design and Evolution. 3.0 Credits.
Instructor(s): B. Garcia-Moreno; J. Lecomte Writing Intensive.

AS.250.315. Biochemistry I. 4.0 Credits.
Foundation for advanced classes in Biophysics and other quantitative biological disciplines. Lecture and computer laboratory. This class is the first semester of a two semester course in biochemistry. Topics in Biochemistry I include chemical and physical properties of biomolecules and energetic principles of catabolic pathways. Computer labs include extensive use of molecular graphics and modelling of reaction kinetics and pathway flux. Co-listed with AS.030.315
Prerequisites: If you have completed AS.250.307 you may not register for AS.250.315.
Prerequisites: AS.030.206 OR AS.030.212
Instructor(s): P. Fleming
Area: Natural Sciences.
AS.250.316. Biochemistry II. 3.0 Credits.
Biochemical anabolism, nucleic acid structure, molecular basis of transcription, translation and regulation, signal transduction with an emphasis on physical concepts and chemical mechanisms. Format will include lectures and class discussion of readings from the literature. 
Prerequisites: (AS.250.315 OR AS.030.315 OR AS.020.305) AND (AS.030.206 OR AS.030.212) or permission of the instructor.
Instructor(s): S. Rokita; S. Woodson.

AS.250.320. Macromolecular Binding. 3.0 Credits.
All biological processes require the interactions of macromolecules with each other or with ligands that activate or inhibit their activities in a controlled manner. This course will discuss theoretical principles, logic, approaches and practical considerations used to study these binding processes from a quantitative perspective. Topics will include thermodynamics, single and multiple binding equilibria, linkage relationships, cooperativity, allostery, and macromolecular assembly. Some biophysical methods used in the study of binding reactions will be discussed. Computer simulation and analysis of binding curves will be used to analyze binding data, and binding schemes and examples from the scientific literature will be reviewed and discussed. Recommended Course Background: AS.250.372 Biophysical Chemistry
Prerequisites: AS.250.315 OR AS.020.305
Instructor(s): K. Fleming
Writing Intensive.

AS.250.335. Single Molecule & Cell Biophysics. 3.0 Credits.
This (elective) course offers an introduction to the field of single molecule and single cell biophysics to second and third year undergraduate students in biophysics. We will examine technologies such as single molecule fluorescence, force measurements and single cell fluorescence detections that enable high precision molecular visualizations in vitro and in cells. In addition, we will cover topics of genome engineering, cell mechanics and optogenetics toward the end of the semester. Each student is expected to read two articles assigned for each week and submit a written summary. All students will take turns presenting the assigned articles to class.
Instructor(s): S. Myong; T. Ha.

AS.250.345. Cellular and Molecular Physiology. 3.0 Credits.
How cells and molecules function as parts of whole organisms. Topics include speeds of diffusion, motor proteins, and animal motility; bacterial size, shape, and chemotaxis; sensory and neuronal mechanisms; osmosis; mucosal protective mechanisms; cellular and organismic circulation and respiration. Discussion section to be arranged 1 hour per week.
Instructor(s): R. Cone
Area: Natural Sciences.

AS.250.351. Reproductive Physiology. 2.0 Credits.
Focuses on reproductive physiology and biochemical and molecular regulation of the female and male reproductive tracts. Topics include the hypothalamus and pituitary, peptide and steroid hormone action, epididymis and male accessory sex organs, female reproductive tract, menstrual cycle, ovulation and gamete transport, fertilization and fertility enhancement, sexually transmitted diseases, and male and female contraceptive methods. Introductory lectures on each topic followed by research-oriented lectures and readings from current literature.
Instructor(s): B. Zirkin
Area: Natural Sciences.

AS.250.353. Computational Biology. 3.0 Credits.
This course introduces several computational approaches to the study of biological macromolecules. Students will learn to use computational tools to carry out and analyze molecular simulations and how to work in a UNIX networked environment. A major goal is to understand molecular systems as ensembles. No previous experience is required. A previous biochemistry course is strongly recommended.
Prerequisites: (AS.030.101 AND AS.030.102) or AS.030.103.
Instructor(s): P. Fleming
Area: Natural Sciences.

AS.250.362. Biophysical Chemistry. 4.0 Credits.
Course covers classical and statistical thermodynamics, spanning from simple to complex systems. Major topics include the first and second law, gases, liquids, chemical mixtures and reactions, conformational transitions in peptides and proteins, ligand binding, and allostery. Methods for thermodynamic analysis will be discussed, including calorimetry and spectroscopy. Students will develop and apply different thermodynamic potentials, learn about different types of ensembles and partition functions. Students will learn to use Mathematica and will use it for data fitting and for statistical and mathematical analysis. Background: Calculus, Organic Chemistry, and Introductory Physics.
Instructor(s): D. Barrick
Area: Natural Sciences.

AS.250.381. Spectroscopy and Its Application in Biophysical Reactions. 3.0 Credits.
Continues Biophysical Chemistry (AS.250.372). Fundamentals of quantum mechanics underlying various spectroscopies (absorbance, circular dichroism, fluorescence, NMR); application to characterization of enzymes and nucleic acids.
Instructor(s): J. Lecomte
Area: Natural Sciences.

AS.250.383. Molecular Biophysics Laboratory. 3.0 Credits.
An advanced inquiry based laboratory course covering experimental biophysical techniques to introduce fundamental physical principles governing the structure/function relationship of biological macromolecules. Students will investigate a "model protein", staphylococcal nuclease, the "hydrogen atom" of biophysics. Using a vast library of variants, the effect of small changes in protein sequence will be explored. A variety of techniques will be used to probe the equilibrium thermodynamics and kinetic properties of this system; chromatography, spectroscopy (UV-Vis, fluorescence, circular dichroism, nuclear magnetic resonance), calorimetry, analytical centrifugation, X-ray crystallography, mass spectroscopy, and computational methods as needed for analysis. These methods coupled with perturbations to the molecular environment (ligands, co-solvents, and temperature) will help to elucidate protein function. Prerequisite: Introduction to Scientific Computing (250.205) or equivalent. Biophysical Chemistry (250.372 or 020.370) or equivalent. Course taught in Fall and Spring.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class; AS.250.372
Instructor(s): C. Fitch
Writing Intensive.
AS.250.401. Advanced Seminar in Structural and Physical Virology. 3.0 Credits.
Illustrated fundamental contributions from biophysics and quantitative and physico-chemical approaches to study of complex biological systems. Focus on the physical and structural basis of viral infectivity, emphasizing replication cycles and evolution and structural biology of human pathogens such as HIV and influenza. AS.250.372 - Introduction to Biophysical Chemistry useful. Recommended Course Background: AS.030.205 and (AS.020.305 or AS.250.307)
Instructor(s): B. Garcia-Moreno
Area: Natural Sciences
Writing Intensive.

AS.250.403. Bioenergetics: Origins, Evolution and Logic of Living Systems. 3.0 Credits.
The trait shared by all living systems is the capacity to perform energy transduction. This biophysics/biochemistry course examines the physico-chemical and structural basis of biological energy transduction. Emphasis is on understanding the molecular and cellular logic of the flow of energy in living systems. The course explores the connection between fundamental physical requirements for energy transduction and the organization, evolution and possibly even the origins of biological molecules, cells, and organisms. Implications for planet earth's energy balance and for the design of synthetic organisms and of artificial energy transducing machines will be discussed, time permitting. Recommended Course Background: One semester of Biochemistry. Recommended Course Background: One semester of Biochemistry
Instructor(s): B. Garcia-Moreno
Writing Intensive.

AS.250.411. Advanced Seminar in Structural Biology of Chromatin. 3.0 Credits.
Focus is on structural and physical aspects of DNA processes in cells, such as nucleosomal packaging, DNA helicases, RNA polymerase, and RNA inhibition machinery. Topics are meant to illustrate how the structural and chemical aspects of how proteins and nucleic acids are studied to understand current biological questions. Recommended Course Background: Biochemistry I (AS.250.315) and Biochemistry II (AS.250.316) or Biochemistry (AS.020.305) and Intro to Biophys Chem (AS.250.372)
Instructor(s): G. Bowman
Area: Natural Sciences
Writing Intensive.

AS.250.421. Advanced Seminar in Membrane Protein Structure, Function & Pharmacology. 3.0 Credits.
Topics are meant to illustrate the physical basis of membranes and membrane proteins towards understanding their functions and pharmacological importance including aspects of drug design as it relates to membranes. Contemporary issues in the field will be covered using primary literature articles, structural manipulations in pymol, and computational binding simulations. Recommended Course Background: AS.030.205, AS.250.307, and AS.250.372
Instructor(s): K. Fleming
Writing Intensive.

AS.250.414. Research in Protein Design and Evolution. 3.0 Credits.
Instructor(s): B. Garcia-Moreno; J. Lecomte
Writing Intensive.

AS.250.519. Independent Study. 3.0 Credits.
Instructor(s): K. Fleming; S. Myong
Writing Intensive.

AS.250.521. Research Problems. 3.0 Credits.
Instructor(s): Staff.

AS.250.522. Research Problems. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.250.531. Laboratory - Biophysics. 3.0 Credits.
Introduction to Independent research in Biophysics emphasizing basic laboratory techniques. Individual study arranged with faculty mentor. Permission from Faculty Sponsor.
Instructor(s): Staff.

AS.250.574. Research Problems. 2.0 Credits.
Instructor(s): K. Fleming; S. Woodson.

AS.250.595. Internship. 1.0 Credit.
Instructor(s): K. Fleming; R. Huang.

AS.250.596. Laboratory - Biophysics. 3.0 Credits.
This is for students who have yet to take their first semester of research during previous fall, spring, or summer semesters.
Instructor(s): Staff.

AS.250.597. Research. 3.0 Credits.
For students who have taken their first semester of research (either during the fall or spring semester, or 596 a previous summer).
Instructor(s): Staff.

AS.250.599. Independent Study. 3.0 Credits.
Graduate students only. Students and invited speakers present current topics in the field.
Instructor(s): J. Lecomte.

Student and invited speakers present current biophysics topics. Permission required. Graduate student only.
Instructor(s): J. Lecomte.

AS.250.621. X-ray diffraction.
Basics of X-ray diffraction methods
Instructor(s): J. Berger.

AS.250.622. Statistics and Data Analysis.
Basics of statistics and data analysis
Instructor(s): D. Barrick.

AS.250.623. Molecular Dynamics.
Basics of molecular dynamics
Instructor(s): A. Damjanovic.

AS.250.624. NMR Spectroscopy.
Basics of NMR spectroscopy
Instructor(s): A. Majumdar.

Basic Principles of Single Molecule Measurements
Instructor(s): T. Ha.

Graduate level seminar on physiology, immunology, and epidemiology of mucosal protection. Permission required.
Instructor(s): R. Cone.
Cells are actively-driven soft materials but also efficient sensors and information processors. This course will cover the physics of those cellular functions, from the mechanics of DNA to the sensing of chemical signals. Questions answered include: How does polymer physics limit how quickly chromosomes move? Why do cells use long, thin flagella to swim? What limits the accuracy of a cell's chemotaxis? Some experience with partial differential equations required. No biology knowledge beyond the high school level necessary. Some problem sets will require minimal programming.
Instructor(s): G. Bowman;
Area: Natural Sciences.

AS.250.649. Introduction to Computing in Biology.
Four week, intensive introductory course on the use of computers for applications in biology. The course will cover fundamentals of UNIX, PYTHON and Mathematica. Brief daily lectures followed by extensive hands-on experience in the computer laboratory. Examples from the world of biology are used to teach a large variety of concepts and computational techniques useful to examine a broad range of topics in biology.
Instructor(s): S. Woodson.
Area: Natural Sciences.

Departmental majors only. Once each term, advanced graduate students make a 10 minute presentation on their thesis work to the departmental faculty. The presentation is followed by a half hour discussion.
Instructor(s): B. Garcia-Moreno.

The structure of proteins, DNA and RNA, and their functions in living systems. Students are required to participate in class discussions based on readings from the primary scientific literature. Co-requisite: AS.250.649 Introduction to Computing in Biology. Instructor permission for undergraduates.
Corequisites: AS.250.649 or permission of instructor.
Instructor(s): G. Bowman; S. Woodson.

AS.250.689. Physical Chemistry of Biological Macromolecules.
Introduction to the principles of thermodynamics and kinetics as applied to the study of the relationship between structure, energy dynamics, and biological function of proteins and nucleic acids. Topics include of classical, chemical, and statistical thermodynamics, kinetics, theory of ligand binding, and conformational equilibria.
Instructor(s): B. Garcia-Moreno.

AS.250.690. Methods in Molecular Biophysics.
Introduction to methods employed in study of energetics, structure and function of biological macromolecules. Topics include optical spectroscopy, transport methods, NMR, X-ray crystallography. Theoretical understanding and knowledge through problem solving and literature discussion emphasized.
Prerequisites: AS.250.685 AND AS.250.689
Instructor(s): J. Lecomte.

AS.250.801. Dissertation Research.
Instructor(s): Staff.

Instructor(s): B. Garcia-Moreno.

Cross Listed Courses

Biology
AS.020.674. Graduate Biophysical Chemistry.
This course will provide an overview of protein and nucleic acid structure, fundamentals of thermodynamics and kinetics, ligand binding, folding and stability of macromolecules, and the principles of biophysical methods such as fluorescence spectroscopy, NMR, and X-ray crystallography. Biology PhD students only. Monday Discussion Session is optional. Recommended Course Background: AS.020.305, AS.020.306
Instructor(s): E. Freire; R. Schleif.

Physics Astronomy
Cells are actively-driven soft materials but also efficient sensors and information processors. This course will cover the physics of those cellular functions, from the mechanics of DNA to the sensing of chemical signals. Questions answered include: How does polymer physics limit how quickly chromosomes move? Why do cells use long, thin flagella to swim? What limits the accuracy of a cell's chemotaxis? Some experience with partial differential equations required. No biology knowledge beyond the high school level necessary. Some problem sets will require minimal programming.
Instructor(s): B. Camley
Area: Natural Sciences.

Biomedical Engineering
EN.580.446. Physical Epigenetics. 3.0 Credits.
Epigenetics describes information heritable during cell division other than DNA sequence per se. Recent advances show the critical role of epigenetics in controlling gene expression, embryonic development, and common human diseases such as cancer. This course will introduce fundamental epigenetic principles with a focus on mechanisms, modeling, and physical principles, relationship to genetics, and application to understanding human disease mechanisms. Recommended Course Background: EN.580.221 Molecules and Cells or equivalent (molecular and cell biology), college level calculus and calculus-based general physics.
Instructor(s): A. Feinberg; T. Ha
Area: Engineering, Natural Sciences.

Chemistry
https://chemistry.jhu.edu/
The Department of Chemistry, in conjunction with other departments of the university, offers a broad education and the opportunity to do research in chemistry and related fields. The great diversity of the field of chemistry, ranging between physics and biology, is reflected in the research interests of the faculty. Undergraduate chemistry majors usually go on to graduate study in chemistry, chemical engineering, biology, oceanography, geochemistry, biophysics, environmental sciences, or medicine, while others enter the chemical industry. The Ph.D. in chemistry leads to professional careers in colleges and universities, research institutes, industry, and government laboratories.

Facilities
The department is well-equipped with instrumentation, both shared and in individual faculty research laboratories, to perform modern chemical research. The Departmental Instrumentation Facility houses the following pieces of major instrumentation:
• Bruker Avance 400 MHz FT-NMR spectrometers (2), one located in the Instrumentation Facility in Remsen Hall and the other on the first floor of the new chemistry building.
• Bruker Avance 300 MHz FT-NMR spectrometer.
• Bruker Avance III 400 MHz FT-NMR spectrometer and Fourier 300 FT-NMR spectrometer with an automatic sample changer are located in the undergraduate teaching laboratory.
• VG70S magnetic sector mass spectrometer, with EI, and CI ionization.
• VG70SE magnetic sector mass spectrometer, with FAB ionization.
• Finnigan LCQ ion trap mass spectrometer with electrospray ionization (APCI available as an option).
• Finnigan LCQ Duo ion trap mass spectrometer with electrospray ionization (for inorganic and organometallic use).
• Finnigan LCT ion trap mass spectrometer with ESI ionization and HPLC inlet.
• Bruker Autoflex III Maldi-ToF-ToF Mass spectrometer with Maldi ionization and collision cell.
• Shimadzu QP2010SE GC-MS with EI ionization.
• Waters Acquity / Xevo G2 UPLC-Q-ToF MS with ESI and APCI ionisation.
• Bruker EMX EPR spectrometer equipped with a liquid helium cryostat and variable temperature controller.
• Thermo Nicolet Nexus 670 FT-IR spectrophotometer with a Nicolet Golden Gate ATR accessory.
• Jasco P-1010 polarimeter.
• Xcalibur 3 X-ray diffractometer with CCD area detector (located on the second floor of the new chemistry building).
• Protein Technologies Symphony Quartet Peptide Synthesizer.
• SuperNova X-ray diffractometer (dual hi-flux micro-focus Mo and Cu sources) with Atlas CCD area detector (located on the second floor of the new chemistry building).

NMR spectrometers suitable for studies of biological macromolecules are located in the Biomolecular NMR Center, located in an underground facility in front of the new chemistry building. The instruments include 500, 600, and 800 MHz FT-NMR spectrometers.

A variety of different mass spectral techniques are available in the expanding Mass Spectrometry Facility. High-resolution mass spectra of submitted samples are obtained on a service basis by a staff member using two magnetic sector instruments equipped with EI, CI, and FAB ionization methods. MALDI-TOF, GC/MS, and electrospray instruments are also available and operated by students and researchers following training by the facility staff.

The X-ray Diffractometer Facility is operated by a staff member. The instruments are suitable for detailed molecular-level structural characterization of new organic or inorganic compounds.

The department has an established in-house peptide synthesis facility. This facility is equipped with a four-channel peptide synthesizer from Protein Technologies, an Agilent HPLC equipped with both a diode array and a fluorescence detector, and a lyophilizer.

Undergraduate Program

Programs for undergraduate majors can be tailored to individual interests so that a major in chemistry is excellent preparation not only for further work in chemistry, but also for any field that rests on a chemical foundation. It is a good choice for a premedical student interested in medical research.

Requirements for the B.A. Degree

(Also see Requirements for a Bachelor's Degree. (p. 7))

Majors must complete all courses required for the major for a letter grade and receive a grade of C- or higher. Requirements of the chemistry major are:

Advanced Elective Courses
Three credits of advanced chemistry courses beyond AS.030.305-306
Nine credits of advanced chemistry courses, or science electives at the 300-level or higher approved by a Department of Chemistry advisor, and/or mathematics beyond Calculus II

Total Credits: 71

* Course must be completed before AS.030.356 and can be taken as early as Spring of the first year.
** Fall semester of AS.030.227 restricted to Chemistry majors.
*** None of the advanced course requirements may be fulfilled with research.

Lecture and laboratory courses should be taken in sequence. In particular, AS.030.228 Intermediate Organic Chemistry Laboratory must be taken before AS.030.356 Advanced Inorganic Lab.

To allow maximum flexibility in choosing electives, students should complete both physics and organic chemistry by the end of the sophomore year. AS.030.449 Chemistry of Inorganic Compounds or AS.030.204 Chemical Structure and Bonding w/Lab and AS.020.305 Biochemistry or AS.250.315 Biochemistry I are required for an American Chemical Society accredited degree.

Honors in Chemistry
To recognize exceptional performance, both in formal course work and in research, chemistry majors can receive a degree with honors. Honors in Chemistry may be achieved by one of two paths. 1: A student with a GPA of 3.75 or higher in (N) and (Q) courses or 2: A student with a 3.5 GPA in (N) and (Q) courses and with at least 2 semesters of research with a Chemistry faculty member or an approved advisor. These students must write a summary of their research and fill out the Honors Clearance form and the GPA checksheet (see: http://www.advising.jhu.edu/honors.php). Turn in these forms to the Director of Undergraduate Studies.

Graduate Programs
Each student's background and interests determine the course of study. The normal program leads to the Ph.D. degree. A student is not usually accepted for a terminal M.A. degree.

Requirements for the M.A. and Ph.D. Degrees
Normally, the minimum course requirement for both the M.A. and the Ph.D. degrees is six one-semester graduate courses in chemistry and related sciences. Exceptionally well-prepared students may ask for a reduction of these requirements.

Requirements for the Ph.D. degree include a research dissertation worthy of publication, and a knowledge of chemistry and related material as demonstrated in an oral examination. Each student must teach for at least one year.

Requirements for the M.A. degree, in addition to completion of formal course work and research, include a satisfactory performance on an oral examination.

Financial Aid and Admissions
Fellowships, research appointments, and teaching assistantships are available for graduate students. There are no fixed admission
requirements. Undergraduate majors in chemistry, biology, earth sciences, mathematics, or physics may apply, as well as well-qualified individuals who will have received a B.A. degree.

For further information about graduate study in chemistry visit the Chemistry Department website at https://chemistry.jhu.edu/.

For current faculty and contact information go to http://chemistry.jhu.edu/people/

**Faculty**

**Chair**

David R. Yarkony

D. Mead Johnson Professor: theoretical chemistry—electronic structure theory, multi-configuration self-consistent-field methods, excited state chemistry, electronic energy transfer in chemical reactions, spin-forbidden processes, and electronically nonadiabatic processes.

**Professors**

Kit H. Bowen

E. Emmet Reid Professor: experimental chemical physics—photoelectron spectroscopy of negative ions, structure and dynamics of gas phase, weakly bound molecular clusters.

Paul J. Dagdigian

Arthur D. Chambers Professor: experimental chemical physics—dynamics of gas-phase chemical reactions, collisional energy transfer, molecular electronic spectroscopy, laser-induced fluorescence and ionization.

D. Howard Fairbrother

Physical chemistry—the structure of chemically protective surfaces, chemistry of adhesives, environmental surface chemistry.

David Goldberg

Inorganic and bioinorganic chemistry—structure/function relationships in heme proteins, artificial enzyme design, biomimetic molybdenum and tungsten coordination compounds, redox active ligands, synthesis of tetrapyrrolic macrocycles (phthalo-cyanine and porphyrin-based systems) for small-molecule activation and materials applications.

Marc M. Greenberg

Vernon K. Kriebel Professor: organic and bioorganic chemistry—application of chemical, biochemical, and biological techniques to studies on DNA damage and repair, independent generation and study of reactive intermediates, development and application of methods for modified oligonucleotide synthesis, design of mechanistically inspired enzyme inhibitors radiosensitizing agents, and sensors.

Rigoberto Hernandez

Gompf Family Professor: theoretical and computational chemistry—statistical mechanics of chemical systems; molecular dynamics in complex environments; nonequilibrium dynamics of polymers, proteins, surfaces, colloids; transition state theory of driven chemical reactions; adaptive steered molecular dynamics of proteins; sustainable nanotechnology.

Kenneth D. Karlin

Ira Remsen Professor: inorganic and bioinorganic chemistry—synthetically derived structural, spectroscopic and functional models for copper and iron proteins, copper-dioxygen reversible binding and metal-mediated substrate oxidation, O2-reduction with copper cluster compounds, porphyrin-iron and copper chemistry relevant to heme-copper oxidases, metal-catalyzed ester and amide hydrolysis, metal complex protein and DNA interactions.

Thomas Lectka

Jean and Norman Scowe Professor: organic chemistry—the design and synthesis of theoretically interesting nonnatural products with applications in bioorganic and physical organic chemistry, materials science and supramolecular chemistry, novel approaches to asymmetric catalysis, theoretical organic chemistry.

Tyrel McQueen

Solid state inorganic chemistry—electronically and magnetically active materials—condensed matter physics.

Steven Rokita

Organic and bioorganic chemistry, sequence and conformation specific reactions of nucleic acids; enzyme-mediated activation of substrates and coenzymes; aromatic substitution and quinone methide generation in bioorganic chemistry, biological dehalogenation.

Harris J. Silverstone

Theoretical chemistry—development of mathematical techniques for applying quantum mechanics to chemical problems, high-order perturbation theory, semiclassical methods, divergent expansions, photoionization, LoSurdo-Stark effect, magnetic resonance spectral simulation, hyperasymptotics.

John P. Toscano

Organic chemistry—organic chemistry, fundamental chemistry and biochemistry of nitroxy (HNO) including the design of new precursors to HNO, new analytical tools for its detection, and the characterization of HNO induces protein modifications-time-resolved IR spectroscopy of organic reactive intermediates.

John D. Tovar

Organic chemistry—organic electronics, conjugated and conducting polymers, electrochemistry, nanostructured materials, polymer chemistry bioinspired self—assembly, and supramolecular chemistry.

Craig A. Townsend

Alsoph H. Corwin Professor: organic and bioorganic chemistry—biosynthesis and chemistry of natural products, stereo-chemical and mechanistic studies of enzyme action, small molecule/DNA interactions, application of spectroscopic techniques to the solution of biological problems.

**Associate Professors**

Arthur Bragg

Experimental physical chemistry—chemical dynamics and charge/energy transfer in condensed-phase systems, ultrafast spectroscopy.

Joel R. Tolman

Biophysical chemistry—protein-protein interactions, protein dynamics and structure, NMR methodology.

**Assistant Professors**

Lan Cheng

Theoretical chemistry—electronic structure theory for treating relativistic and electron-correlation effects, relativistic theory for magnetic properties, computational chemistry and spectroscopy for heavy-element compounds

Stephen D. Fried
Biochemistry and biophysics—mechanisms of protein folding and assembly in vivo, design and evolution of protein-based materials

Thomas Kempa
Materials chemistry—solid-state materials chemistry and experimental physical chemistry.

Rebekka S. Klausen
Organic and materials chemistry—the design and synthesis of well-defined organosilicon and organic materials, electronic characterization of novel materials.

V. Sara Thoi
Inorganic chemistry—coordination chemistry, materials synthesis, electron and ion transport, photochemistry, and electrocatalysis.

Research and Teaching Professors
Jaime Combariza
Research Professor.

Christopher Falzone
Teaching Professor.

Jane Greco
Associate Teaching Professor.

Louise Pasternack
Teaching Professor.

Adjunct, Emeritus, and Joint Appointments
David E. Draper
Professor Emeritus.

David Gracias
Assistant Professor (Chemical and Biomolecular Engineering).

Howard E. Katz
Professor (Materials Science and Engineering).

Brown L. Murr
Professor Emeritus.

Alex Nickon
Vernon Krieble Professor Emeritus.

Douglas Poland
Professor Emeritus.

Lawrence M. Principe
Professor (joint appointment in History of Science and Technology).

Dean W. Robinson
Professor Emeritus.

Lecturers
Larissa D’Souza
Senior Lecturer.

Eric Hill
Lecturer.

Sunita Thyagarajan
Lecturer.

For current course information and registration go to https://sis.jhu.edu/classes/

Courses

AS.030.101. Introductory Chemistry I. 3.0 Credits.
The fundamental principles of chemistry, including atomic and molecular structure, bonding, elementary thermodynamics, equilibrium and acids and bases, are introduced in this course. Can be taken with Introductory Chemistry Laboratory – I unless lab has been previously completed.
Note: Students taking this course and the laboratory 030.105 may not take any other course in the summer sessions and should devote full time to these subjects. High school physics and calculus are strongly recommended as prerequisites. First and second terms must be taken in sequence. Students not enrolled in college (unless they are rising freshmen) may not take this course.
Instructor(s): D. Goldberg; S. Thyagarajan
Area: Natural Sciences.

AS.030.102. Introductory Chemistry II. 3.0 Credits.
Continuation of AS.030.101 emphasizing chemical kinetics, chemical bonding. Topics: energy levels and wave functions for particle-in-a-box and hydrogen atom and approximate wave functions for molecules including introduction to hybrid orbitals. Note: Appropriate adjusting caps should be used to ensure both sections are approximately the same size
Prerequisites: Students enrolled in AS.030.103 may not enroll in or receive credit for AS.030.102.;AS.030.101 OR AS.030.107
Instructor(s): J. Greco
Area: Natural Sciences.

AS.030.103. Applied Chemical Equilibrium and Reactivity w/lab. 4.0 Credits.
This course is designed for students who have scored a 4 or 5 on the AP Chemistry Exam or who have scored a 6 or 7 HL IB Chemistry Exam. This course will review an advanced introductory chemistry sequence in a single semester. Chemical equilibrium, reactivity and bonding will be covered. These topics will be explored through laboratory experiments and problem solving, and discussing these principles in the context of current research. For details on chemistry placement and exam credit policies, please see http://www.advising.jhu.edu/placement_chemistry.php Students who have previously enrolled in AS.030.101 or AS.030.105 may not earn credit for AS.030.103 and students enrolled in AS.030.103 may not enroll in or receive credit for AS.030.102/AS.030.106.
Instructor(s): T. Mcqueen
Area: Natural Sciences.

AS.030.105. Introductory Chemistry Laboratory I. 1.0 Credit.
Laboratory work includes quantitative analysis and the measurement of physical properties. Open only to those who are registered for or have successfully completed Introductory Chemistry 030.101.
Prerequisites: Students enrolled in AS.030.105 may not enroll in AS.030.115, AS.030.103, or AS.030.107.;Students must have completed or be enrolled in AS.030.101 OR EN.510.101 to register for AS.030.105.
Instructor(s): E. Hill; S. Thyagarajan
Area: Natural Sciences.

AS.030.106. Introductory Chemistry Laboratory II. 1.0 Credit.
Laboratory work includes some quantitative analysis and the measurement of physical properties. Open only to those who are registered for or have completed Introductory Chemistry II (AS.030.102).
Permission required for pre-college students.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.;Students enrolled in AS.030.103 may not enroll in or receive credit for AS.030.106, AS.030.107 OR ( AS.030.101 OR EN.510.101 )
Instructor(s): J. Greco
Area: Natural Sciences.
AS.030.107. Chemical Principles w/lab: An Integrated Studio Course. 4.0 Credits.

An introduction to the fundamental principles of chemistry. The main topics to be covered are fundamental chemical reactions, stoichiometry and the balancing of chemical equations, solutions, gas laws, chemical equilibrium, acids and bases, and elementary chemical thermodynamics. Laboratory experiments and laboratory techniques will be incorporated into the course. Course will be run in three 2 hour blocks per week some of which will be used for lab. This course is equivalent to AS.030.101 and AS.030.105.

Prerequisites: This course is equivalent to AS.030.101 and AS.030.105.

Students enrolled in AS.030.107 may not enroll in AS.030.101, AS.030.105, or AS.030.115. Instructor(s): J. Greco

Area: Natural Sciences.

AS.030.110. Mini-term: Introduction to Bioorganic Chemistry. 1.0 Credit.

Meets M-F June 22nd - July 2nd. This interdisciplinary course is an introductory-level class to relate biological phenomena with basic principles of chemistry. Organic chemistry or biochemistry in college is one of the most stressful classes to some students and sometimes they are pushed by assignments and tests during the entire semester without having a chance to enjoy fun side of chemistry. This course will introduce some basic concepts of chemistry and organic chemistry and applications of those concepts into biological systems, in more enjoyable way with a smaller group of students than regular courses. The course aims biology-majors to get a molecular view and chemistry-majors to have fun to find how their chemical knowledge can be used to explain biological process. Also other students will learn about both and have an idea what interdisciplinary science is.

Instructor(s): H. Chung

Area: Engineering, Natural Sciences.

AS.030.112. Chemistry with Problem Solving I.

This course is for students who have had moderate or limited exposure to the subject. Special emphasis is placed on scientific problem-solving skills. There are two discussion sections per week, including one devoted exclusively to interactive quantitative problem solving. A typical student may have taken a year of descriptive chemistry as a high school sophomore, but has not been exposed to the problem-solving mathematical approach used in university-level science courses. Taken concurrently with AS.030.101 and AS.030.102.

Prerequisites: AS.030.101 OR AS.030.102

Instructor(s): A. Gittens; R. Harris.

AS.030.113. Chemistry with Problem Solving II.

This course is for students who have had moderate or limited exposure to the subject. Special emphasis is placed on scientific problem-solving skills. There are two discussion sections per week, including one devoted exclusively to interactive quantitative problem solving. A typical student may have taken a year of descriptive chemistry as a high school sophomore, but has not been exposed to the problem-solving mathematical approach used in university-level science courses. Taken concurrently with AS.030.101 and AS.030.102.

Instructor(s): S. Thyagarajan.

AS.030.114. Freshman Seminar: The Making of a Chemist. 3.0 Credits.

Students will be introduced to professional culture and practice in academic and industrial chemical research laboratories. Through reading and analysis of a few series of seminal papers from the 1800’s to the present leading to Nobel Prizes in Chemistry or Physics, students will learn how scientific inquiry and writing has evolved over time. Through discussion and practice, students will learn how to communicate chemistry in social media, scientific publications, scientific talks, and public lectures.

Instructor(s): R. Hernandez

Area: Natural Sciences

Writing Intensive.

AS.030.117. Chemistry in Art and Archaeology. 3.0 Credits.

From tracing trading routes to dating artifacts, explore the central science, chemistry, as it relates to the study of antiquities. Gain a general overview of non-destructive and destructive techniques for studying artifacts. Gain practical knowledge on how to implement quantitative and qualitative instrumentation in a laboratory and museum setting including. Visit a working museum laboratory to discuss the unique joys and challenges of archaeometry. Study recent advances with primary source analytical chemistry material and assess practical future implementation of new techniques. Learn to tune communication style based upon an audience within and without your main discipline.

Instructor(s): M. Gallagher

Area: Natural Sciences.

AS.030.118. The Science of Color. 3.0 Credits.

This course is designed to introduce students to the fundamental physical and chemical origins of color and how we perceive them - from the vivid palette provided by the natural world to the brightly colored clothing we wear. Beginning with the basic principles of light and color, we will embark on an interdisciplinary investigation of color, including, but not limited to: color chemistry; color in biology; the physiology of the eye; how color affects human psychology; the history of color and light; and the use of color in art. Discover the physical and chemical explanations behind several noteworthy phenomena such as sunsets, color-blindness, rainbows, fireworks, chameleons and the Aurora Borealis.

Instructor(s): J. Young

Area: Natural Sciences.

AS.030.173. Powering Tomorrow: The Chemistry Behind Alternative Energy. 3.0 Credits.

One of the most important scientific challenges society faces today is supply of green and sustainable energy. This course will highlight the contributions of chemists in current and emerging technologies of alternative energy. A general overview of solar energy, biomass conversion, nuclear power and other approaches will be presented. The underlying chemical principles of these areas, such as water oxidation, carbon dioxide reduction and generation of liquid fuels will be examined. The current sources of energy used in today’s world and their impact on the environment will also be discussed. In class sessions, students will be expected to be actively involved in the discussion of lectures and assigned readings.

Prerequisites: Corequisite: AS.030.101 or AP 4 or 5.

Instructor(s): C. Rolle

Area: Natural Sciences.
AS.030.202. How Enzymes Work. 3.0 Credits.
This course will introduce core concepts in protein-catalyzed chemistry and is intended to provide a molecular level context for students interested in learning about biochemical and bioengineering. Topics include protein structure, origins of enzyme catalysis, and types of enzyme reactions. These concepts will be expanded upon through a survey on the basic mechanisms of a selection of enzymes important to health, energy, and the environment. The emphasis will be on how enzymes perform chemical transformation, and their roles in medicinal and industrial applications.
Instructor(s): H. Kuo
Area: Natural Sciences.

AS.030.204. Chemical Structure and Bonding w/Lab. 4.0 Credits.
An introduction to the synthesis, structure, and reactivity of inorganic compounds. Modern approaches to chemical bonding, including molecular orbital, ligand field, and crystal field theories, will be applied to understanding the physical and chemical properties of inorganic materials. Other topics to be discussed include magnetic properties, electronic spectra, magnetic resonance spectra, and reaction kinetics. The integrated laboratory will cover basic synthetic, measurement, and calculation methods of inorganic chemistry.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): T. Mcqueen; V. Thoi
Area: Natural Sciences
Writing Intensive.

AS.030.205. Introductory Organic Chemistry I. 4.0 Credits.
The fundamental chemistry of the compounds of carbon. Methods of structure determination and synthesis. The mechanisms of typical organic reactions and the relations between physical and chemical properties and structures.
Prerequisites: AS.030.102 OR AS.030.103 OR EN.510.101 OR AS.030.204
Instructor(s): C. Falzone; C. Townsend; M. Greenberg
Area: Natural Sciences.

AS.030.206. Organic Chemistry II. 4.0 Credits.
Continuation of AS.030.205 Organic Chemistry I with special emphasis on organic synthesis and related synthetic methods. Students may not simultaneously enroll for AS.030.212 and AS.030.206.
Prerequisites: Pre-req: AS.030.205
Corequisites: Students may not simultaneously enroll for AS.030.212 and AS.030.206.
Instructor(s): E. Hill
Area: Natural Sciences.

AS.030.207. Problem Solving Methodology in Organic Chemistry I. 2.0 Credits.
This course will focus on the skills and strategies often utilized for solving problems in organic chemistry. In a seminar-style format, we will focus on a variety of strategies and techniques that students are otherwise expected to discover independently. This optional course is designed to help students succeed in Organic Chemistry I. The course is graded on a pass/fail basis, and is designed to be fun (believe it or not). Students work together in groups to solve challenging problems, focusing on the strategies necessary to solve each problem. This course is not required in order to succeed in Organic Chemistry I, but students in the past have found it to be helpful in guiding their study efforts for Organic Chemistry I.
Corequisites: Co-req: AS.030.205
Instructor(s): C. Falzone
Area: Natural Sciences.

AS.030.208. Problem Solving Methodology in Organic Chemistry II. 2.0 Credits.
This course will focus on the skills and strategies often utilized for solving problems in organic chemistry. In a seminar-style format, we will focus on a variety of strategies and techniques that students are otherwise expected to discover independently. This optional course is designed to help students succeed in Organic Chemistry II. The course is graded on a pass/fail basis, and is designed to be fun (believe it or not). Students work together in groups to solve challenging problems, focusing on the strategies necessary to solve each problem. This course is not required in order to succeed in Organic Chemistry II, but students in the past have found it to be helpful in guiding their study efforts for Organic Chemistry II.
Corequisites: Co-req: AS.030.206
Instructor(s): E. Hill
Area: Natural Sciences.

AS.030.212. Honors Organic Chemistry II with Applications in Biological and Materials Chemistry. 4.0 Credits.
Second semester undergraduate organic chemistry from an advanced prospective with connections to modern biological and materials chemistry. The standard topics of second semester organic chemistry (e.g. reactivity of aromatic and carbonyl containing molecules) will be covered with an emphasis on reaction mechanism to facilitate learning about reactivity and enriched with modern examples. In addition, the important role that organic chemistry plays in modern biological (e.g. nucleic acids and proteins) and materials science (e.g. living polymerization and the use of organic chemistry to control macroscopic properties) will be covered. Students may not simultaneously enroll for AS.030.212 and AS.030.206. Prereq: Must receive a B or better in the first semester (AS.030.205).
Prerequisites: Must receive a B or better in the first semester (AS.030.205)
Instructor(s): M. Greenberg
Area: Natural Sciences.
AS.030.213. Metalloproteins and Their Role in Human Disease. 3.0 Credits.
Many metal ions are essential elements for human life and health. Non-reducible metals serve as charge carriers and are important in osmotic balance as well as proper protein folding and structure. Redox active transition metals, such as iron and copper are important in electron transfer, oxygen transportation, respiration, and neurotransmitter homeostasis. This course is designed to introduce students to the important biological roles of metal-protein interactions and possible diseases that may occur from their malfunction.
Prerequisites: Introductory Chemistry I/II - AS.030.101 AND AS.030.102

Instructor(s): J. Greco; L. D'Souza
Area: Natural Sciences.

AS.030.225. Introductory Organic Chemistry Laboratory. 3.0 Credits.
Laboratory work includes fundamental laboratory techniques and preparation of representative organic compounds. Open only to those who are registered for or have completed Introductory Organic Chemistry. Note: This one-semester course is offered each term. Introductory Organic Chemistry I/II requires one semester of the laboratory.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class., AS.030.205; ( ( EN.510.101 OR ( AS.030.101 AND AS.030.102 ) OR AS.030.107 ) AND ( AS.030.105 AND AS.030.106 ) ) OR AS.030.103 permission of instructor for freshmen.
Corequisites: Students may not simultaneously enroll for AS.030.225 and AS.030.227

Instructor(s): D. Quist.
Area: Natural Sciences.

AS.030.227. Chemical Chirality: An Introduction in Organic Chem. Lab, Techniques. 3.0 Credits.
This is a project lab designed for Chemistry Majors who are concurrently enrolled in AS.030.205. Techniques for the organic chemistry laboratory including methods of purification, isolation, synthesis, and analysis will be explored through a project focused on chemical chirality. Students may not simultaneously enroll for AS.030.225 and AS.030.227.
Prerequisites: AS.030.206 OR AS.030.212; AS.030.205
Corequisites: Students may not simultaneously enroll for AS.030.225 and AS.030.227.

Instructor(s): E. Hill
Area: Natural Sciences.

AS.030.228. Intermediate Organic Chemistry Laboratory. 3.0 Credits.
Lab skills already acquired in AS.030.225 will be further developed for synthesis, isolation, purification, and identification of organic compounds. Spectroscopic techniques, applications will be emphasized. Recommended Course Background: AS.030.225
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.

Instructor(s): E. Hill
Area: Natural Sciences.

AS.030.270. Metals & Their Impact on Industry, Drug Development & Society. 3.0 Credits.
This is a seminar-based course that is broken up into three modules. The beginning of the course will focus on a basic introduction to the periodic table, in particular the transition metals. After a basic knowledge is formed the first theme will focus on the use of metals in the medical field, for example as MRI imaging agents or heavy metal poisoning. The second portion of the course will move away from the body and focus on how metals have impacted society. For example, we will look at the influence of metals in cars, the production of plastics and household chemicals. The final section will focus on how metals have influenced world power such as the invention of the atomic bomb. This course is designed to provide an overall understand of how chemistry and metals influence our lives every day.
Instructor(s): E. Joslin
Area: Natural Sciences.

AS.030.301. Physical Chemistry I. 3.0 Credits.
The laws of thermodynamics, their statistical foundation, and their application to chemical phenomena. Students should have knowledge of general physics, general chemistry, and calculus (two semesters recommended). Freshmen by permission only.
Instructor(s): R. Hernandez
Area: Natural Sciences.

AS.030.302. Physical Chemistry II. 3.0 Credits.
Introduction to quantum mechanics, its application to simple problems for which classical mechanics fails. Topics: Harmonic oscillator, hydrogen atom, very approximate treatments of atoms and molecules, and theoretical basis for spectroscopy. Recommended Course Background: AS.030.301
Instructor(s): K. Bowen
Area: Natural Sciences.

AS.030.303. Magic Bullets: How Drugs Really Work. 1.0 Credit.
This course will be an overview of the basic science behind frequently administered drugs. Medicines such as antibiotics, antivirals, cancer drugs, painkillers, and cardiovascular drugs will be covered. The course will focus on how these molecules cause a desirable effect in the body. Those with minimal background in chemistry/biology are encouraged to enroll.
Instructor(s): D. Marous
Area: Natural Sciences.

AS.030.305. Physical Chemistry Instrumentation Laboratory I. 3.0 Credits.
This course is designed to illustrate the principles of physical chemistry and to introduce the student to techniques and instruments used in modern chemical research. Chemistry majors are expected to take this sequence of courses, rather than AS.030.307. Chemistry majors only.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): A. Bragg; D. Fairbrother
Area: Natural Sciences.
AS.030.306. Physical Chemistry Instrumentation Laboratory II. 3.0 Credits.
Designed to illustrate the principles of physical chemistry, introduce the student to spectroscopic techniques and instruments used in modern chemical research. Chemistry majors are expected to take this course rather than 030.307.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.; AS.030.301 OR AS.030.302; Prerequisite: AS.030.305
Instructor(s): T. Kempa
Area: Natural Sciences.

AS.030.307. Experiments in Physical Chemistry for Engineers. 3.0 Credits.
This is a one-semester course which selects experiments that are most relevant to chemical engineering. Chemical Engineering majors only. Recommended Course Background: AS.030.301-AS.030.302 or equivalent.
Prerequisites: Students must have completed Lab Safety training prior to registering for this class.
Instructor(s): D. Fairbrother
Area: Natural Sciences.

AS.030.315. Biochemistry I. 4.0 Credits.
Foundation for advanced classes in Biophysics and other quantitative biological disciplines. Lecture and computer laboratory. This class is the first semester of a two semester course in biochemistry. Topics in Biochemistry I include chemical and physical properties of biomolecules and energetic principles of catabolic pathways. Computer labs include extensive use of molecular graphics and modelling of reaction kinetics and pathway flux. Co-listed with AS.250.315
Prerequisites: AS.030.206 OR AS.030.212
Instructor(s): P. Fleming
Area: Natural Sciences.

AS.030.316. Biochemistry II. 3.0 Credits.
Biochemical anabolism, nucleic acid structure, molecular basis of transcription, translation and regulation, signal transduction with an emphasis on physical concepts and chemical mechanisms. Format will include lectures and class discussion of readings from the literature.
Prerequisites: AS.030.315 OR AS.250.315 OR AS.020.305
Instructor(s): S. Rokita; S. Woodson
Area: Natural Sciences.

Students gain a critical understanding of societal energy sources in scientific, economic, and political contexts. Past, present, and future energy sources are discussed in terms of their scope and limitations. Emphasis on the fundamental details of each energy technology and incisive evaluation of policy regarding energy consumption and its environmental consequences. Topics include global warming and climate change, fossil fuels, alternative energies, and energy security and productivity.
Instructor(s): E. Brigham
Area: Natural Sciences.

AS.030.345. Chemical Applications of Group Theory. 3.0 Credits.
The theory of the representations of finite and continuous groups will be applied to problems in chemistry.
Instructor(s): D. Yarkony
Area: Natural Sciences.
AS.030.402. Experimental Methods in Physical Chemistry. 3.0 Credits.
This course introduces the student to experimental methodologies used in gas phase physical chemistry. Topics to be covered include vacuum technology, charged particle optics, lasers, mass spectrometry, data acquisition, detectors, measurement of temperature and pressure, and design and fabrication of scientific apparatus. These topics will be tied together with examples of specific experimental studies.
Instructor(s): K. Bowen
Area: Natural Sciences.

AS.030.403. Optoelectronic Materials and Devices: Synthesis, Spectroscopy, and Applications. 3.0 Credits.
This course provides an introduction to the vast chemistry and physics of solid-state materials. The course begins with a fundamental description of bonding in crystalline solids and calculation of electronic band structure. We then extend our discussion to methods for the synthesis of low-dimensional materials and hierarchical structures, including quantum dots (0D), nanowires (1D), graphene and graphene analogs (2D), and thin-film superlattices. An in-depth discussion of spectroscopic and characterization techniques for solid-state materials will follow and focus on some of the foundational studies of quantum devices and cooperative phenomena. At this stage we will describe recent advances in electron-microscopy (e.g. aberration-corrected and energy filtered TEM, atom-probe tomography) that are revolutionizing the structural, compositional, and electronic characterization of materials. The course will conclude with a survey of contemporary topics in solid-state and nanomaterials science, including functional devices and circuits, assembly, energy conversion and catalysis, and biological sensing. Recommended Course Background: AS.030.301 and AS.030.402 are preferred, but instructor approval may be granted in lieu of these courses.
Instructor(s): T. Kempa
Area: Natural Sciences.

AS.030.404. Electrochemical Systems for Energy Conversion and Storage. 3.0 Credits.
This course will be focused on the fundamentals and applications of electrochemical methods in catalysis, charge transport, and energy conversion and storage. Topics that will be covered are basic electrochemical techniques, homogenous and heterogeneous (photo)electrocatalysis, fuel cells, and charge storage devices. The class will conclude with a group report and presentation on a recent development in the field of energy catalysis, conversion, and storage. Course topics include: 1) Fundamentals of electrochemistry, 2) Potential sweep methods and current-controlled techniques, 3) Impedance analysis, 4) Electrochemistry coupled with other characterization methods, 5) Electrocatalysis and photoelectrochemical catalysis, 6) Basics in fuel cells and current technologies (alkaline, polymer exchange membrane, solid oxide...), 7) Basics in batteries and current technologies (Pb acid, Li-based, other metals...) Recommended Course Background: AS.030.204 or AS.030.449 or AS.030.472, or instructor approval for undergraduate students. No pre-requisites for graduate students
Instructor(s): V. Thoi
Area: Natural Sciences.

AS.030.405. Introduction to Computational Chemistry. 3.0 Credits.
This course provides an introduction to the state-of-the-art computational chemistry. The course integrates the basics about molecular electronic structure theories and the corresponding computational aspects and practice in chemical applications. The discussions of theories cover the modern quantum-chemical methods, ranging from mean-field methods (Hartree-Fock method and density-functional theory) to post mean-field methods for treating electron-correlation effects (configuration interaction and coupled cluster). Demonstrative calculations and computer lab practice are designed to deal with the computation of energetic properties (e.g., heat of formation, bond dissociation energy, reaction activation energy, etc) and structural properties (geometry, vibrational frequencies, etc) of representative molecular systems using standard quantum chemistry program package (the Gaussian program, most probably). The class will conclude with a report and presentation on a piece of recent computational work pertinent to the student's research interests.
Instructor(s): L. Cheng.

AS.030.407. Modeling Matter at Nanoscales: An Introduction to Theoretical and Computational Approaches. 3.0 Credits.
The course allows students to become familiar with the essentials of concepts for modeling the structure of matter at nanoscales and the depending properties, as well as the way that they relate with measurements at human scales. Concepts on modeling, computer representation of nanosystems, origin of interactions between bodies at nanoscales and the different ways of finding the corresponding potential energy surfaces, including both classical and quantum mechanical procedures and described and even detailed when relevant. Applications can be on life materials, or other nanoscopic environments. It is designed for advanced undergraduate and graduate students in Chemistry, Physics, Biology, Pharmacy and Biochemistry, as well as physicians and engineers. Attendants must handle an essential ground in Mathematics, General Physics, Chemistry and related matters.
Instructor(s): L. Montero-Cabrera.

AS.030.420. Transforming Pharmaceutical and Materials Industries: Metal-Catalyzed Cross Coupling Reactions. 3.0 Credits.
Pharmaceutical and Material Industries have immensely benefited since the advent of metal-catalyzed cross-coupling bond forming methods. Most undergraduate organic chemistry courses do not emphasize the potential of these reactions. This course will discuss the synthesis of a variety of commercially available drugs and materials currently synthesized via transition metal-catalyzed cross-coupling methods.
Prerequisites: AS.030.205 AND AS.030.206
Instructor(s): S. Surampudi
Area: Natural Sciences.

AS.030.441. Spectroscopic Methods of Organic Structure Determination. 3.0 Credits.
The course provides fundamental theoretical background for and emphasizes practical application of ultraviolet/visible and infrared spectroscopy, proton and carbon-13 nuclear magnetic resonance and mass spectrometry to the structure proof of organic compounds.
Instructor(s): J. Tovar
Area: Natural Sciences.

AS.030.442. Organometallic Chemistry. 3.0 Credits.
An introduction to organometallic chemistry beginning with structure, bonding, and reactivity and continuing into applications to fine chemical synthesis and catalysis. Recommended Course Background: AS.030.449 or equivalent. Level: Upper level Undergraduate AND Graduate Students
Instructor(s): S. Thyagarajan
Area: Natural Sciences.
**AS.030.446. Mathematica as a Tool for Chemists. 3.0 Credits.**
A systematic, hands-on introduction to Mathematica. Covers Mathematica's basic "language," analytic and numerical calculations, data manipulation, graphical representation, interactivity, programming, and document production. Prerequisite: Calculus (including power series)
Instructor(s): H. Silverstone
Area: Natural Sciences.

**AS.030.449. Chemistry of Inorganic Compounds. 3.0 Credits.**
Physical and chemical properties of inorganic, coordination and organometallic compounds are discussed in terms of molecular orbital, ligand field and crystal field theories. Emphasis on structure and reactivity of these inorganic compounds. Other topics: magnetic properties, electronic spectra, magnetic resonance spectra, reaction kinetics.
Instructor(s): K. Karlin
Area: Natural Sciences.

**AS.030.451. Spectroscopy. 3.0 Credits.**
Spectroscopy and structure of molecules starting from rotational, vibrational and electronic spectra of diatomic molecules and extending to polyatomic molecules as time permits. Recommended Course Background: AS.030.302 or permission of instructor.
Instructor(s): L. Cheng; P. Dagdigian
Area: Natural Sciences.

**AS.030.452. Materials & Surface. 3.0 Credits.**
The chemistry associated with surfaces and interfaces as well as a molecular level understanding of their essential roles in many technological fields. The first half of this course addresses various analytical techniques used to study surfaces including X-ray, photoelectron spectroscopy, and scanning tunneling microscopy. The second half of this course uses a number of case studies to illustrate the application of surface analytical techniques in contemporary research.
Instructor(s): D. Fairbrother
Area: Natural Sciences.

**AS.030.453. Intermediate Quantum Chemistry. 3.0 Credits.**
The principles of quantum mechanics are developed and applied to chemical problems. 
Prerequisites: ( AS.030.301 OR AS.030.370 OR AS.250.372 ) AND AS.030.302
Instructor(s): L. Cheng
Area: Natural Sciences.

**AS.030.472. Advanced Inorganic & Organometallic Reactions Mechanisms. 3.0 Credits.**
The beginning of the course will focus on the basics of organometallic chemistry such as molecular orbital theory, agostic bonding, electronic structure and coordination geometries. These topics would then be followed with common reactions in organometallic chemistry such as ligand substitution, oxidation addition, and reductive elimination. The final set of topics will cover the basic "tools of the trade" which will encompass kinetics, dynamic NMR spectroscopy, kinetic isotope effects and mechanistic studies.
Prerequisites: Prerequisite: AS.030.206 OR AS.030.212
Instructor(s): E. Joslin
Area: Natural Sciences.

**AS.030.501. Independent Research in Physical Chemistry I. 3.0 Credits.**
Research under the direction of members of the physical chemistry faculty.
Instructor(s): D. Fairbrother; D. Yarkony; L. Cheng; R. Hernandez.

**AS.030.502. Independent Research in Physical Chemistry. 0.0 - 3.0 Credits.**
Research under the direction of members of the physical chemistry faculty.
Instructor(s): D. Fairbrother; K. Bowen; L. Cheng; R. Hernandez.

**AS.030.503. Independent Research in Inorganic Chemistry I. 3.0 Credits.**
Research under the direction of members of the inorganic chemistry faculty.
Instructor(s): D. Goldberg; J. Roth; K. Karlin; T. Lectka.

**AS.030.504. Independent Research in Inorganic Chemistry. 0.0 - 3.0 Credits.**
Research under the direction of members of the inorganic chemistry faculty.
Instructor(s): D. Goldberg; G. Meyer; J. Roth; K. Karlin; V. Thoi.

**AS.030.505. Independent Research in Organic Chemistry I. 3.0 Credits.**
Research under the direction of members of the organic chemistry faculty.
Instructor(s): Staff.

**AS.030.506. Independent Research in Organic Chemistry I. 0.0 - 3.0 Credits.**
Research under the direction of members of the organic chemistry faculty.
Instructor(s): Staff.

**AS.030.507. Independent Research in Biochemistry. 3.0 Credits.**
Research under the direction of members of the biochemistry faculty.
Instructor(s): Staff.

**AS.030.509. Independent Research in Biochemistry II. 3.0 Credits.**
Research under the direction of members of the biochemistry faculty. Recommended Course Background: AS.030.507-AS.030.508 and permission of instructor.
Instructor(s): C. Townsend; J. Tolman.

**AS.030.510. Independent Research in Biochemistry II. 0.0 - 3.0 Credits.**
Research under the direction of members of the biochemistry faculty. Recommended Course Background: AS.030.507-AS.030.508 and permission of instructor.
Instructor(s): C. Falzone; C. Townsend; J. Tolman.

**AS.030.511. Independent Research in Materials Chemistry. 0.0 - 3.0 Credits.**
Instructor(s): T. Mcqueen.

**AS.030.512. Independent Research in Materials Chemistry. 0.0 - 3.0 Credits.**
Research under the direction of the materials chemistry faculty. 
Instructor(s): T. Mcqueen.

**AS.030.521. Independent Research in Inorganic Chemistry II. 3.0 Credits.**
Research under the direction of the inorganic chemistry faculty. Recommended Course Background: AS.030.503-AS.030.504 and permission of instructor.
Instructor(s): C. Falzone; D. Goldberg; J. Roth; K. Karlin.

**AS.030.522. Independent Research in Inorganic Chemistry II. 0.0 - 3.0 Credits.**
Research under the direction of the inorganic chemistry faculty. Recommended Course Background: AS.030.503-AS.030.504 and permission of instructor.
Instructor(s): D. Goldberg; G. Meyer; J. Roth.
AS.030.523. Independent Research in Physical Chemistry II. 3.0 Credits.
Research under the direction of the physical chemistry faculty.
Recommended Course Background: AS.030.501-AS.030.502 and permission of instructor.
Instructor(s): D. Fairbrother; K. Bowen; L. Cheng; R. Hernandez.

AS.030.524. Independent Research in Physical Chemistry II. 0.0 - 3.0 Credits.
Research under the direction of the physical chemistry faculty.
Recommended Course Background: AS.030.501-AS.030.502 and permission of instructor.
Instructor(s): D. Fairbrother.

AS.030.525. Independent Research in Organic Chemistry II. 3.0 Credits.
Research under the direction of the organic chemistry faculty.
Recommended Course Background: AS.030.505-AS.030.506 and permission of instructor.
Instructor(s): J. Toscano; M. Greenberg; T. Lectka.

AS.030.526. Independent Research in Organic Chemistry II. 0.0 - 3.0 Credits.
Instructor(s): J. Toscano; M. Greenberg; T. Lectka.

AS.030.527. Independent Study. 3.0 Credits.
Instructor(s): D. Fairbrother.

AS.030.528. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): D. Goldberg.

AS.030.530. Independent Research in Inorganic and Materials Chemistry. 1.0 - 3.0 Credits.
Research under the direction of members of the Inorganic Chemistry faculty.
Instructor(s): V. Thoi.

Research under the direction of members of the Physical Chemistry faculty.
Instructor(s): T. Kempa.

AS.030.551. Internship - Chemistry. 1.0 Credit.
Instructor(s): Staff.

AS.030.552. Internship - Chemistry. 1.0 Credit.
Instructor(s): Staff.

AS.030.592. Research - Inorganic Chemistry I. 3.0 Credits.
Instructor(s): G. Meyer; M. Greenberg.

AS.030.593. Research - Organic Chemistry I. 3.0 Credits.
Instructor(s): M. Greenberg; T. Lectka.

AS.030.597. Research - Summer. 3.0 Credits.
Instructor(s): Staff.

An introduction to statistical mechanics of cooperative phenomena using lattice gases and polymers as the main models. Covered topics: phase transitions and critical phenomena, scaling laws, and the use of statistical mechanics to describe time dependent phenomena.
Instructor(s): R. Hernandez.

AS.030.610. Chemical Kinetics.
The molecular mechanism of elementary physical and chemical rate processes will be studied. Topics such as elastic scattering, collisional vibrational and rotational energy transfer, chemically reactive collisions, and the theory of unimolecular decay will be covered.
Instructor(s): K. Bowen.

AS.030.613. Chemistry-Biology Interface Program Forum I.
Chemistry-Biology Interface (CBI) program students and faculty will meet weekly in a forum that will host presentations from CBI faculty and students as well as invited guest speakers. These meetings will serve as a valuable opportunity for students to develop presentation skills and interact with CBI students and faculty. Enrollment is required for first- and second-year CBI students, and is recommended for advanced year graduate students.
Instructor(s): S. Rokita.

AS.030.614. Chemical-Biology Program Interface Forum II.
Chemistry-Biology Interface (CBI) program students and faculty will meet weekly in a forum that will host presentations from CBI faculty and students as well as invited guest speakers. These meetings will serve as a valuable opportunity for students to develop presentation skills and interact with CBI students and faculty. Enrollment is required for first- and second-year CBI students, and is recommended for advanced year graduate students.
Instructor(s): S. Rokita.

AS.030.615. Bioinorganic Chemistry.
Instructor(s): D. Goldberg.

AS.030.619. Chemical Biology I.
Parts I and II constitute the core course of the Chemistry-Biology Interface (CBI) Program. An introduction to the structure, synthesis, reactivity, and function of biological macromolecules (proteins, nucleic acids, carbohydrates, and lipids) will be provided using the principles of organic and inorganic chemistry. Discussion will incorporate a broad survey of molecular recognition and mechanistic considerations, and introduce the tools of molecular and cellular biology that are utilized in research at the interface of chemistry with biology and medicine. Recommended Course Background: AS.030.206 or equivalent.
Instructor(s): S. Rokita.

AS.030.620. Chemical Biology II.
Selected topics of current importance in chemical biology are covered. They include protein engineering and proteomics, cell signaling, protein-nucleic acid interactions (e.g. replication, transcription, DNA repair), catalytic RNA and the ribosome, biosynthesis of natural products, mechanisms of drug action, combinatorial chemistry and chemical genetics, and in vitro selection. Recommended Course Background: AS.030.619 or permission required.
Instructor(s): S. Rokita.

AS.030.621. Literature - Organic Chemistry.
Instructor(s): L. Cheng.

AS.030.622. Seminar: Literature of Chemistry.
Seminars are presented by advanced graduate students on topics from current chemical journals. Most first-year graduate students are expected to attend for credit. Undergraduates may take the course on a satisfactory/unsatisfactory basis.
Instructor(s): L. Cheng.
Principles and methods for the design and optimization of new biological systems, from a molecular perspective. Topics include: introduction to genetic parts and modern methods for their assembly; synthesis and incorporation of nucleic acids at the level of nucleotides, genes, and genomes; design of genetic programs; library generation and screening; directed evolution and its application to create new proteins and metabolic pathways; computational design of protein and RNA?using physical and bioinformatic approaches; non-canonical amino acids and genetic code expansion. This course will also feature critical evaluation of the primary literature in this fast-paced field, and practical experience with relevant software and computational tools.
Instructor(s): S. Fried.

AS.030.625. Advanced Mechanistic Organic Chemistry I.
The course covers the application of techniques in physical chemistry to the study of organic reaction mechanisms. Topics include chemical bonding and structure, stereochemistry, conformational effects, molecular orbital theory, methods to determine reaction mechanisms, reactive intermediates, and photochemistry. Recommended Course Background: AS.030.205-AS.030.206
Instructor(s): J. Tovar.

AS.030.626. Advanced Mechanistic Organic Chemistry II.
This course covers advanced organic reactions and their mechanisms. Emphasis is given both to methods of postulating mechanisms for rationalizing reaction results and to the use of mechanistic thinking for designing reactions and reagents. This course is intended to be taken in sequence with AS.030.425. Recommended Course Background: AS.030.205-AS.030.206
Instructor(s): R. Klausen.

AS.030.630. Molecular Photophysics and Photochemistry.
This course will introduce fundamental physical, chemical, and analytical concepts underlying light-induced chemical and (molecular-based) material processes. The final weeks of this course will build from these core concepts to survey molecular photoresponses and their consequences or applications in environmental chemistry, chemical biology, and materials science.
Instructor(s): A. Bragg
Area: Natural Sciences.

AS.030.634. Topics in Bioorganic Chemistry.
Selected topics in modern bioorganic chemistry will be treated in greater depth emphasizing natural products chemistry, biosynthetic reaction mechanisms and drug design. Carbohydrates, lipids, polyketides, polypeptides, terpenes and alkaloids will be discussed. Specific examples of drug design will be introduced throughout and methods of synthesis, combinatorial synthesis and genetics will be described.
Instructor(s): C. Townsend.

AS.030.635. Mthds Nuc Mag/Resonance.
Instructor(s): J. Tolman.

AS.030.652. A Theoretical and Experimental Approach to X-ray Crystallography.
The X-ray course will provide a complete approach to X-ray structure determination (mostly concerned with small molecules) and its uses in Chemistry. The first segment of this course will cover all theoretical aspects of X-ray crystallography, i.e. crystals and crystallization, the nature of X-rays, the diffraction phenomenon of X-rays by crystals, symmetry and space groups, crystal structure analysis. Additionally, the course will provide laboratory experience for the students, involving hands-on instrumentation, experimental methodology to X-ray structure determination, structure solution/refinement, data analyses and publishing data. The course is aimed for graduate students with a strong interest in organic/inorganic chemistry, materials sciences, and physics. Undergraduate students with a major in chemistry are also encouraged to participate.
Instructor(s): M. Siegler
Area: Natural Sciences.

AS.030.677. Advanced Organic Synthesis I.
The reactions and principles involved in the synthesis of simple and complex organic compounds. Discussion of famous natural product syntheses and practice in developing rational designs for organic syntheses. Problems in the design of syntheses and in the use of chemical literature.
Instructor(s): T. Lectka.

AS.030.678. Advanced Organic Synthesis II.
Advanced discussion of organic stereochemistry & its application to problems in asymmetric reactions and catalysis will be presented. Emphasis will be placed on the latest reports in the literature, especially with respect to the development of new catalytic, asymmetric processes.
Instructor(s): T. Lectka.

The course is designed to provide the essential principles and concepts underlying the modern study of the structure and properties of solids in bulk crystals, thin films, and nanoscale objects. Topics include basic crystallography, structure determination by x-ray, neutron, and electron diffraction, fundamental concepts of bonding in solids, lattice dynamics, electronic band structure, magnetism, and strongly correlated electron behavior. Particular emphasis is placed on the impact of the structure, dimensionality, and electron count on electrical and magnetic properties (electric conduction, superconductivity, thermoelectricity, etc). More course info available at <a href="http://occamy.chemistry.jhu.edu">http://occamy.chemistry.jhu.edu</a>. Cross-listed with Physics and Astronomy
Instructor(s): T. Mcqueen.

In this course we will survey common time-resolved spectroscopic methods used to interrogate the dynamic and static properties of chemical systems. We will explore theoretical treatments both of key molecular processes (e.g. radiative and non-radiative transitions, solvation, coherence dephasing) and the spectroscopic tools used to interrogate them. Furthermore, we will survey the technical developments that are now allowing us to capture events that occur on ever faster timescales (currently down to the attosecond regime) and across the electromagnetic spectrum (from X-rays to Terahertz). Previous or concurrent concentrated study of Quantum Mechanics (graduate level or from a physics course) would be helpful, but not strictly required. Recommended Course Background: AS.030.301-AS.030.302
Instructor(s): A. Bragg.

AS.030.801. Independent Study.
Instructor(s): Staff.
Cross Listed Courses

Biophysics
AS.250.310. Exploring Protein Biophysics using Nuclear Magnetic Resonance (NMR) Spectroscopy. 3.0 Credits.
NMR is a spectroscopic technique which provides unique, atomic level insights into the inner workings of biomolecules in aqueous solution. A wide variety of biophysical properties can be studied by NMR. For example, we can use the technique to determine three dimensional structure of biological macromolecules such as proteins and nucleic acids, probe their dynamical properties in solution, study their interaction with other molecules and understand how physico-chemical properties (such as electrostatics and redox chemistry) affects and modulates structure-function relationships. NMR exploits the exquisite sensitivity of magnetic properties of atomic nuclei to their local electronic (and therefore, chemical) environment. As a result, biophysical properties can be studied at atomic resolution. That is to say, we can deconstruct global properties of a molecule in terms of detailed, atomic level information. In addition, interactions between nuclei can be exploited to enhance the information content of NMR spectra via multi-dimensional (2D and 3D) spectroscopy. Since these properties can be studied in solution, NMR methods serve as an effective complement to X-Ray crystallography, which also provides detailed, atomic level information in the solid state. In this course, we will learn about the basics of NMR spectroscopy, acquire 1D and 2D NMR spectra and use various NMR experiments to characterize and probe biophysical properties of proteins at an atomic level. Juniors and Seniors Only.
Prerequisites: ((AS.030.101 AND AS.030.105) OR (AS.030.103 OR AS.030.204)) AND (AS.030.370 OR AS.250.372) AND (AS.020.305 OR AS.030.315 OR AS.250.315) AND AS.030.205 or permission of the instructor.
Instructor(s): A. Majumdar.

AS.250.315. Biochemistry I. 4.0 Credits.
Foundation for advanced classes in Biophysics and other quantitative biological disciplines. Lecture and computer laboratory. This class is the first semester of a two semester course in biochemistry. Topics in Biochemistry I include chemical and physical properties of biomolecules and energetic principles of catabolic pathways. Computer labs include extensive use of molecular graphics and modelling of reaction kinetics and pathway flux. Co-listed with AS.030.315
Prerequisites: If you have completed AS.250.307 you may not register for AS.250.315.
Prerequisites: AS.030.206 OR AS.030.212
Instructor(s): P. Fleming
Area: Natural Sciences.

AS.250.372. Biophysical Chemistry. 4.0 Credits.
Course covers classical and statistical thermodynamics, spanning from simple to complex systems. Major topics include the first and second law, gases, liquids, chemical mixtures and reactions, conformational transitions in peptides and proteins, ligand binding, and allostery. Methods for thermodynamic analysis will be discussed, including calorimetry and spectroscopy. Students will develop and apply different thermodynamic potentials, learn about different types of ensembles and partition functions. Students will learn to use Mathematica and will use it for data fitting and for statistical and mathematical analysis. Background: Calculus, Organic Chemistry, and Introductory Physics.
Instructor(s): D. Barrick
Area: Natural Sciences.

Classics

Open to AS Chemistry Graduate Students only.
Instructor(s): G. Meyer.

Classics

http://classics.jhu.edu

Classics has long been at the heart of humanistic studies at Johns Hopkins University: the very first person appointed to the faculty of the newly founded University in 1876 was Basil L. Gildersleeve (http://archive.magazine.jhu.edu/2009/08/to-understand-ourselves), a professor of Greek. Gildersleeve adopted the most effective model of scholarship at the time—the German seminar, which combined teaching with research—as the basis for training students at Hopkins. This revolutionary structure was central to the new model of the “research university” that Johns Hopkins University pioneered.

Today, the Department of Classics at Johns Hopkins seeks to maintain and enhance this tradition of leadership and innovation. Members of the current faculty are highly interdisciplinary. We combine philological, historical, iconographical, and comparative methods in our investigations of the cultures, broadly conceived, of ancient Greece and Rome, with additional expertise in Reception Studies (aka “The Classical Tradition”) and in the post-classical use of Greek and Latin.

The graduate program reflects these characteristics. It is founded upon intensive study of ancient Greek and Latin language and literature, but also requires rigorous work in such fields as ancient history, art, archaeology, and philosophy, while allowing considerable flexibility to accommodate individual interests. The program aims to produce broad, versatile scholars who have a holistic view of the ancient cultures and of the evidence by which those cultures are comprehended.

The classics department enjoys close ties with several local and regional institutions whose missions include the study of the ancient world, including the Walters Art Museum, with its world-class collection of antiquities and manuscripts; the Baltimore Museum of Art, with its Roman mosaics; and the Center for Hellenic Studies in Washington, D.C. Internationally, it is a member of the American School of Classical Studies in Athens, the American Academy in Rome, and the Intercollegiate Center for Classical Studies in Rome.

The department’s main scholarly resource is the Milton S. Eisenhower Library, which has broad and deep holdings in the various fields of classical antiquity. The department also has a significant collection of Greek, Roman, and Etruscan antiquities, housed in the Johns Hopkins Archaeological Collection (shared with the Department of Near Eastern Studies), and a small reference library in its Gilman Hall seminar room.

Undergraduate Programs

The department offers undergraduate courses in Greek and Latin languages and literature, ancient history, classical art and archaeology, Greek and Roman civilizations, history of sexuality and gender, ancient philosophy, mythology, and anthropological approaches to the classics. These courses are open to all students in the university, regardless of their academic year or major field of interest.

Requirements for the B.A. Degree

(See also Requirements for a Bachelor’s Degree (p. 7).)

The B.A. program in classics is highly flexible, accommodating a variety of interests in and approaches to the ancient world. Possible areas of emphasis include language and literature, ancient philosophy, art and archaeology, and ancient history.
Classics Major

Certain courses taken in other departments may count toward the major, with the approval of the director of undergraduate studies (DUS). Advanced undergraduates may participate in graduate seminars, with the approval of the DUS and the professor. With assistance from their faculty advisors, students are required to build an intellectually substantial and coherent curriculum and must take all courses for a letter grade and earn a C or better in major requirements. Students are strongly encouraged to complete a course in ancient Greek civilization (usually AS.040.111 (p. 144)) and a course in Roman civilization (usually AS.040.104 (p. 144)).

Major Requirements

Greek or Latin Language Courses
Two Greek or Latin language courses at any level 6-8
Two Greek or Latin language courses at the 200-level or above 6-8
Language Proficiency in French, German, or Italian
Proficiency demonstrated through the second semester of intermediate level via course completion or waiver by exam

Classics Courses
Eight courses offered through the Classics Department or cross-listed in Classics 24

A student with previous Latin or Greek experience may begin at the intermediate or advanced level if approved by the faculty member overseeing the course in which the student wishes to enroll. In such cases, the normal prerequisites are waived. (NB: The student must still take four language courses according to the requirements given above, but a maximum of two waived courses may be counted toward the eight "Classics courses," making it possible for students with experience in Latin or Greek to meet requirements more quickly.)

Sample Program
A typical program might include the following sequence of courses:

Freshman

Honors Program in Classics

Classics majors have the opportunity to graduate with honors by writing an honors thesis (15,000-20,000 words) in close consultation with a faculty member. Three credits of "honors thesis research" are awarded in the spring semester of the senior year. (These credits may not be used to fulfill the basic requirements for the Classics BA, which must be met independently of any honors thesis work.)

Entrance to the Classics Honors program is contingent on outstanding performance in previous Classics courses. Students wishing to pursue an honors thesis are expected to consult with the Director of Undergraduate Studies by March 15 of the junior year to allow for adequate advising, planning, and identification of an appropriate honors thesis advisor.

A typical timeline for honors thesis research is as follows: research begins in the summer before the senior year (or earlier); further research and writing continues through the fall, with a draft of the thesis submitted early in the spring semester and a final version submitted in April.

Study Abroad

The Department of Classics is a member of the Intercollegiate Center for Classical Studies in Rome and can provide information on other year-long, semester-long, or summer programs in Greece and Italy (e.g., the College Year in Athens and the summer session of the American School of Classical Studies at Athens). Interested students, especially classics majors and minors, are encouraged to consider these options for studying overseas.
Classics Minor

The requirements for the minor in classics are extremely flexible. Courses are selected, in consultation with the DUS, to meet the needs and interests of the student. Minors may wish to pursue the study of one ancient language, or create a curriculum that meshes with their other academic pursuits. All courses must be taken for letter grades and receive a grade of C or higher.

Minor Requirements

Classics Courses

6 courses offered through the Classics Department or cross-listed in Classics

B.A./M.A. Degree

The department offers a masters degree for current Hopkins undergraduate students. Details may be found on the Graduate tab.

Graduate Programs

Requirements for the B.A./M.A. Degree

Admission to the B.A./M.A. program is restricted to current Johns Hopkins undergraduate classics majors and is based on outstanding performance in previous classics courses.

Students considering a five-year program are expected to declare their interest during the spring semester of their junior year. Prior to application, students must consult with the director of undergraduate studies, their faculty adviser, and the department administrator. A formal graduate application must be submitted no later than November 15 of the fall semester of the senior year in order for admission to the program in the spring of the senior year, thus meeting the requirement for concurrent status. In the senior (fourth) year, students are to devise a program of study that would best prepare them to do advanced work in their final (fifth) year, in particular addressing any weakness in one or the other classical language. All requirements for the B.A. must be completed by the end of the fourth year.

In the MA (fifth) year, students must complete the following:

Two graduate seminars in the Classics Department

Four semesters (12 credits) of Latin and/or Greek, at least six credits of which must be at the advanced level

A thesis of 20,000 to 25,000 words representing original research. The thesis will be supervised by a member of the Classics Department faculty and graded by the supervisor and a second reader from Classics or an outside department.

Exceptionally well-prepared students may apply for the B.A./M.A. program in the spring of their junior year, with prior approval from the director of undergraduate studies and the department chair. In this case it is possible to complete the bachelor’s/master’s degree in four years, provided all B.A. requirements are fulfilled by the end of the third year. These students are expected to express their interest to the department by the fall term of their junior (third) year; they must then submit an application no later than March 15 in the following semester.

The B.A. and M.A. degrees are conferred concurrently at the end of the M.A. year. Please note that the department does not award degrees during the summer; students are expected to complete the degree requirements in conformance with the university Graduate Board spring deadlines. Specific departmental and Graduate Board deadlines are communicated to the student in due course.

Requirements for the Ph.D. Degree

To receive a Ph.D. in classics from Johns Hopkins University, students must complete successfully a range of seminar work and examinations and then write a substantial dissertation. The Graduate Program in Classics is designed to be completed in five years, of which the first three are dedicated to seminar work and examinations, and the last two to the dissertation. Assuming satisfactory progress toward the Ph.D., all students admitted to the program receive five years of living expenses and tuition remission, in order to make it possible to complete the program in a timely manner. This support takes the forms of a fellowship for the first two years, and teaching for at least two of the remaining years. The department may also offer teaching opportunities in the summer, as well as funded summer travel for program-related purposes. All students, upon reaching dissertation level, are encouraged to apply for outside funding to spend a year abroad. If outside funding is obtained, the Johns Hopkins fellowship may be held in reserve for an additional year. A detailed outline of the Ph.D. program, including a prospectus of all seminars and exams, can be found on the Classics Department website (http://classics.jhu.edu).

Application information may be obtained from the Graduate Admissions website or by contacting the department chair, Department of Classics, Johns Hopkins University, 113 Gilman Hall, 3400 North Charles Street, Baltimore, MD 21218. Telephone: 410-516-7556; Fax: 410-516-4848; email: classics@jhu.edu. The application deadline is on or about January 15. For the precise date, please refer to the Graduate Admissions website (http://grad.jhu.edu).

For current faculty and contact information go to http://classics.jhu.edu/people/

Faculty

Chair
Shane Butler
Professor of Classics and Nancy H. and Robert E. Hall Professor in the Humanities: Latin Literature (Ancient, Medieval, Renaissance), media history and theory, classical reception

Professors
Richard Bett
Professor (Philosophy and Classics): ancient philosophy, ethics
Silvia Montiglio
Basil L. Gildersleeve Professor of Classics (Director of Graduate Studies): Greek literature and culture, the ancient novel and narrative, philosophy
Matthew Roller
Professor: Latin literature, Roman social and cultural history, Roman material culture, Graeco-Roman philosophy

Associate Professor
Dimitrios Yatromanolakis
Associate Professor: Greek literature, Greek social and cultural history, theory and anthropology of Greek music, papyrology, epigraphy, performance cultures of Greece and Rome

Assistant Professors
Emily Anderson
Assistant Professor: Aegean Bronze Age art and archaeology, material culture, sociocultural interaction, identity, glyptic
Joshua M. Smith
Assistant Professor (Director of Undergraduate Studies): Greek language and literature, ancient scholarship, history of literary criticism

Affiliated Faculty
Sanchita Balachandran
Curator, JHU Archaeological Collection, and Lecturer (Near Eastern Studies): Art and archaeological conservation

Richard Jasnow
Professor (Near Eastern Studies): Egyptology

Eugenio Refini
Assistant Professor of Italian Studies (German and Romance Languages and Literatures): Renaissance poetics, rhetoric, and drama; the Classical tradition; Latin and vernacular humanism; the intersections of music and literature

Professors Emeriti
Marcel Detienne
Basil L. Gildersleeve Professor of Classics Emeritus: Greek, social history, cultural history, mythology, anthropology and classics

H. Alan Shapiro
Academy Professor and W. H. Collins Vickers Professor of Archaeology Emeritus: Greek and Roman art and archaeology, Greek mythology and religion

For current course information and registration go to https://sis.jhu.edu/classes/

Courses

AS.040.103. The Roman Empire. 3.0 Credits.
This introductory course examines the history, society, and culture of the Roman state in the Imperial age (ca. 31 BCE-ca. 500 CE), during which it underwent a traumatic transition from an oligarchic to a monarchic form of government, attained its greatest territorial expanse, produced its most famous art, architecture, and literature, experienced vast cultural and religious changes, and finally was transformed into an entirely different ("late antique") form of society. All readings in English.
Instructor(s): M. Roller
Area: Humanities.

AS.040.104. The Roman Republic: History, Culture, and Afterlife. 3.0 Credits.
This introductory level course examines the history, society, and culture of the Roman state in the Republican period (509-31 BCE), during which it expanded from a small city-state to a Mediterranean empire. We also consider the Republic’s importance for American revolutionaries in the 18th century. All readings in English.
Instructor(s): M. Roller
Area: Humanities.

AS.040.105. Elementary Ancient Greek. 4.0 Credits.
This course provides a comprehensive, intensive introduction to the study of ancient Greek. During the first semester, the focus will be on morphology and vocabulary. Credit is given only upon completion of a year’s work. Cannot be taken Satisfactory/Unsatisfactory.
Instructor(s): R. Franklin.

AS.040.106. Elementary Ancient Greek. 4.0 Credits.
Course provides comprehensive, intensive introduction to the study of ancient Greek. The first semester’s focus is morphology and vocabulary; the second semester’s emphasis is syntax and reading. Credit is given only upon completion of a year’s work. Course may not be taken Satisfactory/Unsatisfactory.
Prerequisites: AS.040.105
Instructor(s): M. Asuni.

AS.040.107. Elementary Latin. 3.5 Credits.
This course provides a comprehensive, intensive introduction to the study of Latin for new students, as well as a systematic review for those students with a background in Latin. Emphasis during the first semester will be on morphology and vocabulary. Credit is given only upon completion of a year’s work. Course may not be taken Satisfactory/Unsatisfactory.
Instructor(s): J. Lenzi; R. Warwick.

AS.040.108. Elementary Latin. 3.5 Credits.
This course provides comprehensive, intensive introduction to the study of Latin for new students as well as systematic review for students with background in Latin. The first semester’s emphasis is on morphology and vocabulary; the second semester’s focus is on syntax and reading. Credit is given only upon completion of a year’s work. Course may not be taken Satisfactory/Unsatisfactory.
Prerequisites: AS.040.107
Instructor(s): A. Tabeling; D. Piana.

AS.040.111. Ancient Greek Civilization. 3.0 Credits.
The course will introduce students to major aspects of the ancient Greek civilization, with special emphasis placed upon culture, society, archaeology, literature, and philosophy.
Instructor(s): J. Smith
Area: Humanities.

AS.040.121. Ancient Greek Mythology: Art, Narratives, and Modern Mythmaking. 3.0 Credits.
This course focuses on major and often intricate myths and mythical patterns of thought as they are reflected in compelling ancient visual and textual narratives. Being one of the greatest treasure troves of the ancient world, these myths will further be considered in light of their rich reception in the medieval and modern world (including their reception in the modern fields of anthropology and philosophy).
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.126. Religion, Music and Society in Ancient Greece. 3.0 Credits.
Emphasis on ancient Greek ritual and mythology; on ancient music, religion, and society; and on cultural institutions such as symposia (drinking parties) and festivals.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.133. Heroes: the Ancient Greek Way. 3.0 Credits.
The purpose of this course is to introduce students to Ancient Greek literature by reading and discussing its most important and famous texts, from the Iliad and the Odyssey to tragedy to philosophy. Knowledge of Greek is not required.
Instructor(s): S. Montiglio
Area: Humanities.
AS.040.134. Love, War, and Glory: The Gods and Heroes of Greek Mythology. 3.0 Credits.
Greek myths fascination us as adventurous narratives, yet they always sound enigmatic and require interpretation. This course will combine the pleasure of reading stories and the concern for their understanding. Readings in ancient and modern texts. The course may not be taken S/U. This course meets Hopkins’ requirements for a major in classics.
Instructor(s): D. Gessert
Area: Humanities.

AS.040.135. The Grandeur That Was Rome. 3.0 Credits.
At the peak of its power, the Roman empire extended from Scotland to Syria, incorporating numerous cultures, attitudes, and lifestyles. This course examines Roman social practices, political institutions, and religion from the empire’s humble beginnings through its final period, using a wide variety of materials including drama, poetry, history, and oratory. This course may not be taken S/U and meets the Hopkins requirements for a major in classics.
Instructor(s): M. Mueller
Area: Humanities.

AS.040.137. Freshman Seminar: Archaeology at the Crossroads: The Ancient Eastern Mediterranean through Objects in the JHU Archaeological Museum. 3.0 Credits.
This seminar investigates the Eastern Mediterranean as a space of intense cultural interaction in the Late Bronze Age, exploring how people, ideas, and things not only came into contact but deeply influenced one another through maritime trade, art, politics, etc. In addition to class discussion, we will work hands-on with artifacts from the JHU Archaeological Museum, focusing on material from Cyprus.
Instructor(s): E. Anderson
Area: Humanities.

Writing Intensive.

AS.040.140. Gender and Sexuality in Early Greece and the Eastern Mediterranean. 3.0 Credits.
In this course we will explore evidence and interpretations of gender and sexuality in the region of the Aegean and eastern Mediterranean during the third and second millennia BCE. Material investigated will include the “snake goddess” figures from Minoan Crete, anthropomorphic figurines from the Cyclades and Cyprus, wall paintings, etc. In each case we will consider the history of interpretation as well as investigate the objects’ archaeological and sociocultural contexts. Discussion topics will include representational ambiguity, the specific materialities of objects, and their possible roles in activities construing gender. The course will incorporate material from the JHU Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.145. Story and Argument from Homer to Petrarch. 3.0 Credits.
Stories entertain us, but we also tell them to make a point. This course will explore the ways that stories were used to make points by Greek and Latin authors from Homer to Petrarch, while also looking at, and comparing them to, the techniques of argument contemporaneous thinkers were developing. This is a course about narrative and rhetoric but also about how and in what way stories matter.
Instructor(s): C. Cannon
Area: Humanities.

AS.040.146. Classics and Comics: Ancient Writers and Modern Visual Culture. 3.0 Credits.
Course analyzing the adaptation of ancient Greek and Roman literature and visual culture in modern comic books, graphic novels, and manga.
Instructor(s): G. Gessert
Area: Humanities.

AS.040.148. Ancient Israel and Ancient Greece in Opera and on Film. 3.0 Credits.
Some of the most breathtaking (early and later) operas and films have been in intense dialogue with ancient societies, narratives, and cultural concepts. Contemporary hit movies center on diverse aspects of ancient narratives: the beginning of the world, violent wars, politics, erotic themes, and intricate existential questions. The course will introduce students to a comparative examination of the variety of approaches to ancient Israel and ancient Greece in the spectacular worlds of opera and cinema. The course will focus on major texts and archaeological material related to antiquity; works of world cinema will be analyzed.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.150. Island Archeology: Land and Sea in Ancient Crete, Cyprus and the Cyclades. 3.0 Credits.
Islands present highly distinctive contexts for social life. We examine three island worlds of the ancient eastern Mediterranean. These are places where water had a unique and powerful meaning and boat travel was part of daily life, where palaces flourished and contact with other societies implied voyages of great distance. Class combines close study of material and visual culture with consideration of island-specific interpretive paradigms; trips to Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.152. Medical Terminology. 3.0 Credits.
This course investigates the Greek and Latin roots of modern medical terminology, with additional focus on the history of ancient medicine and its role in the development of that terminology.
Instructor(s): J. Smith
Area: Humanities.

AS.040.160. Special Opportunities in Undergraduate Learning: Constructing an Empire: An Introduction to the Art & Archaeology of Ancient Rome. 1.0 Credit.
Have you ever wondered what it would be like to stroll down the colonnaded streets of ancient Rome, visiting the monuments, palaces and temples of the ancient gods? Have you ever wondered what the luxurious villas looked like from within, or what it would be like to attend a play in an ancient theatre or the gladiatorial games in the Colosseum? This course is designed to introduce students to the material culture of the ancient Roman world by exploring the architecture, sculpture, painting, and mosaics of Rome and its environs. We will also take a field trip to the gallery of Roman art in the Walters Art Museum in order to better understand the Roman Empire through the visual arts.
Instructor(s): A. Tabeling.

AS.040.205. Intermediate Ancient Greek. 3.0 Credits.
Reading ability in classical Greek is developed through a study of various authors.
Prerequisites: AS.040.105 AND AS.040.106 OR Equivalent
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.206. Intermediate Ancient Greek. 3.0 Credits.
Reading ability in classical Greek is developed through a study of various authors, primarily Plato (fall) and Homer (spring).
Prerequisites: AS.040.205
Instructor(s): S. Montiglio
Area: Humanities.
AS.040.207. Intermediate Latin. 3.0 Credits.
Although emphasis is still placed on development of rapid comprehension, readings and discussions introduce student to study of Latin literature, principally through texts of various authors.
Prerequisites: AS.040.107 AND AS.040.108 OR Equivalent
Instructor(s): A. Tabeling; T. Smith
Area: Humanities.

AS.040.208. Intermediate Latin. 3.0 Credits.
Reading ability in Latin is developed through the study of various authors, primarily Cicero (fall) and Vergil (spring).
Prerequisites: AS.040.207
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.218. Celebration and Performance in Early Greece. 3.0 Credits.
Surviving imagery suggests that persons in Minoan and Mycenaean societies engaged in various celebratory performances, including processions, feasts, and ecstatic dance. This course explores archaeological evidence of such celebrations, focusing on sociocultural roles, bodily experience, and interpretive challenges.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.221. Art and Archaeology of Early Greece. 3.0 Credits.
This course explores the origins and rise of Greek civilization from the Early Bronze Age to the Persian Wars (ca. 3100-480 B.C.), focusing on major archaeological sites, sanctuaries, material culture, and artistic production.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.233. The Ancient Greek and Roman Novels. 3.0 Credits.
The ancient Greeks are credited with inventing democracy, philosophy, drama, and science. They also invented the novel. In this class, we will read a large sample of Greek and Roman novels: stories of love, adventures, and magic.
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.235. Past is Present: Cultural Heritage and Global Interactions. 3.0 Credits.
The uncovering, collection and valuation of the archaeological past is deeply embroiled in global interactions - diplomatic, economic, cultural. We examine the complex role of cultural heritage through consideration of case studies and analytic approaches. Frequent visits to area museums.
Instructor(s): E. Anderson
Area: Humanities.

AS.040.236. From Apollo to Dionysus: Ritual, Performance, and the Genesis of Tragedy. 3.0 Credits.
This course explores the origins and development of what is often regarded as the most exemplary form of western art—Classical Athenian Tragedy. Focusing on the ritual, performative, and civic contexts of Greek song culture, it ultimately seeks to pose the question 'what makes Athens unique?'. To this end, the courses is centered on an examination of texts in tandem with material culture (monumental architecture, temples, dedications, statuary, vase painting). Issues of identity, religion, politics, and athletics will be discussed. Dean's Teaching Fellowship course.
Prerequisites: Prereq: AS.040.111
Instructor(s): T. Smith
Area: Humanities
Writing Intensive.

AS.040.237. Myth and Metamorphosis. 3.0 Credits.
Beginning with close study of the poem itself, this course will examine the unequalled influence of Ovid’s Metamorphoses on subsequent literature and art, including theater and film.
Instructor(s): M. Butler
Area: Humanities.

AS.040.238. Freshman Seminar: Magic and Miracles from Antiquity to the Renaissance. 3.0 Credits.
This freshman seminar will explore concepts of magic and miracles and their different forms from ancient Greece and Rome and early Christianity through the Middle Ages up to the Renaissance. Dean's Prize Teaching Fellowship Course.
Instructor(s): M. Mueller
Area: Humanities
Writing Intensive.

AS.040.241. The Greeks and Their Emotions. 3.0 Credits.
This seminar is meant as an introduction to the study of ancient emotions, with a particular emphasis on how the Greeks of the Archaic, Classical and Hellenistic periods conceptualized, portrayed and lived their emotions through linguistic, literary and artistic expression. After an analysis of how the ancient Greek terminology for the emotions differs from our own, we shall focus on the phenomenon of emotion as deeply rooted in the physical body, and in light of this we will contemplate (and question) its universality. Texts will be read in translation. No knowledge of ancient Greek required.
Instructor(s): M. Asuni
Area: Humanities
Writing Intensive.

AS.040.305. Advanced Ancient Greek. 3.0 Credits.
Reading of prose or verse authors, depending on the needs of students.
Co-listed with AS.040.705.
Prerequisites: AS.040.205 AND AS.040.206 OR Equivalent
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.306. Advanced Ancient Greek. 3.0 Credits.
Reading of prose or verse authors, depending on the needs of students.
Co-listed with AS.040.702.
Prerequisites: AS.040.205 AND AS.040.206 or equivalent
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.307. Advanced Latin Prose. 3.0 Credits.
This course aims to increase proficiency and improve comprehension of the Latin language. Intensive reading of Latin texts, with attention to grammar, idiom, translation, etc. Specific offerings vary. Co-listed with AS.040.707.
Prerequisites: AS.040.207 AND AS.040.208 or equivalent
Instructor(s): M. Butler
Area: Humanities.

AS.040.308. Advanced Latin Poetry. 3.0 Credits.
The aim of this course is to increase proficiency and improve comprehension of the Latin language. Intensive reading of Latin texts, with close attention to matters of grammar, idiom, and translation. Co-listed with AS.040.710.
Prerequisites: AS.040.207 AND AS.040.208 OR Equivalent
Instructor(s): M. Butler
Area: Humanities.
AS.040.320. Myth In Classical Art. 3.0 Credits.
This course traces the representation of the principal gods and heroes of Greek myth in the visual arts (sculpture and vase-painting), as well as later reflections in Roman painting.
Instructor(s): A. Shapiro
Area: Humanities.
AS.040.348. Worlds of Homer. 3.0 Credits.
Through texts, art, and archaeological remains, this course examines the various worlds of Homer—those recalled in the Iliad and Odyssey, those within which the epics were composed, and those born of the poet’s unique creative work. Class will make museum visits. Ancient texts read in translation.
Instructor(s): E. Anderson
Area: Humanities.
AS.040.363. Craft and Craftpersons of the Ancient World: Status, Creativity and Tradition. 3.0 Credits.
This course explores the dynamic work and social roles of craftpersons in early Greece, the eastern Mediterranean and Near East. Readings and discussion will query the identities and contributions of these people—travelers, captives, lauded masters, and even children—through topics including gender, class, and ethnicity. Special focus on late third-early first millennia BCE; local field trips.
Instructor(s): E. Anderson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.040.366. The Archaeology of Ancient Cyprus: Investigating a Mediterranean Island World in the JHU Museum. 3.0 Credits.
This course explores the visual and material worlds of ancient Cyprus from the earliest human evidence through the Iron Age. Course topics will include the island’s unique position between the Aegean and Near East and how this has impacted both Cyprus’ ancient past and the way in which it has been conceived in the modern world. Class involves regular analysis of artifacts based in the Archaeological Museum.
Instructor(s): E. Anderson
Area: Humanities.
AS.040.369. The Battle for the 5th Century BC: Athens, Persia, Sparta. 3.0 Credits.
This course explores the achievements and conflicting interactions of Athens, Persia, and Sparta during the 5th century BC, a period whose cultural richness lies at the roots of Western Civilization.
Instructor(s): J. Lamont
Area: Humanities
Writing Intensive.
AS.040.370. Ovid and the Consequences. 3.0 Credits.
Beginning with close study of the poem itself, this course will examine the unequalled influence of Ovid’s Metamorphoses on subsequent literature and art, including theater and film.
Instructor(s): M. Butler
Area: Humanities.
AS.040.373. Propaganda and the Art of Visual Politics during the Roman Empire. 3.0 Credits.
We will examine visual expressions of propaganda in the city of Rome, considering how emperors used public art to promote their political agendas and their ideological vision of power. Dean’s Teaching Fellowship course
Instructor(s): A. Tabeling
Area: Humanities.
AS.040.407. Survey of Latin Literature I: Beginnings to the Augustan Age. 3.0 Credits.
This intensive Latin survey is designed for very advanced undergraduate students—normally those who have completed two semesters of Advanced Latin (AS.040.307/308)—and PhD students preparing for their Latin translation exam. In this course, the first half of a year-long sequence, we will read substantial texts of major Republican and some Augustan authors. The weekly pace is designed to inculcate greater speed and accuracy in Latin reading, and provide significant coverage of various kinds of texts. Recommended background: AS.040.307-308 or equivalent
Prerequisites: AS.040.307 AND AS.040.308 or permission of instructor.
Instructor(s): M. Roller
Area: Humanities.
AS.040.408. Survey of Latin Literature II: Early Empire to the Post-Classical Period. 3.0 Credits.
This intensive Latin survey is designed for very advanced undergraduate students (normally those who have completed the regular undergraduate sequence through the advanced level) and PhD students preparing for their Latin translation exam. In this course, the second half of a year-long sequence, we will read substantial texts of major Imperial authors, as well as a selection of works from Late Antiquity and the Post-Classical period. The weekly pace is designed to inculcate greater speed and accuracy in Latin reading and to provide significant coverages of various kinds of texts. Prior completion of AS.040.407 preferred but not required.
Prerequisites: AS.040.307 AND AS.040.308 or equivalent.
Instructor(s): M. Butler
Area: Humanities.
AS.040.410. Junior-Senior Capstone: Food and Dining in the Ancient World. 3.0 Credits.
This junior-senior capstone course examines the culture of food and drink, and its associated social practices and values, in the ancient Greek and Roman worlds. The evidence examined will include texts, images, and archaeological remains.
Instructor(s): M. Roller
Area: Humanities.
AS.040.412. Junior-Senior Capstone: The Ancient Senses. 3.0 Credits.
This course offers immersion in the rapidly expanding interdisciplinary field of sense studies, with an emphasis on the questions posed thereby to classicists and the humanities generally. It should be useful both to students of antiquity with an interest in the senses and to others who want to explore the role of antiquity in shaping sensory theories.
Instructor(s): M. Butler
Area: Humanities.
AS.040.414. Junior-Senior Seminar: The Art of Ancient Tragedy. 3.0 Credits.
This seminar explores the form and function of tragedy in the ancient Greek and Roman worlds by investigating the dramatic texts themselves, ancient and modern discussions about tragedy, and archaeological remains. As a Junior-Senior Seminar, this course includes instruction in core research methods within Classics and culminates in an individualized research project. Classics majors only
Instructor(s): J. Smith
Area: Humanities.
AS.040.415. Junior-Senior Capstone: Odysseus Becomes an Ass. 3.0 Credits.
We shall focus on one Greek epic, The Odyssey, and one Latin novel, Apuleius' Golden Ass: what do Odysseus and a donkey have in common? Do they experience similar adventures? How does magic play into the two stories? We shall read both texts in their entirety, including passages in the original languages, and unearth the connections between these two masterpieces of ancient literature.
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.417. Survey of Greek Literature I: Homer to the Classical Period. 3.0 Credits.
We shall read an extensive selection of major texts of Greek literature from Homer to the classical period.
Instructor(s): S. Montiglio
Area: Humanities.

AS.040.501. Independent Study. 3.0 Credits.
Instructor(s): Staff.

AS.040.502. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.040.519. Honors Research. 3.0 Credits.
Instructor(s): Staff.

AS.040.520. Honors Research. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.040.599. Independent Study. 3.0 Credits.
Instructor(s): C. Celenza; M. Roller.

AS.040.601. Italian Renaissance Humanism and Modern Humanities.
This course will reflect on certain key moments in the development of Latinate and Italian Renaissance humanism and will also include reading and discussion of certain recent landmark contributions to the history of the modern humanities.
Instructor(s): C. Celenza.

AS.040.602. Heliodorus.
We shall read and discuss the writing of Heliodorus in the original Greek.
Instructor(s): S. Montiglio.

AS.040.604. Heliodorus II.
We will read the second half of Heliodorus’ Aethiopica in the original Greek and integrate the reading with secondary literature.
Instructor(s): S. Montiglio.

AS.040.606. Topics in Classical Reception.
An exploration of recurring themes and recent trends in the reception of classical antiquity.
Instructor(s): M. Butler.

AS.040.607. Citations.
This course investigates the use of literary citation in ancient scholarly works, including issues of source and accuracy, as well as notions of literary authority (with focus on the use of digital tools for analysis).
Instructor(s): J. Smith.

This seminar explores the topic of Petronius as a historical character in ancient Rome.
Instructor(s): G. Schmeling.

We shall look at several allegorical readings offered in antiquity to interpret myths and literary works, especially, but not only, the epics of Homer.
Instructor(s): S. Montiglio.

AS.040.615. Ovid's Metamorphoses.
In this seminar, we will study Ovid's Metamorphoses, paying special attention to the text's generic playfulness and the author's poetics of illusion. We will also survey recent critical trends in Ovidian studies.
Instructor(s): M. Butler.

AS.040.616. Latin Literature Beyond Hermeneutics.
This seminar will examine various works from the perspective of recent efforts to move beyond language and interpretation, including histories and theories of material texts, sensation, and aesthetic pleasure.
Instructor(s): M. Butler.

AS.040.618. Around the Gracchi: Current Views on Late Republican Culture, Politics, and Economics.
This seminar explores and appraises the recent revolution in our understanding of the culture, politics, and economics of the late Roman Republic, with a thematic focus on how we now understand the Gracchi as historical actors and as cultural phenomena.
Instructor(s): M. Roller.

AS.040.621. Proseminar to Classical Archaeology.
An introduction to research methods and current topics of discussion in the scholarship on Greek and Roman art and archaeology.
Instructor(s): A. Shapiro.

AS.040.623. Greek Wall Painting.
This seminar will examine wall painting of the Aegean from the Bronze Age to the Hellenistic period. Topics will include crafting, spatial and experiential dynamics, materiality, narrative, iconography and the relationship of the images to their worlds.
Instructor(s): E. Anderson.

AS.040.638. Ancient Literary Criticism.
This course covers essential Greek and Latin texts (e.g. Plato, Aristotle, Horace, Plutarch) and the commentary tradition (e.g. scholia to Homer and other important authors). Focus is on poetic texts, with some prose.
Instructor(s): J. Smith.

We shall read Musaeus’ “Hero and Leander” and collateral texts, including Ovid’s two letters “authored” by the two protagonists and several sections from the ancient novels, which have influenced Musaeus. If students are interested and time allows, we will read some modern re-writings of this wonderful love story.
Instructor(s): S. Montiglio.

AS.040.665. Survey of Greek Literature.
An intensive survey of Greek poetic and prose texts, which emphasizes reading for comprehension and speed. Texts range from Homer to Lucian.
Instructor(s): J. Smith
Area: Humanities.

AS.040.691. Roman Reciprocities.
This seminar investigates Roman reciprocity and social exchange with a focus on the early empire, in light of both classical anthropological theory and recent work on reciprocity by Classicists and others. Substantial Latin readings from Seneca’s De Beneficiis and such poetic praise texts as the Laus Pisonis and Panegyricus Messalae.
Instructor(s): M. Roller.
AS.040.693. The Pre-Socratics and Early Plato.
This seminar will focus on the earliest phases of European philosophy. Topics that will be examined include: scholarly approaches to the fragments of major thinkers such as Herakleitos and Empedokles; the concept of "fragment," the transition from the pre-Socratics to early Plato; the later reception of Herakleitos and Pythagoras in European thought.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.702. Reading Ancient Greek Poetry.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. Co-listed with AS.040.306.
Instructor(s): S. Montiglio.

AS.040.705. Reading Ancient Greek Prose.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. Co-listed with AS.040.305.
Recommended Course Background: AS.040.205-AS.040.206.
Instructor(s): D. Yatromanolakis
Area: Humanities.

This reading seminar is intended to train graduate students in direct and critical work on primary sources. Co-listed with AS.040.307.
Instructor(s): M. Butler.

AS.040.710. Reading Latin Poetry.
This reading seminar is intended to train graduate students in direct and critical work on primary sources. Co-listed with AS.040.308.
Recommended Course Background: AS.040.207-AS.040.208.
Instructor(s): M. Butler
Area: Humanities.

AS.040.714. Survey of Latin Literature.
This seminar surveys Latin authors and texts represented on the Ph.D. reading list. Intensive, accelerated reading aims to familiarize students with the different authors and their styles, to improve reading speed and accuracy, and prepare students to tackle the remaining works on the reading list by themselves.
Instructor(s): M. Roller.

AS.040.716. Petrarch (1304-74) and the Beginnings of Renaissance Latin.
This course will provide close readings of certain Latin texts by Petrarch, with attention to his letters and to other prose works.
Instructor(s): C. Celendza.

AS.040.801. Independent Study.
Instructor(s): Staff.

AS.040.802. Independent Study.
Instructor(s): Staff.

AS.040.809. Exam Preparation.
Study in preparation for a comprehensive oral exam, required to become a PhD candidate, and consisting of three fields in classics and related areas.
Instructor(s): S. Montiglio.

AS.040.810. Exam Preparation.
Study in preparation for a comprehensive oral exam, required to become a PhD candidate, and consisting of three fields in classics and related areas.
Instructor(s): S. Montiglio.

No Audits.
Instructor(s): Staff.

AS.040.815. Dissertation Research.
No Audits.
Instructor(s): Staff.

Cross Listed Courses

History of Art
AS.010.205. The Painted Worlds of Early Greece: Fantasy, Form and Action. 3.0 Credits.
This course explores the creation and role of early Aegean wall painting. Found primarily in palaces, villas and ritual spaces, these paintings interacted with architecture to create micro-worlds for social activities taking place in their midst. Their subjects range—from mythological to documentary, from ornamental to instructive. They depict dance and battle, fantastical beasts and daily life. We examine their complex relationship to lived reality as well as the activities that surrounded them, from their crafting, to performance of rituals, to their role in “international” relations.
Instructor(s): E. Anderson
Area: Humanities
Writing Intensive.

AS.010.222. Representing Roman Power: Sculpture as Political Rhetoric from Republic to Empire. 3.0 Credits.
Rome created one of the world’s most powerful empires that dominated the Mediterranean from the 3rd century BCE into the 4th century CE. As Rome expanded its borders, its cities saw a proliferation of sculptural monuments that produced a visual political rhetoric and expressed imperial ideologies. This class examines the close relationship between Roman sculpture and politics from the Republic through the Severan principate. Through close visual analysis of the ancient materials and critical readings of scholarship, this course will examine the role of sculpture in the formation, reproduction, and attenuation of imperial rule.
Instructor(s): A. Miranda
Area: Humanities.

AS.010.418. The Icon in East and West. 3.0 Credits.
The chronologically structured seminar discusses the conception and reception of holy images in the Middle Ages from Late Antiquity until the beginning of the Renaissance. We will investigate their creation during the rise of Christianity and their affinities with Graeco-Roman portraits and cult images. Another focus is dedicated to the theological and political context of icons during the waves of early medieval iconoclasm, in particular in Byzantium. We will address icons made in the Holy Land during the crusades, which are often characterized by merging Frankish and Byzantine styles and motifs with Islamic art. We will discuss the emergence of new icons in Italy, and their pan-European distribution after 1100. Here we will focus on the influence of the papal court and the economic impact of icons in the later Middle Ages in the Italian commune.
Instructor(s): N. Zchomelidse
Area: Humanities
Writing Intensive.
AS.010.421. Creating Sacred Space in the Ancient and Medieval World. 3.0 Credits.
What makes a space sacred? How is it different from other spaces? This seminar explores the various means - visual, artifactual, architectural, and performative - of creating sacred space in the ancient and medieval worlds of the Near East and Mediterranean. Possible cases for study include early Sumerian temples, state-sponsored Assyrian temples, votive deposits, Greek sanctuaries, sanctuaries and landscape, early medieval Jewish, Christian, and Islamic cult buildings, cave sanctuaries, pilgrimage sites, icons and sacred space.
Instructor(s): M. Feldman
Area: Humanities
Writing Intensive.

The arts of the Near East, Aegean and Egypt are typically taught separately from one another. However, the Mediterranean Sea has always served as a connector, and the diverse cultures of these areas were in close contact with one another for much of their histories. During the Bronze Age (3000 to 1200 BCE), these interactions were particularly dynamic, resulting in a diversity of arts including wall frescoes, precious jewelry, and elaborate furnishings and weaponry. This course examines the arts of the interactions among Near Easterners, Greeks, Egyptians and others. It focuses special attention on the role of artistic products in intercultural relations, including trade, diplomacy, war and imperialism. Students are not expected to have extensive knowledge of all the areas, although some experience in at least one of them will be helpful. The course will interweave establishing a knowledge base necessary to tackle this topic with broader conceptual concerns and interdisciplinary approaches (art historical, archaeological, anthropological, and historical). There will be a final paper.
Instructor(s): E. Anderson; M. Feldman
Area: Humanities.

English
AS.060.604. Philology.
An examination of the many ways (both as old and then ‘New’, but also as the subject of a key ‘return’) that ‘philology’ has been claimed as the master category of literary study. The nuts and bolts of older philological procedures as well as the broadest theoretical claims for the term will be attended to.
Instructor(s): C. Cannon
Area: Humanities
Writing Intensive.

Near Eastern Studies
AS.130.110. Introduction To Archaeology. 3.0 Credits.
An introduction to archaeology and to archaeological method and theory, exploring how archaeologists excavate, analyze, and interpret ancient remains in order to reconstruct how ancient societies functioned. Specific examples from a variety of archaeological projects in different parts of the world will be used to illustrate techniques and principles discussed.
Instructor(s): E. Anderson
Area: Humanities, Social and Behavioral Sciences.

Archaeology
AS.136.101. Introduction To Archaeology. 3.0 Credits.
An introduction to archaeology and to archaeological method and theory, exploring how archaeologists excavate, analyze, and interpret ancient remains in order to reconstruct how ancient societies functioned. Specific examples from a variety of archaeological projects in different parts of the world will be used to illustrate techniques and principles discussed.
Instructor(s): G. Schwartz
Area: Humanities, Social and Behavioral Sciences.

Medicine, Science and the Humanities
AS.145.101. Death and Dying in Art, Literature, and Philosophy: Introduction to Medical Humanities. 3.0 Credits.
This team-taught course offers an interdisciplinary introduction to the university’s new concentration in “Medicine, Science, and Humanities.” The themes of death, dying, and the treatment of the dead are explored in their changing historical, anthropological, philosophical, literary, art historical and medical dimensions. Open to freshmen, sophomores, and upperclass Medicine, Science, and Humanities majors.
Instructor(s): E. Ender; M. Merback; W. Stephens
Area: Humanities
Writing Intensive.

Philosophy
AS.150.134. Freshman Seminar: Socrates in Context. 3.0 Credits.
A study of Socrates as portrayed by his contemporaries, and of intellectual and political trends to which he may have been reacting. Authors will include Plato, Xenophon and Aristophanes. Freshmen Only.
Instructor(s): R. Bett
Area: Humanities.

AS.150.201. Introduction To Greek Philosophy. 3.0 Credits.
A survey of the earlier phase of Greek philosophy. Socrates, Plato, and Aristotle will be discussed, as well as two groups of thinkers who preceded them, usually known as the pre-Socratics and the Sophists.
Instructor(s): R. Bett
Area: Humanities.

AS.150.401. Greek Philosophy: Plato and His Predecessors. 3.0 Credits.
A study of pre-Socratic philosophers, especially those to whom Plato reacted; also an examination of major dialogues of Plato with emphasis upon his principal theses and characteristic methods. Cross-listed with Classics.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.

AS.150.402. Aristotle. 3.0 Credits.
A study of major selected texts of Aristotle.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.

AS.150.403. Hellenistic Philosophy. 3.0 Credits.
A study of later Greek philosophy, stretching roughly from the death of Aristotle to the Roman imperial period. Epicureans, Stoics, and Skeptics will be the main philosophical schools examined.
Instructor(s): R. Bett
Area: Humanities
Writing Intensive.
German Romance Languages Literatures

AS.211.475. Inside the Writer's Laboratory. 3.0 Credits.
How do books come to life? Behind every masterpiece is a tale of hard work, dialogue with other texts, and constant negotiations with social and material circumstances that evolve over time. This course opens up the "laboratory" of figures of the European Renaissance like Erasmus, Machiavelli, and Montaigne to explore the world of writerly culture in its manifold expressions, including authorial revision, self-translation, controversy, censorship, intertextuality, and forgery. Our own laboratory will be the Department of the Special Collections, where we will spend a good deal of our time handling manuscripts and early printed books. Course may be used to satisfy major requirements in both French and Italian sections.
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.211.714. Ariadne's Threads: Metamorphosing Mythologies.
Abandoned by Theseus, Ariadne lamenting on the shore of Naxos embodies one of the most powerful tropes in literature and the arts. The fate of the heroine who helped Theseus out of the labyrinth became herself a thread (indeed, an inexhaustible series of threads) running across the ages and populating the imagination of poets, painters, composers. After exploring in detail the classical sources that canonized Ariadne's myth (Catullus, Carmina, 64; Ovid, Heroïdes, 10) as well as references to the myth found in other classical authors (Homer, Hesiod, Pausanias, Plutarch, Propertius), we will turn to the reception of Ariadne in literature and music (Ariostio, Rinuccini-Monteverdi, Haydn, Nietzsche, Strauss-Von Hofmannsthal). The analysis of the various case studies will focus on the rhetorical and poetical devices used by poets and composers to reenact the vocal features of Ariadne's lament.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.347. Petrarch and the Beginnings of the Renaissance. 3.0 Credits.
This course will focus on the life, work, and thought of Francesco Petrarca, or "Petrarch." Though known today primarily as the author of Italian love poetry, Petrarch considered his Latin work more lasting. We will explore both sides of his work, the vernacular and Latin (in English translation) to come to an understanding of his place in medieval intellectual history, the history of philosophy, and the history of literature.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.377. Gendered Voices. 3.0 Credits.
The course will explore the notion of 'voice' in order to show how poetry, literature, philosophy, and music have been dealing with it throughout the ages. In particular, by focusing on classical figures such as the Sirens, Circe and Echo, as well as by considering the seminal discussions of the 'voice' in Plato and Aristotle, the course will address the gendered nature of the voice as a tool to seduce and manipulate the human mind. More specifically, the course will discuss the ways in which male and female voices embody different examples. Functions to be analyzed include texts by Dante, Petrarch, Ariosto, and Tasso. The course will also consider later rewritings of myths concerned with the voice such as Giuseppe Tomasi di Lampedusa's The Siren and Italo Calvino's A King Listens.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.390. Machiavelli: A Renaissance Master. 3.0 Credits.
Who was Niccolo Machiavelli? The author of the Italian Renaissance's most famous book, The Prince, he also wrote histories, commentaries, comedies, and letters. And he had a career as a prominent Florentine diplomat, which ended tragically but informed everything he wrote. This course is intended to offer students an introduction to Machiavelli's major works and to the intellectual, social, and political contexts that shaped his thinking.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.437. The Intellectual World of the Italian Renaissance. 3.0 Credits.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the "lost" Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin – not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance "humanists," inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their "native" tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.445. Boccaccio's Decameron and the Multiplicity of Story-Telling. 3.0 Credits.
Boccaccio's Decameron (1352), a collection of 100 short stories, ranges from the bawdy through the cynical to the romantic and even fantastic. It has inspired numerous writers, artists, musicians and film-makers. We will read Boccaccio's masterpiece on its own terms and in relation to the development of story-telling, from gossipy "news" (novelle) to artistic short story, theatrical adaptation, literary fairy-tale, and the fantastic. The Decameron will be compared with its forerunners in saints' lives, bawdy fabliaux, and moral exempla, and with its literary, theatrical, and filmic imitators in Italy and Europe. Italian graduate students and undergraduate majors will attend an extra weekly meeting conducted in Italian. Those students should enroll in section 2 which will be awarded 4 credits.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.
AS.214.477. Magic, Marvel, and Monstrosity in the Renaissance. 3.0 Credits.
Magick, Monstrosity, and Marvels or Wonders call into question what we see and experience: what is reality, what is illusion; what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the nature of reality were bound up with questions and issues very different from those of our time. With the exact sciences still being invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These and other works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors and graduate students (who should enroll in section 2) will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.637. The Intellectual World of the Italian Renaissance.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the “lost” Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin – not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance “humanists,” inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their “native” tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

Although naturally and historically intertwined, music and poetry tended to be described in the early modern period as competing rather than interacting. By looking at both literary and theoretical texts, the seminar aims to explore the ways in which this controversial relation is revealed by the interplay of poetics, rhetoric, and music theory. Reading materials will include classical sources (e.g. Plato, Aristotle, Ps.-Longinus, Quintilian) and their early modern interpretations. Special attention will be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni, whose works will be also discussed in the light of the contemporary development of musical genres (e.g. madrigals, opera). No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.655. Translating Knowledge: Brunetto’s Tresor and Dante’s Convivio.
By focusing on Brunetto Latini’s Tresor and Dante Alighieri’s Convivio, the seminar will examine the notion of “encyclopedic knowledge” in the Middle Ages. The two works — both examples of “translation” — call traditional ideas of knowledge into question. The seminar will study the Convivio as a response to the Tresor and will situate Dante’s project within a wider discussion of vernacular translation as a key tool for the dissemination of the classical tradition in the Middle Ages.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.684. The Commentary Tradition and the Birth of Literary Scholarship.
The practice of commenting on texts lies at the foundations of what we call today “literary criticism.” From the Bible to Dante’s Divine Comedy, from Greek and Latin poetry to medieval and Renaissance literary writings, the many questions posed by the commentators have contributed widely to the shaping of the modern notions of reading and interpretation. What do we look for when we read a text? How do we approach it? How does our reading interact with the author’s intention? To what extent is the commentator appropriating the author’s prerogatives? By exploring a wide range of case studies, the seminar aims to reassess the role of the commentary tradition within the development of literary scholarship and as a genre per se. Some sessions will take place at the Hopkins Special Collections and at the Walters Art Museum, where students will have the opportunity to work on both manuscripts and early prints, and select materials for their presentations.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.716. Translation and Vernacular Readership in Italy, 1250-1500.
Translation is usually acknowledged as instrumental to the rise of vernacular readership in medieval and early modern Europe. By reconsidering seminal contributions such as Erich Auebarch’s, this seminar will explore the textual and cultural implications of the translative process that played a major role in the medieval reception of antiquity. Special attention will be given to translation theory and its history.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.
Giambattista Vico's Principi di scienza nuova d'intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an "ideal" and "eternal" model of human development, valid for all societies.
Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square "sacred history" (the presumed historical accuracy of the Bible) with "profane" or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this "old science" stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

Interdepartmental
AS.360.133. Freshman Seminar: Great Books at Hopkins. 3.0 Credits.
Freshman Seminar: Students attend lectures by an interdepartmental group of Hopkins faculty and meet for discussion in smaller seminar groups; each of these seminars is led by one of the course faculty. In lectures, panels, multimedia presentations, and curatorial sessions among the University's rare book holdings, we will explore some of the greatest works of the literary and philosophical traditions in Europe and the Americas. Close reading and intensive writing instruction are hallmarks of this course; authors for Fall 2018 include Homer, Boethius, Machiavelli, Shakespeare, Descartes, Apha Behn, Mary Shelley, Mozart, Douglass, and Woolf.
Instructor(s): E. Patton; E. Refini; S. Weiss; W. Egginton
Area: Humanities
Writing Intensive.

AS.360.134. Great Books at Hopkins II: The Sciences. 3.0 Credits.
Great Books at Hopkins II: The Sciences will combine readings from philosophy and literature with foundational texts from several scientific disciplines. Readings for this spring will explore links between traditional theories of economics and genetics in the context of literary developments, and will include: Xenophon's Deconomimicus, Mendel's "Experiments on Plant Hybridization," Marx's Communist Manifesto, Darwin's Voyage of the Beagle, Swift's A Modest Proposal, Wharton's House of Mirth, and Joyce's Finnegans Wake.
Instructor(s): E. Patton; M. Roller
Area: Humanities
Writing Intensive.

Study of Women, Gender, Sexuality
AS.363.330. Gender & Sexuality beyond the Global West: The Poetics of "Nasty Women" in Archaic and Classical Greece. 3.0 Credits.
This course is meant to examine the depiction of ambitious and intelligent women in ancient Greek literature of the Archaic and Classical Periods. During this semester we will acquire the critical tools necessary to think about gender in antiquity, with a particular focus on Clytemnestra, Medea, and Helen. Students will gain historical background of ancient Greece, become familiar with a variety of theoretical approaches for understanding gender in antiquity, and develop strategies for reading ancient Greek texts, especially epic, lyric poetry, and tragedy. Special emphasis will be given to exchange, gender, and feminist theoretical frameworks. All course material will be in English.
Instructor(s): R. Franklin
Area: Humanities.

Program in Museums and Society
AS.389.205. Examining Archaeological Objects. 3.0 Credits.
This course considers the role of materials in the production, study and interpretation of objects by examining artifacts from the Johns Hopkins Archaeological Museum. Students will consider materials such as ceramics, stone, metal, glass, wood and textiles, and visit artists' studios to gain an understanding of historical manufacturing processes. M&S practicum course. Cross-listed with Archaeology, Near Eastern Studies, Classics, and History of Art.
Instructor(s): S. Balachandran
Area: Humanities.

AS.389.315. Ancient Color: The Technologies and Meanings of Color in Antiquity. 3.0 Credits.
What role did the colorful surfaces of sculptures, vessels and textiles play in the ancient world? We examine historical texts and recent scholarly and scientific publications on the technologies and meanings of color in antiquity, and use imaging and analytical techniques to study polychromed objects from the Johns Hopkins Archaeological Museum.
Instructor(s): S. Balachandran
Area: Humanities, Social and Behavioral Sciences.

AS.389.335. Recreating Ancient Greek Ceramics. 4.0 Credits.
This hands-on course in experimental archaeology brings together undergraduate and graduate students across disciplines to study the making of Athenian vases. Students work closely with expert ceramic artists, and in consultation with art historians, archaeologists, art conservators, and materials scientists to recreate Greek manufacturing processes.
Instructor(s): S. Balachandran
Area: Humanities.

Cognitive Science
http://www.cogsci.jhu.edu

Cognitive science is the study of the human mind and brain, focusing on how the mind represents and manipulates knowledge and how mental representations and processes are realized in the brain. Conceiving of the mind as an abstract computing device instantiated in the brain, cognitive scientists endeavor to understand the mental computations underlying cognitive functioning and how these computations are implemented by neural tissue. Cognitive science has emerged at the interface of several disciplines. Central among these are cognitive psychology, linguistics, and portions of computer science and artificial intelligence; other important components derive from work in the neurosciences, philosophy, and anthropology. This diverse ancestry has brought into cognitive science several different perspectives and methodologies. Cognitive scientists endeavor to unite such varieties of perspectives around the central goal of characterizing the structure of human intellectual functioning. It is this common object of inquiry that integrates traditionally separate disciplines into the unified field of cognitive science.

Programs in cognitive science at Johns Hopkins University reflect the interdisciplinary nature of the subject, requiring the student to approach the study of the mind/brain from several different investigative perspectives. Programs in cognitive science draw on courses offered by several other departments as well.
Facilities
The department is located in Krieger Hall. Laboratory and office space is provided for graduate students. The department’s research facilities are provided by the following laboratories:

- Language and Cognition Lab (Landau)
- Language Acquisition Lab (Legendre)
- Computational Psycholinguistics Lab (Linzen)
- Cognitive Neuroscience Lab (McCloskey)
- Cognitive and Brain Sciences Lab (Rapp)
- Semantics Lab (Rawlins)
- Computational Linguistics Lab (Smolensky)
- Phonetics/Phonology Lab (Wilson)
- Computational Cognition, Vision, and Learning Group (Yuille)
- Integrated Experimental/Theoretical Grammar Research (IGERT) Lab and Library

Department members also conduct research in the F.M. Kirby Center for Functional Brain Imaging at the Kennedy Krieger Institute and in other laboratories at Johns Hopkins School of Medicine.

Undergraduate Programs
Our cognitive science undergraduate program reflects the interdisciplinary nature of the field, allowing students to approach the study of the mind and brain from multiple perspectives. Students gain broad knowledge of the field as a whole, plus a greater depth of the understanding in two of the sub-disciplines within the field. Training emphasizes not only learning about the principal theories and evidence, but also development of the conceptual and practical skills needed for understanding and conducting theoretical and empirical work in the field.

Our department offers a B.A. in Cognitive Science as well as a Linguistics Minor (p. 158).

B.A. in Cognitive Science
Also see Requirements for a Bachelor’s Degree (p. 7).

Cognitive Science Major Requirements
The required courses for cognitive science majors are divided into five general areas, as described below. The program is structured so as to ensure some exposure to each of the five areas. In addition, it provides in-depth training in two of the areas, deemed focal areas, chosen by the student. Majors in cognitive science thus acquire a broad perspective which will enable them to situate particular research disciplines within the overall study of the mind/brain.

Areas of Focus: Students must take courses in all five focal areas; however, two focal areas must be chosen in which a greater selection of courses is required. The three focal areas not chosen may be referred to as ‘non focal’ areas for advising purposes. Courses offered by our department and other affiliated departments (e.g., Departments of Psychological and Brain Sciences, Philosophy, Computer Science, Neuroscience, etc.) may be used to satisfy the requirements for these areas. Examples of courses that satisfy the requirements for each area can be found on our website. (http://cogsci.jhu.edu/undergraduate/cognitive-science-major) However, please note that courses change over time, and some courses are not offered every year. The Director of Undergraduate Studies (http://advising.jhu.edu/completing-your-degree/directors-of-undergraduate-studies) can answer questions about which courses qualify for each focal area.

- Cognitive Psychology/Neuropsychology
- Linguistics
- Computational Approaches to Cognition
- Neuroscience
- Philosophy of Mind

B.A. Coursework
The below requirements are for students who entered in Fall 2018 or after. Students who entered prior to Fall 2018 should refer to the academic catalog from the year they entered (http://e-catalog.jhu.edu/archive). Students who entered prior to Fall 2018 may follow the new Math Option B or the old Math Option B.

Two Focal Areas, see areas above
Four courses in each of the two selected focal areas. Research, readings, and practica courses do not qualify.
At least two courses in each focal area must be at the 300-600 level. *

Three 'Non-Focal' Areas
One course at any level from each of the three non-focal areas. Research, readings, and practica courses do not qualify.

Additional Upper-Level Elective Courses
Nine credits at the 300-600 level, chosen from any of the five areas or other cognitive science offerings. **

Math Requirement (Option A or B)
Math Option A: Any two of the following courses:

- AS.110.106 Calculus I (Biology and Social Sciences) or AS.110.107 Calculus II (For Biological and Social Science)

- AS.110.109 Calculus II (For Physical Sciences and Engineering) or AS.110.113 Honors Single Variable Calculus
- AS.110.201/212 Linear Algebra
- or EN.553.291 Linear Algebra and Differential Equations
- or AS.150.118 Introduction to Formal Logic
- or AS.150.420 Mathematical Logic I
- or AS.050.370 Mathematical Models of Language
- or AS.050.371 Bayesian Inference
- or AS.050.372 Foundations of Neural Network Theory
- EN.553.171 Discrete Mathematics

Math Option B: Statistics Sequence †

* For students with Linguistics as one of their focal areas, one intermediate or advanced foreign language course may be used to partially satisfy the upper-level course requirement for that area and one other intermediate or advanced foreign language course may be used to partially satisfy the Additional Upper-Level Elective Courses requirement.

** For students with Linguistics as one of their focal areas, one intermediate or advanced foreign language course may be used to partially satisfy the upper-level course requirement for that area and one other intermediate or advanced foreign language course may be used to partially satisfy the Additional Upper-Level Elective Courses requirement.

† For students with Linguistics as one of their focal areas, one intermediate or advanced foreign language course may be used to partially satisfy the upper-level course requirement for that area and one other intermediate or advanced foreign language course may be used to partially satisfy the Additional Upper-Level Elective Courses requirement.
† Up to three credits of cognitive science research, readings, or practica may be applied to the Additional Upper-Level Elective Courses requirement.

‡ For students with Cognitive Psychology/Neuropsychology as one of their focal areas, Math Option B is required and should be completed, if possible, by the end of the sophomore year.

§ Students who would like to substitute a different statistics course for one of these two Math Option B courses should consult with their Cognitive Science faculty adviser.

Additional Cognitive Science Major Information

• Departmental requirements may not be taken Satisfactory/Unsatisfactory, with the exception of research and practica.

• A grade of C- or better must be earned in all major requirements.

Sample Program

The below sample program demonstrates how a student with the focal areas (p. 157) of Cognitive Psychology/Neuropsychology and Linguistics might complete the Cognitive Science major requirements in four years. In this scenario, the student has not placed out of any foreign language requirements. Each student's path through the program will have variation depending on the two focal areas they choose to pursue within the major.

Practicum in Language Disorders

In addition to having numerous research opportunities year-round, our department also offers AS.050.318 Practicum in Language Disorders-Community Based Learning (also listed as AS.080.400 Research Practicum: Language Disorders-Community Based Learning in the Department of Neuroscience) to its majors. Each fall and spring semester two qualified upperclassmen may enroll in this practicum and have the unique opportunity to learn about adult aphasias, be trained in supportive communication techniques, and work as a communication partner with an individual with aphasia throughout the semester at SCALE (http://www.scalebaltimore.org), a local aphasia support non-profit organization.

Departmental Honors

To receive Honors in Cognitive Science, graduating seniors must have a major GPA of 3.5 or higher and complete an Honors Clearance (http://advising.jhu.edu/student-roadmap/seniors/honors) with the department's Director of Undergraduate Studies (http://advising.jhu.edu/completing-your-degree/directors-of-undergraduate-studies)'s approval. Only courses directly applied to a student's cognitive science major, including math and foreign language requirements, will be included in the major GPA calculation. All other elective courses should be excluded from the major GPA calculation. If the GPA requirement is met, the departmental honors will appear on the student's transcript and will be indicated in that year's Commencement program.

Excellence in Cognitive Science Award

Each year at Commencement, a cognitive science graduating senior with a stellar academic and research record. The department's faculty make nominations and the Director of Undergraduate Studies announces the winner. This honor is accompanied by a $500 award.

Minor in Linguistics

A minor in linguistics is available to undergraduates majoring in any department, except for cognitive science majors who choose linguistics as a focal area. Students intending to minor in linguistics should declare their intention, preferably by the beginning of junior year. A grade of C- or better must be earned in all minor requirements.

Linguistics Minor Requirements

Foreign Language

One foreign language through the intermediate level OR two foreign languages at the elementary level.

Linguistics Courses

Six courses in linguistics that fall under the linguistics focal area

Four of the required six linguistics courses must be at the 300-level or above, excluding research and readings.
Graduate Programs
(For precise and up-to-date information on these M.A. and Ph.D. graduate programs, visit www.cogsci.jhu.edu/graduate.)

Masters of Art Program
MA Requirements for Admission
This intensive, one-year M.A. program is intended to appeal to students who have undergraduate degrees in linguistics, psychology, computer science, neuroscience, and other sub-disciplines of cognitive science. Prominent in this program is the emphasis of faculty mentorship of the students during the application period and throughout the duration of the program. There are two distinct tracks in the M.A. program: Course Track and Research Track. Besides traditional required admissions materials, the Research Track is the only track that has a coursework prerequisite: three credits of undergraduate research or equivalent. Please visit the link at the beginning of this section to find more detailed information on the program and specific admissions requirements.

MA Degree Requirements
Completion of this M.A. program strengthens the qualifications of students who will be applying for Ph.D. programs and also provides career opportunities in areas including science writing, research coordinator, human factors IT, and community college teaching, among others.

Courses may not be double-counted. Each course may only be used to satisfy a single degree requirement, even if it may qualify for more than one requirement.

Course Track: Students in this track must complete 12 courses with a grade of B- or better. See the course requirements below. Additionally, MA students are expected to take a research ethics course (AS.360.625 Responsible Conduct of Research). See the coursework requirements below. As the capstone event for a student’s completion of the program, he/she must produce a portfolio of accomplishments from the program (e.g., course assignments, seminar papers) overseen by the faculty adviser, prepare a reading list and set of discussion questions, and present what has been learned from the year of study at an Oral Presentation supervised by two faculty members.

MA Course Track Requirements
Coursework: Seven courses, 600 or above
Lab or Research Seminars: Two courses, 800-level
Directed Readings and/or Research: Three courses taken throughout the program, including one during Intersession. Below are the course numbers:

<table>
<thead>

<td>Responsible Conduct of Research</td>
</tr>
</tbody>
</table>

Capstone: Portfolio and Oral Exam

* Up to three courses may be substituted by 300/400-level courses with a mentor’s written permission.

Research Track: Students in this track must complete 12 courses. Students must work on full-time research overseen by their faculty adviser and must complete maintain a B- or better in all coursework. Additionally, MA students are expected to take a research ethics course (AS.360.625 Responsible Conduct of Research). See the course requirements below. At the end of the program, a student in the research track must produce and defend research paper that is approved by the faculty adviser.

Lab or Research Seminar: Two courses, 800-level

Additional Courses: Three courses, 600-level or above

Capstone: Research Paper and Oral Defense

Financial Support
No regular funding is provided to students in the M.A. program, though a 50% reduction in tuition is offered to students with JHU undergraduate degrees. Students will be encouraged to seek funding from both internal and external sources.

Doctoral Program
PhD Requirements for Admission
A program of study leading to the Ph.D. degree is open to students with a bachelor’s or master’s degree in cognitive science or one of the several areas that contribute to it. Prospective doctoral students would be well advised to take courses in cognitive psychology, linguistics, and computer science. Some preparation in the foundations of contemporary neuroscience is also an asset, as is training in the philosophical issues surrounding the study of mind and consciousness. However, there are no fixed prerequisites (in the form of specific required courses) for admission to the doctoral program. The Department of Cognitive Science invites inquiries from students who are prepared in any of the related fields and who are interested in extending their work to the broader study of the mind/brain.

PhD Degree Requirements
The Department of Cognitive Science’s Ph.D. requirements consist of coursework, foreign language competence, teaching experience, and research papers. The requirements are designed to meet the following goals:

• Depth: Students become expert in their primary area of research interest and also are prepared so that they will be competitive for academic positions in one of the traditional disciplines. Students take 8 - 10 advanced courses that the student, in conjunction with his/her advisory committee, determines to be important for achieving expertise in a chosen research area and marketplace competitiveness in one of the traditional areas: cognitive psychology/neuropsychology, computer science or linguistics.

• Breadth: Students develop the ability to understand, appreciate and critically evaluate work in the various sub-disciplines of cognitive science by taking a selection of courses, two each in the areas of cognitive psychology/neuropsychology, computation and linguistics and one each in philosophy and cognitive neuroscience. Students may place out of breadth courses based on undergraduate
coursework and (for certain courses) based on examination. It is not uncommon for a student to place out of two breadth requirements.

- **Integration**: Students learn to integrate theory and method across sub-disciplines through specially-designed integrative courses and regular seminars involving the entire department.

**(Neuro)psychology, Linguistics, and Computational Approaches Track**

Courses may not be double-counted. Each course may only be used to satisfy a single degree requirement, even if it may qualify for more than one requirement.

**Breadth**

**Cognitive Neuroscience**
One course

**Philosophy**
One course in philosophy of mind, language, or science

**Cognitive Psychology/Neuropsychology**

</tbody>
</table>

**Computational Cognitive Science Track Requirements**

Courses may not be double-counted. Each course may only be used to satisfy a single degree requirement, even if it may qualify for more than one requirement.

**Breadth**

3-4 courses in the Department of Cognitive Science that collectively develop sophistication in theoretical and (human) experimental approaches to cognitive science. At least one course must be in each language and vision.

- Language (at least 1 course)
- Vision (at least 1 course)

**Basic Computation**

Three courses. Below are some examples of courses that apply:

**Research Papers & Dissertation**

Emphasis is placed on producing two research papers prior to writing a dissertation. These two research papers are typically presented at conferences and often lead to separate journal publications. Students are encouraged to incorporate the two research papers into their dissertation.

- **Nov. 1 (2nd year)** First Research Paper*, completion of which typically marks achievement of an M.A. within the Ph.D. program. (Some additional coursework may be required to complete the MA.)
- **May 1 (3rd year)** Second Research Paper*, completion of which signals readiness to discuss a career path with an adviser
- **May 1 (4th year)** Dissertation Proposal due detailing a significant research project and the methods to be used. Student must pass oral defense.
- **Aug. 1 (5th year)** Graduate Board Oral Exam defending a Ph.D. Dissertation that presents an original contribution to some area(s) of cognitive science in a format approaching publication standards

* The two research papers must each employ a different research methodology within cognitive science, e.g., theoretical linguistics and psychology, supervised by two appropriate faculty members.

**Financial Support**

The department provides competitive levels of funding for Ph.D. students covering tuition and living expenses. Research expenses, including some support for travel to present papers at scholarly meetings, are also provided. If a student maintains an academic good standing, funding is extended up to five years of total support. Students are encouraged to apply for external graduate fellowship opportunities (NSF, NIH, DoD, etc.). As funded entities, our graduate students are expected to engage in full-time research during the summer months and the January intersession in addition to their regular coursework, TA responsibilities, and participation in academic departmental talks and events.

For current faculty and contact information go to [http://cogsci.jhu.edu/people](http://cogsci.jhu.edu/people)

**Faculty**

- **Chair**
  - Géraldine Legendre
  - Professor: syntax, optimality theory, Romance and Balkan morphology and syntax, acquisition of syntax.

- **Professors**
  - Barbara Landau
  - Dick and Lydia Todd Faculty Development Professor: language acquisition, cognitive development, spatial representation, acquisition of the lexicon.

  - Michael McCloskey
  - Professor: cognitive neuropsychology, vision, spatial and lexical representation, foundations of cognitive science.

  - Brenda Rapp
  - Professor: cognitive neuropsychology, spelling, spoken language production, spatial frames of reference, reading and neural bases of recovery of function.

  - Paul Smolensky

  - Alan Yuille
  - Bloomberg Distinguished Professor: computational models of vision, mathematical models of cognition, and artificial intelligence and neural networks.

- **Associate Professors**
  - Kyle Rawlins
  - Associate Professor: natural language semantics and pragmatics, the syntax/semantics interface, syntax.

  - Colin Wilson
  - Associate Professor: theoretical phonology, experimental phonology, computational cognitive science.

- **Assistant Professors**
  - Michael Bonner
  - Assistant Professor: cognitive neuroscience, computational neuroscience, vision, semantic memory, navigation, machine learning, artificial intelligence, neural networks, statistical modeling of neural representations.

  - Tal Linzen
  - Assistant Professor: human sentence comprehension, computational psycholinguistics.

- **Professor Emeritus**
  - Luigi Burzio
  - theoretical phonology, morphology, and syntax, Romance linguistics.

- **Secondary Appointments**
  - Marina Bedny
  - Assistant Professor (Psychological and Brain Sciences): brain development and plasticity, cognitive neuroscience, concepts.

  - Howard Egeth
  - Professor: perception, attention, cognition, psychology, law.

  - Lisa Feigenson
  - Professor: cognitive development, numerical cognition.

  - Charles Firestone
  - Assistant Professor (Psychological and Brain Sciences): how perception enables and incorporates sophisticated processing typically associated with higher-level cognition.

  - Jonathan Flombaum
  - Associate Professor: visual perception, attention, cognition.

  - Steven Gross
  - Associate Professor (Philosophy): philosophy of language, philosophy of mind, metaphysics.

  - Justin Halberda
  - Professor: cognitive development, reasoning, language acquisition.

- **Joint Appointments**
  - Dana Boatman
AS.050.102. Language and Mind. 3.0 Credits.
Introductory course dealing with theory, methods, and current research topics in the study of language as a component of the mind. What it is to "know" a language: components of linguistic knowledge (phonetics, phonology, morphology, syntax, semantics) and the course of language acquisition. How linguistic knowledge is put to use: language and the brain and linguistic processing in various domains. Cross-listed with Neuroscience and Psychology.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.105. Introduction to Cognitive Neuropsychology. 3.0 Credits.
When the brain is damaged or fails to develop normally, even the most basic cognitive abilities (such as the ability to understand words, or perceive objects) may be disrupted, often in remarkable ways. This course explores a wide range of cognitive deficits, focusing on what these deficits can tell us about how the normal brain works. Topics include brain anatomy and causes of brain damage, reading and spelling deficits, unilateral spatial neglect, hemispheric disconnection, cortical plasticity, and visual perception of location and orientation. Students read primary sources: journal articles that report deficits and discuss their implications.
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.107. Language and Advertising. 3.0 Credits.
Advertising pervades our culture; interactions with advertising are an unavoidable fact of modern life. This class uses tools from linguistics and cognitive science to analyze these interactions, and understand the impact of advertising on its viewers. A central theme is to treat ads as communicative acts, and explore the consequences – what can theories of communication (from linguistics, psychology, and philosophy) tell us about ads? How do ads use central features of human cognition to accomplish their aims? Do ads manipulate, and if so, how successfully? The theories of communication we explore include Gricean pragmatics, theories of speech acts, linguistic theories of presuppositions, and more. Students will collect, analyze, and discuss advertisements in all mediums.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.128. Freshmen Seminar: Born to Talk: Language in the Human Mind. 3.0 Credits.
Human infants learn their native language in less than 5 years with no direct teaching from adults. This mysterious fact is the basis of the modern study of language as a cognitive and computational system. In this seminar we will review major findings about how children learn the sound system, words, and grammar of their first language, focusing on how the evidence reveals the role of biological structures and environmental influences on language development. Weekly readings will include summary texts, original research articles, and coverage of language science in the popular media. Although language development is a topic of real importance to parents, educators, and policy-makers, it is often difficult to disseminate findings in a way that the public can understand. In weekly writing assignments, students will practice "translating" scientific reasoning for a general audience. Freshman Seminar
Instructor(s): S. Lewis
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.202. Introduction to Computational Cognitive Science. 3.0 Credits.
This course is an introduction to computational approaches to the study of the mind. The approaches discussed include symbolic structured representations, probabilistic inference and artificial neural networks, as applied to concept learning, language and reasoning. Some programming experience (e.g., AS.250.205.01 Introduction to Computing or equivalent) and mathematical preparation (e.g., AS.110.107 Calculus II or equivalent) are highly recommended.
Instructor(s): T. Linzen
Area: Quantitative and Mathematical Sciences.

AS.050.203. Cognitive Neuroscience: Exploring the Living Brain. 3.0 Credits.
This course surveys theory and research concerning how mental processes are carried out by the human brain. Currently a wide range of methods of probing the functioning brain are yielding insights into the nature of the relation between mental and neural events. Emphasis will be placed on developing an understanding of both the physiological bases of the techniques and the issues involved in relating measures of brain activity to cognitive functioning. Methods surveyed include electrophysiological recording techniques such as EEG, ERP, single/multiple unit recording and MEG; functional imaging techniques such as PET and fMRI; and methods that involve lesioning or disrupting neural activity such as cortical stimulation, animal lesion studies, and the study of brain-damaged individuals. (Co-listed as AS.080.203 in Neuroscience.) It's strongly recommended that students have background in one of the following courses: AS.050.101 OR AS.050.105 OR AS.200.141.
Instructor(s): Staff
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.206. Bilingualism. 3.0 Credits.
Do children get confused when they grow up exposed to more than one language? Is it possible to forget one's native language? Are the first and second language processed in different areas of the brain? How does brain damage impact the different languages of a polyglot? Does knowing a second language affect non-linguistic cognitive processing? This course will address questions such as these through an exploration of mental and neural processes underlying bilingual and multilingual language processing.
Instructor(s): J. Yarmolinskaya
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.235. Theory of Mind and the Development of Language. 1.0 Credit.
The course offers an overview of recent research on language and social cognition. It focuses on Theory of Mind (ToM) and the development of language. Theory of Mind is the ability to attribute mental states to oneself and others and to understand that others have beliefs, desires, and intentions that are different from one's own. The development of human language is closely related to the development of ToM.
Instructor(s): A. Tamm
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.240. World of Language. 3.0 Credits.
This hands-on course exposes students to the fascinating variety — and uniformity — to be found among the world's 6000 languages through group lectures on a variety of topics as well as actual linguistic fieldwork conducted in small groups with a native speaker of a language unknown to the participants. This course is a good preparation for upper-division linguistics courses.
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.312. Cognitive Neuroimaging Methods in High-Level Vision. 3.0 Credits.
This course is an advanced seminar and research practicum course. It will provide the opportunity to learn about fMRI methods used in the field of vision science and for students to have hands-on experience to develop, design and analyze a research study on topics in the cognitive neuroscience field of high-level vision. In the first part of the course students will read recent fMRI journal papers and learn about common fMRI designs and analysis methods; in the second part of the course students will conduct a research study as a group to address a research question developed from readings. Students are expected to write a paper in a journal article format at the end of the course and to present their results in front of the class. Research topics will vary but with special focus on topics in object, scene and space recognition. Cross-listed with Neuroscience and Psychology. instructor's permission required.
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

When we think about our ability to see, we tend to think about our eyes, but in fact vision happens mostly in the brain. This course explores the remarkable perceptual deficits that occur when the visual regions of the brain are damaged or fail to develop normally, focusing on what these perceptual malfunctions tell us about normal visual perception. Topics include visual system anatomy and physiology; functional specialization in the lower visual system as revealed by cerebral achromatopsia (color blindness resulting from brain damage) and akinetopsia (impaired motion perception); cortical plasticity in the visual system; spatial deficits in perception and action; and the implications of high-level visual deficits, including prosopagnosia (impaired face recognition), Charles Bonnet syndrome (complex visual hallucinations in blind areas of the visual field), blindsight (accurate responding to visual stimuli despite apparent inabilty to see them), and Anton's syndrome (denial of blindness).
Prerequisites: AS.050.105 OR AS.050.203 OR AS.080.203 OR AS.050.101 OR AS.200.110 OR AS.200.211 or instructor's permission.
Instructor(s): M. McCloskey
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.317. Semantics I. 3.0 Credits.
This is an introduction to the study of meaning in natural language. We address the conceptual and empirical issues in semantic theory and introduce some formal machinery that has been developed to deal with such problems. After discussing foundational questions, we turn to formal semantics and pragmatics, as well as their interfaces with syntax and the lexicon. Specific topics include presupposition, type-driven composition, quantification, lexical aspect, argument structure, and lexical representations of meaning.
Prerequisites: AS.050.107 OR AS.050.102 or instructor's permission.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.318. Practicum in Language Disorders- Community Based Learning. 2.0 Credits.
This course provides the opportunity to learn about adult aphasias, language disorders which are one of the most common consequences of stroke. You will receive training in supportive communication techniques and work as a communication partner with an individual with aphasia for two hours per week. Three class meetings for orientation and reading assignments will be held on campus; training and practicum will be conducted at a local aphasia support center. Independent mode of transportation required. Co-listed as AS.080.400 in Neuroscience. Additional information can be found on the Department of Neuroscience's website: http://krieger.jhu.edu/neuroscience/academics/practicums/practicum-in-language-disorders. Interested students should contact the instructor. Find out more about the practicum site at http://www.scalebaltimore.org.
Prerequisites: A- or Better in AS.050.105 OR AS.050.203 OR AS.080.203 OR AS.050.311 or instructor's permission.
Instructor(s): B. Rapp
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.320. Syntax I. 3.0 Credits.
Introduces the basic methods and means of analysis used in contemporary syntax investigations, practicing with data from different languages. Also offered as AS.050.620.
Prerequisites: AS.050.102 OR AS.050.240 or equivalent/see instructor.
Instructor(s): G. Legendre
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.325. Phonology I. 3.0 Credits.
An introduction to the basic principles underlying the mental representation and manipulation of language sounds and their relation to human perception and vocal articulation: how units of sound are both decomposable into elementary features and combined to form larger structures like syllables and words. The role of rules and constraints in a formal theory of phonological competence and in accounting for the range of variation among the world's languages. Also offered as AS.050.625.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.326. Foundations of Cognitive Science. 3.0 Credits.
This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion. Also offered as AS.050.626.
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences Writing Intensive.

AS.050.332. Developmental Cognitive Neuroscience. 3.0 Credits.
In-depth examination of the current literature on cognitive development in the context of developmental cognitive neuroscience. Please see course prerequisites. Meets with AS.050.632.
Prerequisites: AS.050.101 OR AS.050.339 OR AS.200.132 OR AS.050.105 OR Instructor's Permission.
Instructor(s): B. Landau
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.333. Psycholinguistics. 3.0 Credits.
This course provides a broad survey of current research on language processing in adult native speakers and language learners. Topics include speech perception, word recognition, and sentence production and comprehension. We will discuss the nature of representations that are being constructed in real-time language use, as well as how the mental procedures for constructing linguistic representations could be studied by various behavioral and physiological measures. Also offered as AS.050.633.
Prerequisites: AS.050.102 OR AS.050.240 OR AS.050.317 OR AS.050.320 OR AS.050.325 or instructor's permission.
Instructor(s): E. Atkinson
Area: Natural Sciences, Social and Behavioral Sciences Writing Intensive.

AS.050.339. Cognitive Development. 3.0 Credits.
This is a survey course in developmental psychology designed for individuals with some basic background in psychology or cognitive science, but little or none in development. The course is strongly theoretically oriented, with emphasis on issues of nature, and development psychology as well as relevant empirical evidence. The principle focus will be early development, i.e., from conception through middle childhood. The course is organized topically, covering biological and prenatal development, perceptual and cognitive development, the nature and development of intelligence, and language learning.
Instructor(s): J. Yarmolinskaya
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.344. Writing Matters: Written Language and the Brain. 3.0 Credits.
Written language is undoubtedly one of humanity's greatest inventions, providing the basis for most all other human innovations. What are the capacities of the human mind that enable written language? How does literacy change the brain? Do differences in writing systems affect how humans learn and process written language? These and other questions will be addressed by examining evidence from experimental studies of individuals with typical written language processing, as well as neuropsychological studies of brain-injured individuals. Throughout the course you will build and revise a cognitive architecture, a theory of how humans process written language, based on the current understanding of the cognitive and neural bases of literacy.
Prerequisites: AS.050.101 OR AS.050.105 OR AS.050.203 OR AS.080.203 OR AS.200.141 or instructor's permission.
Instructor(s): R. Wiley
Area: Natural Sciences, Social and Behavioral Sciences.
AS.050.345. Cognitive and Neural Basis of Executive Control. 3.0 Credits.
This course discusses the concept of executive control, a general class of functions that support more specialized cognitive operations such as language and problem solving, and their neural underpinnings. Discussion will include classification of executive functions, relationship to working memory, domain-generality or specificity of executive control functions, and experimental, neural, and computational approaches to exploring components of executive control, with a special emphasis on the role of cognitive control in the processing of language. The goal of this course is two-fold: to teach students the basic knowledge regarding cognitive and neural mechanisms of executive control, and more importantly to encourage them to put that knowledge to use by asking them to think critically about the readings, to participate in interactive discussions with questions they bring in each week based on the readings assigned for that week, and finally to propose one well thought-out question at the end of the semester and to write a short proposal on how to explore that question. As such, the course puts little emphasis on memorization and a strong emphasis on analytical abilities and integration.
Prerequisites: AS.200.207(C) OR AS.050.333(C) OR EN.550.111(C)
Instructor(s): N. Nozari
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.346. Decoding the Brain: Multivariate Analysis in Cognitive Neuroscience. 3.0 Credits.
Neural decoding through Machine Learning has become an ever more important tool for neuroscientists to understand how the brain processes information. This course introduces students to this exciting field by combining seminar style lectures and hands-on practice sessions. The course will be organized around a number of corner-stone applications in cognitive neuroscience, including face recognition, neural representation of word meaning, decoding mental states. During the practice sessions, students will learn to replicate the published findings with off-the-shelf software (prior programming knowledge could be helpful but not required). By the end of the course, the students will be familiar with the principal methods and applications of neural decoding, and will acquire hands-on experience and practical skills of data analysis.
Prerequisites: EN.553.111 OR EN.553.112 OR EN.550.111 OR EN.550.112 OR equivalent.
Instructor(s): Y. Tao
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.358. Language & Thought. 3.0 Credits.
Have you ever wondered about the relationships between language and thought? Philosophers, linguists, psychologists, evolutionary theorists and cognitive scientists have too and this course will survey the current thinking on this matter. Classical papers such as those by Whorf and Sapir, more recent philosophical papers by people such as Fodor and Dennett, and recent empirical work by linguists and psycholinguists on the relationships between language and thinking in development and in adults will be covered. Discussions will focus on the theoretically possible relationships between language and thought and the empirical data that speak to these. Juniors and seniors only. Freshmen and sophomores by permission of instructor only.
Instructor(s): B. Landau
Area: Humanities, Natural Sciences, Social and Behavioral Sciences.

AS.050.371. Bayesian Inference. 3.0 Credits.
This course introduces techniques for computational modeling of aspects of human cognition, including perception, categorization, and induction. Possible topics include maximum likelihood and Bayesian inference, structured statistical models (including hierarchical and graphical models), nonparametric models. The course emphasizes the close connections among data analysis, theory development, and modeling, with examples drawn from language and vision. Also offered as AS.050.671.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.372. Foundations of Neural Network Theory. 4.0 Credits.
Introduction to continuous mathematics for cognitive science, with applications to biological and cognitive network models: real and complex numbers, differential and integral multi-variable calculus, linear algebra, dynamical systems, numerical optimization. Meets with AS.050.672.
Prerequisites: AS.110.106 OR AS.110.108
Instructor(s): P. Smolensky
Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.050.373. Neural-Network Modeling of Learning, Language and Cognition. 3.0 Credits.
Connectionism is an approach to Artificial Intelligence computation inspired by how the brain, a network of neurons, works. A connectionist model (or artificial neural network) is a collection of simple processing units that are massively interconnected with each other, and that represents knowledge in its connection pattern. Each processing unit has highly limited computational power but the collection of units as a whole has great computational power (as strong as the Turing machine). Connectionist models have been used to study diverse aspects of human cognition: attention, pattern recognition, memory, categorization, language processing, learning, and decision making. In this seminar, students will learn important concepts, principles, algorithms, and practical skills in connectionist modeling by actually doing connectionist modeling. Students will first play with toy problems to learn various types of connectionist modeling techniques, and will then carry out a team research project. In addition to practical skills, students will learn to be explicit about their assumptions and reasoning when making their (conceptual or implemented) models and to make new observable predictions that can be tested in experiments. Recommended Course Background: Experience with some programming language. Exceptions can be made by seeking instructor’s permission.
Instructor(s): P. Cho
Area: Natural Sciences, Quantitative and Mathematical Sciences.
AS.050.375. Probabilistic Models of the Visual Cortex. 3.0 Credits.
The course gives an introduction to computational models of the mammalian visual cortex. It covers topics in low-, mid-, and high-level vision. It briefly discusses the relevant evidence from anatomy, electrophysiology, imaging (e.g., fMRI), and psychophysics. It concentrates on mathematical modeling of these phenomena taking into account recent progress in probabilistic models of computer vision and developments in machine learning, such as deep networks.
Prerequisites: AS.110.106 OR AS.110.108
Instructor(s): A. Yuille
Area: Quantitative and Mathematical Sciences.

AS.050.501. Readings in Cognitive Science/Freshmen. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.502. Readings in Cognitive Science-Freshmen. 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.503. Research in Cognitive Science/Freshmen. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.504. Research Cognitive Science-Freshmen. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.505. Readings in Cognitive Science/Sophomores. 1.0 - 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.506. Readings Cognitive Science-Sophomores. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.507. Research in Cognitive Science/Sophomores. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.508. Research Cognitive Science - Sophomores. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.509. Cognitive Science Internship. 1.0 Credit.
Research current topics in cognitive science.
Instructor(s): B. Rapp.

AS.050.511. Readings in Cognitive Science/Juniors. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.512. Readings Cognitive Science-Juniors. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.513. Research in Cognitive Science/Juniors. 0.0 - 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.514. Research Cognitive Science - Juniors. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.515. Readings in Cognitive Science/Seniors. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.516. Readings Cognitive Science - Senior. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.517. Research in Cognitive Science/Seniors. 3.0 Credits.
Research current topics in cognitive science.
Instructor(s): Staff.

AS.050.518. Research Cognitive Science - Seniors. 0.0 - 3.0 Credits.
Permission Required.
Instructor(s): Staff.

AS.050.599. Research-Cognitive Science. 0.0 - 3.0 Credits.
Instructor(s): Staff.

Instructor’s permission required. (Also offered as AS.050.312.)
Instructor(s): S. Park
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.617. Semantics I.
Also offered as AS.050.317. This is an introduction to the study of meaning in natural language. We address the conceptual and empirical issues in semantic theory and introduce some formal machinery that has been developed to deal with such problems. After discussing foundational questions, we turn to formal semantics and pragmatics, as well as their interfaces with syntax and the lexicon. Specific topics include presupposition, type-driven composition, quantification, lexical aspect, argument structure, and lexical representations of meaning.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.620. Syntax I.
Also offered as AS.050.320.
Instructor(s): G. Legendre.

AS.050.622. Semantics II.
Co-taught with AS.050.322. This course extends the material in AS.050.317 to cover advanced but central topics in semantic and pragmatic theory, focusing on intensional semantics (especially possible world semantics and situation semantics). Empirical domains of interest in this class include modality, tense, grammatical aspect, conditionals, attitude and speech reports, questions, and free choice phenomena. Three core theoretical issues addressed in this class are the nature of a compositional account of the above intensional phenomena, the representations of possibilities involved, and the role of the syntax/semantics/pragmatics interface in such an account.
Prerequisites: AS.050.617
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.625. Phonology I.
Also offered as AS.050.325. An introduction to the basic principles underlying the mental representation and manipulation of language sounds and their relation to human perception and vocal articulation: how units of sound are both decomposable into elementary features and combined to form larger structures like syllables and words. The role of rules and constraints in a formal theory of phonological competence and in accounting for the range of variation among the world's languages.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.
Also offered as AS.050.326. This course explores general issues and methodologies in cognitive science through the reading of classic works (from Plato and Kant through Skinner and Turing) and recent research articles to begin construction of a coherent picture of many seemingly divergent perspectives on the mind/brain. Recent brain-based computational models serve to focus discussion.
Instructor(s): P. Smolensky
Area: Natural Sciences, Social and Behavioral Sciences
Writing Intensive.

Also offered as AS.050.332. See description. In-depth examination of the current literature on cognitive development in the context of developmental cognitive neuroscience.
Instructor(s): B. Landau.

Also offered as AS.050.333. This course provides a broad survey of current research on language processing in adult native speakers and language learners. Topics include speech perception, word recognition, and sentence production and comprehension. We will discuss the nature of representations that are being constructed in real-time language use, as well as how the mental procedures for constructing linguistic representations could be studied by various behavioral and physiological measures.
Instructor(s): E. Atkinson
Writing Intensive.

Also offered as AS.050.339. This is a survey course in developmental psychology designed for individuals with some basic background in psychology or cognitive science, but little or none in development. The course is strongly theoretically oriented, with emphasis on issues of nature, and development psychology as well as relevant empirical evidence. The principle focus will be early development, i.e., from conception through middle childhood. The course is organized topically, covering biological and prenatal development, perceptual and cognitive development, the nature and development of intelligence, and language learning.
Instructor(s): J. Yarmolinskaya.

Also offered as AS.050.345. This course discusses the concept of executive control, a general class of functions that support more specialized cognitive operations such as language and problem solving, and their neural underpinning. Discussion will include classification of executive functions, relationship to working memory, domain-generality or specificity of executive control functions, and experimental, neural, and computational approaches to exploring components of executive control, with a special emphasis on the role of cognitive control in the processing of language. The goal of this course is two-fold: to teach students the basic knowledge regarding cognitive and neural mechanisms of executive control, and more importantly to encourage them to put that knowledge to use by asking them to think critically about the readings, to participate in interactive discussions with questions they bring in each week based on the readings assigned for that week, and finally to propose one well thought-out question at the end of the semester and to write a short proposal on how to explore that question. As such, the course puts little emphasis on memorization and a strong emphasis on analytical abilities and integration.
Instructor(s): N. Nozari.

AS.050.658. Language & Thought.
Have you ever wondered about the relationships between language and thought? Philosophers, linguists, psychologists, evolutionary theorists and cognitive scientists have too and this course will survey the current thinking on this matter. Classical papers such as those by Whorf and Sapir, more recent philosophical papers by people such as Fodor and Dennett, and recent empirical work by linguists and psycholinguists on the relationship between language and thinking in development and in adults will be covered. Discussions will focus on the theoretically possible relationships between language and thought and the empirical data that speak to these.
Instructor(s): B. Landau.

Also offered as AS.050.370. This course will be devoted to the study of formal systems that have proven useful in the cognitive science of language. We will discuss a wide range of mathematical structures and techniques and demonstrate their applications in theories of grammatical competence and performance. A major goal of this course is bringing students to a point where they can evaluate the strengths and weaknesses of existing formal theories of cognitive capacities, as well as profitably engage in such formalization, constructing precise and coherent definitions and rigorous proofs.
Instructor(s): K. Rawlins
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.671. Bayesian Inference.
Also offered as AS.050.371. This course introduces techniques for computational modeling of aspects of human cognition, including perception, categorization, and induction. Possible topics include maximum likelihood and Bayesian inference, structured statistical models (including hierarchical and graphical models), nonparametric models. The course emphasizes the close connections among data analysis, theory development, and modeling, with examples drawn from language and vision.
Instructor(s): C. Wilson
Area: Natural Sciences, Social and Behavioral Sciences.

AS.050.672. Foundations of Neural Network Theory.
Also offered as AS.050.372. Introduction to continuous mathematics for cognitive science, with applications to biological and cognitive network models: real and complex numbers, differential and integral multi-variable calculus, linear algebra, dynamical systems, numerical optimization.
Instructor(s): P. Smolensky.

The course gives an introduction to computational models of the mammalian visual cortex. It covers topics in low-, mid-, and high-level vision. It briefly discusses the relevant evidence from anatomy, electrophysiology, imaging (e.g., fMRI), and psychophysics. It concentrates on mathematical modelling of these phenomena taking into account recent progress in probabilistic models of computer vision and developments in machine learning, such as deep networks. Also offered as AS.050.375. Co-listed with Computer Science as EN.601.485.
Instructor(s): A. Yuille.

Directed readings on current topics in cognitive science. Instructor approval required.
Instructor(s): Staff.

AS.050.800. Directed Readings.
Guided independent readings in special fields of cognitive science.
Instructor(s): P. Smolensky.
Participants in this graduate seminar will read and discuss current research articles in cognitive neuropsychology of vision or language, and present their own research.
Instructor(s): M. McCloskey.

Permission required. Current issues and ongoing research on human cognition are discussed.
Instructor(s): B. Rapp.

A specialized research seminar for individuals researching language acquisition, cognitive development and the interface between language and cognition. Students must actively carry out empirical or theoretical research in these areas. Permission required.
Instructor(s): B. Landau.

AS.050.814. Research Seminar in Computer Vision.
This course covers advanced topics in computational vision. It discusses and reviews recent progress and technical advances in visual topics such as object recognition, scene understanding, and image parsing.
Instructor(s): A. Yuille.

Instructor(s): K. Rawlins.

Participants in this graduate seminar will read and discuss current research articles in language development and present their own research. Permission required.
Instructor(s): G. Legendre.

Discussion of current computational and experimental research on human language processing.
Instructor(s): T. Linzen.

A critical analysis of current issues and debates in theoretical syntax. Discussion of on-going research.
Instructor(s): G. Legendre.

AS.050.825. Research Seminar in Optimality Theory.
A specialized research seminar on constraint based theories of human language, including Optimality Theory, Harmonic Grammar, and Maximum Entropy models.
Instructor(s): G. Legendre.

Readings and research presentations on varying topics in mathematics, computation, and formal linguistics with bearing on cognitive science.
Instructor(s): C. Wilson.

AS.050.827. Research Seminar in Language Acquisition.
Focus is on current research in acquisition of syntax.
Instructor(s): G. Legendre.

This seminar will read on-going and recent papers on the cognitive neuroscience research of vision. Permission required.
Instructor(s): S. Park.

Topics range from mathematical analysis of neural networks to computational studies of linguistic structure. Focus is ongoing research and current literature.
Instructor(s): P. Smolensky.

AS.050.832. Research In Language Processes.
Current Topics in Human Language Processing, with discussion of recent developments in theory and experimental study. Permission required.
Instructor(s): A. Omaki.

Current topics in any area of cognitive science, including language and vision, with discussion of recent developments in theory, experimental study, and computational modeling.
Instructor(s): Staff.

AS.050.849. Teaching Practicum.
Permission required. Essential for Teaching Assistants.
Instructor(s): Staff.

Instructor permission required. Addresses professional issues such as research ethics, success on the job market and in an academic career, teaching and mentoring and differing professional standards in the sub-disciplines of cognitive science.
Instructor(s): G. Legendre.

Independent study. Intended for graduate students who have completed all degree requirements except for their dissertation but must remain or return to residency status in order to fulfill other obligations. Advisor or department approval required
Instructor(s): Staff.

Cross Listed Courses

Neuroscience

AS.080.203. Neuroscience: Cognitive. 3.0 Credits.
This course surveys theory and research concerning how the human brain carries out mental processes. The sections of this course correspond with the sections listed for AS.020.203. All sections will meet together on exams day and guest lecture days. Co-listed as AS.050.203 in Cognitive Science. It's strongly recommended that students have background in one of the following courses: AS.050.101 OR AS.050.105 OR AS.200.141.
Instructor(s): Staff
Area: Natural Sciences, Social and Behavioral Sciences.

AS.080.320. The Auditory System. 3.0 Credits.
This course will cover the neuroanatomy and neurophysiology of the human auditory system from the ear to the brain. Behavioral, electrophysiological, and neuroimaging methods for assessing peripheral and central auditory function will be discussed. Acquired and developmental disorders of auditory function will be reviewed using clinical case studies.
Prerequisites: AS.080.305 OR AS.080.203 OR AS.050.203 OR AS.200.141 OR AS.020.312 or permission of the instructor.
Instructor(s): D. Boatman
Area: Natural Sciences.
Psychological Brain Sciences
AS.200.336. Foundations of Mind. 4.0 Credits.
An interdisciplinary investigation into the innateness of concepts: perception, number, language, and morality, physics discussed. Evidence from animals, infants, patients, brains. Students collect data in sections investigating claims from the readings. Cross-listed with Cognitive Science and Philosophy.
Instructor(s): J. Halberda; L. Feigenson
Area: Social and Behavioral Sciences.

Music
AS.376.371. Introduction to Music Cognition. 3.0 Credits.
What underlies our aesthetic response to music? How and why are we able to identify certain sounds as music? To what extent are music and natural language similar? What is it about music that evokes such powerful emotions such as happiness and sadness? What is unique to musical creativity? Examining such questions from cognitive science, neuroscience, psychology, and philosophical perspectives, this course explores relevant theories and research in the emerging domain of music perception and cognition. Students will complete a final research paper on the topic of their choice that integrates the course material.
Instructor(s): M. Lopez-Gonzalez
Area: Natural Sciences, Social and Behavioral Sciences.

AS.376.372. Topics in Music Cognition. 3.0 Credits.
This course explores the similarities and differences between music and language, the effects of musical training on cognitive development, and the expressive power of music, with an introduction to music and its role in film. We will read relevant research and theory on these topics from cognitive science, neuroscience, psychology, musicology, and philosophical perspectives.
Instructor(s): M. Lopez-Gonzalez
Area: Natural Sciences, Social and Behavioral Sciences.

Computer Science
EN.601.769. Events Semantics in Theory and Practice. 3.0 Credits.
This course explores selected topics in the nature of event representations from the perspective of cognitive science, computer science, linguistics, and philosophy. These fields have developed a rich array of scientific theories about the representation of events, and how humans make inferences about them – we investigate how (and if) such theories could be applied to current research topics and tasks in computational semantics such as inference from text, automated summarization, veridicality assessment, and so on. In addition to classic articles dealing with formal semantic theories, the course considers available machine-readable corpora, ontologies, and related resources that bear on event structure, such as WordNet, PropBank, FrameNet, etc..
The course is aimed to marry theory with practice: students with either a computational or linguistic background are encouraged to participate.
Applications
Instructor(s): B. Van Durme; K. Rawlins.

Comparative Thought and Literature
http://comptoughtlit.jhu.edu/
The faculty of the Department of Comparative Thought and Literature shares an ongoing commitment to questions at the intersection of literature, philosophy and aesthetics. Central to these concerns is the analysis of literary and philosophical texts, ranging across a set of diverse traditions, genres, and languages, in juxtaposition to ethics, religion, history, art history, anthropology, media studies, political theory, and the natural sciences. Questions of literary theory, the history and value of literature, and the constitution and development of philosophical and literary forms in a global context are similarly at the forefront of the department’s research and teaching.

The department’s interdisciplinary nature is one of its main strengths and provides crucial common ground for scholars from humanities departments across the university. Faculty members work in a variety of fields but are unified by a common investment in intellectual curiosity, flexibility, open-mindedness, and careful reading and criticism. Graduate students are encouraged to undertake projects addressing authentic philosophical or theoretical problems without the restriction of disciplinary conventions. Students may also cultivate strong ties with faculty in other departments working in their areas of interest.

Every year, the department hosts at least two associates, who are faculty members from other institutions that stay for an extended period to present lectures, give seminars, and interact with faculty and students. Previous and current associates include many distinguished scholars, such as Anita LaFrance Allen, Susan James, Barbara Cassin, David Wellbery, Robert Pippin, Jean-Luc Marion, Eli Friedlander, Sari Nusseibeh, and Toril Moi.

History
In the mid-20th century, the department, which was then known as the Humanities Center, was established as a meeting ground for the various humanities departments. With Charles Singleton as its first director, the center aimed to strengthen the humanities at Johns Hopkins and provide a place where scholars could engage in theoretical reflections on the human sciences, including recent European movements such as structuralist thought and literary hermeneutics.

The department's interdisciplinary nature is one of its main strengths and provides crucial common ground for scholars from humanities departments across the university. Faculty members work in a variety of fields but are unified by a common investment in intellectual curiosity, flexibility, open-mindedness, and careful reading and criticism. Graduate students are encouraged to undertake projects addressing authentic philosophical or theoretical problems without the restriction of disciplinary conventions. Students may also cultivate strong ties with faculty in other departments working in their areas of interest.

As of January 1, 2018, the name of the Humanities Center has been changed to Department of Comparative Thought and Literature. The new name recognizes the department's ongoing commitment to serious interdisciplinary study, with a focus on questions at the intersection of literature, philosophy, and aesthetics. It also represents the various literatures, philosophies, religions, political systems, cultures, and methodologies that its faculty studies and applies. A search is currently underway to fill the Boone Chair in the newly named department.

The department offers several courses taught by its faculty. These courses provide a broad introduction to the documents and thought of Western culture for all students, from those interested in a general liberal arts preparation to those in one of the university’s pre-professional programs.

For qualified juniors and seniors preparing for graduate school, the department also offers the opportunity to pursue an independent and often interdisciplinary research project through the Honors Program (http://comptoughtlit.jhu.edu/undergraduate/honors-program).
The Department of Comparative Thought and Literature does not offer a departmental major or minor. Students who wish to concentrate on the courses that it offers should consider a major in another humanities department.

**Honors Program in the Humanities**

Initiated in 1976, the Honors Program in the Humanities offers all qualified undergraduates the possibility to pursue an independent and often interdisciplinary research project, normally in their junior and senior years. Students can propose a topic in any humanistic discipline, including intellectual or cultural history, English and comparative literatures, women and gender studies, minority literatures and culture, film studies, anthropology, philosophy, etc. Past topics have also examined points of intersection between the arts and sciences, giving majors outside the humanities a chance to broaden and combine their studies through the program.

**Requirements**

- Students must have above average performance in humanities courses.
- The proposed project should show coherence, focus, and seriousness of purpose.
- Each project must be sponsored by two faculty members, one of whom will be the primary adviser. One adviser may be external to the university.
- Students must complete the research thesis and participate in the honors seminar for two years, the second of which must be the student's senior year.

**Application process**

Applications are accepted in the spring of the applicant’s sophomore year. Second-semester freshmen who plan to study abroad in their junior year or who already possess the necessary qualifications are also encouraged to apply.

Applications may be submitted by email or in hardcopy to Prof. Yi-Ping Ong. All applications must include:

- A completed application form (http://comphoughtlit.jhu.edu/wp-content/uploads/sites/87/2017/11/ApplicationHonorsProgram2012.doc), including the name of at least one faculty adviser
- Brief statement of purpose outlining the proposed thesis topic, with initial bibliography
- Unofficial transcript of undergraduate course work

**Required Course Work**

**Sophomore year (optional)**

Sophomores who plan to study abroad in their junior year and those who are ready to begin their honors research should consider participating in the honors seminar during their sophomore year.

**Junior year**

1. Two courses chosen from relevant offerings in the Department of Comparative Thought and Literature curriculum.
2. A semester-long honors seminar for all students in the program, in which the general progress of the students’ writing and research will be discussed, and senior students will present work-in-progress reports.
3. Optional independent study course on thesis project with one or both advisers.

**Junior agenda**

- September-October: Students should identify and meet with prospective faculty advisers. Two faculty advisers are required for the final thesis; at least one of these advisers must be a Department of Comparative Thought and Literature faculty member or affiliate. Once students have received a commitment from two advisers to supervise the thesis, they should begin to compose a comprehensive reading list in consultation with their advisers.
- November-January: Using the reading list as a guide, students will conduct exploratory research in the field of their proposed project.
- February-March: Students will present a three- to five-page prospectus, which formulates the central questions of the thesis, in the honors seminar.

**Senior year**

1. Independent study course in the spring semester dedicated to completing the thesis.
2. Two courses taught by department faculty members or affiliates.
3. Continued participation in the two-semester honors seminar with periodic “work-in-progress” reports and an oral presentation of the thesis research in the spring semester.

**Senior agenda**

- All year: Students will complete their theses in consultation with their advisers and continue to attend the honors seminar.
- April-May: Students will present their final theses in the honors seminar.

The department offers a PhD in humanistic studies, which includes a program in comparative thought and literature. Priority is given to highly-qualified candidates whose proposed course of study is congruent with faculty interests and strengths.

**Requirements for the Ph.D. Degree**

Each PhD student works with a committee of faculty members who help to design a coherent, individual program of study. During the first two years, the candidate works closely with each of his or her advisers. The course of study, seminars, and tutorials lead to three area examinations administered by the department and committee. During the second year, qualified students are invited to teach under faculty supervision, and occasionally students may offer undergraduate seminars of their own design.

PhD students choosing a focus in comparative literature should be competent in three national literatures and have a general familiarity with critical theory. Students are encouraged to spend at least one year studying abroad, usually working in Paris, Florence, Hamburg, Geneva, or Madrid in programs sponsored by the department or the Department of German and Romance Languages and Literatures.

Students can become supervised teaching assistants in the German Program in the Department of German and Romance Languages and Literatures, and they can earn a master’s degree in German upon completion of the field examinations, before their doctoral degree is completed. Similar arrangements can generally be made with the Department of Classics and the programs in the romance languages and literatures.

**Advisers**

New PhD students will work with the department chair to select a faculty member to serve as a primary academic adviser. As a student's interests become defined, he or she may change advisers or work with a faculty member in another department. Students who choose to work with a
faculty member outside of the department should meet regularly with the Department of Comparative Thought and Literature's director of graduate studies.

**Third-Year Review**
During their third year of residence, after completing all outstanding seminar papers, students will have their work reviewed by a faculty committee. The committee will comprise three faculty members from the department and the faculty members from the other departments with whom the student plans to conduct field exams. The review allows the faculty to assess the student's progress, clarify his or her status in regards to remaining course work, and define future fields. Prior to the meeting, the student should circulate materials that he or she judges to be work that will best serve the purpose of the review.

**Field Examinations**
In their third and fourth years, students are expected to complete three field exams. The exams may serve to help students refine their dissertation topics, or they may be a means of extending and deepening students' knowledge of an area in which they propose to teach and conduct research.

The examinations may take a variety of forms, and the form should be discussed at the student's third-year review. Examples include:

- Work further on a project begun in a seminar and produce a longer paper that would become part of a dissertation
- Read into and across a particular field, writing a series of short papers on the reading or sitting for a written or oral examination on the material studied
- Design and teach an undergraduate course in an area of interest
- Complete the requirements for an MA degree in another department, as a way of strengthening claim to teach in that field

**Undergraduate Teaching**
Graduate students have many opportunities to develop their skills and confidence as a teacher. Beginning in the second year, students often serve as teaching assistants for courses taught by the department's faculty or, if appropriate, for courses in other departments. In the past, PhD students have taught courses in French and German language programs, English composition and literature, history, philosophy, and political science. More experienced students are encouraged to teach courses of their own invention as a way of completing a field exam, in competition for one of the Dean's Teaching Fellowships, or to add to the department's array of offerings.

**Dissertation Review**
A second formal review of a student's work will take place after the dissertation has been completed. However, it will mark the transition from work on the field exams to the preparation and writing of a dissertation.

**Departmental Presentations**
In their fifth year or beginning of their sixth year, students will give a talk on material from their dissertation to the students and faculty of the department and invited guests. This presentation gives students experience formally presenting their work. It also allows for a wider range of response to that work than a dissertation committee can provide and allows all students in the department to become better acquainted with each other's projects.

To apply, please submit the following to http://grad.jhu.edu/apply/apply-now/:

- Official Application
- Statement of purpose
- Three letters of recommendation
- Transcripts
- Sample of work
- Supplementary Application Form (Language Form)
- GRE scores and subject (optional)
- TOEFL/IELTS scores (if applicable)

**Financial Aid**
Tuition grants, stipends, and teaching fellowships are available to doctoral candidates.

**Faculty**

**Acting Chair**
Leonardo Lisi

**Associate Professor**
Leonardo Lisi
Director of Undergraduate Studies European literature of the long nineteenth century; European modernism; Kierkegaard and German idealism; tragedy and the tragic; philosophical aesthetics and literary forms

**Professor**
Paola Marrati
Director of Graduate Studies Modern and contemporary French Philosophy, American Pragmatism and Skepticism, Phenomenology, Philosophy and Cinema, Feminist and Queer Theory; (secondary appointment: Department of Philosophy)

**Assistant Professors**
Anne Eakin Moss
Russian literature and cinema; women's studies, literary theory and film theory

Yi-Ping Ong
19th- and 20th-century literature and philosophy, the novel, modernism, existentialism, ethics, and justice in contemporary Anglophone literature

For current course information and registration go to https://sis.jhu.edu/classes/
Courses

**AS.300.113. Freshmen Seminar: Drama and Gender in Shakespeare's England. 3.0 Credits.**
In this seminar we will read male and female authored plays and discuss how they reflect contemporary social expectations in Tudor and Stuart England. Authors include William Shakespeare; Mary Sidney, Countess of Pembroke; Christopher Marlowe; Elizabeth Cary; Ben Jonson; and Mary Sidney, Lady Wroth.
Instructor(s): E. Patton
Area: Humanities.

**AS.300.115. Introduction to Romantic Poetry. 3.0 Credits.**
This course offers an introduction to romantic poetry through a comparative approach to three of the movement's key authors: Friedrich Hölderlin, John Keats, and Giacomo Leopardi. We will work through their main writings in detail along with considerations of their cultural contexts and theoretical and critical approaches to romanticism more broadly.
Instructor(s): L. Lisi
Area: Humanities.

**AS.300.133. Freshmen Seminar: Women of Epic Fame in Literature and Drama, 800 BCE-1650 CE. 3.0 Credits.**
From Homer's Odyssey to Shakespeare's Antony and Cleopatra, powerful women who achieve their ends by working from within the system are often overlooked or not fully explored. Our readings and discussions will foreground these women of fiction, while we also consider the social conditions of their living contemporaries. Readings will include: Homer's Odyssey (Penelope); Virgil's Aenead (Dido); Dante's Inferno (Beatrice); Milton's Paradise Lost (Eve), and several accounts of Cleopatra in plays by Shakespeare and his contemporary women writers. Cross listed with Theater Arts, Writing Seminars, and WGS.
Instructor(s): T. Tower
Area: Humanities
Writing Intensive.

**AS.300.143. Introduction to Comparative Literature. 3.0 Credits.**
This course offers an introduction to the history, theory, and praxis of comparative literature. We will read texts from some of the founding figures of the discipline and look at the most recent debates in the field, including translation studies, literary theory, and world literature, among others. Particular attention will be given to the methodologies and problems of studying literatures in different linguistic traditions and the relation between literature and other areas of thought and culture, such as philosophy, art history, and psychoanalysis. Case studies in comparative approaches to literature will provide concrete examples to our discussions.
Instructor(s): L. Lisi
Area: Humanities
Writing Intensive.

**AS.300.228. Brain and Society. 3.0 Credits.**
On April 2, 2013, President Obama unveiled the Brain Activity Map Project, a $100 million dollar investment to map the single-celled neurons composing the human brain. Scientific in its aim, the project is culturally significant as well. Popular websites lumosity.com and neuronetlearning.com offer brain-exercises to boost intelligence, while the emergent academic fields neurophilosophy, neuroethics, and neurohistory borrow from the brain sciences. The interaction between the brain and society, however, is by no means new. In this course, we will investigate the origins of brain maps and trace their reception in nineteenth-century European and American literature, philosophy, and politics. Topics include phrenology, the nervous system, psychopathology, and brain localization, and these fields’ resonance in German Idealism, Victorian literature, French anthropology, and American fiction. The course is reading intensive.
Instructor(s): L. McGrath
Area: Humanities, Social and Behavioral Sciences.

**AS.300.231. Introduction to Comparative Literature. 3.0 Credits.**
This course offers an introduction to the history, theory, and praxis of comparative literature. We will read texts from some of the founding figures of the discipline and look at the most recent debates in the field, including translation studies, literary theory, and world literature, among others. Particular attention will be given to the methodologies and problems of studying literatures in different linguistic traditions and the relation between literature and other areas of thought and culture, such as philosophy, art history, and psychoanalysis. Case studies in comparative approaches to literature will provide concrete examples to our discussions.
Instructor(s): L. Lisi
Area: Humanities
Writing Intensive.

**AS.300.232. Existentialism. 3.0 Credits.**
What is existence and why do we care about it? What happens when we think about the nothing? What is the philosophical significance of issues such as commitment, marriage, death, and suicide, or of feelings such as anxiety, boredom, and nausea? We will consider these themes and read a selection of texts dealing with them by some of the most famous thinkers associated with the existentialist tradition, including Pascal, Kierkegaard, Nietzsche, Heidegger, Sartre, and Camus.
Instructor(s): O. Mehrgan
Area: Humanities.

**AS.300.239. Philosophy and the Emotions. 2.0 Credits.**
We will read some of the most important texts in the history of the philosophy of the emotions, including works by Plato, Descartes, Spinoza, Schopenhauer, Heidegger, and Freud. We will discuss themes such as love, shame, apathy, anxiety, the mind-body problem, the notion of spirit, the notion of mood, and the overall problem of the distinction between emotion and reason.
Instructor(s): A. Rot
Area: Humanities.

**AS.300.282. Life and Form in Modern Thought. 3.0 Credits.**
This course is a theoretical treatment of the question of form in fragmented bourgeois society since the late eighteenth century. Essential to modernity is a political and philosophical conflict between established forms and individual and collective lives. We will treat the concepts of form, freedom, and subjectivity in four spheres: aesthetics, morality, political economy, history. We will read texts by Kant, Hegel, Marx, Lukacs, Weber, and Adorno, literary works by Goethe, Rilke, Kafka, Stevens, and discuss paintings by Manet, Malevich, Guglielmo.
Instructor(s): O. Mehrgan
Area: Humanities.
AS.300.241. The Literature of the Everyday. 3.0 Credits.
The ordinary, the common, the everyday: why does literary realism consider the experiences of the average individual to be worthy of serious contemplation? In this course, we will read closely a set of novels by Flaubert, Mann, Dickens, Zola, Tolstoy, and Woolf from the period between 1850 and 1950 in which the development of realism reaches its climax. These novels explore the nature of work, family, the body, consciousness, and the changing relation between individual and tradition in modernity. We will situate these novels in their social, historical, and literary contexts, and establish a set of terms for the formal study of the novel as a genre (plot, character, setting, narrative, etc.). (Students of all levels who are interested in literature are encouraged to take this course.)
Instructor(s): Y. Ong
Area: Humanities.

AS.300.283. Nineteenth-Century Science Fiction: Ecology, Utopia, and Catastrophe. 3.0 Credits.
This course will introduce students to some of the key texts of science fiction as the genre emerged during the nineteenth century. We will consider the intellectual contexts for the form's development in Britain, France, and the United States, as well as its emerging narrative conventions. In particular, we will consider how early sci-fi writers used non-realistic modes to dramatize problems and discoveries were at once real and yet hard to fathom within the parameters of everyday cognition: deep geological time, alternative social arrangements, post-human landscapes. Texts may include H.G. Wells’ The Time Machine, Charlotte Perkins Gilman’s Herland, Samuel Butler’s Erewhon, Edward Bulwer Lytton’s The Coming Race, William Morris’ News from Nowhere, and Jules Verne’s 20,000 Leagues Under the Sea.

AS.300.290. Freshman Seminar: Shakespeare and his “Goddess”: real and imaginary lovers in the poetry and drama of early modern Europe. 3.0 Credits.
Shakespeare’s description of his lover’s eyes as ‘nothing like the sun’ is both an homage and a sendup of a 300-year-old poetic convention reaching back to the days of Petrarch and the early humanist poets. Incorporating music and drama, we will examine that sonnet tradition from the perspective of Shakespeare and his contemporaries, tracing both the historical roots of the Shakespearian sonnet form its influence on the music of the present day, and finishing the semester with Shakespeare’s The Taming of the Shrew, a play that further illustrates and problematizes Shakespeare’s ‘goddess’ reference. Readings will include poetic dialogues between male and female poets, such as those by the early Italian Petrarchans Vittoria Colonna, Michelangelo, Veronica Gambara, and Gaspara Stampa; their French counterparts, Maurice Scève, Louis Labé, Joachim du Bellay and Pernette du Guillet; and later reflections on the sonnet by Shakespeare and his English contemporaries: Sir Philip Sidney, Sidney’s niece, Mary Herbert, Lady Wroth; John Donne; Robert Southwell; and Katherine Phillips. All continental works will be read in translation.
Instructor(s): E. Patton
Area: Humanities
Writing Intensive.

AS.300.291. Freshman Seminar: Home and Exile. 3.0 Credits.
This interdisciplinary seminar examines the concept of home and the condition of exile in 20th century Russian and Soviet culture from a variety of theoretical and methodological perspectives. Students will be introduced to classics of Soviet dissident, exilic, and official literature (Akhmatova, Brodsky, Nabokov, Bulgakov, Zamyatin), Soviet films (including Tarkovsky’s Solaris), as well as key theoretical texts about what it means to be “at home.” Open to freshmen and sophomores with approval of professor.

Area: Humanities
Writing Intensive.

AS.300.303. Multum in Parvo: Forms of Short Fiction. 3.0 Credits.
The theory and practice of reading brief narratives, from the parable to the post-modern short story. We will be attending to the rhetorical and ethical issues that are raised within the compass of such fictions, with consideration of some specific forms that have shaped the development of recent literary tales: the case history, portraits of the artist, fictions of detection, and certain enduring philosophic myths. Time permitting, we’ll also examine how a few of our narratives have been translated into another medium such as film.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.305. Islamic Philosophy. 3.0 Credits.
This course is an introduction to key concepts and seminal texts of Islamic Philosophy in the classical period, running from the 7th to the 13th century. Although instrumental to the transmission of Greek philosophy and to the rise of modern philosophy in the western world, Islamic philosophy is not merely a conduit of transmission. Philosophers on Islamic lands, offered original philosophical solution to both old problems, and new problems that arose with monotheism. We will begin our examination of the specificity of Islamic Philosophy by situating it in its historical and political context. We will have to tackle fundamental questions: How did philosophers who wrote in Arabic translate and transmit Greek philosophical texts? What does it mean to do philosophy within an Islamic context? Is it not an oxymoron to talk about philosophy within a religious context? The course is divided into three sections that treat of these general fields: politics, metaphysics and psychology and discusses the major Philosophers of the classical period, with particular attention paid to the work of Alfarabi, Avicenna and Averroes.
Instructor(s): L. Ferhat
Area: Humanities
Writing Intensive.

AS.300.307. Dostoevsky and Critical Theory. 3.0 Credits.
The tormented, obsessive and sadistic characters of Dostoevsky’s novels posed a challenge to positivism and reason too scandalous and compelling to be ignored. The novels inspired some of the most brilliant and influential thinkers of the nineteenth and twentieth centuries in the fields of religion, philosophy, psychology and literary theory. We will read three of Dostoevsky’s philosophically challenging novels alongside works by these critics and philosophers. While exploring their ideas about faith and unbelief, madness and reason, violence and torture, society and history, we will also inquire into the relationships among literature, philosophy and biography and examine the processes of influence and adaptation.
Instructor(s): A. Eakin Moss
Area: Humanities.
AS.300.310. Introduction to Psychoanalysis. 3.0 Credits.
One of the most controversial intellectual endeavors of the 20th century, psychoanalysis is a theory about human nature, motivation, behavior, development and experience, as well as a clinical method of treatment for psychological disorders. We will read texts by Freud, Jung, Ferenczi, Rank, Horney, Klein, Anna Freud, Lacan, and others.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.316. Philosophy and Revolution: Four Case Studies. 3.0 Credits.
This course offers a historical and systematic inquiry into the modern idea, most clearly expressed by the young Karl Marx, that revolution should be the realization of philosophy. We will take up four revolutionary moments or four crucial years in four places and study them together with their philosophical influences and / or consequences: the French Revolution of 1789/1792 with Hegel, the Russian/October Revolution of 1917 with Lenin and Georg Lukács, the Iranian Revolution of 1979 with Michel Foucault, the Egyptian Revolution of 2011 with Alain Badiou. Some of the concept with which we will be engaging include freedom, alienation, historical necessity, reification, political spirituality, infinity.
Instructor(s): O. Mehrgan
Area: Humanities
Writing Intensive.

AS.300.317. The Russian Novel. 3.0 Credits.
Russian authors began writing novels in the shadow of counterparts in Western Europe, and thus had the chance to experiment with the form and scope of genres and themes they found in European literature: Alexander Pushkin's novel in verse Eugene Onegin pays homage to Byron's Don Juan and satirizes Richardson's Pamela; Mikhail Lermontov's nested stories A Hero of Our Time owes a debt to Romantic and gothic fiction, and Nikolai Gogol's Dead Souls brings Dante's Inferno to the Russian provinces. From these literary forefathers emerged the likes of Feodor Dostoevsky and Leo Tolstoy, who made a lasting impact on world literature with their psychological and philosophical novels. This course examines the Russian novel in its historical and cultural context alongside contributions of Russian literary criticism in defining novel form and genre.
Area: Humanities
Writing Intensive.

AS.300.324. Cinema of the 1930s: Communist and Capitalist Fantasies. 3.0 Credits.
Comedy and musical comedy film flourished in the USA during the Great Depression as well as in the USSR during the Stalinist Great Terror. This course will compare films of the era in a variety of genres (musical, epic, Western, drama), examining the intersections between politics and aesthetics as well as the lasting implications of the films themselves in light of theoretical works on film as a medium, ethics and gender.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.325. American Madness – History of the Treatment of the Mentally Ill. 3.0 Credits.
As mental illnesses became a social issue during the 18th century, community institutions were created in order to handle the needs of individuals with such illnesses collectively. This course will investigate the history of these institutions in the USA from the seemingly quiet, secluded, and peaceful private asylums in country settings, at the beginning of the 19th century, through the notorious crowded public, so-called “psychopathic hospitals” in mid-20th century, to the crisis-services, short-term acute psychiatric units, and out-patient services that followed the “death of the asylum” at the end of the 20th century. The history of the institutional care of the mentally ill in America is also the story of American psychiatry changing attitudes towards these individuals. Reading will include selections from 200 years of writings of asylum superintendents, psychiatrists, patients, and historians of psychiatry such as Foucault, Goffman, Grob, Scull, Lunbeck, Micale, and Mora.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.327. Introduction to Comparative American Cultures: Obama and Philosophy. 3.0 Credits.
This course will investigate the philosophical as well as theological, juridical and political, and rhetorical and literary backgrounds that have informed and shaped Barack Obama's writings, speeches, and policy strategies leading up to and during his presidency. While paying minute attention to a few selected controversial debates in domestic and international governance and relations, and while discussing the question of Obama's legacy in and after the upcoming elections, our primary focus will be on understanding the curious blend of Christian realism, influenced by the theologian Reinhold Niebuhr, the tradition of American civic republicanism and pragmatism, and Obama's specific brand of post-Civil Rights, if not necessarily post-racial, politics. All these tenets coalesce in a vision and politics that may well be described as one of "deep" pragmatism. Attention will be paid to Obama's early appeal to "simple ideas" and "small miracles," each of them yielding the Biblical and sobered injunction of a "hope against hope." But extensive consideration of his thought and impact in the assessment of biographers and intellectual historians, legal scholars and political theorists, cultural critics and pundits will add to our attempt to understand and take stock of the Obama phenomenon as well.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.333. Melancholy in Science, Literature, and Film. 3.0 Credits.
This course explores the manifold nature of melancholy from an interdisciplinary perspective that combines sciences, history of medicine, and the arts. Defined by Greek medicine as the excess of black bile, melancholy, in its long history, has been seen as disease of the soul, state of intellectual grace, or psychological condition. The course will examine chronologically the development and variety of the meanings of melancholy between medical texts, visual representations, poetry, psychoanalytic theory, and films. The works analyzed will include, among others, those by Galen, Robert Burton, Albrecht Dürer, Shakespeare, Cervantes, Baudelaire, Freud, Lars von Trier.
Instructor(s): E. Fabietti
Area: Humanities.
AS.300.335. Victorian Literature as World Literature. 3.0 Credits.
What does it mean to read literature in a global context? How are literary texts that we think of as products of distinct national cultures plugged into larger global systems – even if they seem unaware of it? In this course we'll consider these questions through sustained readings of major Victorian literary texts such as Bram Stoker's Dracula (1897) and Charles Dickens's Great Expectations (1861). We will retrace how these books exercised cultural influence beyond the borders of Great Britain; how networks of trade, tourism, and imperial power brought authors from different cultures into contact with one another; and how Victorian texts have become a part of our culture in unexpected ways. Other primary texts may include Arthur Conan Doyle's The Sign of Four (1890), the poetry of Romesh Chunder Dutt, and first-hand accounts of Oscar Wilde's 1882 American lecture tour; critical readings will cover postcolonial theory, media theory, and histories of colonialism and urbanization.
Instructor(s): S. Lecourt
Area: Humanities
Writing Intensive.

AS.300.338. Comic Evolution: Stages in Development of Comedy. 3.0 Credits.
An eclectic tour of comic forms and theories from classical antiquity to contemporary practice. Although the textual focus will be on stage comedy, we'll also consider the comic in other forms and media—film [Keaton], comic strip [Herriman], and contemporary satire. Some of the familiar questions on the agenda: topical vs. 'perennial' material, the social functions of comedy, the 'shelf life' of humor, butts & scapegoats, symmetries & asymmetries between comedy and tragedy, verbal and non-verbal comic devices, the general rhetoric of comedy, and the possibility of a Grand Unified Theory. (Final paper.)
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.345. Madness Interpreted – A Case Study in Medical Humanities. 3.0 Credits.
Too often conventional medical education teaches the student to translate a rich and complex narrative of illness into a minimalistic account, stripped of its ambiguities. Case presentations, too, are highly formalized reports lacking the historical, cultural, and social context. Although medicine since antiquity relies on the interpretation of observations, "evidence-based medicine," when reductively used, tends to ignore the basic fact that we are "self-interpreting animals." Patients and doctors alike try to make sense of their experiences as they recount them and, hence, case narratives teach us not only about disease and medical practice but also what it means to be human. This course will concentrate on the "case" of what is arguably the most famous psychiatric patient in the world, Daniel Paul Schreber, the German fin-de-siècle Senatspräsident of the Saxon Supreme Court. Beginning with Freud, the first doctor who turned Schreber's rich psychotic delusional world, as expressed in his bizarre, at times comic and then again painful, Memoir, into a "case of paranoia," we will follow the many interpretations that this narrative of illness with its unique cosmology, private theology, extraordinary creatures, transgressed sexuality, and cataclysmic vision of the universe, inspired in generations of psychoanalysts, historians, philosophers, theologians, literary critics, essayists, and scholars in political science as well as queer studies. Whether he was a paranoid schizophrenic, victim of traumatic abuse, a solipsistic philosopher, proto-fascist, or cultural hero, Schreber's memoir offers a paradigmatic case in the study of the field of medical humanities. Readings will include: Schreber, Freud, Benjamin, Canetti, Klein, Lacan, Deleuze and Guattari, de Certeau, Lingis, Lyotard, and Santner. Cross-listed with GRLL and History.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.346. Forms of Moral Community: The Contemporary World Novel. 3.0 Credits.
Literary and philosophical imaginations of moral community in the post-WWII period (1950-2001). Texts include: Coetzee, Disgrace; McEwan, Atonement; Achebe, Things Fall Apart; Ishiguro, An Artist of the Floating World; Roy, The God of Small Things; Lessing, The Grass is Singing; Mistry, A Fine Balance; Morrison, Beloved; and essays by Levi, Strawson, Adorno, Murdoch, Beauvoir and Barthes on the deep uncertainty over moral community after the crisis of World War II. Close attention to novelistic style and narrative will inform our study of the philosophical questions that animate these works. What does it means to acknowledge another person’s humanity? Who are the members of a moral community? Why do we hold one another responsible for our actions? How do fundamental moral emotions such as contempt, humiliation, compassion, gratitude, forgiveness, and regret reveal the limits of a moral community? Cross listed with English.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.351. The Phenomenon of Boredom from an Interdisciplinary Perspective. 3.0 Credits.
We will examine the history, philosophy, sociology, and psychology of boredom and consider the characteristics, concerns, and methods of the different fields and disciplinary frameworks in which this phenomenon has been studied.
Instructor(s): A. Rot
Area: Humanities
Writing Intensive.
AS.300.357. Forms of Modern Fiction. 3.0 Credits.
A comparative tour of modern narrative forms from 3 continents. The emphasis is on the development of shorter fictional models, though some of the founders and innovators are better known for their novels. The emphasis will be on the emergence new structural, rhetorical, and thematic concerns, including adaptation to other media. There will be an optional hour for queries and discussion TBA.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.363. Reading Judith Shakespeare: poetry and drama by women writers in Elizabethan England (ca 1558-1650). 3.0 Credits.
Virginia Woolf's account of the thwarted career of Shakespeare's hypothetical sister, Judith (in A Room of One's Own) frames our reading of plays and poetry by Shakespeare and contemporary women writers, including Isabella Whitney, Elizabeth Cary, Mary Sidney, Aemelia Lanyer, Mary Wroth, and others. Students will create fictional biographies of "Judith Shakespeare" and her literary accomplishments. Cross listed with English, Theater Arts, Writing Seminars, and WGS.
Instructor(s): E. Patton
Area: Humanities
Writing Intensive.

AS.300.365. Desire in the Fin de siècle. 3.0 Credits.
This course examines the obsession with desire at the turn of the 20th century in literature, drama, philosophy and social thought and its implications for notions of self and community in modernity. We will read comparatively across European, Russian and American cultures, including Stoker's Dracula, Hamsun's Hunger, plays by Chekhov, Strindberg, Ibsen, Wilde, and stories by Tolstoy, Gorky, Chopin and Larsen.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.369. The Bible and Philosophy (Introduction to Intellectual History). 3.0 Credits.
This course will examine several attempts by ancient, modern, and contemporary thinkers to come to terms with the Biblical concept of creation and provience, revelation and prophecy, law and election, apocalypse and eschatology, with a special emphasis on the first articulation of the idea of Christian universalism, faith and justification, time and eternity, sacrifice and the body. Readings will include the entire corpus of St. Paul's authentic letters, the major Scriptural passages on which he writes, but also selections from Philo of Alexandria, St. Augustine, Spinoza, Nietzsche, Karl Barth, Jakob Taubes, Alain Badiou, Giorgio Agamben, and others.
Instructor(s): H. de Vries
Area: Humanities

AS.300.371. The Modernist Novel: James, Woolf, and Joyce. 3.0 Credits.
The purpose of this course is to survey works by three of the greatest, most relentless innovators of the twentieth century – Henry James, Virginia Woolf, and James Joyce – who explored and exploded narrative techniques for depicting what Woolf called the "luminous halo" of life. Selected works include: "The Beast in the Jungle," The Portrait of a Lady, Jacob's Room, Mrs. Dalloway, To the Lighthouse, A Portrait of the Artist as a Young Man, and Ulysses.
Instructor(s): Y. Ong
Area: Humanities.

AS.300.383. History of Madness from the Bible to DSM-V. 3.0 Credits.
Madmen, lunatics or the insane, have seen an extraordinary variety of responses and attitudes across the centuries. Whether seen as a "true" phenomenon or as socially constructed "madness" was defined and treated, examined and controlled, diagnosed and "cured" according to the spirit of the time. This course will follow the varied social imageries of "madness" throughout Western history, from the Bible to the contemporary and controversial Diagnostic Statistical Manual (DSM) in its most recent 5th edition. Alongside primary texts by Hippocrates, Avicenna, Pinel, and Freud and secondary texts by Michel Foucault, Ian Hacking, Edward Shorter, and Elaine Showalter, among others, we will acquaint ourselves with first-person accounts of "madness" and its different forms of treatment, ranging from lunatic asylum, through electric-shock treatments and lobotomies to psychoanalysis. The course will explore the interaction between the historical and social, scientific and political as well as economical factors that have shaped the views of "madness" and its treatment.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.389. Freud's Cases - Source of Psychoanalytic Knowledge. 3.0 Credits.
Even though major scientific discoveries have been made from the intensive study of singular cases, modern science is mostly quantitative in its approach. In this course we will follow psychoanalysis' use of clinical practice as the primary context for the generation of knowledge. We will use two notions from the philosophy of science: "exemplars" (Kuhn) and "personal knowledge" (Polanyi), as we read Freud's cases in which he combines theoretical consideration and detailed investment in the singularity of the person. In his accounts of the "hysteria" of Dora, the "phobia" of Little Hans, the "obsession" of the Rat Man, the "infantile neurosis" of the Wolf Man and Schreber's "paranoia," Freud not only generated theoretical and technical knowledge but also constituted the "single case study" genre of investigation, as the primary source of psychoanalytic knowledge. Readings will include: Freud, Foucault, Polanyi, Kuhn, Hacking, and Forrester. Cross-listed with Film and Media Studies.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.417. Women in Psychoanalysis - The Second Generation of Psychoanalysis. 3.0 Credits.
With its forced dissemination after the Anschluss of Austria with Germany in 1938, psychoanalysis shifted its center of gravity not only from Vienna to London, creating "a new kind of diaspora," but also from a patriarchal and phallocentric focus towards a mother-child centered theory and practice. After Freud's death, psychoanalysis, notably in Britain, was led by two women psychoanalysts, Melanie Klein and Anna Freud, each with a very different view on the nature of childhood, sexuality and aggression, intellectual development, the development of responsibility, motherhood, pathology, and the life of the mind as such. This course will introduce the important intellectual psychoanalytic concepts and theories, which were developed not only through the clinical work of these two exceptional women with children, but also through what came to be known in the history of psychoanalysis as "The Controversial Discussions": a set of intense debates between two thought collectives organized around these female pioneers. Readings will include: Sigmund Freud, Klein, Anna Freud, Winnicott, Heimann, Jones, and Isaac. Cross-listed with History, Psychology, WGS.
Instructor(s): O. Ophir
Area: Humanities.
AS.300.419. 1966 before and after. French theory. 3.0 Credits.
The "Languages of Criticism" conference held at Hopkins marked a watershed moment in the history of literary studies and redefined, for many scholars and intellectuals, the nature of humanistic inquiries. This course involves the close study of key texts that, from the postwar years into 1970s (from Bachelard, Poulet, and Starobinski to Lacan, Barthes, and Derrida), are landmarks in this changing critical and philosophical landscape. Knowledge of French is desirable but not required.
Instructor(s): E. Ender
Area: Humanities.

AS.300.420. The Violence from Within and the Migration of Knowledge - The Marginalization of Melanie Klein in American Psychoanalysis. 3.0 Credits.
Freud's idea of an inborn death instinct and its link to war and violence was greatly developed by the Austrian-born British psychoanalyst Melanie Klein. Yet these ideas were largely rejected by mainstream American psychoanalysis as they were judged to be "un-American." In this seminar, we will read primary psychoanalytic texts on violence, aggression, sadism and war by Sigmund Freud, Melanie Klein, Wilfred Bion, among others and will follow their reception, reshaping and reconstruction among American analysts such as Otto Kernberg, Heinz Kohut, Roy Schafer, and others. Secondary resources will include historical studies on the migration of psychoanalysis by George Makari, Nathan Hale, and Edith Kurzweil among others. Co-listed with 300.610
Instructor(s): O. Ophir
Area: Humanities.

AS.300.427. Reading Freud. 3.0 Credits.
Sigmund Freud was one of the most influential thinkers of the 20th century. Psychoanalysis, which was his theory of mind, a research method, and a therapeutic technique, offered concepts that pervade Western culture and the humanities. In this seminar which is designed for students from all fields of knowledge, we will closely and chronologically read Freud's major works, follow his developing theories, and become familiar with psychoanalytic concepts such as the unconscious, the uncanny, instincts and aggression, which illuminated mysteries in other fields, from literature to anthropology, from political science to religious studies, and from philosophy to the arts.
Instructor(s): O. Ophir
Area: Humanities.

AS.300.431. Russian Literary Modernisms. 3.0 Credits.
Play with form and genre, self-reflexivity, fragmentation, linguistic creativity, and destabilizing humor all characterize classic works in Russian literature written before and after what would in literary historical terms be considered the Modernist period. This seminar will test a number of recent formal and philosophical definitions of Modernism against a wide range of Russian literary classics that can be seen to fall loosely into the genre including works by Gogol, Tolstoy, Chekhov, Bely, Olesha, Shklovsky, Bulgakov, and Tertz. We will also look at Russian literary critical texts that define and constitute Modernism in the Russian context. Texts in translation. Co-listed with AS.300.641
Instructor(s): A. Eakin Moss
Area: Humanities

Writing Intensive.

AS.300.433. Cavell: Skepticism and the Ordinary. 3.0 Credits.
This seminar studies the main works and concepts of Stanley Cavell, one of the most original and influential philosophers of the 20th century. It will address in particular his analyses of skepticism, the ordinary, and moral perfectionism as they are expressed in philosophy, but also in literature and films.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.435. Emmanuel Levinas: Essential Works, Guiding Concepts, Lasting Influence. 3.0 Credits.
This seminar will address the major writings and guiding concepts of Emmanuel Levinas and investigate his increasing critical role as a touchstone and dividing line in the formation of twentieth century and contemporary schools of thought (phenomenology, pragmatism, post-analytic philosophy, literary, feminist, and political theory, anthropology). Additional readings will include Stanley Cavell, Jacques Derrida, Vasily Grossman, Jean-François Lyotard, and Hilary Putnam.
Instructor(s): H. de Vries
Area: Humanities.

AS.300.599. Independent Study. 3.0 Credits.
Instructor(s): L. Lisi; R. Macksey.

AS.300.610. The Violence from Within and the Migration of Knowledge - The Marginalization of Melanie Klein in American Psychoanalysis. Freud's idea of an inborn death instinct and its link to war and violence was greatly developed by the Austrian-born British psychoanalyst Melanie Klein. Yet these ideas were largely rejected by mainstream American psychoanalysis as they were judged to be "un-American." In this seminar, we will read primary psychoanalytic texts on violence, aggression, sadism and war by Sigmund Freud, Melanie Klein, Wilfred Bion, among others and will follow their reception, reshaping and reconstruction among American analysts such as Otto Kernberg, Heinz Kohut, Roy Schafer, and others. Secondary resources will include historical studies on the migration of psychoanalysis by George Makari, Nathan Hale, and Edith Kurzweil among others. Co-listed with 300.420
Instructor(s): O. Ophir
Area: Humanities.

AS.300.617. Philosophy and Literature in Either/Or.
Celebrated and reviled alike, Kierkegaard's 1843 Either/Or has been viewed as both the culmination of the Enlightenment project and the birth of existentialism, a playful work of romantic literature and a piece of late-Hegelian philosophy, a vindication of the secular everyday and the articulation of a modern faith in a transcendent God. In this course we read the work closely and in its entirety and pay particular attention to the relation between its philosophical arguments and literary forms of presentation.
Instructor(s): L. Lisi.

AS.300.619. 1966 before and after: French theory. 3.0 Credits.
This seminar studies the main works and concepts of Stanley Cavell, one of the most original and influential philosophers of the 20th century. It will address in particular his analyses of skepticism, the ordinary, and moral perfectionism as they are expressed in philosophy, but also in literature and films.
Instructor(s): P. Marrati
Area: Humanities.

AS.300.625. Russian Literary and Critical Theory.
Close reading of major authors from the Russian literary theoretical and critical tradition including Bakhtin, Eikhenbaum, Jakobson, Lotman, Shklovsky and Tynianov. Student will present primary sources or case studies from their own fields and research.
Instructor(s): A. Eakin Moss.
AS.300.626. Philosophy of/and the Novel.
The novel is unique among literary genres in its capacity to represent the inner life of characters portrayed in the third person. Neither poetry nor drama is equipped to convey the innermost thoughts of characters who do not speak for themselves but are instead narrated. This course will examine the implications of “third-person subjectivity” for the novel’s claim to construct (or reconstruct) a world governed by ethical norms that are all but impossible to fulfill. In fact, the very impetus for the novel is the unresolvable tension between the ideals that a work posits and the choices its characters face in a world defined by compromise and limitation. What criteria for judgment does the novel provide? How does it establish a world it simultaneously critiques as devoid of meaning save the meaning posited by the subject? We will also investigate the use of novels and novelistic form in philosophy. Is it possible for novels to be treated not only as vehicles, but also as equivalents to philosophical views? How do novelistic forms provide new ways of thinking or philosophizing? Readings to include works by Lukács, Bakhtin, Hamburger, Sartre, Beauvoir, Ricoeur, Murdoch, Nussbaum, Diamond and novels by Coetzee and Flaubert.
Instructor(s): R. Tobias; Y. Ong.

Instructor(s): A. Eakin Moss
Area: Humanities.

This seminar examines what in Bergson’s philosophy remains, or becomes, challenging for contemporary debates. Particular emphasis is given to his concepts of life and time, but also to his philosophical anthropology and his reflections on the ambiguous interplay between war, technology, and religion.
Instructor(s): P. Marrati.

AS.300.631. Russian Literary Modernisms.
Play with form and genre, self-reflexivity, fragmentation, linguistic creativity, and destabilizing humor all characterize classic works in Russian literature written before and after what would in literary historical terms be considered the Modernist period. This seminar will test a number of recent formal and philosophical definitions of Modernism against a wide range of Russian literary classics that can be seen to fall loosely into the genre including works by Gogol, Tolstoy, Chekhov, Bely, Olesha, Shklovsky, Bulgakov, and Tertz. We will also look at Russian literary critical texts that define and constitute Modernism in the Russian context. Texts in translation. Co-listed with AS.300.431
Instructor(s): A. Eakin Moss
Area: Humanities.

Readings in Balzac, Stendhal, Hugo, Musset and Nerval, plus viewings of Géricault, Delacroix, Daumier. Theories of Romanticism, from Baudelaire to present will be examined and commented as well. Course taught in French. Recommended Course Background: AS.212.333 and 212.334
Instructor(s): J. Neefs; M. Fried
Area: Humanities
Writing Intensive.

AS.300.649. The Fate of Nothing from Goethe to Heidegger.
Nothing and negativity play a central role in the literature and philosophy of the long nineteenth-century. In this course, we look closely at a number of approaches to these problematic concepts in Goethe, Hölderlin, Hegel, Schopenhauer, Leopardi, Kierkegaard, Nietzsche and Heidegger.
Instructor(s): L. Lisi.

AS.300.651. What Remains of the Human?.
This seminar discusses modern and contemporary philosophical and anthropological conceptions of the human and its uncertain boundaries: between the cultural and natural, the human and the inhuman, the animal and the spiritual, the living and the dead and so forth. Particular attention will be devoted to the ethical and political implications any definition of the human inevitably invites.
Instructor(s): P. Marrati.

AS.300.653. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives.
Starting with a detailed discussion of its Introduction and Division One, this jointly taught seminar will bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic.
Instructor(s): H. de Vries; M. Williams.

AS.300.655. Martin Heidegger, Being and Time: Integral Reading and Current Perspectives, II.
Starting with a brief overview and recapitulation of themes discussed in its Introduction and Division One, this jointly will focus on Division Two of Being and Time and bring phenomenological, hermeneutic, and deconstructive as well as analytic, epistemological, and pragmatist methods and viewpoints to bear upon this modern classic.
Instructor(s): H. de Vries; M. Williams.

AS.300.658. Must We Mean What We Say?.
Starting out from Stanley Cavell’s programmatic book and title, this seminar will revisit his discussion of J.L. Austin, John Searle, Jacques Derrida, and Shoshana Felman, with special emphasis on these authors’ theories of intentionality, seriousness, and sincerity, and with reference to the ancient and modern concepts of tragedy on which they partly rely. In addition to the aforementioned thinkers’ relevant works, reading will include selections from Euripides, Henrik Ibsen, Isaiah Berlin, Emmanuel Levinas, and Jean-Luc Marion.
Instructor(s): H. de Vries.

AS.300.684. Marcel Proust, Literature and Art.
Proust’s great sequence of novels À la recherche du temps perdu is also a theory of the Novel and indeed of Art. A close reading of Du côté de chez Swann, À l’ombre des jeunes filles en fleurs, La Prisonnière and Le Temps retrouvé, will put this to the test. Required editions: Proust’s Du côté de chez Swann, Gallimard, Folio, À l’ombre des jeunes filles en fleurs, Gallimard, Folio, La Prisonnière, Gallimard Folio, Le Temps retrouvé, Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar is open to advanced undergrads, with authorization of the instructor.
Undergraduate are Seniors permitted to take this course. Recommended course background: At least 2 212.3xx courses
Instructor(s): J. Neefs; M. Fried.

AS.300.810. Thesis Seminar.
Thesis Seminar.
Instructor(s): P. Marrati.

Cross Listed Courses
History of Art
AS.010.400. Looking at Language: Vision and Textuality from Surrealism to the Present. 3.0 Credits.
Considers the emergence of the “written painting” and other uses of language in the visual arts. Among our case studies: Magritte, Twombly, Ruscha, Indiana, Holzer, Wool, Ligon, Darboven.
Instructor(s): M. Warnock
Area: Humanities.
AS.010.654. Topics in Postwar Abstraction.
Emphasis on European and American case studies from Pollock to the present; figures may include: Newman, Still, Frankenthaler, Louis, Noland, Olitski, Stella, Ryman, Marden, Hantai, Bishop, Jorn, Uecker, and Klein. Instructor(s): M. Fried; M. Warnock.

Classics
AS.040.148. Ancient Israel and ancient Greece in Opera and on Film. 3.0 Credits.
Some of the most breathtaking (early and later) operas and films have been in intense dialogue with ancient societies, narratives, and cultural concepts. Contemporary hit movies center on diverse aspects of ancient narratives: the beginning of the world, violent wars, politics, erotic themes, and intricate existential questions. The course will introduce students to a comparative examination of the variety of approaches to ancient Israel and ancient Greece in the spectacular worlds of opera and cinema. The course will focus on major texts and archaeological material related to antiquity; works of world cinema will be analyzed.
Instructor(s): D. Yatromanolakis
Area: Humanities.

AS.040.693. The Pre-Socratics and Early Plato.
This seminar will focus on the earliest phases of European philosophy. Topics that will be examined include: scholarly approaches to the fragments of major thinkers such as Herakleitos and Empedokles; the concept of "fragment," the transition from the pre-Socratics to early Plato; the later reception of Herakleitos and Pythagoras in European thought.
Instructor(s): D. Yatromanolakis
Area: Humanities.

German Romance Languages Literatures
AS.211.472. Barbers and countesses: conflict and change in the Figaro trilogy from the age of Mozart to the 20th century. 3.0 Credits.
2016 marks the bicentennial of Rossini's irreverent masterwork The Barber of Seville, which premiered in Rome in February 1816. Thirty years earlier, in 1786, Mozart's The Marriage of Figaro had opened in Vienna. The two operas, based on the first two plays of Beaumarchais' controversial "Figaro trilogy," stage conflicts of class and gender, challenging the assumptions of the aristocracy as well as the ludicrous pretentions of the raising bourgeoisie. The same themes inform the post-modern portrayal of the past in John Corigliano's The Ghosts of Versailles (1991), which ideally completes the musical afterlife of the trilogy. By studying how the plays were adapted to the opera stage within their different cultural and historical contexts, the course will explore the representation of the ideological, social, and political turmoil that, eventually, culminated in the French Revolution. The course will also include field trips and screenings of movies such as Stanley Kubrick's Barry Lyndon (1975) and Milos Forman's Amadeus (1984). This course may be used to satisfy major requirements in both the French and Italian majors.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

Interdepartmental
AS.360.134. Great Books at Hopkins II: The Sciences. 3.0 Credits.
Great Books at Hopkins II: The Sciences will combine readings from philosophy and literature with foundational texts from several scientific disciplines. Readings for this spring will explore links between traditional theories of economics and genetics in the context of literary developments, and will include: Xenophon's Deconomicus, Mendel's "Experiments on Plant Hybridization," Marx's Communist Manifesto, Darwin's Voyage of the Beagle, Swift's A Modest Proposal, Wharton's House of Mirth, and Joyce's Finnegan's Wake.
Instructor(s): E. Patton; M. Roller
Area: Humanities
Writing Intensive.

AS.371.304. Photo Seminar: Wet Darkroom. 3.0 Credits.
In this film based course, students develop a project of their choice over the semester working independently in the darkroom and meeting for weekly critiques and discussions. Using the zone system (a method of pre-visualization developed by Ansel Adams) students will experiment with different film, paper and developer combinations specific to their projects. Writing in the form of a journal as well as critical analysis of images are integral parts of the seminar experience.
Prerequisites: AS.371.146 or Permission Required
Instructor(s): Staff
Area: Humanities.

Morton K. Blaustein Department of Earth and Planetary Sciences
http://eps.jhu.edu/

The Department of Earth and Planetary Sciences offers programs of study and research in a wide range of disciplines including atmospheric science, ecology, environmental science and studies, geology, geochemistry, geophysics, oceanography, and planetary science. The undergraduate major in Earth and Planetary Sciences is flexible and allows the student, in consultation with a faculty adviser, to devise a program of study that is both rigorous and individualized. The graduate program develops skills in research through independent investigation under the general guidance of one or more members of the faculty, backed up by relevant course work. The department gives particular emphasis to the integration of experimental investigation, theoretical calculation, and quantitative field observations.

The Department also supports an interdisciplinary undergraduate program in Environmental Science and Studies (ENVS), which involves faculty from a range of departments across the university. The two ENVS majors and minor introduce students to Earth system science and the ways in which humans interact with and affect the Earth. ENVS is solution-focused and trains students to help solve the environmental and sustainability problems facing society today using the powerful tools of science and policy. Undergraduate degrees are typically specialized within traditional disciplines, but a primary goal of this program is to develop the ability of students to think outside of those boxes. Students learn theory, research, and practical applications of the natural and social sciences in their coursework, while also examining the relationship between humans and the environment through the lens of the humanities.

Facilities
The Department of Earth and Planetary Sciences is housed in Olin Hall, a modern building dedicated to the Earth sciences, nestled on a wooded
knoll on the western edge of campus. Its facilities include state-of-the-art instrumentation, a departmental library, and modern computer equipment. There are laboratories for crystallography, evolutionary biology/ecology, stable isotope geochemistry, materials science, and fluid and solid mechanics. Olin Hall also contains equipment for modern petrographic work (including a computer-controlled image analysis system), darkroom facilities, and a laboratory for sectioning rocks. There is also a substantial collection of rocks, minerals, and fossils. Facilities are available for a wide spectrum of fluid mechanical experiments, including thermal convection and solidification.

A JEOL 8600 electron microprobe in Olin Hall is available to all members of the department. Crystallographic facilities include a modern specimen preparation laboratory for transmission electron microscopy and single-crystal X-ray diffraction studies. The transmission electron microscopy laboratory houses state-of-the-art instruments capable of both high-resolution imaging at the atomic scale and microanalysis at the nanometer scale.

The department contains several computer laboratories containing clusters of workstations and personal computers, together with printers and scanners. These computers are used for numerical simulations, graphics applications, data manipulation, and word processing.

Field studies and excursions form an integral part of the program of instruction and research in geology and are closely integrated with the laboratory and course work. Situated at the fall line between the Coastal Plain and the Piedmont and only an hour's ride from the Blue Ridge and Appalachians, Baltimore is an excellent location for a department with a field-oriented program in geology. The department has a permanent field station for geological research, Camp Singewald, in the Bear Pond Mountains of Washington County, Maryland, and a vehicle for field use.

Supporting facilities on campus include the Milton S. Eisenhower Library, the Space Telescope Science Institute, and the Homewood High-Performance Computing Center. In addition, the JHU Applied Physics Laboratory, the facilities of the Smithsonian Institution and the Geophysical Laboratory and the Department of Terrestrial Magnetism of the Carnegie Institution of Washington are available by special arrangement for students qualified to use them. For students whose research requires substantial computation, special arrangements can be made to use the supercomputers at the NASA Goddard Space Flight Center and the National Center for Atmospheric Research.

**Undergraduate Programs**

The Department of Earth and Planetary Sciences offers the following majors and minors:

- Earth and Planetary Sciences Major (p. 180)
- Earth and Planetary Science Minor (p. 180)
- Environmental Science Major (p. 180)
- Environmental Studies Major (p. 180)
- Environmental Studies Minor (p. 180)

The Earth and Planetary Sciences major focuses on the study of the physical, chemical, and biological processes that shape the Earth and other planets. It is designed primarily for science students who wish to have careers involving research and study of the Earth and planets, although it is also suitable for students planning careers in the health professions.

The interdisciplinary ENVS majors and minor introduce students to human-Earth interactions and processes, our complex relationship with the changing environment, and methods for solving environmental and sustainability problems. The Environmental Science major emphasizes the perspective of the natural sciences, while the Environmental Studies major emphasizes the social science perspective, but there is a set of common core courses shared by both these majors that create a strong interdisciplinary foundation. ENVS is designed to prepare students for a variety of potential career paths, including both graduate study and entry-level jobs in an environmentally related field.

In addition to major requirements, students are required to complete the university requirements for the bachelor's degree. See Requirements for a Bachelor's Degree (p. 7).

### Earth and Planetary Sciences (EPS) Major (B.A.)

The Bachelor of Arts in Earth and Planetary Sciences is for undergraduates interested in the study of the physical, chemical, and biological processes that shape the Earth and the other planets, drawing on the disciplines of geology, geochemistry, geophysics, hydrology, ecology, geobiology, oceanography, and atmospheric science.

Students should design a specific plan of appropriate courses in consultation with their adviser and the EPS Director of Undergraduate Studies (DUS). Those who wish to be majors may proceed directly to the introductory courses at the 200-level, but depending on the student's background, it may be appropriate initially to take a freshman seminar or 100-level course designed for the non-major. Our courses provide a broad educational base in the Earth, planetary, and environmental sciences and enable exploration of a set of electives at the 300- and 400-level, depending on the area of interest.

The department requires a total of 9 credits at the 100- or 200-level and 12 credits at the 300-level or above within the department, as well as science and math foundation courses from other departments. All courses must be taken for a letter grade, and students must earn a grade of C- or better to apply the course to the major.

Honors in EPS Major
To receive honors in Earth and Planetary Sciences, students must meet the following criteria:

- Take a challenging set of courses during the four years of study
- Earn a GPA in the major requirements of a 3.5 or higher.
- Complete a senior thesis (AS.270.495 Senior Thesis and AS.270.496 Senior Thesis) at a level judged to be sufficiently high by the faculty of the Department of Earth and Planetary Sciences.
- Present the results of the thesis orally in the Department of Earth and Planetary Sciences.

Earth and Planetary Sciences Minor
The Earth and Planetary Sciences minor is for science undergraduates interested in learning about Earth and other planets through geology, geochemistry, geophysics, hydrology, ecology, geobiology, oceanography, and atmospheric science. Students take 12 credits of EPS courses, at least six of which are at the 300-level, and at least 16 credits of other natural sciences, quantitative studies, or engineering. No ENVS AS.271.xxx courses may count toward the minor. All courses must be taken for a letter grade, and students must earn a grade of C- or better to apply the course towards the minor.

Environmental Science Major (B.S.)
The Bachelor of Science in Environmental Science is an interdisciplinary major that introduces students to Earth system science and the ways in which humans interact with the environment. It equips students to use a variety of tools, such as policy, science, communication, and individual and societal behavior change, to solve environmental and sustainability problems but focuses on the perspectives and tools of the natural sciences. Environmental Science majors must complete a set of core courses common to both ENVS majors, including a senior capstone course and an applied experience involving either research or an internship, plus several additional natural science core courses and a suite of electives selected to form an adviser-approved focus area.

The ENVS senior capstone seminar involves the planning and execution of a tangible, group sustainability project on or off-campus. All ENVS majors must enroll in the capstone course in the fall semester of their senior year. The applied experience can be completed during any semester including summers and involves at least 80 hours of supervised, hands-on experience working with environmental or sustainability issues through a research project, internship, or study abroad program with a research or internship component. Synthesizing assignments reflecting on the experience are also required. The goal of the applied experience requirement is to ensure that students have practical experience in a research, workplace, or community setting that will help prepare them for the next step in their education and career. Consult the ENVS advising guide on the program's website for additional information: http://krieger.jhu.edu/envs/requirements/major/
The Environmental Science major requires a total of 71-77.5 credits to complete. All courses must be taken for a letter grade, and students must earn a grade of C- or better to apply the course to the major. All ENVS majors are encouraged to consider studying abroad at some point during their undergraduate years to develop a more global, culturally sensitive perspective on environmental and sustainability issues.

Appropriate transfer or study abroad courses may be counted toward the major at the discretion of the ENVS Director of Undergraduate Studies (DUS). Students are not permitted to double-major in both Environmental Science and Environmental Studies.

**Total Credits** 16

**Focus Area**

Each student should work with their adviser to choose a coherent suite of elective courses totaling at least 15 credits, 12 of which are at the 300-level or above. These courses should be related to a focus area of relevance to the student’s individual interests and career plans. The focus area can center around a particular environmental or sustainability topic or a particular disciplinary lens through which a variety of environmental issues can be viewed. Suggested topical focus areas include but are not limited to: climate change, oceans, and energy; water and soil; ecology and conservation; and environmental health. Appropriate focus area courses are those that concentrate directly on environmental or sustainability issues. The ENVS Director of Undergraduate Studies (DUS) distributes a list of approved focus area courses prior to the registration period for each semester, and approval for other courses can be sought by emailing the major adviser and DUS. Consult the ENVS advising guide on the program’s website for additional information: http://krieger.jhu.edu/envs/requirements/major/

With the adviser approval, choose 15 credits of coursework related to a focus area, at least 12 credits of which are at the 300-level or above.

**Total Credits** 15
The goal of the applied experience requirement is to ensure that students have practical experience in a research, workplace, or community setting that will help prepare them for the next step in their education and career. Consult the ENVS advising guide on the program’s website for additional information: http://krieger.jhu.edu/envs/requirements/major/

The Environmental Studies major requires a total of 64-66.5 credits to complete. All courses must be taken for a letter grade, and students must earn a grade of C- or better to apply the course to the major. All ENVS majors are encouraged to consider studying abroad at some point during their undergraduate years to develop a more global, culturally sensitive perspective on environmental and sustainability issues. Appropriate transfer courses taken abroad may be counted toward the major at the discretion of the ENVS Director of Undergraduate Studies (DUS). Students are not permitted to double-major in both Environmental Studies and Environmental Science.

Environmental Studies Major (B.A.)

The Bachelor of Arts in Environmental Studies is an interdisciplinary major that introduces students to Earth system science and the ways in which humans interact with the environment. It equips students to use a variety of tools, such as policy, science, communication, and individual and societal behavior change, to solve environmental and sustainability problems but focuses on the perspectives and tools of the social sciences. Environmental Studies majors must complete a set of core courses common to both ENVS majors, including a senior capstone course and an applied experience involving either research or an internship, plus three additional social science core courses and a suite of electives selected to form an adviser-approved focus area.

The ENVS senior capstone seminar involves the planning and execution of a tangible, group sustainability project on or off-campus. All ENVS majors must enroll in the capstone course in the fall semester of their senior year. The applied experience can be completed during any semester including summers and involves at least 80 hours of supervised, hands-on work with environmental or sustainability issues through a research project, internship, or study abroad program with a research or internship component. Synthesizing assignments reflecting on the experience are also required. The goal of the applied experience requirement is to ensure that students have practical experience in a research, workplace, or community setting that will help prepare them for the next step in their education and career. Consult the ENVS advising guide on the program’s website for additional information: http://krieger.jhu.edu/envs/requirements/major/

The Environmental Studies major requires a total of 64-66.5 credits to complete. All courses must be taken for a letter grade, and students must earn a grade of C- or better to apply the course to the major. All ENVS majors are encouraged to consider studying abroad at some point during their undergraduate years to develop a more global, culturally sensitive perspective on environmental and sustainability issues. Appropriate transfer courses taken abroad may be counted toward the major at the discretion of the ENVS Director of Undergraduate Studies (DUS). Students are not permitted to double-major in both Environmental Studies and Environmental Science.

Total Credits: 9
Focus Area
Each student should work with their adviser to choose a coherent suite of elective courses totaling at least 12 credits, 9 of which are at the 300-level or above. These courses should be related to a focus area of relevance to the student’s individual interests and career plans. The focus area can center around a particular environmental or sustainability topic or a particular disciplinary lens through which a variety of environmental issues can be viewed. Suggested topical focus areas include but are not limited to: sustainable development; environmental policy and governance; ecology and conservation; and environmental health. Appropriate focus area courses are those that concentrate directly on environmental or sustainability issues. The ENVS Director of Undergraduate Studies (DUS) distributes a list of approved focus area courses prior to the registration period for each semester, and approval for other courses can be sought by emailing the major adviser and DUS. Consult the ENVS advising guide on the program’s website for additional information: http://krieger.jhu.edu/envs/requirements/major/

With adviser approval, choose 12 credits of coursework related to a focus area, at least 9 credits of which are at the 300-level or above

Honors in the ENVS Majors
To qualify for honors in an ENVS major, a student must:

• Earn a cumulative GPA of 3.5 in the courses taken to fulfill the major requirements, as determined at the end of the second-to-last semester of the student’s enrollment.
• Successfully complete 3 or more credits of independent research or senior thesis involving an environmental or sustainability-related project.
• Earn a rating of good or excellent on the final product of the research project, as determined by the faculty research adviser.
• Present the results of the research orally in an appropriate JHU department.

Environmental Studies Minor
The Environmental Studies minor is designed to allow students majoring in other disciplines to develop additional expertise in environmental issues and sustainability. It consists of 18 credits of environmental or sustainability-related courses, including two introductory core courses. At least 6 credits must be at the 300-level or above. Students are encouraged to select electives from relevant courses in both the social and natural sciences but can tailor their coursework to fit their particular interests and career goals. Appropriate elective courses are those focused directly on environmental or sustainability issues. The ENVS Director of Undergraduate Studies (DUS) distributes a list of approved courses for the minor prior to the registration period for each semester, and approval for other courses can be sought by emailing the DUS. All courses must be taken for a letter grade, and students must earn a grade of C- or better to apply the course to the minor.

Graduate Programs

Requirements for Admission
Applicants must submit transcripts, Graduate Record Examination scores (aptitude exam only), and supporting letters to show their ability to do advanced study. The applicant should have his/her GRE scores, verbal and quantitative aptitude, sent to the department before the January 1 deadline for filing applications for admission.

The department expects applicants for advanced degrees to have completed undergraduate training in the basic sciences and mathematics. Normally this includes mathematics through at least integral calculus and a year's course each in physics, chemistry, and biology. Further undergraduate study in one or more of these subjects or in mathematics is highly desirable for all programs in the Earth sciences; additional mathematics is essential for geophysics, atmospheric sciences, and dynamical oceanography. Extensive undergraduate work in Earth sciences is not a requirement for admission. If students lack formal training in this area or have deficiencies in the other related sciences, they may be admitted but will have to allow additional time in the graduate program to make up for deficiencies in their preparation.

JUMP to Requirements for the B.A./M.S. Option for Johns Hopkins Undergraduate ENVS Majors. (p. 187)

Requirements for Advanced Degrees
Candidates for the Ph.D. must take courses and meet requirements specified by their advisory committee; must pass a comprehensive examination before a departmental committee and an oral examination administered by the Graduate Board of the university; and must submit an acceptable dissertation involving significant original research. A minimum of two consecutive terms registered as a full-time student is required.

The department rarely accepts candidates for the M.A. degree alone, but Ph.D. students can, with the consent of their advisors, complete a program that will qualify them for the M.A. degree at the end of the second year. Candidates for this degree must pass a comprehensive examination before a departmental committee, and must satisfy the residency requirement specified above for the Ph.D. degree. A student's advisor may require an essay demonstrating research capability.

For further information about graduate study in the Earth and planetary sciences contact the Chair, Department of Earth and Planetary Sciences.

Fields of Graduate Study and Research
The department offers a range of fields of study covering Earth, Space and Environmental Sciences. In recent years we have invested in hiring new faculty in Planetary Sciences, Geosciences and Environmental Science, with seven new assistant professors and two new full professors. What links all of our fields of research together is a focus on treating individual processes - ranging from the formation of rocks to the distribution of organisms - as part of a system, with implications for and feedbacks from other parts of the system. The description below provides a rough grouping of the research areas involved and the faculty associated with each one. Interested applicants are urged to consult individual group web sites for more detail as well as to view presentations made as part of the department's 50th Anniversary celebration (http://eps.jhu.edu/events/50th-anniversary-symposium/). Prospective students should contact individual faculty members with whom they are interested in working. Students with interests that cross disciplinary boundaries or who use techniques found in different groups are strongly encouraged to apply as we believe that the most exciting questions to pursue in science today involve interdisciplinary research.

Planetary Sciences
In the last four years the department has hired four new faculty members in the Planetary Sciences who study bodies ranging from Mercury to Pluto to exoplanets. Key questions include: What role do planetary atmospheres play in the habitability of planets and the origin and/or evolution of life? (Hörst) What can we learn from the sedimentary record on Mars about what processes have shaped the evolution of that planet? (Lewis) How do planetary dynamos work? (Stanley) How can we use the wealth of spectra coming to us from new sensors to learn about planetary atmospheres? (Sing) A common thread across all of this work is the question of habitability - what sort of things need to happen in order for a planet to be able to support life, and for us to detect it? These questions are addressed using a combination of observation (ground-based telescopes and robotic spacecraft), laboratory experimentation, theoretical modeling, and Earth-analog field studies. The program requires an interdisciplinary focus, drawing from a wide variety of fields including astronomy, geosciences, physics and chemistry. Research often includes data from active planetary exploration missions. EPS faculty include members of the Cassini mission to the Saturn system, New Horizons mission to the Pluto system, and Mars Science Laboratory Rover teams, along with a number of proposed future missions to Venus, and Titan, and other worlds.

Students are encouraged to take courses in astrophysics, chemistry, physics, applied mathematics, computer science, and engineering to gain the comprehensive background necessary for interdisciplinary research. The best undergraduate preparation is a broad background in physics, applied mathematics, chemistry, or earth science. Advanced undergraduate courses in these fields (including differential equations, linear algebra, classical mechanics, electricity and magnetism, thermodynamics, organic, and physical chemistry) are strongly recommended. The EPS Planetary Science research program has close ties with the Space Department of the JHU Applied Physics Laboratory (APL), and students may be co-advised by APL researchers. Students in the department additionally benefit from the local availability of outside institutions including the Space Telescope Science Institute (co-located on the JHU campus), NASA Goddard Space Flight Center, the Carnegie Institution for Science, and the Smithsonian Institution.

Deep Earth Geosciences
This area focuses on understanding chemical and physical processes deep within the Earth and other planetary bodies. Key questions include: How do materials behave at very high temperatures and pressures, and what are the implications of this behavior for the whole planet system? (Wicks, Sverjensky) By what processes and at what rates do petrologic and tectonic systems evolve, and what are the feedbacks with the biosphere? (Viete). How is the Earth's geodynamo changing with time - and why? (Stanley) The interdisciplinary techniques used to study these questions include X-ray scattering and laser studies of planet-building minerals at extreme conditions (Wicks), geological field work and observation, and spatially-resolved geochemical and geochronological analysis of crystalline rocks (Viete) and theoretical and laboratory studies of mineral-fluid interactions (Sverjensky).

Aqueous geochemical studies centered in the Sverjensky group focus on the role of water in the evolution of Earth through deep time, particularly the linkages between water in the deep Earth and the near-surface environment. It involves quantitative geochemical modeling of the chemistry of water-rock interactions from Earth's surface into the upper
mantle. Students participate in research involving the interpretation of experimental studies of water-rock interactions in terms of fundamental properties of aqueous inorganic and organic species over extreme ranges of pressure and temperature. Developing a thermodynamic characterization of the behavior of fluids at elevated pressures and temperatures enables exciting research into topics such as the origins of diamonds, the development and evolution of the continents and the potential roles of abiogenic hydrocarbons in Earth’s deep carbon cycle. Collaborations with experimental laboratories enable a wide range of training in combined theoretical and experimental studies of the role of fluids in the history of Earth and other planets.

Students applying in this area will come from a wide variety of backgrounds, including class and research experience in chemistry, mechanical engineering, material science and condensed matter physics. Recommended classes, depending on the research track, include crystallography, mineralogy, petrology, and field geology, thermodynamics, quantum mechanics, continuum mechanics, and mineral physics.

Research within the fields of petrology and tectonics centered in the Viete group focus on questions of length scales, time scales and drivers. It seeks to understand the tectonic processes that operate at plate margins, the nature and utility of the rock record, and interactions between the solid Earth and biosphere. Current foci include crustal heating and the tectonic significance of metamorphic rocks, scales of tectonic organization and episodicity, and petrologic records of seismicity. Student projects begin in the field, first involving mapping, measurement, observation and sampling. With field context established, geological questions are further interrogated through micro-scale structural, geochemical and geochronological analysis of sampled materials. Simple analytical and numerical modeling of processes of deformation and heat and material transfer are used to reproduce observed features and constrain processes recorded in landscapes and rocks.

Students applying in this area should enjoy field work and the outdoors and will preferably have some background and interest in chemistry, physics and/or mathematics. Recommended classes, depending on research track, may include field geology, petrology and petrography, structural geology, sedimentology, transport phenomena, thermodynamics, and rock mechanics.

Geoscience in the Surface Environment

This area focuses on what the geological record can tell us about the evolution of life on Earth and its interaction with climate. A particular focus of this group is the use of isotope geochemistry to examine the carbon, nitrogen, oxygen and sulfur cycles, and to link changes in the rock record to the actual organisms present at the time. Key questions include: What was the physical and chemical context in which the earliest complex life formed? (Smith) How do environmental conditions and/or biological communities influence geochemical signatures found in the rock record? (Gomes)

Students working in this area will learn a range of skills— including the field geology methods necessary to put samples in context, how to make isotopic measurements necessary to characterize the large-scale chemical environment, and how to use this information in conjunction with quantitative and modeling tools to investigate the coevolution of life and the Earth surface. Additionally, the Smith group has expertise in the paleontology of Ediacaran organisms and the Gomes group uses the tools of microbial ecology. Using multi-disciplinary tools, researchers in this area seek to use insight about the coevolution of life and the Earth surface to provide context to understand modern climate change and investigate the tools that can be used to search for life on other planets.

Oceans, Atmospheres and Climate

The Oceans, Atmospheres and Climate area focuses on understanding planetary-scale and regional dynamics with implications for planetary climates, including anthropogenic climate change. The philosophy underlying the department’s program is a rigorous and thorough process-based understanding of the climate system, with a grounding in fluid dynamics, energy exchange, and relevant chemical and biological interactions. Researchers in the department address these processes with theory, laboratory and numerical experiments, and study both remotely sensed and in situ field observations. Johns Hopkins is a member of the University Corporation for Atmospheric Research.

The best preparation for graduate study in this program is an undergraduate degree in physics, applied mathematics, mechanical engineering, or another parent science such as chemistry, oceanography, meteorology, or geology/geophysics. Prior course work in fluid dynamics, while highly desirable, is not mandatory to pursue graduate study in this area. It is strongly recommended to have a broad background in the parent sciences, specialization in one of them, and at least three years of undergraduate mathematics. Research experience is also desirable.

Research in physical oceanography (involving Profs. Haine, Gnanadesikan and Waugh) focuses on the processes that maintain the global ocean circulation and the ocean’s role in climate and global biogeochemical cycling. In particular, attention is on the role of waves, eddies, and small-scale mixing in controlling the ocean’s part in Earth’s heat and freshwater balances. We also study advection, stirring, and mixing processes in the interior ocean and their roles in dispersing atmospheric trace gases and nutrients. The research program also includes computational oceanography, with links to other Hopkins departments and centers.

Research in atmospheric dynamics, (involving Prof. Waugh) focuses on large-scale dynamics, the transport of trace constituents, and understanding the composition of the global atmosphere (e.g., distributions of stratospheric ozone and tropospheric water vapor). Current interests include stratospheric vortex dynamics, troposphere-stratosphere couplings, transport and mixing processes, and global modeling of chemical constituents.

Research in hydroclimate, including atmospheric processes that drive precipitation and terrestrial hydrology, is a focus of Prof. Zaitchik’s group. This research employs satellite image analysis, numerical modeling, and field observation to build a process-based understanding of the ways in which climate shapes landscape and vice versa. Current interests include drivers of rainfall variability in the tropics, coupled natural-human systems, seasonal forecast, and the application of hydroclimate analysis to studies of water resources, agriculture, and human health.

Research on climate and radiation is found across all of the research groups in this area and includes study of the global climate system and its response to radiative forcing due to changes in greenhouse gases and solar luminosity, the feedback effects of water vapor and clouds, and the radiative and hydrological effects of aerosols. These studies involve global and regional scale modeling, and the analysis and interpretation of satellite observations.

Additionally Prof. Gnanadesikan’s group conducts research in global biogeochemical cycling, focussing on applying and developing large-scale computational models that can be combined with observations remotely sensed data to characterize cycling of key elements (including
carbon, nitrogen, and oxygen) in the earth system. Opportunities exist to link this work to the observational and theoretical geochemistry work done in the department as well as to simulate key periods and transitions in Earth History.

**Ecology: Organisms, Ecosystems and Environmental Change**

This area of research involves understanding how organisms interact with each other and with the physical world, and how humans affect ecological processes and ecosystems. Questions include: How does past and present land use change affect species distribution, community assembly and biogeochemical cycles? (Avolio, Szlavecz) How does biodiversity, especially invasive species, affect the rates of soil biogeochemical cycling the production of greenhouse gasses (Szlavecz)? How do urban environments shape the ecology and evolution of plants and soil organisms within these systems (Avolio, Szlavecz)? What are the linkages between plant community composition and ecosystem function and/or services in grasslands and cities (Avolio)? How resistant or resilient are grasslands to global change drivers and what is their capacity to adapt to new environmental conditions (Avolio)? Students are invited to participate in ongoing collaborations at two Long Term Ecological Research Sites (Baltimore Ecosystem Study and Konza Prairie Biological Station), the Smithsonian Environmental Research Center, the Beltsville Agricultural Research Center, or to design an original research project under the advisement of our faculty.

All Ph.D. students are expected to have a background of general biology, physics, chemistry and calculus. Deficiencies can be made up in the first semesters at Hopkins. Students take a core program of statistics, Earth history, stable isotope geochemistry, and ecology. In conjunction with the Department of Environmental Health and Engineering, Earth and Planetary Sciences offers course work opportunities in aquatic chemistry, microbial ecology, geospatial analysis, and analytical environmental chemistry.

**Financial Aid**

The university makes available to the department a number of Gilman Fellowships, which provide for complete payment of tuition, together with Johns Hopkins’ fellowships and graduate assistantships that carry a nine-month stipend. Graduate assistantships cannot require more than 10 hours a week of service to the department, and all recipients of financial aid carry a full program of study. In addition, a number of special and endowed fellowships pay as much or more. In many areas of study, financial aid carry a full program of study. In addition, a number of special and endowed fellowships pay as much or more. In many areas of study, summer support is also available.

Applications for admission to graduate study and financial aid (including all supporting documents and GRE scores) should be submitted to the department before January 1.

**B.A./M.S. Option for Johns Hopkins ENVS Majors**

Undergraduates majoring in Environmental Science or Environmental Studies (ENVS) may apply for accelerated status toward an M.S. in Environmental Science and Policy (ESP) through the JHU Krieger School of Arts & Sciences’ Advanced Academic Programs. These students should declare their intention to pursue the M.S. during their junior year or early in their senior year to their adviser and to the Director of the ESP Program, Jerry Burgess (Jerry.Burgess@jhu.edu). ENVS students may apply up to three courses taken as undergraduates toward the M.S. in Environmental Science and Policy thereby leaving only seven more courses to complete the M.S. following receipt of their bachelor’s degree.

**Application**

ENVS students may apply for the B.A./M.S. anytime during the senior year or after conferral of their undergraduate degree. The application procedure is the same as that of other AAP applicants and details are found online at: http://advanced.jhu.edu/. Students admitted to the B.A./M.S. program will be assigned a graduate adviser but will also continue to be advised by their ENVS adviser for all matters concerning the bachelor’s degree.

**Course Requirements For B.A./M.S.**

ENVS students will receive two separate degrees, so the requirements of both degrees must be fulfilled. Students cannot earn the M.S. degree without completion of the B.A. or B.S., however, students who do not complete the M.S. retain their B.A. or B.S. ENVS students pursuing the M.S. may opt for either the general ESP degree or a concentration. Up to three courses completed while an undergraduate can count toward the ten courses required for the M.S. Two of the following courses can be used to satisfy the corresponding core course requirements for the M.S. in Environmental Science and Policy.

</tbody>
</table>

(Note that the Environmental Policymaking and Policy Analysis course is a combined ENVS undergraduate and ESP masters class.)

If a student wishes to apply a third course to both their ENVS B.A. or B.S. and their ESP M.S., the course must be approved by the graduate adviser and must be at the 300- to 600- level with content germane to environmental science and policy.

For current faculty and contact information go to http://eps.jhu.edu/people/

**Chair**

Anand Gnanadesikan
biogeochemical oceanography, geophysical fluid dynamics.

**Professors**

Thomas Haine
physical oceanography.

Sabine Stanley
planetary magnetism, planetary interiors, geophysics.

Darrell F. Strobel
planetary atmospheres and astrophysics.

Dimitri Sverjensky
molecular surface geochemistry and environmental geochemistry.

Darryn W. Waugh
atmospheric dynamics.

**Associate Professor**

Benjamin Zaitchik
climate dynamics, surface hydrology.

**Assistant Professors**

Meghan Avolio
plant and urban ecology.

Maya Gomes
stable isotope geochemistry, geobiology.
Sarah Horst  
aromatic chemistry, planetary atmospheres.

Kevin Lewis  
planetary geology and geophysics.

Emmy Smith  
sedimentary geology, biostratigraphy and Earth history.

Daniel Viete  
metamorphic petrology, structural geology and tectonics.

June Wicks  
mineral physics, planetary interiors.

**Professors Emeriti**

John M. Ferry  
m metamorphic geology.

George W. Fisher  
global earth systems and religious ethics.

Bruce D. Marsh  
igneous petrology and geophysics.

Peter I. Olson  
geophysical fluid dynamics.

David R. Veblen  
crystallography.

**Research/Teaching Faculty**

Jerry Burgess  
Lecturer: environmental science and studies.

Xin Chen  
Lecturer: civil engineering.

Rebecca Kelly  
Associate Teaching Professor: environmental science and studies.

Jomar Malodano  
Lecturer: environmental science and studies.

Alexios Monopolis  
Senior Lecturer: environmental science and studies.

Richard Stolarski  
Research Professor: atmospheric chemistry.

Katalin Szlavecz  
Research Professor: soil ecology.

**Joint Appointments**

Andrew W. Beck  
Adjunct Assistant Professor, Earth and Planetary Sciences; Senior Staff Scientist, Applied Physics Lab

Gabriel Bever  
Assistant Professor, Functional Anatomy and Evolution, School of Medicine

Siobhan Cooke  
Assistant Professor, Functional Anatomy and Evolution, School of Medicine

Jocelyne DiRuggiero  
Associate Research Professor, Biology.

Ciaran Harman  
Assistant Professor, Environmental Health and Engineering.

Michael Harrower  
Assistant Professor, Near Eastern Studies.

Kevin J. Hemker  
Professor, Mechanical Engineering.

Takeru Igusa  
Professor, Civil Engineering.

Scot Miller  
Assistant Professor, Environmental Health and Engineering

K.T. Ramesh  
Professor, Mechanical Engineering.

For current course information and registration go to https://sis.jhu.edu/classes/

**Courses**

**AS.270.102. Freshman Seminar: Conversations with the Earth. 3.0 Credits.**

A discussion of topics on Earth's origin, evolution, and habitability. Students will be introduced to the role that scientific thinking and process play in research and our understanding of Earth systems. We will cover a broad foundation of knowledge of Earth sciences, including solid earth, atmospheric, and oceanic systems, as well as topics concerning the origin of life, evolution, ecosystems, and mass extinctions. And we will discuss the relation of these systems to societal concerns such as climate change, energy resources, mineral and ore needs in industry, and nuclear waste storage and risk assessment. We are returning to the original seminar format for this class, with a limit of 15 students. We are looking for students who are willing to engage in frequent class discussion with instructors and classmates to ensure they acquire a broad understanding of the subject matter. This will be a 3 credit course with homework to be completed each week and a term paper submitted at the end of the semester.

Instructor(s): A. Charrier De Assis

Area: Natural Sciences.

**AS.270.103. Introduction to Global Environmental Change. 3.0 Credits.**

A broad survey of the Earth as a planet, with emphasis on the processes that control global changes. Topics include: the structure, formation, and evolution of the Earth, the atmosphere, oceans, continents, and biosphere. Special attention is given to present-day issues, such as global climate change, natural hazards, air pollution, resource depletion, human population growth, habitat destruction, and loss of biodiversity. Open to all undergraduates.

Instructor(s): D. Waugh; K. Szlavecz

Area: Natural Sciences.

**AS.270.110. Freshman Seminar: Sustainable + Non-Sustainable Resources. 1.0 Credit.**

An introduction to the important resources involved in the origin and production of oil, natural gas, coal, cement, metals and geothermal fluids.

Instructor(s): D. Sverjensky

Area: Natural Sciences.
AS.270.111. Freshman Seminar: The Story of Earth. 1.0 Credit.
The four and a half billion year story of Earth's global changes focusing
on the co-evolution of Earth and Life.
Instructor(s): D. Sverjensky
Area: Natural Sciences.

AS.270.112. The Changing Arctic Environment: Problem or Opportunity?.
3.0 Credits.
The Arctic is warming three times faster than the global-mean rate. In this
course we will be studying this phenomenon and its consequences by
looking at the interconnected parts of the Arctic climate system (ocean,
atmosphere, and ice), how they are changing, and which socio-economic
opportunities and environmental challenges arise from these changes.
Instructor(s): R. Gelderloos
Area: Natural Sciences.

AS.270.113. Freshman Seminar: Environmental Poisons. 1.0 Credit.
An exploration of the occurrence and potential effects of poisons in the
environment, from naturally occurring ones such as arsenic to those that
may be introduced by mankind such as nuclear waste.
Instructor(s): D. Sverjensky
Area: Natural Sciences.

AS.270.114. Guided Tour: The Planets. 3.0 Credits.
An introduction to planetary science and planetary exploration primarily
for non-science majors. A survey of concepts from astronomy, chemistry,
geology, and physics applied to the study of the solar system.
Instructor(s): S. Stanley
Area: Natural Sciences.

AS.270.116. Freshman Seminar: An Introduction to Climate Change. 3.0
Credits.
This course introduces the main physical components of the Earth's
climate systems and their documented and forecasted changes. The first
part of the course presents evidences of climate change in Earth's history,
and introduces the main natural and anthropogenic drivers of climate
change. The second part of the course focuses on future climates,
and includes modules about climate modeling, building of emission
scenarios, geoengineering, emission reductions and adaptability. The
course is highly interdisciplinary, exploring the relationships among
climate science, policy, ecology, economy and ethics. Freshmen Only. No
prerequisites required.
Instructor(s): V. Aquila
Area: Natural Sciences.

3.0 Credits.
This course is designed to introduce non-science students to the ways
in which humans and the Earth interact. These interactions go in both
directions, with Earth processes and materials affecting human society,
and human activities altering the Earth. Topics include natural disasters,
natural resources, and environmental issues rooted in geology; and
they are examined from both a historical perspective and in the context
of current events. Class time involves active learning and hands-on
experiences. Course open to freshmen, sophomores, and juniors. Seniors
by instructor permission only.
Instructor(s): R. Kelly
Area: Natural Sciences.

AS.270.205. Introduction to Geographic Information Systems and
Geospatial Analysis. 3.0 Credits.
The course provides a broad introduction to the principles and practice
of Geographic Information Systems (GIS) and related tools of Geospatial
Analysis. Topics will include history of GIS, GIS data structures, data
acquisition and merging, database management, spatial analysis, and GIS
applications. In addition, students will get hands-on experience working
with GIS software.
Instructor(s): X. Chen
Area: Engineering, Natural Sciences.

AS.270.220. The Dynamic Earth: An Introduction to Geology. 3.0 Credits.
Basic concepts in geology, including plate tectonics; Earth's internal
structure; geologic time; minerals; formation of igneous, sedimentary,
and metamorphic rocks; development of faults, folds and earthquakes;
geomagnetism. Corequisite (for EPS Majors): AS.270.221; optional for
others. The course is introductory and open to undergraduates at all
levels; freshmen are encouraged to enroll.
Prerequisites: AS.030.101 OR ( AS.171.101 AND AS.171.102 ) or
equivalent.
Instructor(s): D. Viete; E. Smith
Area: Natural Sciences.

AS.270.221. The Dynamic Earth Laboratory. 2.0 Credits.
This course is a hands-on learning experience for introductory geological
concepts and techniques using geological tools, such as mineral/rock
samples, microscopes, and maps. Field trips is its essential part. The
course is open to undergraduates at all levels; freshmen who wish to get
their hands (and boots) dirty are encouraged to enroll.
Prerequisites: Students must have completed Lab Safety training prior to
registering for this class.
Corequisites: AS.270.220
Instructor(s): D. Viete; E. Smith
Area: Natural Sciences.

AS.270.222. Mineralogy. 4.0 Credits.
An introduction to the properties, occurrence, and origin of the basic
constituents of the Earth, including minerals and rocks. Introductory
training in the recognition of minerals and rocks in the laboratory and the
field.
Prerequisites: Students must have completed Lab Safety training prior to
registering for this class.
Instructor(s): J. Wicks
Area: Natural Sciences.

AS.270.224. Oceans & Atmospheres. 3.0 Credits.
A broad survey of the Earth's oceans and atmospheres, and their role in
the environment and climate. Topics covered include waves, tides, ocean
and atmosphere circulation, weather systems, tornadoes and hurricanes,
El Niño, and climate change. For science and engineering majors
Instructor(s): A. Gnanadesikan; T. Haine
Area: Natural Sciences.
AS.270.302. Aqueous Geochemistry. 3.0 Credits.
Modeling the chemistry of water-rock interactions from weathering and riverine development at Earth's surface to hot springs at depth, fluids in subduction zones in Earth's interior, and the ancient fluids preserved in fluid inclusions. Thermodynamic basis for the calculation of equilibria and irreversible chemical mass transfer involving minerals and aqueous species at low and high temperatures and pressures. The course culminates with practical examples of research interest to individual participants.
Prerequisites: (AS.030.101 AND AS.030.102) AND (AS.270.220 AND AS.270.221) or equivalents.
Instructor(s): D. Sverjensky
Area: Natural Sciences.

AS.270.303. Earth History. 3.0 Credits.
This course will explore the evolution of life in the context of environmental, ecological, and geological changes to the Earth surface system. The goal of the class is to provide students with an understanding of how geological and palaeontological records provide insight into the origin(s) of life, oxygenation of the atmosphere, the evolution of multicellularity, evolutionary radiations and extinctions, and modern global change.
Prerequisites: AS.270.103 OR AS.270.220 OR AS.270.224; or permission of the instructor.
Instructor(s): M. Gomes
Area: Natural Sciences.

AS.270.304. Igneous Geology and Volcanology. 3.0 Credits.
This course provides an introduction to igneous and volcanic processes on Earth and other planetary bodies. Focus is placed on linking observations made on rocks in hand sample and outcrop to Earth/planetary processes. The course will review crystal chemistry of major rock-forming minerals and progress through how igneous rocks form. Volcanism, including eruption processes, landforms and tectonic settings, will be reviewed. Labs will include rock identification, study of thin sections under microscope and field trips. Teaching is geared toward the graduate and advanced undergraduate level. Recommended course background: AS.270.220 and AS.270.221, or instructor permission.
Instructor(s): A. Beck
Area: Natural Sciences.

AS.270.305. Energy Resources in the Modern World. 3.0 Credits.
This in-depth survey will inform students on the non-renewable and renewable energy resources of the world and the future prospects. Topics include petroleum, natural gas, coal, nuclear, hydroelectric, geothermal, solar, wind, biomass, and ocean energy. Global production, distribution, usage, and impacts of these resources will be discussed.
Instructor(s): J. Burgess
Area: Natural Sciences.

AS.270.306. Urban Ecology. 3.0 Credits.
Urban ecology has been called the ecology in, of, and for cities. In this course, we will explore how ecological concepts are applied to urban ecosystems and the different approaches to urban ecological research. Topics will include: Biodiversity, water dynamics, energy and heat island effects, and nutrient cycling, urban metabolism, design of greenspace, and sustainability of cities. We will use Baltimore as a case study for studying cities.
Prerequisites: AS.270.308 OR EN.570.205 OR EN.570.403
Instructor(s): M. Avolio
Area: Natural Sciences.

AS.270.307. Geoscience Modeling. 4.0 Credits.
An introduction to modern ways to interpret observations in the context of a conceptual model. Topics include model building, hypothesis testing, and inverse methods. Practical examples from geophysics, engineering, and medical physics will be featured.
Instructor(s): T. Haine
Area: Natural Sciences.

AS.270.308. Population/Community Ecology. 3.0 Credits.
This course explores the distribution and abundance of organisms and their interactions. Topics include dynamics and regulation of populations, population interactions (competition, predation, mutualism, parasitism, herbivory), biodiversity, organization of equilibrium and non-equilibrium communities, energy flow, and nutrient cycles in ecosystems. Field trip included. Permission of instructor.
Instructor(s): K. Szlavecz
Area: Natural Sciences.

AS.270.310. Evolution and Development of the Vertebrates. 3.0 Credits.
Modern vertebrates (animals with backbones) are the products of a more than 500-million-year evolutionary history. This course surveys that history and uses it to explore such core evolutionary concepts as adaptive radiation, convergence, extinction, homology, phylogenetic taxonomy, and tree thinking. Emphasis will be placed on the origins of the modern vertebrate fauna and how fossils are being integrated with developmental biology to better understand major transitions in the vertebrate body plan.
Instructor(s): G. Bever
Area: Natural Sciences.

AS.270.311. Geobiology. 3.0 Credits.
A survey of the interactions between geological and biological processes at and near the Earth's surface, covering topics such as biogeochmistry and nutrient cycles, soil chemistry, biomarkers, archives of paleobiology, and the evolution of life, with an emphasis on terrestrial systems.
Recommended Course Background: AS.270.220
Instructor(s): N. Levin
Area: Natural Sciences.

AS.270.312. Mammalian Evolution. 3.0 Credits.
An introduction to the evolutionary history and diversity of mammals, with emphasis on the first half of the Cenozoic - the beginning of the Age of Mammals. The course will focus primarily on the adaptive radiation of mammals (including our own order primates) that followed the extinction of the dinosaurs, exploring the origins and relationships of the major groups of mammals as well as the anatomical and ecological reasons for their success. Lectures will be supplemented with relevant fossils and recent specimens.
Instructor(s): S. Cooke
Area: Natural Sciences.

AS.270.313. Isotope Geochemistry. 3.0 Credits.
Instructor(s): B. Passey
Area: Natural Sciences.
AS.270.315. Natural Catastrophes. 3.0 Credits.
A survey of naturally occurring catastrophic phenomena, with emphasis on the underlying physical processes. Topics include hurricanes, tornadoes, lightning, earthquakes, tsunamis, landslides, and volcanic eruptions and climate change. Intended for students in science and engineering.
Instructor(s): A. Charrier De Assis
Area: Natural Sciences.

AS.270.316. Planets. 3.0 Credits.
This course will serve as an introduction to planetary science at a more advanced level than AS.270.114. Topics covered will include formation of the solar system, planetary interiors, surfaces and atmospheres, solar system exploration, and extrasolar planets. Recommended Course Background: AS.270.220 and AS.270.224.
Instructor(s): S. Horst
Area: Natural Sciences.

AS.270.317. Conservation Biology. 3.0 Credits.
In this course, students examine the meaning and implications of biodiversity with a focus on disciplines associated with conservation biology, wildlife conservation and wildlife management, including taxonomy, genetics, small population biology, chemical and restoration ecology, and marine biology. This includes exploring how conservation biology differs from other natural sciences in theory and in application. Students learn the major threats to biodiversity and what natural and social science methods and alternatives are used to mitigate, stop, or reverse these threats. The course also includes the economic and cultural tradeoffs associated with each conservation measure at the global, national, regional, and local levels. One required field trip.
Instructor(s): J. Burgess
Area: Natural Sciences.

AS.270.318. Remote Sensing of the Environment. 3.0 Credits.
This course is an introduction to the use of remote sensing technology to study Earth's physical and biochemical processes. Topics covered include remote sensing of the atmosphere, land and oceans, as well as remote sensing as a tool for policy makers. Also offered as 270.618
Instructor(s): B. Zaitchik; K. Lewis
Area: Natural Sciences.

AS.270.319. Geochronology and High-Temperature Isotope Geochemistry. 3.0 Credits.
Introduction to radiotisotope geo/thermochronology and mantle stable and radiotisotope geochemistry. Course covers: (1) methods for dating of rocks and geologic processes using long-half-life radiotisotope systems, including the various isotope systems available and their applicability; (2) radiotisotope techniques for investigation of the geochemical evolution of the crust and mantle; (3) isotope fractionation and utility of traditional and novel stable isotope geochemistry for interrogating high-temperature processes, and (4) thermochronology and methods for interrogating upper-crustal processes. Recommended course background: AS.270.220 and AS.270.221, or instructor permission.
Instructor(s): D. Viete.

AS.270.320. Seminar in Planetary Science. 1.0 Credit.
Major problems of current interest in planetary science are critically discussed in depth.
Instructor(s): S. Horst
Area: Natural Sciences.

AS.270.323. Ocean Biogeochemical Cycles. 3.0 Credits.
This course will examine the cycling of trace chemicals in the ocean, consider what we can learn from the distributions of these chemicals about the ocean circulation, and ocean ecosystems. Topics covered will include oceanic biological productivity, open water cycling of nutrients and oxygen, ocean acidification and sediment cycling.
Instructor(s): A. Gnanadesikan
Area: Natural Sciences.

AS.270.324. Climate variability with python. 1.0 Credit.
Seasonal-to-decadal climate variability is important for various fields from agriculture to reinsurance, and it is challenging dynamically as the fluctuations often include coupled ocean-atmosphere mechanisms. This summer course covers mechanism for seasonal-to-decadal climate variability, and we will use python to build simple models to understand them. Students will learn the basics of python, numerical integration, and climate modelling. The course is S/U but will require a student report on a chosen mechanism of climate variability.
Instructor(s): A. Nummelin
Area: Natural Sciences.

AS.270.325. Introductory Oceanography. 3.0 Credits.
This class is an introduction to a wide range of physical, chemical, and biological phenomena in the world's oceans. Underlying basic principles are exposed wherever possible. Topics covered include: seawater, waves, tides, ocean circulation, chemical oceanography, biogeochemical ocean processes, and remote sensing of the oceans. Recommended Course Background: freshman Physics, Chemistry, Calculus through ordinary differential equations.
Instructor(s): A. Gnanadesikan
Area: Natural Sciences.

AS.270.326. Cosmochemistry. 4.0 Credits.
Students in this course will gain an understanding of the origin of various forms of matter in our Solar System and beyond, along with its evolution through geologic processes. Beginning with the concepts of nucleosynthesis and stellar evolution, this course will then cover the condensation of matter, meteoritics, and petrogenetic evolution of differentiated, rocky bodies (i.e. asteroids, the Moon, Mars). Evolution of matter in extra-Solar planetary systems (i.e. exoplanets) will also be broached. In lab we will examine thin sections of meteorites, lunar material, and terrestrial analogs - a field trip to the Smithsonian Meteorite Collection is planned. Graduate and advanced undergraduate-level students are encouraged, as are interdisciplinary students with an interest in planetary science.
Instructor(s): A. Beck; J. Wicks
Area: Natural Sciences, Social and Behavioral Sciences.
AS.270.328. Planetary Exploration: Techniques and Data Analysis. 3.0 Credits.
Have you ever wondered what it would be like if you could visit other planets and travel through the space? Students in this course will use state-of-the-art observational techniques in planetary exploration and actual spacecraft data from the Cassini mission to Saturn and the Mars Rover mission to solve problems in planetary science and design a space exploration mission. Important planetary properties, such as atmospheric composition and interior composition of a planet, will be studied using remote sensing and in situ data. Recent discoveries about exoplanets will be integrated into course activities. Recommended Course Background: One semester of Introductory Chemistry (AS.030.101).
Instructor(s): X. Yu
Area: Natural Sciences, Social and Behavioral Sciences.

AS.270.332. Soil Ecology. 3.0 Credits.
The course introduces basic aspects of cycles and flows in the soil ecosystem, and provides students with an overview of the higher groups of soil organisms. Laboratory and field surveying methods are also covered.
Instructor(s): K. Szlavecz
Area: Natural Sciences.

AS.270.336. Freshwater Systems. 3.0 Credits.
A study of streams, lakes, and groundwater with a focus on aspects of water quality, hydrology, geomorphology, and aquatic ecology that are relevant to human impacts on freshwater systems. US environmental policies and water resource management agencies will also be examined in the context of issues such as dams, cattle grazing, climate change, and water allocation.
Prerequisites: AS.270.103 OR AS.271.107 or permission of the instructor.
Instructor(s): R. Kelly
Area: Natural Sciences.

AS.270.337. Freshwater Systems Lab. 1.0 Credit.
A hands-on investigation of the water quality, hydrology, geomorphology, and aquatic ecology of streams and other freshwater bodies. Includes field trips to water-related facilities such as drinking water and wastewater treatment plants.
Instructor(s): R. Kelly
Area: Natural Sciences.

AS.270.350. Sedimentary Geology. 4.0 Credits.
Sedimentary rocks are the historical records of the Earth, documenting climate change, mass extinctions, and the evolution of life. This course will provide an introduction to sedimentary processes and sedimentary rocks. Focus is placed on linking physical observations to the ancient environments in which sedimentary rocks once formed. Fundamental tools for interpreting the sedimentary rock record, such as depositional models, geochronology, and chronostratigraphy will be reviewed. Two 1-day weekend field trips will occur over the course of the semester. There will also be weekly 1-hour labs. Lab and field trip times will be determined in the first week of class. Graduate and advanced undergraduate level.
Recommended Course Background: AS.270.220 or instructor permission.
Instructor(s): K. Lewis; M. Gomes
Area: Natural Sciences.

AS.270.366. Spacecraft Instrumentation Project. 3.0 Credits.
Co-Listed with EN.530.366 Investigation into the content relevant to an ongoing spacecraft instrumentation project. An interdisciplinary team will enhance the skills and knowledge of science and engineering students. Topics include mission background, planetary science, sensor design, spacecraft systems, and mission planning, and sensor fabrication, calibration, integration, and testing, data analysis and interpretation, scientific/technical writing and publication.
Instructor(s): S. Horst
Area: Engineering, Natural Sciences.

AS.270.369. Geochem Earth/Environmen. 3.0 Credits.
An introduction to all aspects of Geochemistry theoretical, experimental, and observational, including the application of geochemistry to issues such as the migration of toxic metals and nuclear waste.
Prerequisites: AS.270.220
Instructor(s): D. Sverjensky
Area: Natural Sciences.

AS.270.378. Present and Future Climate. 3.0 Credits.
Intended for majors who are interested in the science that underlies the current debate on global warming, the focus is on recent observations one can glean from model simulations. Meets with AS.270.641.
Recommended Course Background: AS.110.108-AS.110.109 and AS.171.101-AS.171.102
Prerequisites: Student may not receive credit for both AS.270.378 and AS.270.641.
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

AS.270.379. Atmospheric Science. 3.0 Credits.
A survey of core topics in atmospheric science, including dynamics, thermodynamics, radiative transfer, and chemistry. The course addresses both basic principles and applications to weather and climate.
Prerequisites: (AS.110.108 AND AS.110.109) AND (AS.171.101 AND AS.171.102) or instructors permission.
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

AS.270.380. Seminar in Regional Field Geology. 3.0 Credits.
Introduction to the regional geology and geological history of the Appalachian system (from Alabama to Newfoundland). Key papers on regional bedrock geology and Mesoproterozoic through Phanerozoic tectonics are reviewed in weekly seminar classes. Two three-day field trips are made on weekends negotiated at the beginning of the semester. Fieldwork will be designed with student input to test ideas and models from the literature. Techniques in sedimentary, metamorphic, igneous and structural field geology are introduced and developed in the field.
Recommended course background: AS.270.220 and AS.270.221, or instructor permission.
Instructor(s): D. Vite; E. Smith
Area: Natural Sciences, Social and Behavioral Sciences.

AS.270.395. Planetary Physics and Chemistry. 3.0 Credits.
The fundamental principles governing the dynamic processes within and around the planets are treated in some detail. Core equations are developed and used to analyze nebula condensation, planetary accretion, convection in mantles and atmospheres, radiative and conductive heat transport, seismic waves, hurricanes, volcanism, and meteorite impacts, among others. Emphasis is on fundamentals and problem solving.
Prerequisites: AS.030.101; AS.171.101-102 or 103-104 or 105-106.
Instructor(s): D. Strobel
Area: Natural Sciences.
AS.270.396. Special Topics in Planetary Exploration. 3.0 Credits.
A selection of planetary research topics investigated by Prof. Strobel spanning the past 45 years covering the progress that has been made and remaining problems that still need to be addressed. The majority of topics will involve the outer solar system and the science discoveries made by the Voyager, Cassini-Huygens, and New Horizons Missions as well as observations by Earth orbiting satellites – IUE, HUT, HST, FUSE.
Instructor(s): D. Strobel
Area: Natural Sciences.

AS.270.400. The Carbon Cycle: Past, Present and Future. 3.0 Credits.
This course will explore how the carbon cycle shapes environmental conditions and influences other biogeochemical cycles through an investigation of the modern carbon cycle, major carbon cycle perturbations in the geological record, and projections of future global change. The majority of the class will be structured as a reading seminar, but students will also develop an understanding of how to use quantitative models to evaluate patterns of change associated with both modern and ancient carbon cycle perturbations with implications for predicting future environmental changes. Recommended Prerequisites: AS.270.103 or AS.270.220 or AS.270.224
Instructor(s): E. Smith; M. Gomes
Area: Natural Sciences, Quantitative and Mathematical Sciences.

AS.270.401. Metamorphic Geology. 3.0 Credits.
Introduction to metamorphic geology and the concepts on which it is built. Ideas and techniques that underpin metamorphic petrology are introduced in the context of the development and evolution of metamorphic geology as a discipline. Focus is on utility of metamorphic geology in understanding crustal processes and the nature of plate tectonics. One-day, weekend field trips to explore the Baltimore Gneiss Domes. Recommended course background: AS.270.220 and AS.270.221, or instructor permission.
Prerequisites: AS.270.220 AND AS.270.221
Instructor(s): D. Viete
Area: Natural Sciences.

AS.270.404. Planetary Interiors. 3.0 Credits.
This course investigates the physical processes occurring in planetary interiors. Topics include formation and differentiation of planetary bodies, planetary structure, thermal evolution, convection, and dynamo generation of magnetic fields. Standard remote sensing methods used to investigate planetary interiors and results from recent planetary satellite missions will also be discussed. Recommended: Knowledge of vector calculus, PDEs and introductory physics.
Instructor(s): S. Stanley
Area: Natural Sciences.

AS.270.405. Modeling the Hydrological Cycle. 3.0 Credits.
Survey of modeling techniques for hydrological monitoring, analysis and prediction, including applied exercises with commonly used models. Topics include the terrestrial water balance, rivers and floods, groundwater, atmospheric transport, and precipitation processes. Focus is on numerical methods applicable at the large watershed to global scale.
Instructor(s): A. Dezfuli; B. Zaitchik.

AS.270.410. Planetary Surface Processes. 3.0 Credits.
This course explores processes that influence the evolution of planetary surfaces, including impact cratering, tectonics, volcanism, weathering, and sediment transport. These processes manifest themselves as structural deformation of planetary crusts due to loading by volcanoes, formation of craters by asteroid impacts, modification of surfaces by flowing landslides, rivers and glaciers, and the accumulation and transport of sand in dune fields on various planets. Emphasis is on the relationship to similar Earth processes, and the integrated geologic histories of the terrestrial planets, satellites, and asteroids. The focus will be on developing a physical understanding of these processes to interpret the surface characteristics and evolution of planets, satellites, asteroids, and comets from both qualitative assessments and quantitative measurements obtained from spacecraft data. A key component of the class will be the interpretation of these observations from recent and current planetary missions to the Moon, Mars, and other terrestrial bodies. Recommended Course Background: A sound knowledge of Calculus and Introductory Physics, and some prior knowledge of Earth and/or Planetary Science.
Instructor(s): K. Lewis
Area: Natural Sciences.

AS.270.423. Planetary Atmospheres. 3.0 Credits.
Instructor(s): S. Horst
Area: Natural Sciences.

AS.270.425. Earth and Planetary Fluids. 3.0 Credits.
An introductory course on the properties, flow, and transport characteristics of fluids throughout the Earth and planets. Topics covered include: constitutive relationships, fluid rheology, hydrostatics, dimensional analysis, low Reynolds number flow, porous media, waves, stratified and rotating fluids, plus heat, mass, and tracer transport. Illustrative examples and problems are drawn from the atmosphere, ocean, crust, mantle, and core of the Earth and other Planets. Open to graduate and advanced undergraduate students. Recommended Course Background: Basic Physics, Calculus, and familiarity with ordinary differential equations.
Instructor(s): S. Stanley
Area: Natural Sciences.

AS.270.431. Tectonics Seminar. 3.0 Credits.
Introduction to plate tectonics and its “framework” role in understanding the Earth. Kay papers will be discussed in a weekly seminar class. Focus will be on early works that helped establish the theory, in addition to recent breakthrough contributions that have led to modifications and improvements to the theory of plate tectonics.
Instructor(s): D. Viete.

AS.270.495. Senior Thesis. 3.0 Credits.
Preparation of a substantial thesis based upon independent student research, supervised by at least one faculty member in Earth and Planetary Sciences. Open to Sr. departmental majors only. Required for department honors.
Instructor(s): A. Gnanadesikan; T. Haine
Area: Natural Sciences
Writing Intensive.
AS.270.496. Senior Thesis. 4.0 Credits.
Preparation of a substantial thesis based upon independent student research, supervised by at least one faculty member in Earth and Planetary Sciences. Open to Sr. departmental majors only. Required for department honors.
Instructor(s): A. Gnanadesikan, B. Passey; T. Haine
Writing Intensive.

AS.270.501. Independent Study. 3.0 Credits.
An independent course of study may be pursued under the direction of an adviser on those topics not specifically listed in the form of regular courses.
Instructor(s): B. Marsh; B. Zaitchik; C. Parker; K. Szelavecz.

AS.270.503. Independent Research. 3.0 Credits.
Instructor(s): G. Ball; K. Lewis.

AS.270.504. Independent Research. 0.0 - 3.0 Credits.
Research under the direction of members of the Earth & Planetary Sciences Faculty.
Instructor(s): E. Smith; M. Gomes; S. Horst.

AS.270.595. Internship. 1.0 Credit.
Instructor(s): C. Parker; D. Sverjensky; D. Veblen; D. Waugh.

AS.270.599. Independent Study. 3.0 Credits.
Instructor(s): Staff.

AS.270.603. Geochemistry Seminar.
A variety of topics of current interest involving mineral-fluid interactions will be reviewed.
Instructor(s): D. Sverjensky.

AS.270.605. EPS Colloquium.
A weekly seminar series in which graduate students present their latest research results and attend Departmental seminars. This course is required for all graduate students in the Department of Earth and Planetary Sciences.
Instructor(s): S. Stanley.

AS.270.606. EPS Colloquium.
A weekly seminar series in which graduate students present their latest research results and attend Departmental seminars. This course is required for all graduate students in the Department of Earth and Planetary Sciences.
Instructor(s): T. Wright.

AS.270.611. Global Atmospheric Dynamics.
This course will examine the fluid dynamics that determine large-scale atmospheric circulation and variability using Ian James’ “Introduction to Circulating Atmospheres.” Topics covered will include the dynamics of Hadley cells, mid-latitude jets, baroclinic instability, monsoon circulation, and low-frequency variability of the circulation.
Instructor(s): A. Gnanadesikan.

Transitioning from graduate school to a postdoc to a “permanent” job in the natural sciences requires a set of essential skills that are not covered as a formal component of most Ph.D. programs. This seminar will be a weekly discussion of career issues relevant to new scientists. Topics will include elements of good presentations, conferences, scientific writing and peer-review, employment trends, job interviews, and grant proposals. The class will conclude with a mock grant proposal review panel, conducted by the students. This seminar is aimed at graduate and advanced undergraduate students in the natural sciences planning careers in academia or industry.
Instructor(s): J. Roberts.

AS.270.615. Inversion Modeling & Data Assimilation.
This graduate class will introduce modern inverse modeling and data assimilation techniques. These powerful methods are used in atmospheric science, oceanography, and geophysics and are growing more widespread. Topics will include: singular value decomposition, Green's function inversions, Kalman filtering, and variational data assimilation. The class will include lectures on concepts and theory, and practical experience in the computer laboratory. Permission of Instructor Required
Instructor(s): T. Haine.

Also offered as 270.318
Instructor(s): B. Zaitchik; K. Lewis
Area: Natural Sciences.

AS.270.619. Regional Climate Analysis.
This seminar style course will address advanced topics in regional climate, including dynamic mesoscale models, climate change downscaling, seasonal forecasts, and statistical methods. Students will review relevant literature and collaborate to address modeling and analysis challenges.
Instructor(s): B. Zaitchik
Area: Natural Sciences.

AS.270.620. Seminar in Geophysical Turbulence and Transport.
Turbulence plays an important role in setting the structure of both atmospheres and oceans by transporting heat and momentum. It also plays a key role in mobilizing chemical species such as nutrients and aerosols that play key roles in the Earth System. This seminar will cover how we measure and model turbulence and its effects. For the Fall of 2015 the course will center around Planetary Boundary Layers, including topics such as scaling theories, large eddies in boundary layers and their simulation, and interactions with small-scale topographic features.
Instructor(s): A. Gnanadesikan.

Discussion of the physical principles that underlie earth remote sensing. Topics to include radiative transfer in Earth's atmosphere, operating principles of active and passive remote sensing systems, and advanced methods for image analysis.
Instructor(s): B. Zaitchik.

AS.270.626. Ocean General Circulation.
The aim of this course is to achieve conceptual understanding of the large scale low frequency ocean general circulation. The role of the ocean circulation in earth’s climate is emphasized throughout.
Instructor(s): T. Haine.

Discussion of current research topics in soil ecology and biogeochemistry.
Instructor(s): K. Szelavecz.

AS.270.628. Field Seminar.
Weekend field trip to explore regional geology. Students are required to prepare short presentations on field trip stops in advance of weekend trip. Attendance at organizational meetings is required. Open to E & PS graduate students and upper level E & PS undergraduate majors and minors.
Two meetings to be scheduled prior to trip. Trip dates are 4/15-4/17/2016. Consult instructors for details.
Instructor(s): D. Viete.
**AS.270.629. Tracer Transport in Geophysical Flows.**
This course examines the transport of substances in geophysical flows. Topics covered include fundamental transport processes, transport in simple flows, and use of chemical tracers to infer transport properties. These concepts will be illustrated by case studies in a variety of geophysical flows, including the flow in atmospheres, oceans, lakes, and groundwater.
Instructor(s): D. Waugh.

**AS.270.630. Physics and Chemistry of Aerosols.**
This course will cover fundamentals of aerosol physics and chemistry. Topics covered will include aerodynamics and diffusion of aerosol particles, condensation and evaporation, particle size distributions, optics of small particles, characterization of particle composition, and the diversity of aerosols found in planetary atmospheres. Recommended Course Background: Basic Physics and Chemistry. Calculus.
Instructor(s): S. Horst.

**AS.270.631. Tectonics Seminar.**
Introduction to plate tectonics and its "framework" role in understanding the Earth. Kay papers will be discussed in a weekly seminar class. Focus will be on early works that helped establish the theory, in addition to recent breakthrough contributions that have led to modifications and improvements to the theory of plate tectonics.
Instructor(s): D. Viete
Area: Natural Sciences.

**AS.270.633. Advanced Topics in Isotopic Geochemistry.**
Consent of instructor required in depth exploration of selected systems in stable isotope geochemistry, and examination of the physical basis of stable isotope fractionation. Topics vary annually.
Instructor(s): N. Levin
Area: Natural Sciences.

**AS.270.641. Present and Future Climate.**
Meets with AS.270.378.
Prerequisites: Student may not receive credit for both AS.270.378 and AS.270.641.
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

**AS.270.642. Surface Geochemistry.**
Instructor(s): D. Sverjensky.

**AS.270.644. Physics of Climate Variability.**
This course is an advanced-level review of the ways in which climate varies on time scales of seasons to decades, including El Nino, the Pacific Decadal Oscillation, the Indian Ocean Dipole Mode, the North Atlantic Oscillation and others. Topics covered will include, depending on class's interest: 1) Methods for isolating climate modes. (2) Key dynamic and thermodynamic processes involved in causing such fluctuations, including atmospheric and oceanic wave propagation, air-sea interaction and changes in the thermohaline circulation. (3) Impacts of climate modes on biogeochemical cycling, including some that are used by paleoclimatologists to reconstruct past variability. Geophysical understanding and links to fundamental mechanisms are emphasized. Format will consist of a mix of lectures and paper discussions.
Instructor(s): A. Gnanadesikan
Area: Natural Sciences.

**AS.270.647. Earth's Interior.**
Mechanical processes in Earth's core and mantle with applications to plate tectonics, the thermal and chemical evolution of the Earth, and generation of Earth's magnetic field.
Instructor(s): P. Olson.

**AS.270.653. Earth and Planetary Fluids II.**
A sequel to AS.270.425 concentrating on planetary-scale atmospheric and oceanic circulation. Physical understanding of the underlying fluid dynamics will be emphasized.
Instructor(s): D. Waugh; T. Haine.

**AS.270.654. Environmental Data Analysis.**
Environmental data is often messy-contaminated with noise, fundamental nonlinear, potentially stationary. This course will build on Menke and menke's Environmental Data Analysis with Matlab to examine methods of analyzing environmental data that don't lead us to confuse noise with signal. Topics covered will include significance testing, spectral estimation, nonparametric methods, multivariate data analysis. Applications will be tailored to the student interest.
Instructor(s): A. Gnanadesikan.

**AS.270.662. Seminar in Planetary Science.**
Instructor(s): N. Izenberg.

**AS.270.667. Seminar in Soil Ecology.**
Instructor(s): K. Szlavecz
Area: Natural Sciences.

**AS.270.668. Geobiology Seminar.**
Geobiology is the study of interactions between life and rocks. In this class we will explore how organisms impact sedimentary records both directly, by leaving behind biosignatures, or indirectly, by affecting their surroundings in a way that promotes formation of certain types of minerals. This will serve as a guide for interpreting geological records during the early evolution of life on Earth, the rise of animals, and major mass extinctions.
Instructor(s): E. Smith; M. Gomes
Area: Natural Sciences.

**AS.270.679. Atmospheric Science.**
A survey of core topics in atmospheric science, including dynamics, thermodynamics, radiative transfer, and chemistry. The course addresses both basic principles and applications to weather and climate.
Prerequisites: (AS.110.108 AND AS.110.109) AND (AS.171.101 AND AS.171.102) or permission of instructor.
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

**AS.270.680. Seminar in Regional Field Geology.**
Introduction to the regional geology and geological history of the Appalachian system (from Alabama to Newfoundland). Key papers on regional bedrock geology and Mesoproterozoic through Phanerozoic tectonics are reviewed in weekly seminar classes. Two three-day field trips are made on weekends negotiated at the beginning of the semester. Fieldwork will be designed with student input to test ideas and models from the literature. Techniques in sedimentary, metamorphic, igneous and structural field geology are introduced and developed in the field. Recommended course background: AS.270.220 and AS.270.221, or instructor permission.
Instructor(s): D. Viete; E. Smith
Area: Natural Sciences.

**AS.270.696. Special Topics in Planetary Exploration.**
A selection of planetary research topics investigated by Prof. Strobel spanning the past 45 years covering the progress that has been made and remaining problems that still need to be addressed. The majority of topics will involve the outer solar system and the science discoveries made by the Voyager, Cassini-Huygens, and New Horizons Missions as well as observations by Earth orbiting satellites – IUE, HUT, HST, FUSE.
Instructor(s): D. Strobel
Area: Natural Sciences.
AS.270.807. Research.
Instructor(s): Staff.

AS.270.808. Research.
Instructor(s): B. Zaitchik.

AS.271.107. Introduction to Sustainability. 3.0 Credits.
Humans are having such a massive impact on Earth systems that some call this the Anthropocene epoch. How to we find a sustainable path to the future? This course provides an interdisciplinary introduction to the principles and practice of sustainability, exploring such issues as population, pollution, energy and natural resources, biodiversity, food, justice, and climate change through the lens of systems thinking. Course open to freshmen, sophomores, and juniors. Seniors by instructor permission only.
Instructor(s): R. Kelly.

AS.271.120. Environmental Photojournalism. 3.0 Credits.
Environmental cognition, consciousness and communication are produced, reproduced, interpreted and remembered with the support of visual representations and, in particular, photography. Images increasingly structure our experience of nature, environmental problems, human-environmental relations, and ecological awareness. Students will review critical literature focusing on visual representation theory, the relationship between images and social change, and the history and typology of environmental photography. An understanding of modern environmental history, environmental issues and sustainability is required. Students will identify and investigate environmental issues facing Baltimore, participate in photographic critiques, and develop a final documentary project focusing on a specific environmental narrative. The class is designed with an emphasis on independent research and practice, interdisciplinary analysis, and application.
Instructor(s): A. Monopolis
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.271.301. Climate Change Adaptation in the Developing World. 3.0 Credits.
This course considers the way in which people and their livelihoods are adapting to climate change in sensitive regions of the developing world. The course will include an overview of climate systems and climate change science, although it will emphasize vulnerability assessment from an ecosystem and livelihood perspective. Using a case-study approach, the focus will be on key economic sectors of agriculture, water resources, forest systems and tourism. A focus of the course is how to develop an informed approach to climate change adaptation that can drive both national policy and international development and donor efforts to create sustainable responses that serve both the local country and global needs. Students will consider adaptive capacity in specific countries, evaluating the feasibility and sustainability of current adaptation strategies, differentiate national and international efforts and effects of adaptation; learn key tools for climate change assessment, review and critique climate data sources for developing countries, and compare climate change adaptation to the developed world. GECS Majors Only. Prerequisites: Intro to Sustainability, Intro to Global Environmental Change, or Climate Change: Science and Policy. 
Prerequisites: AS.270.107 OR AS.271.107
Instructor(s): A. Monopolis, C. Parker
Area: Social and Behavioral Sciences.

AS.271.302. Exploring Nature. 3.0 Credits.
This course integrates environmental media analysis and production with weekly outdoor excursions. Environmental media increasingly structures our experience of nature, environmental problems, human-environmental relations, and ecological awareness. Students will survey a range of authors, photographers and filmmakers that have written about or documented nature and environmental issues. Field trips to Baltimore’s parks and green spaces will encourage students to discover their own sense of place and environmental worldview through careful exploration, observation and reflection. Using a mixed media journal, students will reflect on their experiences, perspectives, and insights. A background in photography or film is not required.
Instructor(s): A. Monopolis
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.271.304. Sustainable Food Systems. 3.0 Credits.
Where does your food come from? What impact does food production have on the environment and human societies? How can food systems become more sustainable as the human population increases? This seminar-style course examines the past, present, and future of agriculture, including topics such as the foodways of indigenous people, modern "factory farming" versus organic agriculture, genetically modified foods, and the interplay among science, economics, policy, and agriculture. Involves hands-on experiences.
Instructor(s): R. Kelly
Area: Social and Behavioral Sciences.

AS.271.305. Special Topics in Environmental Studies. 3.0 Credits.
Environmental Policy in the Age of Trump. This course will analyze the effects of the current administration's actions on environmental issues by assessing the policies in question and estimating the potential impacts on climate change, human health, and ecology. Policies that have been overturned or are under review represent a number of environmental issues, including climate change and greenhouse gas emissions, offshore drilling, national monuments, mining pollution, toxic discharge into public waterways, the development of oil pipelines, public land use planning, coal leases, a harmful insecticide, hunting in wildlife refuges, airborne mercury emissions, protection of tributaries and wetlands under the Clean Water Act, energy and fuel-efficiency standards, and resource extraction from federal lands. Students will examine the historical roles environmental organizations and government agencies have played in advocating for, creating and enforcing U.S. environmental policy and will discuss the future roles of these actors and other stakeholders in implementing effective environmental policy.
Instructor(s): A. Monopolis
Area: Social and Behavioral Sciences.
AS.271.309. Designing Sustainable Wellness. 3.0 Credits.
This course examines the convergence of social and environmental sustainability within the built environment. The built environment refers to the space, structures and systems humans generate for living, working and playing. This includes everything from homes and office buildings, to neighborhoods and cities, to green spaces and parks. It also includes hard infrastructure, such as energy, transportation and water systems, and soft infrastructure, such as formal human services (e.g. health, education, recreation). More recently, the term has expanded to include conditions related to public health, such as walkability, bikability, and access to healthy foods. This course will examine the conceptual frameworks that support the creation of built environments, assess their impact on environmental and social well-being, and re-imagine methodologies and designs that may better promote “sustainable wellness” or, socio-ecological sustainability, in the future. Through case studies and a final design-based project, students will learn and apply the fundamental principles behind socio-ecologically sustainable design. The course is designed with an emphasis on interdisciplinary analysis and systems thinking. The course is geared towards GECS majors, in addition to students interested in psychology, design, architecture and urban planning.
Instructor(s): A. Monopolis
Area: Engineering, Social and Behavioral Sciences.

AS.271.360. Climate Change: Science & Policy. 3.0 Credits.
Prereq: 270.103 or permission of instructor. This course will investigate the policy and scientific debate over global warming. It will review the current state of scientific knowledge about climate change, examine the potential impacts and implications of climate change, explore our options for responding to climate change, and discuss the present political debate over global warming.
Instructor(s): B. Zaitchik; D. Waugh
Area: Natural Sciences.

AS.271.401. Environmental Ethics. 3.0 Credits.
Environmental Ethics is a philosophical discipline that examines the moral relationship between humans and the natural environment. For individuals and societies, it can help structure our experience of nature, environmental problems, human-environmental relations, and ecological awareness. Beginning with a comprehensive analysis of their own values, students will explore complex ethical questions, philosophical paradigms and real-life case studies through readings, films and seminar discussions. Traditional ethical theories, including consequentialism, deontology, and virtue ethics will be examined and applied. Environmental moral worldviews, ranging from anthropocentric to ecocentric perspectives, will be critically evaluated. Organized debates will help students strengthen their ability to deconstruct and assess ethical arguments and to communicate viewpoints rooted in ethical principles. Students will apply ethical reasoning skills to an examination of contemporary environmental issues including, among others, biodiversity conservation, environmental justice, climate change, and overpopulation. Students will also develop, defend and apply their own personal environmental ethical framework. A basic understanding of modern environmental history and contemporary environmental issues is required. Prior experience with philosophy and ethics is not required.
Instructor(s): A. Monopolis
Area: Humanities, Social and Behavioral Sciences Writing Intensive.

AS.271.402. Water, Energy, and Food. 3.0 Credits.
The water, energy and food (WEF) nexus is a topic of growing interest in the research and policy communities. This course will survey WEF concepts and principles, introduce tools of analysis, and engage students in case studies of critical WEF issues in the United States and internationally.
Instructor(s): B. Zaitchik.

AS.271.403. Environmental Policymaking and Policy Analysis. 3.0 Credits.
This course provides students with a broad introduction to US environmental policymaking and policy analysis. Included are a historical perspective as well as an analysis of future policymaking strategies. Students examine the political and legal framework, become familiar with precedent-setting statutes such as NEPA, RCRA, and the Clean Air and Clean Water Acts, and study models for environmental policy analysis. Cost benefit studies, the limits of science in policymaking, and the impact of environmental policies on society are important aspects of this course. A comparison of national and international policymaking is designed to provide students with the proper perspective. This course is taught in conjunction with an identical graduate course. All students will be expected to perform at a graduate level.
Instructor(s): J. Maldonado
Area: Social and Behavioral Sciences.

AS.271.404. GIS Workshop. 1.0 Credit.
An accompaniment to the GECS Senior Capstone Seminar for students whose research project involves a GIS component. Designed to enable beginner to advanced GIS users to acquire the data and skills needed to accomplish their research goals.
Corequisites: AS.271.506
Instructor(s): R. Kelly
Area: Natural Sciences.

AS.271.501. Independent Study. 3.0 Credits.
Instructor(s): A. Monopolis.

AS.271.502. Independent Study. 1.0 - 3.0 Credits.
Instructor(s): A. Monopolis; S. Horst.

AS.271.505. Senior Capstone Experience. 4.0 Credits.
This seminar will provide the academic space, time, and mentoring for students to integrate, synthesize and apply the knowledge and skills obtained through GECS curriculum into a tangible environmental filed project.
Instructor(s): A. Monopolis Writing Intensive.

AS.271.506. GECS Senior Capstone Seminar Part I. 3.0 Credits.
The GECS Senior Capstone Seminar will provide the intellectual time and space to bring together the knowledge and tools acquired during the four years of interdisciplinary work on the GECS curriculum into a coherent framework in preparation for careers, and/or graduate work. Part I of this module will include the initial, research and planning phase of the capstone project. Part II, during the Spring semester, will involve the application and implementation phase.
Instructor(s): A. Monopolis.

AS.271.507. Internship. 1.0 Credit.
Instructor(s): R. Kelly.

AS.271.508. Internship. 1.0 - 3.0 Credits.
Instructor(s): C. Parker; R. Kelly.
**East Asian Studies**

http://krieger.jhu.edu/east-asian/

The East Asian Studies major is interdisciplinary and interdepartmental. Its primary purpose is to introduce undergraduates to the knowledge, language skills, and research methods they will need to enter various academic and professional paths relating to China, Japan, and Korea. Majors in East Asian Studies engage in intensive Chinese, Japanese and/or Korean language study through the Center for Language Education and work with faculty on such topics as China in the global economy, nationalism in East Asia, Korean identity and culture, modern Japanese history and politics, Chinese urban history, and women in East Asia. Students are encouraged to pursue original research projects in East Asia with the support of intersession and summer travel grants, stipends for conference presentations, a senior thesis honors option, and seminars that bring together research scholars, faculty, graduate students and undergraduates in a manner that is distinctly Hopkins. Alumni of the program are making their mark around the world in business and finance, academia, law, international development, medicine and public health, engineering, media, public service, and the arts.

---

**Cross Listed Courses**

**Near Eastern Studies**

AS.130.378. Geoaarchaeology: Applications of Earth Science to Archaeology. 3.0 Credits.

Geoarchaeology is a multidisciplinary subfield that applies the tools and techniques of earth science to understand ancient humans and their interactions with environments. This course examines basic topics and concepts, including archaeological site formation, paleo-environmental reconstruction, raw materials and resources, soil science, deposition and erosion of wind and water-borne sediments in different environments such as along rivers, lakes and coastlines, radiocarbon and other chronometric dating methods, and ground-based remote sensing, including ground penetrating radar.

Instructor(s): M. Harrower

Area: Natural Sciences, Social and Behavioral Sciences.

AS.131.678. Geoaarchaeology: Applications of Earth Science to Archaeology.

Geoarchaeology is a multidisciplinary subfield that applies the tools and techniques of earth science to understand ancient humans and their interactions with environments. This course examines basic topics and concepts, including archaeological site formation, paleo-environmental reconstruction, raw materials and resources, soil science, deposition and erosion of wind and water-borne sediments in different environments such as along rivers, lakes and coastlines, radiocarbon and other chronometric dating methods, and ground-based remote sensing, including ground penetrating radar.

Instructor(s): M. Harrower

Area: Natural Sciences, Social and Behavioral Sciences.

**Requirements for the B.A. Degree**

(See also Requirements of a Bachelor's Degree (p. 7).)

The curriculum of the East Asian Studies major consists of a balanced mixture of language and area studies.

Students select from among three discipline-based focus areas - history, political science, or sociology - or create an individualized focus area. In addition to solid language training and content courses about the region, EAS majors receive training in the methods and theory of the particular academic discipline they select as a focus area. If they choose, East Asian Studies majors may double major in International Studies, as the requirements of each of the three focus areas overlap with those of International Studies. The individualized focus area requires consultation and approval of the director of undergraduate studies.

**Requirements for the B.A. Degree**

**Three Additional East Asian Studies Courses**

Two East Asian Studies courses at any level 6

One East Asian Studies course at the 300- or 400-level 3

**East Asian Foreign Language**

---

**Hopkins in Tokyo**

In fall 2012, a full-year undergraduate exchange program began with the University of Tokyo, and it is off to a great start. This new study abroad program was designed with Hopkins' East Asian Studies majors and Japanese language students in mind. As with other departmental study abroad programs at Hopkins, students' credits and grades will be transferred between the two universities.

This is a direct exchange program between our universities, rather than a program run by Hopkins. For each Hopkins student who attends the University of Tokyo, one University of Tokyo student will attend Hopkins. Each Hopkins student has a Japanese student as his/her personal tutor. The tutors assist students in both academic matters and in daily life.

Limited to 1-3 students per year, admission to the University of Tokyo program is competitive. Students must have completed 4 semesters of college-level Japanese or the equivalent, have a term GPA of 3.0 or above, and submit two faculty references, one of which should be from a Japanese language instructor. For more information and application instructions, visit krieger.jhu.edu/east-asian/study-abroad/hopkins-in-tokyo/

**Hopkins Waseda University: Global Leadership Program**

The aim of the Global Leadership Program (GLP) is to identify students of promise in multiple fields of study and promote their development as leaders in a world of ever-changing demands and opportunities. 10-15 Fellows from top-ranked U.S. universities will join another 10-15 Waseda Fellows in this U.S.-Japan “Zemi”, a unique Japanese-style collaborative seminar and small-group pedagogical method. Students will take classes and conduct join research projects. This program is for the academic year and does not require prior knowledge of Japanese language. Admission to the program is limited to two JHU students per year and is competitive. For more information and application instructions, visit http://krieger.jhu.edu/east-asian/study-abroad/waseda-university-exchange-program/.

---

**AS.271.509. Applied Experience. 1.0 Credit.**

This course is designed to accompany a supervised, hands-on experience working on an environmental or sustainability-related research project or internship. While completing 80 hours of applied work, students will prepare a reflective journal, paper, and poster presentation about their experience. Graded S/U only.

Instructor(s): R. Kelly

Area: Natural Sciences.
Four courses in an East Asian Language at any level
Two courses in an East Asian Language at the third-year level or higher **

** One Focus Area - History, Political Science, Sociology, or History of Science and Technology

History focus area
- AS.100.193 Undergraduate Seminar In History 3
- AS.100.194 Undergraduate Seminar in History 3
- One East Asian history course at any level 3
- One East Asian history course at the 300- or 400-level 3

Political Science focus area
- Two core courses at the 100- or 200-level; in two of the following subfields - American Politics, Comparative Politics, International Relations, or Political Theory. 6
- One East Asian political science or sociology courses at any level 3
- One East Asian political science or sociology course at the 300- or 400-level 3

Sociology focus area
- One East Asian sociology or political science course at any level 3
- One East Asian sociology or political science course at the 300- or 400-level 3

Select two of the following:
- AS.230.101 Introduction to Sociology 3-4
- or AS.230.202 Research Methods for the Social Sciences
- or AS.230.205 Introduction to Social Statistics
- or AS.230.213 Social Theory

History of Science and Technology focus area
Two survey courses from the following list:
- AS.140.105 History of Medicine 3
- or AS.140.106 History of Modern Medicine
- or AS.140.301 History of Science: Antiquity To Renaissance
- or AS.140.302 Rise Of Modern Science
- or AS.140.321 Scientific Revolution

Two upper level East Asian courses from the following list:
- AS.140.305 From the Compass to Androids: History of Science, Technology, and Medicine in Asia 3
- or AS.140.398 Godzilla and Fukushima: Japanese Environment in History and Films
- or AS.140.346 History of Chinese Medicine
- or AS.140.146 History of Public Health in East Asia

Courses taught by professors Yulia Frumer, Marta Hanson, and Yumi Kim may be applicable even if not coded AS.140, pending permission.

Individualized focus
Requires approval of the EAS director. Focus requirements to be determined in consultation with the director.

* Or students may take another East Asian survey course as approved by the director of undergraduate studies from the History or History of Science & Technology Departments.

** Students entering with advanced proficiency in an Asian language (as determined by the Center for Language Education) will not be permitted to waive language study and are expected to complete at least two years of language study in a second Asian language in order to fulfill the requirements of the major. Students who place into 3rd year Japanese or Korean on their initial placement test can and should continue their study of the same language for 3rd and 4th year. In the absence of formal language courses at the fifth-year level at Homewood, we will in such cases allow students to replace the remaining two language classes with other electives— or permit them to transfer credits from a 5th-year language course taken elsewhere or overseas. Students entering at third year Chinese should continue their language study through the fifth-year level and will not be permitted to substitute electives, since we offer advanced classes in Chinese. Students studying abroad can formally substitute comparable language classes for language study at Johns Hopkins if they receive credit for their overseas program.

Sample Plan of Study
The plan below assumes the student begins language study in Chinese at JHU.

Honors
- Honors in the major may be earned by maintaining a GPA of 3.7 in the major and writing a senior honors thesis by taking a two-semester seminar, AS.310.431 Senior Thesis Seminar: East Asian Studies and AS.310.432 Senior Thesis Seminar: East Asian Studies. The thesis...
seminar is a total of six credits and may count toward two of the required EAS courses.

Other Departmental Requirements
No major requirements may be taken satisfactory/unsatisfactory. All courses required for the major must be passed with a grade of C- or higher. The University encourages students enrolled in this program to take advantage of foreign study options. Courses and programs must be pre-approved by the student’s East Asian Studies advisor.

Transfer credit policy: Up to six classes may be transferred from study abroad programs or other schools upon approval of the major advisor.

Courses

AS.310.106. Introduction to Korean History and Culture. 3.0 Credits.
This course offers a comprehensive overview of Korean history and culture from ancient times to the modern era. Through primary, secondary, and audio-visual sources, students will become familiar not only with the overall contours of the entirety of Korean history, but also with its cultural and religious legacy. The course combines lectures and class discussions.

Instructor(s): Staff
Area: Humanities.

AS.310.108. Introduction to Chinese Fiction and Drama. 3.0 Credits.
This course will introduce Chinese fiction and drama from the Tang dynasty (618-906) to the early Republican period (1911-1949), such as the romantic dramas of Tang Xianzu and the uncanny tales of Pu Songling. Students will draw connection between these vibrant literary genres and the cultural and socio-historical events that shaped imperial China. Key topics include story-telling, romance, urban culture, gender, reincarnation, and many more. Students will acquire skills in how to read, analyze and discuss the rich legacy of Chinese fiction and drama in translation and to think critically about these writings. Reading materials are all in English.

Instructor(s): F. Joo
Area: Humanities.
AS.310.114. Introduction to East Asian Religions. 3.0 Credits.
This survey course explores the ideas and practices of various East Asian religious traditions. It covers not only major religious teachings – Confucianism, Buddhism, Daoism, and Shinto – but also touches upon other folkloric traditions such as shamanism, in order to understand the rich diversity of East Asian religions. Using a variety of methodologies such as art history, literature, history, and anthropology and materials such as paintings, tales, and historical documents, students will be introduced to the doctrines and practices of major religious traditions, as well as themes relating to family, gender, the nation state building, and imperialism.
Instructor(s): F. Joo
Area: Humanities.

AS.310.115. Ghost Tales from China and Japan, 14th-19th Centuries. 3.0 Credits.
We cannot express our own experience of death – only imagine life after death. How did people in the past conceptualize the world of the dead? Ghost tales will teach us what we imagine as the experience of dead and life after death. This course aims to introduce students to a variety of ghost stories in Late Imperial China and Tokugawa Japan and connect their literary imagination of the dead to the cultural, socio-historical, and religious context of each society as well as to the broad East Asian tradition of supernatural narratives. While we also touch upon earlier traditions on narrating the dead, most of the stories in class readings are from the Ming (1368-1644) and Qing (1644-1911) dynasties of China, and the Tokugawa period (1600-1868) of Japan. Key issues include family, gender, sexuality, body, medicine and many more. Although we will also take a look at visual and theatrical representations of the dead, we will primarily focus on literary texts about ghostly phenomena. Film screenings required. All readings are in English.
Instructor(s): F. Joo
Area: Humanities.

AS.310.117. Love and Illusion in Japanese Literature. 3.0 Credits.
This course aims to introduce students to a variety of literary texts featuring love and illusion from the 12th to the 21st century Japan. We will explore how enchantment and disenchantment play in the literary imagination of romantic love within Japanese literary history. The target texts cover a wide range of literary products from medieval noh drama to the modern novelist Izumi Kyoka’s gothic tales and further to a contemporary Murakami Haruki’s novel. By reading a variety of narrative forms such as diary literature, drama, epic, poetry, and modern fiction, we will examine changing ideas about marriage, love, sexuality, religion, and modernity within the literary discourse.
Instructor(s): F. Joo
Area: Humanities.

AS.310.118. Japanese Popular Culture. 3.0 Credits.
This course will examine Japanese popular culture as a way to discuss contemporary Japanese society. We will investigate a wide range of cultural products – from literature, anime and manga to theater, music, fashion and food – and question how these items are created, circulated, and consumed in Japanese society as well as by individuals. Since many Japanese cultural products also quickly move beyond the national borders in the age of globalization, we will also discuss the global consumption of Japanese popular culture. Topics include gender, sexuality, family, fan community, global capitalism, mass media, race and power. Film screenings and group projects are required. Reading materials are all in English.
Instructor(s): F. Joo
Area: Humanities.

AS.310.200. Economic Growth and Development in East Asia. 3.0 Credits.
The course offers an overview of the complexities of East Asia’s development experience from a variety of perspectives, and it is divided into three parts to allow students to develop expertise in one or more countries and/or policy arenas, while also cultivating a broad grasp of the region and the distinct challenges of “East Asia fast-paced, sustained economic growth.” Part I considers the origins of Asian economic development, analyses the common economic variables behind the region’s success, looks at the East Asian financial crisis and its lessons and assesses whether or not East Asian countries have learned them. Part II will focus on the development experiences of individual countries, with an emphasis on the ASEAN economies, NIEs, Japan and China. Part III considers topics of special interest to Asia, including trends toward greater regional economic cooperation, both in the real and financial/monetary sectors, and issues related to poverty, migration, and inclusiveness.
Instructor(s): G. Dore
Area: Social and Behavioral Sciences.

AS.310.201. Freshman Seminar: Korean History through Film and Literature. 3.0 Credits.
In this course, students will engage with select topics in Korean history from premodern and modern times and examine how the past has been represented through various forms of film and literature. This will be combined with readings of academic articles to allow students to gauge the distance between scholarship and cultural expressions of history. Through this, students will be introduced to the highly contested and often polarizing nature of Korean history and the competition surrounding historical memory.
Instructor(s): Staff
Area: Humanities.

AS.310.205. Music in East Asia. 3.0 Credits.
This survey course focuses on music in modern East Asia. By exploring historical and ethnographic works by scholars in ethnomusicology, history, and anthropology, this course examines traditional, contemporary, and popular musical and theatrical genres. Through case studies, we will discuss major topics—including nationalism, modernity, ethnicity, gender, colonialism, and globalization—of modern East Asia, ranging from Japan, South Korea, North Korea, China, Taiwan, Hong Kong, to Asian diasporas. This course aims to enhance students’ cross-cultural understanding, interdisciplinary approach to performance, and critical thinking on the concepts of “East Asia” and “performance.”
Instructor(s): P. Tse
Area: Humanities.

AS.310.206. Film and Performing Arts in China: 1949-present. 3.0 Credits.
This course explores Chinese film, music, and theater in post-1949 China. Through discussing scholarly works in history, theater, ethnomusicology, and film studies, students will be exposed to interdisciplinary approach to engaging with film, traditional theater (xiqu), instrumental music, and popular music in China, Taiwan, Hong Kong, and Chinese diasporas. We will examine issues including nationalism, cultural hegemony, modernity, invented tradition, cultural policy, class, and gender. Supplemented by case studies, this course is organized around two overarching questions: how does film and performing arts inform us about the social history of China? How is expressive culture utilized in political agendas in the modern China?
Instructor(s): P. Tse
Area: Humanities.
AS.310.301. Documentary Photography in a Changing China. 3.0 Credits.
This course aims to inspire students to explore the impacts, meanings, and explanations of social transformation in contemporary China, via the lens of documentary photography. The photographic images of selective topics will include the products of photojournalism and documentary photography, and several documentary films, by both Chinese and non-Chinese photographers. While one picture is worth thousand words, one picture may also provoke countless interpretations. Students are strongly encouraged to read broadly about different aspects of social transformations in contemporary China, and to select and curate their own subjects of photo images. The spirit of comparative study of documentary photography of China and other parts of world will be strongly encouraged. Active class participation is imperative. A small exhibition on the campus will be organized by the Spring semester. The course is designed for upper division undergraduates. Cross-listed with Sociology and International Studies (CP).
Instructor(s): G. He
Area: Social and Behavioral Sciences.

AS.310.302. Human Rights in China and U.S. Policy: Advocacy Opportunities and Challenges. 3.0 Credits.
This interactive seminar will explore domestic human rights issues in China and U.S. policy toward China on human rights. In addition to learning about the broader landscape of human rights issues and related challenges in China, students will select a specific human rights issue to focus on during the course. As a practice-oriented seminar, students will develop advocacy skills that will enable them to effectively "make the case" for why the Administration and Congress should press China on the topic they've selected.
Instructor(s): A. Worden
Area: Social and Behavioral Sciences.

AS.310.305. Southeast Asia and US Security Strategy. 3.0 Credits.
This survey course is designed to introduce students to Southeast Asia – the ten member countries of the Association of Southeast Asian Nations (ASEAN) plus Australia and New Zealand. Southeast Asia is an integral part of the broader region of East Asia and a geographic bridge to the Indian subcontinent (South Asia). Southeast Asia has been one of the great success stories in the saga of modernization and development of post-colonial Afro-Asia over the last six decades. Its resulting economic importance is matched by its strategic significance given the presence of imbedded jihadist networks and the emergence of China as a regional great power and aspirant superpower. Nevertheless, the region has been largely overlooked by senior foreign policy and defense officials in Washington. This course will equip students to fill that void by examining the region from the perspective of national security strategy – broadly understood in its multiple dimensions. Students will be challenged to formulate some element of a viable U.S. national security strategy for the region.
Instructor(s): M. Ott
Area: Social and Behavioral Sciences.

AS.310.306. Domestic Politics of Contemporary China. 3.0 Credits.
This course introduces students to China’s contemporary political history and current political system. It helps students develop a critical understanding of China’s governance institutions and processes, political economy, and state-society relations. The course focuses primarily on China’s domestic politics but also covers China’s changing role in Asia and the world.
Instructor(s): Y. Yang
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.307. Governance and Politics in China. 3.0 Credits.
A dramatic rise of popular protests in China today has spurred lively discussions about the causes, dynamics, and impact of these protests. This course will provide students with an opportunity to understand these issues by discussing the social, institutional and cultural background of protests, major forms of protest, social groups involved, government responses, and social implications of various kinds of protests. The first part of the course will explore significant socio-economic changes since 1978 and the effects of these changes on China’s social structure and stratification. This part will also examine changes in governance and political systems in the reform era and review important theories of contentious politics. The second part will examine protests by distinct social groups, including peasants, workers, homeowners, and ethnic minority groups, pro-democratic activists, among others. This part will identify similarities and differences in the demands and actions of different groups, introduce the major forms of popular resistance, and explore how the state deals with them accordingly. The course will conclude with discussion of the outcomes of social protests in China and make a cross-national comparison between protests in China and other authoritarian states. By taking China as an example, this course will enhance students’ knowledge about forms of popular contention and government responses in an authoritarian regime as well as help students develop analytical and critical thinking skills with regard to contentious politics.
Instructor(s): Y. Li
Area: Social and Behavioral Sciences
Writing Intensive.

AS.310.308. The Frontier in Late Imperial China. 3.0 Credits.
The tremendous expansion of Chinese frontiers during the late imperial period forced the state and those who lived within it to grapple with complex problems of governance, ethnicity, and the geographic extent of "China". Issues and concerns associated with the massive Chinese frontiers have extended into the present; hence, no one can appreciate the current problems plaguing China's northwestern, southwestern, or coastal regions without an understanding of its historical antecedents. This seminar is designed to introduce major scholarly works and theoretical frameworks on the Chinese frontier.
Instructor(s): J. Bandy
Area: Humanities
Writing Intensive.

AS.310.309. Monsters, Demons, and Ghosts: Folklore and Festival in Japan. 3.0 Credits.
This course examines popular narratives and festivals from historical through contemporary Japan. Rather than traditional sources (canon works, philosophical doctrines, and high art), it focuses on non-elite modes of expression: oral histories, epic tales, local legends, stories of the supernatural, music, religious festivals, manga, anime, and film. Through analyses of these mediums, students explore the underlying belief structures that have shaped ideas concerning death and the afterlife, moral ethics, and the spiritual realm in Japan. The course also tackles issues concerning the intellectual construct of the 'folk' and folk religion. Who are the folk? How does this concept relate to regional versus national identity, civilized versus so-called primitive populations, premodern versus modern categories? Students will engage these questions through active discussions in the classroom, in-class writing exercises, mini-presentations, and two papers.
Instructor(s): C. Carter
Area: Humanities
Writing Intensive.
AS.310.310. Shamans, She-Devils, and Pilgrims: Women & Gender in East Asian Religions. 3.0 Credits.
This course examines the complexities of gender and the role that women have played in the religions of China, Korea, and Japan. It explores two main types of content: 1) religious discourse on women and gender through doctrines, scriptures, narratives, myths, and legends; and 2) the practices, beliefs, and lives of real women through historical cases, including those of nuns, laity, sovereigns and family members. Organized in chronological order, the course begins with early sources across East Asia and finishes in contemporary times. Readings and assignments emphasize the analysis of primary sources, complemented by secondary works for historical and cultural context. Students will end the course with a research paper focused on a topic of their choice.
Instructor(s): C. Carter
Area: Humanities
Writing Intensive.

AS.310.312. Masterpieces of Chinese Literature: Song through 20th Century, a Literature-in-Translation class. 3.0 Credits.
In the millennium from the Song Dynasty (960-1280) to the modern era court poets and master storytellers, eccentric misfits and satiric novelists, as well as courtesans and film makers all considered a complex and changing China. We will look at the masterpieces of this millennium, examining both text and cultural context. In examining the texts we will rely on close reading in order to develop sound critical interpretations. We will also place the text in cultural context, considering the multiple forces—political, economic, artistic and religious— that shaped the lives of these writers and the cultures they observed.
Instructor(s): V. Cass
Area: Humanities
Writing Intensive.

AS.310.315. First Year Classical Chinese, First Semester. 3.0 Credits.
Readings in prose and poetic texts of the pre-Qin period. Class emphasizes language acquisition, especially grammar and vocabulary memorization. In addition we will read and discuss works in western languages that treat the culture and writers of the Ancient period. Biweekly quizzes included. A final translation project required.
Recommended Course Background: 2 years mandarin or the equivalent.
Instructor(s): F. Joo
Area: Humanities
Writing Intensive.

AS.310.316. First Year Classical Chinese: Language and Literature of the Ancient Period. 3.0 Credits.
Readings in prose and poetic texts of the Zhou and Han Dynasties. Class emphasizes language acquisition, especially grammar and vocabulary memorization. In addition we will read and discuss works in western languages that treat the culture and writers of the Ancient period. Quizzes and Tests (Midterm and Final) will cover both language and cultural data. A short paper also required.
Instructor(s): V. Cass
Area: Humanities.

We will examine how major political events, players, norms and institutions have shaped US-Asia relations in the modern era.
Instructor(s): W. Konishi
Area: Social and Behavioral Sciences
Writing Intensive.

AS.310.401. Authoritarianism, Democracy, and Economic Development: Korea, Indonesia, and Myanmar. 3.0 Credits.
The East Asia's "miracle growth" has not gone hand in hand with a decisive move toward democracy. This seminar explores the reasons why democratization proceeds slowly in East Asia, and seems to be essentially decoupled from the region's fast-paced economic growth and development, and it is divided into three parts. Part I introduces the specifics of East Asia's economic development strategies as well as key concepts of democracy, authoritarianism and military rule and the tensions between these theories and the East Asian experience. Part II will focus on the development experiences of Korea, Indonesia and Myanmar in light of what discussed in Part I of the seminar. The, Part III presents lessons emerging from the comparison of Korea's, Indonesia's and Myanmar's developmental trajectories, and explore the role international organizations (e.g. ADB, EU, IMF, WB etc.) played in those choices.
Instructor(s): G. Dore
Area: Humanities.

AS.310.402. Labor Politics in China. 3.0 Credits.
This course explores the transformation of labor relations in China over the past century. It will cover the origins of the labor movement, the changes brought about by the 1949 Revolution, the industrial battles of the Cultural Revolution, the traumatic restructuring of state-owned enterprises over the past two decades, the rise of private enterprise and export-oriented industry, the conditions faced by migrant workers today, and recent developments in industrial relations and labor conflict. The course is designed for upper division undergraduates and graduate students. Cross-listed with Sociology and International Studies (CP).
Instructor(s): G. He; J. Andreas
Area: Social and Behavioral Sciences
Writing Intensive.

AS.310.431. Senior Thesis Seminar: East Asian Studies. 3.0 Credits.
Students may earn honors in the East Asian Studies major by maintaining a 3.7 average in the major and completing a senior thesis by taking the year-long AS.310.431 & AS.310.432 Senior Thesis Seminar: East Asian Studies. Students are required to secure the mentorship of an adviser among the EAS faculty before asking for permission to enroll in the course.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.310.432. Senior Thesis Seminar: East Asian Studies. 3.0 Credits.
This course is the continuation of Senior Thesis Course AS.360.431 for students completing their thesis in the East Asian Studies program.
Instructor(s): T. Meyer-Fong
Area: Social and Behavioral Sciences
Writing Intensive.

AS.310.501. Independent Study - East Asia. 1.0 - 3.0 Credits.
Students carry out an independent research project involving East Asia.
Instructor(s): W. Rowe.

AS.310.592. Summer Internship. 1.0 Credit.
Instructor(s): W. Rowe.

AS.310.600. Advanced Topics in East Asian Studies.
This interdisciplinary seminar gives graduate students in East Asian Studies opportunities to present and receive comments on their dissertation chapters, prospectuses, conference papers, and/or potential publications.
Instructor(s): E. Chung
Area: Humanities, Social and Behavioral Sciences.
Cross Listed Courses

History of Art

AS.010.103. Introduction to the Art of Asia. 3.0 Credits.
A survey of the art and architecture of Asia, from the ancient world to the present and including the Indian subcontinent, China, Japan, Korea, and Southeast Asia.
Instructor(s): Staff
Area: Humanities.

AS.010.211. Monuments of Asia. 3.0 Credits.
An examination of selected architectural monuments from across Asia, including the Indian subcontinent, Southeast Asia, China, Japan, and Korea. Ancient to contemporary.
Instructor(s): R. Brown
Area: Humanities.

AS.010.305. Global Modern Art: Africa, Asia, the Pacific and the Americas. 3.0 Credits.
Artists around the world grappled with the modern, working through local concerns and struggles but continually engaged with counterparts in Europe, North America, and across the "global South." This course will introduce art, artists, movements, and institutions of modernism from approximately 1880 to the present and from outside of the northern Atlantic while critically examining the very notion of "global modernism."
Instructor(s): R. Brown
Area: Humanities
Writing Intensive.

Anthropology

AS.070.359. Korean War. 3.0 Credits.
This course takes the Korean War as a site to both explore: 1) contemporary historical and political transformations in East Asia and globally and 2) the ways in which violence, catastrophic loss, and separation are woven into everyday life. It will explore the Korean War through film, fiction, historiography, and draw on comparative materials in anthropology
Instructor(s): C. Han
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

History

AS.100.219. Chinese Cultural Revolution. 3.0 Credits.
The Cultural Revolution was Mao Zedong's last attempt to transform Chinese society spiritually and structurally. The events of this period were marked by social upheaval, personal vendettas, violence, massive youth movements, and extreme ideological pressure. This course will explore the Cultural Revolution from a variety of perspectives, focusing on the relationship between events in China from 1966-1976, and their interpretation in China and the West during the Cultural Revolution decade and since.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.236. Chinese Cultural Revolution. 3.0 Credits.
The Cultural Revolution was Mao Zedong's last attempt to transform Chinese society spiritually and structurally. The events of this period were marked by social upheaval, personal vendettas, violence, massive youth movements, and extreme ideological pressure. This course will explore the Cultural Revolution from a variety of perspectives, focusing on the relationship between events in China from 1966-1976, and their interpretation in China and the West during the Cultural Revolution decade and since. Previously offered as AS.100.219.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.243. China: Neolithic to Song. 3.0 Credits.
This class offers a broad overview of changes in China from Neolithic times through the Song Dynasty (roughly from 5000 BCE through the 13th century CE) and will include discussion of art, material culture, and literature as well as politics and society. Close readings of primary sources in discussion sections and extensive use of visual material in lectures will help students gain firsthand perspective on the materials covered. Not open to students who have previously taken AS.100.208. Cross listed with East Asian Studies
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.248. Japan in the World. 3.0 Credits.
This course is an introduction to Japan's history from 1800 to the present with emphasis on the influences of an increasing global circulation of ideas and people. Topics include the emperor system, family and gender, imperialism, World War II, the postwar economy, and global J-pop.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences.

AS.100.300. National Identity in 20th Century China & Japan. 3.0 Credits.
Using primary sources, including literature and film, we will explore the changing ways in which ideologues, intellectuals, and ordinary citizens defined national identity in 20th century China and Japan.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

AS.100.347. Early Modern China. 3.0 Credits.
The history of China from the 16th to the late 19th centuries.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.348. 20th-Century China. 3.0 Credits.
The history of China from the last years of the Qing Empire to the post-Mao reforms.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.381. Religion, Medicine, and the Mind in Japan. 3.0 Credits.
This seminar explores the relationship between religion and medicine in treating disorders of the mind and soul throughout Japanese history. We will consider such topics as animal spirit possession, Buddhism, family-based care, psychotherapy, gender, and social withdrawal.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.385. Mobility and Encounter in the Medieval Indian Ocean. 3.0 Credits.
This seminar discusses forms of mobility and exchange - trade and travel, conquest and religious transformation, diasporas and migration, the spread of practices and technologies - across the Indian Ocean from the 8th to 16th centuries.
Instructor(s): T. El-leithy
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.386. Religion, Medicine, and the Mind in Japan. 3.0 Credits.
This seminar explores the relationship between religion and medicine in treating disorders of the mind and soul throughout Japanese history. We will consider such topics as animal spirit possession, Buddhism, family-based care, psychotherapy, gender, and social withdrawal.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.
AS.100.398. Images of Postwar Japan. 3.0 Credits.
This seminar explores Japan's changing place in the world in the decades following World War II, with an emphasis on analyzing visual media such as photographs, films, advertisements, and comic books. Topics include relations with the U.S. and other countries in East Asia, particularly the two Koreas; the atomic bombings of Hiroshima and Nagasaki; and the global contexts for an expanding Japanese consumerism in the late 20th century.
Instructor(s): H. Kim.

AS.100.411. Readings in the History of Public Health in the 20th and 21st Centuries. 3.0 Credits.
The students will read major and some minor works in the history of global public health and will each develop their own concept of how and why the major institutions, professions, and practices associated with public health have evolved over the past long century. To help the students focus on their ideas, they will write three essays on particular aspects of the history.
Instructor(s): L. Galambos
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.422. Society & Social Change in 18th Century China. 3.0 Credits.
What did Chinese local society look like under the Qing Empire, and how did it change over the early modern era?
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.423. Multiethnic Japan. 3.0 Credits.
An advanced undergraduate seminar on the intertwined histories of race, ethnicity, and empire in Japan and its former colonies from the early twentieth century to the present.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.424. Women & Modern Chinese History. 3.0 Credits.
This course examines the experience of Chinese women, and also how writers, scholars, and politicians (often male, sometimes foreign) have represented women's experiences for their own political and social agendas. Cross listed with East Asian Studies.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.437. Late Imperial China: History and Fantasy. 3.0 Credits.
Students in this seminar will look at the ways in which Chinese and Western scholars, novelists, film-makers, and artists have represented China’s Late Imperial period. We will look at the way foreigners have imagined China, and the ways in which Chinese writers past and present have fancifully, nostalgically, and inventively rendered their personal and national pasts. The course will explore issues of historical, geographical, and literary imagination. Cross-listed with East Asian Studies
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.100.482. Historiography Mod China. 3.0 Credits.
A survey of assumptions and approaches in the study of modern Chinese history, as written by Chinese, Japanese, and Western historians.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

A reading seminar on the interconnected histories and historiographies of Japan and Korea in the nineteenth and twentieth centuries.
Instructor(s): H. Kim
Area: Humanities, Social and Behavioral Sciences.

AS.100.614. Seminar in Modern Chinese History.
A seminar covering major milestones in research on late imperial and modern Chinese history, primarily in English. Open to undergraduates with the permission of the instructor.
Instructor(s): W. Rowe
Area: Humanities, Social and Behavioral Sciences.

AS.100.733. Reading Qing Documents.
Open to advanced undergraduates with at least one semester of Classical Chinese. This course has several objectives. First and foremost, it is a hands on document reading class designed to familiarize students with the skills, sources, and reference materials necessary to conduct research in Qing history. To that end, we will spend much of our time reading documents. At the same time, we will engage in problem solving exercises designed to develop and enhance basic research skills. Finally, several important archive-based secondary works in the secondary literature are available on reserve for your reference. These works demonstrate the ways in which historians have recently applied archival skills (and materials).
Instructor(s): T. Meyer-Fong.

AS.100.756. Reading Seminar in Chinese History.
A seminar covering recent work on late imperial and modern Chinese history, primarily in English.
Instructor(s): T. Meyer-Fong
Area: Humanities, Social and Behavioral Sciences.

History of Science Technology

AS.140.146. History of Public Health in East Asia. 3.0 Credits.
This course examines the history of disease, epidemics, and public health responses in East Asia from the 17th-20th centuries. This public health history emphasizes the interactions, connections, and comparisons among China, Japan, Korea, and Taiwan.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.147. Chinese Medicine: Tradition and Modernity. 3.0 Credits.
Examine Chinese Medicine’s practical application as a therapy of increasing global popularity. While also examining its theoretical frameworks from antiquity to the present, healing methods such as acupuncture and herbal medicine are highlighted.
Instructor(s): J. Flowers
Area: Humanities, Social and Behavioral Sciences.

AS.140.176. Public Health in East Asia Through Films & Documentaries. 1.0 Credit.
This course uses contemporary films and documentaries to address issues in public health in East Asia, past & present. Topics covered include medicine in turn-of-the-twentieth century Japan and China, revolutionary medicine, STDS, mental illness, HIV/AIDS in China, industrial pollution, the politics of universal health care insurance, and pandemics in East Asia.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences.
AS.140.305. From the Compass to Androids: History of Science, Technology, and Medicine in Asia. 3.0 Credits.
The course explores the history and cultural context of science, medicine, and technology in East Asia, from the ancient Chinese science to the latest scientific and technological developments in Japan.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences.

AS.140.346. History of Chinese Medicine. 3.0 Credits.
Students will study the most recent anthropological, philosophical, and historical scholarship on medicine in traditional and modern Chinese society. They will approach the topic from several angles including medical pluralism, the range of healers, domestic and literate medicine, gender, emergence of new disciplines, public health and the history of disease. The course relies on secondary sources and primary sources in English translation. Cross-listed with East Asian Studies.
Instructor(s): M. Hanson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.357. Science Fiction Movies in the East and West. 3.0 Credits.
What is a science fiction (SF) movie? How did SF movies and developments in science and technology influence each other during the twentieth century? What is the use of SF movies for societies? And why are SF movies much more popular in some countries than in others? By watching and analyzing classic and contemporary SF movies from the US, the Soviet Union, Japan, China, and other countries, we will search for answers to these questions. Special emphasis will be given to analyzing how historical, political, and cultural environments in different countries have influenced the production and acceptance of SF movies.
Instructor(s): D. Kim
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.398. Godzilla and Fukushima: Japanese Environment in History and Films. 3.0 Credits.
Juxtaposing Japanese environmental history and its reflection in popular media, the course will explore the intersection between technology, environment, and culture. The course will be accompanied by relevant movie screenings.
Instructor(s): Y. Frumer
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.140.665. History of Science and Technology in Asia.
Graduate level discussion of major historiography of science and technology in East Asia.
Instructor(s): Y. Frumer.

Political Science
AS.190.315. Asian American Politics. 3.0 Credits.
This course examines issues of political identity, political incorporation, and political participation of Asian Americans. Themes include Asian American panethnicity, the struggle for immigration and citizenship, Asian American electoral politics, political activism and resistance since the 1960s, and the impact of Asian Americans on the politics of race and ethnicity in the United States.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.320. Politics Of East Asia. 3.0 Credits.
Examines some of the central ideas and institutions that have transformed politics in the contemporary world through the lens of East Asia, focusing on Japan, South Korea, Taiwan, and China. Topics include state-society relations, late development, nationalism, democratization, political culture, social movements, and globalization.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.

AS.190.330. Japanese Politics. 3.0 Credits.
This course introduces students to the major debates and issues of postwar Japanese politics. Topics include nationalism, electoral politics, civil society, and immigration.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.341. Korean Politics. 3.0 Credits.
This course introduces students to the historical and institutional foundations of modern South Korean politics. Topics include nationalism, political economic development, civil society, globalization, and ROK-DPRK relations. (CP)
Instructor(s): E. Chung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.427. Political Economy of Japan and Korea. 3.0 Credits.
This upper-level seminar examines some of the major debates and issues of postwar Japanese and South Korean political economy. Topics include nationalism, gender politics, civil society, immigration, and US-Japan-South Korea trilateral relations.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences
Writing Intensive.

AS.190.442. Civil Society. 3.0 Credits.
This course explores classic and contemporary debates on the concept of civil society and critically examines its analytical value in light of recent developments. Topics include the relationship between civil society, the state, and markets, the role of civil society in development and democratization, social capital, and global civil society. This course is open to graduate students from any discipline. Advanced undergraduate students must obtain permission from the instructor and are expected to keep up with graduate students during class discussions.
Instructor(s): E. Chung
Writing Intensive.

AS.190.612. Comparative Citizenship and Immigration Politics.
Graduate students only. Examines the contemporary political dynamics of migration, citizenship, and race concentrating on North America, Europe and East Asia. We will focus on how citizenship and immigration policies shape immigrant political identities, claims, and strategies as well as how immigrants impact public debates and policies in receiving societies.
Instructor(s): E. Chung
Area: Social and Behavioral Sciences.
**Sociology**

**AS.230.166. Chinese Migration in Modern World History 1500's-2000's. 3.0 Credits.**

This interdisciplinary course applies theories of economic sociology to examine the effects of Chinese overseas migration on modern world economy from the sixteenth century to the contemporary era. It examines the contribution of overseas Chinese to the development of capitalism in the following junctures: the East-West economic integration in the pre-modern era, China's modern transformation after the Opium War (1839-1842), the making of US national economy in the early twentieth century, as well as the postwar economic miracles in the Pacific Rim, among others. Special Note: Fulfills History requirement for GSCD track students.

Instructor(s): H. Kuo
Area: Social and Behavioral Sciences

**AS.230.175. Chinese Revolutions. 3.0 Credits.**

This course introduces the origins, operation and impacts of five major revolutions in modern China between 1850 and 1950. These include the Taiping Rebellion, the republican revolutions, federalist and southern automatic movements, labor strikes as well as peasant rebellions. It draws on the existing historiography that examines China's transition from an empire to a republic, impacts of western and Japanese influences to China, as well as the continuity and change of Chinese social organizations. Cross list with International Studies and East Asian Studies. Fulfills IS History requirement.

Instructor(s): H. Kuo
Area: Social and Behavioral Sciences Writing Intensive.

**AS.230.217. Chinese Overseas in Global History. 3.0 Credits.**

This course examines the trajectory of capitalist development in South Korea (hereafter, Korea) in the twentieth and the early twenty-first centuries. Formerly offered as AS.230.321.

Instructor(s): J. Andreas
Area: Social and Behavioral Sciences Writing Intensive.

**AS.230.228. Colonialism in Asia and Its Contested Legacies. 3.0 Credits.**

This course surveys the impacts of colonialism in East and Southeast Asia. Special attention will be paid to the social and economic development in British Singapore and Hong Kong as well as Japanese Korea and Taiwan. Topics include free-trade imperialism, colonial modernity, anticolonial movements, pan-Asianism, and post-war U.S. hegemony.

Instructor(s): H. Kuo
Area: Social and Behavioral Sciences Writing Intensive.

**AS.230.235. Revolution, Reform and Social Inequality in China. 3.0 Credits.**

This course explores various aspects of social inequality in China during the Mao Zedong and the post-Mao reform eras. We will examine inequality within villages, the rural/urban divide, urban inequality, education and health policies, and gender and ethnic inequality. Each of these issue areas will be tackled analytically, but the aim is also to understand what it was/is like to live in China during and after the Mao era. Formerly offered as AS.230.321.

Instructor(s): J. Andreas
Area: Social and Behavioral Sciences Writing Intensive.

**AS.230.285. Maritime East Asia. 3.0 Credits.**

This course examines the transnational connections among merchants and migrants in the waters of East and Southeast Asia from a historical and comparative perspective. We will explore how diplomatic ties, long-distance trade and migration contributed to the making of cosmopolitan cities such as Quanzhou (Zayton), Malacca, Fort Zeelandia (Formosa), Batavia, Manila, Singapore and Hong Kong in the region from the tenth century onwards. The course will close with an examination of how the transnational connections are relevant to understand interstate competition in Asia's long twentieth century. Key subjects to be introduced include tribute trade system, trading diasporas, Euro-Chinese co-colonialism, pan-Asianism, as well as history and historiography of maritime silk road.

Instructor(s): H. Kuo
Area: Social and Behavioral Sciences Writing Intensive.

**AS.230.336. Family, Gender and Sexuality in China. 3.0 Credits.**

This course examines social changes in China since the beginning of the People's Republic (1949) through the lenses of family, gender and sexuality. The first half of the course focuses on understanding family institutions, women's status, gender relations and sexualities in connection with major historical transitions between 1949 and the present. The second half includes readings and discussions around several thematic topics regarding family, gender and sexuality in contemporary China in the broader context of politics, economy, and social norms.

Instructor(s): Y. Dong
Area: Social and Behavioral Sciences Writing Intensive.

**AS.230.351. Capitalism, Development and Resistance in South Korea. 3.0 Credits.**

This course examines the trajectory of capitalist development in South Korea (hereafter, Korea) in the twentieth and the early twenty-first centuries. We will examine debates around the political economy of development in Korea as well as class formation and social and labor protest. This course is designed to help students explore the dynamics of capitalist development and workers' movements in Korea as a case of late development in the global South. The course also draws on theoretical perspectives and methodological tools from comparative and world-historical sociology to better understand the Korean case.

Instructor(s): M. Kang
Area: Social and Behavioral Sciences.
AS.230.352. Chinese Diaspora: Networks and Identity. 3.0 Credits.
This course combines lecture and class discussion. It examines the history and historiography of Chinese overseas migration. Major issues include overseas Chinese as “merchants without empire;” Chinese exclusion acts in the age of mass migration, the “Chinese question” in postcolonial Southeast Asia, as well as the making and unmaking of Chinese identity in the current wave of globalization.
Prerequisites: Students may not have completed AS.230.217 previously.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

AS.230.377. Colonialism and Anti-Colonialism. 3.0 Credits.
This seminar examines the theories and historiography of colonialism and anti-colonial movements. It focuses on the establishment of the colonial division of labor, comparative colonialism, identity formation, and nationalism as well as anti-colonial movement.
Instructor(s): H. Kuo
Area: Social and Behavioral Sciences.

AS.230.415. Social Problems in Contemporary China. 3.0 Credits.
In this course we will examine contemporary Chinese society, looking at economic development, rural transformation, urbanization and migration, labor relations, changes in class structure and family organization, health care, environmental problems, governance, and popular protest. The course is designed for both graduate and undergraduate students. Undergraduates must have already completed a course about China at Hopkins. Cross-listed with East Asian Studies.
Instructor(s): J. Andreas
Area: Social and Behavioral Sciences
Writing Intensive.

AS.230.435. The China Boom. 3.0 Credits.
This course addresses the origins, global impacts, and demise of China’s economic ascendancy as a world economic and political powerhouse at the turn of the twenty-first century. The course will cover the historical origins of the China boom and impacts of the boom on global political economic order. It will also address the social-political imbalances within China that contribute to the global financial crisis and recent slowdown of the Chinese economy. Particular topics include late imperial and Maoist legacies’ relation to contemporary economic growth, stages of China’s capitalist development, China’s outward investment in the developing world, formation and limits of US-China economic symbiosis, and China’s participation in global governance, among others.
Instructor(s): H. Hung
Area: Social and Behavioral Sciences
Writing Intensive.

Study of Women, Gender, Sexuality
AS.363.328. Beyond the Global West: Gender/Sexuality, Post-colonialism & Global Capitalism: Feminist Inquiries from Asian Perspectives. 3.0 Credits.
This course examines gender and sexuality issues in both East and South Asian Societies and situates subject matters in the broader contexts of post-colonialism, state formation, revolution and global capitalism.
Instructor(s): Y. Dong
Area: Humanities
Writing Intensive.

Center for Language Education
AS.373.111. First Year Heritage Chinese. 3.5 Credits.
This course is designed for students who were raised in an environment in which Chinese is spoken by parents or guardians at home and for those who are familiar with the language and possess native-like abilities in comprehension and speaking. The course therefore focuses on reading and writing (including the correct use of grammar). Cross-listed with East Asian Studies
Instructor(s): N. Zhao; R. Hsieh.

AS.373.112. First Year Heritage Chinese II. 3.0 Credits.
For students who have significant previously-acquired ability to understand and speak Modern Standard Chinese. Course focuses on reading and writing. Teaching materials are the same as used in AS.373.115-116; however, both traditional and simplified versions of written Chinese characters are used. Lab required. Continuation of AS.373.111. Recommended Course Background: AS.373.111 or permission required.
Prerequisites: AS.373.111 or instructor permission
Instructor(s): N. Zhao.

AS.373.115. First Year Chinese. 4.5 Credits.
This course is designed primarily for students who have no prior exposure to Chinese. The objective of the course is to help students build a solid foundation of the four basic skills—listening, speaking, reading, and writing in an interactive and communicative learning environment. The emphasis is on correct pronunciation, accurate tones and mastery of basic grammatical structures. Note: Students with existing demonstrable skills in spoken Chinese should take AS.373.111-112. No Satisfactory/ Unsatisfactory. Students may choose to attend either lecture at 12pm or 3pm on TTh. Cross-listed with East Asian Studies
Instructor(s): J. Chen; N. Zhao; Y. Chen.

AS.373.116. First Year Chinese II. 4.5 Credits.
Introductory course in Modern Standard Chinese. Goals: mastery of elements of pronunciation and control of basic vocabulary of 800-900 words and most basic grammatical patterns. Students work first with Pin-Yin system, then with simplified version of written Chinese characters. Continuation of AS.373.115. Note: Student with existing demonstrable skills in spoken Chinese should take AS.373.111-112. Recommended Course Background: AS.373.115 or permission required.
Prerequisites: AS.373.115 or instructor permission
Instructor(s): J. Chen; L. Yin; N. Zhao; Y. Chiang.

AS.373.211. Second Year Heritage Chinese. 3.5 Credits.
This course is designed for students who finished AS.373.112 with C+ and above (or equivalent). Students in this course possess native-like abilities in comprehension and speaking. The course focuses on reading and writing. Cross-listed with East Asian Studies
Prerequisites: AS.373.112 or equivalent.
Instructor(s): A. Chen
Area: Humanities.

AS.373.212. Second Year Heritage Chinese II. 3.0 Credits.
For students who have significant previously-acquired ability to understand and speak Modern Standard Chinese. Course focuses on reading and writing. Teaching materials are the same as used in AS.373.115-116; however, both traditional and simplified versions of written Chinese characters are used. Continuation of AS.373.211. Recommended Course Background: AS.373.211 or permission required.
Prerequisites: AS.373.211 or instructor permission
Instructor(s): A. Chen
Area: Humanities.
AS.373.215. Second Year Chinese. 4.5 Credits.
Consolidation of the foundation that students have laid in their first year of study and continued drill and practice in the spoken language, with continued expansion of reading and writing vocabulary and sentence patterns. Students will work with both simplified and traditional characters. Note: Students who have native-like abilities in comprehension and speaking should take AS.373.211-212. Cross-listed with East Asian Studies
Prerequisites: AS.373.116 or equivalent.
Instructor(s): A. Chen; L. Yin
Area: Humanities.

AS.373.216. Second Year Chinese II. 4.5 Credits.
Consolidation of the foundation that students have laid in their first year of study and continued drill and practice in the spoken language, with continued expansion of reading and writing vocabulary and sentence patterns. Students will work with both simplified and traditional characters. Note: Students who have native-like abilities in comprehension and speaking should take AS.373.211-212. Recommended Course Background: AS.373.215 or Permission Required. Cross-listed with East Asian Studies
Prerequisites: AS.373.215 or instructor permission.
Instructor(s): A. Chen; J. Yin
Area: Humanities.

AS.373.313. Third Year Heritage Chinese. 3.0 Credits.
This course is designed for those who have already taken AS.373.212 or equivalent. Students need to have native-level fluency in speaking and understanding Chinese. The course focuses on reading and writing. In addition to the textbooks, downloaded articles on current affairs may also be introduced on a regular basis. Cross-listed with East Asian Studies
Prerequisites: Prereq: AS.373.211 AND AS.373.212 or instructor's permission
Instructor(s): L. Yin
Area: Humanities.

AS.373.314. Third Year Heritage Chinese II. 3.0 Credits.
This course is a continuation of AS.373.313. Students need to have native-level fluency in speaking and understanding Chinese. The course focuses on reading and writing. In addition to the textbooks, downloaded articles on current affairs may also be included on a regular basis. Recommended Course Background: AS.373.313 or Permission Required. Lab required.
Prerequisites: AS.373.313 or equivalent
Instructor(s): J. Yin
Area: Humanities.

AS.373.315. Third Year Chinese. 3.5 Credits.
This two-semester course consolidates and further expands students' knowledge of grammar and vocabulary and further develops reading ability through work with textbook material and selected modern essays and short stories. Class discussions will be in Chinese insofar as feasible and written assignments will be given. Cross-listed with East Asian Studies
Prerequisites: AS.373.216 or instructor permission
Instructor(s): A. Chen
Area: Humanities.

AS.373.316. Third Year Chinese II. 3.5 Credits.
This two-semester course consolidates and further expands students' knowledge of grammar and vocabulary and further develops reading ability through work with textbook material and selected modern essays and short stories. Class discussions will be in Chinese insofar as feasible, and written assignments will be given. Continuation of AS.373.315.
Recommended Course Background: AS.373.315 or permission required.
Prerequisites: AS.373.315 or instructor permission
Instructor(s): A. Chen
Area: Humanities.

AS.373.415. Fourth Year Chinese. 3.0 Credits.
This course is designed for students who finished AS.373.316 with a C+ or above (or equivalent). Readings in modern Chinese prose, including outstanding examples of literature, newspaper articles, etc. Students are supposed to be able to understand most of the readings with the aid of a dictionary, so that class discussions are not focused primarily on detailed explanation of grammar. Discussion, to be conducted in Chinese, will concentrate on the cultural significance of the readings' content. Cross-listed with East Asian Studies
Prerequisites: AS.373.316 or instructor permission
Instructor(s): Staff
Area: Humanities.

AS.373.416. Fourth Year Chinese II. 3.0 Credits.
Continuation of AS.373.415. Readings in modern Chinese prose, including outstanding examples of literature, newspaper articles, etc. Students should understand most of the readings with the aid of a dictionary, so that class discussions need not focus primarily on detailed explanations of grammar. Discussion, to be conducted in Chinese, will concentrate on the cultural significance of the readings' content. Recommended Course Background: AS.373.415 or Permission Required. Cross-listed with East Asian Studies
Prerequisites: AS.373.415 or instructor permission
Instructor(s): L. Yin
Area: Humanities.

AS.373.451. Topics in Chinese Media. 3.0 Credits.
The main focus of this course is to expand the student’s knowledge of four essential skills in Chinese language and to deepen the student’s knowledge of Chinese culture. The course is taught based on various written and visual materials (including newspapers, journals, TV, movies, and short novels) to improve students’ reading comprehension, maintain conversation skills through class discussion, improve understanding of the culture and society of China, and enhance writing ability through short compositions and a writing project. Recommended Course Background: Completion of four years of Chinese language or permission required.
Instructor(s): N. Zhao
Area: Humanities.

AS.373.491. 5th Year Chinese. 3.0 Credits.
Fifth Year Chinese is designed for students who finished fourth year regular or third year heritage Chinese course at JHU or its equivalent and wish to achieve a higher advanced proficiency level in Chinese. The goal of the course is to help students further develop their listening, speaking, reading and writing skills cohesively and to enhance students’ understanding of Chinese culture and society through language learning.
Prerequisites: AS.373.416 or AS.373.314 or equivalent.
Instructor(s): N. Zhao.
AS.378.115. First Year Japanese. 4.5 Credits.
This course is designed for students who have no background or previous knowledge in Japanese. The course consists of lectures on Tuesday/Thursday and conversation classes on Monday/Wednesday/Friday. The goal of the course is the simultaneous progression of four skills (speaking, listening, writing, and reading) as well as familiarity with aspects of Japanese culture. By the end of the year, students will have basic speaking and listening comprehension skills, a solid grasp of basic grammar items, reading and writing skills, and a recognition and production of approximately 150 kanji in context. Knowledge of grammar will be expanded significantly in AS.373.215. No Satisfactory/Unsatisfactory. Student may choose to attend either lecture at 10:30 am or 12 pm on TTh. Cross-listed with East Asian Studies
Instructor(s): M. Johnson; S. Katagiri.

AS.378.116. First Year Japanese II. 4.5 Credits.
This course is designed for students who have no background or previous knowledge in Japanese. The course consists of lectures on Tuesday/Thursday and conversation classes on Monday/Wednesday/Friday. The goal of the course is the simultaneous progression of four skills (speaking, listening, writing, and reading) as well as familiarity with aspects of Japanese culture. By the end of the fall term, students will have basic speaking and listening comprehension skills, a solid grasp of basic grammar items, reading and writing skills, and a recognition and production of approximately 60 kanji in context. Knowledge of grammar will be expanded significantly in 2nd year Japanese. May not be taken Satisfactory/Unsatisfactory. Recommended Course Background: AS.378.115
Prerequisites: Prereq: AS.378.115 or instructor permission.
Instructor(s): M. Johnson; S. Katagiri.

AS.378.215. Second Year Japanese. 4.5 Credits.
Training in spoken and written language, increasing their knowledge of more complex patterns. At completion, students will have a working knowledge of about 250 Kanji. Recommended Course Background: AS.378.115 and AS.378.116 or equivalent.
Prerequisites: AS.378.116 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.216. Second Year Japanese II. 4.5 Credits.
Continuation of Beginning Japanese and Intermediate Japanese I. Training in spoken and written language, increasing students' knowledge of more complex patterns. At completion, students will have a working knowledge of about 250 Kanji. Lab required. Recommended Course Background: AS.378.215 or equivalent.
Prerequisites: Prereq: AS.378.215 or instructor permission
Instructor(s): M. Nakao
Area: Humanities.

AS.378.315. Third Year Japanese. 3.0 Credits.
Emphasis shifts toward reading, while development of oral-aural skills also continues apace. The course presents graded readings in expository prose and requires students to expand their knowledge of Kanji, grammar, and both spoken and written vocabulary. Cross-listed with East Asian Studies
Prerequisites: AS.378.215 AND AS.378.216 or instructor permission
Instructor(s): M. Nakao
Area: Humanities.

AS.378.316. Third Year Japanese II. 3.0 Credits.
Emphasis shifts toward reading, while development of oral-aural skills also continues apace. The course presents graded readings in expository prose and requires students to expand their knowledge of Kanji, grammar, and both spoken and written vocabulary. Lab required. Continuation of AS.378.315. Recommended Course Background: AS.378.315 or equivalent.
Prerequisites: AS.378.315 or equivalent.
Instructor(s): M. Nakao
Area: Humanities.

AS.378.396. Fundamentals of Japanese Grammar. 2.0 Credits.
This course is designed for students who have already studied 1st-year Japanese grammar and wish to develop a thorough knowledge of Japanese grammar in order to advance all aspects of language skills to a higher level. It is also appropriate for graduate students who need to be able to read materials written in Japanese. Recommended Course Background: AS.378.315 and AS.378.316 or equivalent.
Prerequisites: AS.378.316 or equivalent.
Instructor(s): M. Nakao; S. Katagiri
Area: Humanities.

AS.378.415. Fourth Year Japanese. 3.0 Credits.
By using four skills in participatory activities (reading, writing, presentation, and discussion), students will develop reading skills in modern Japanese and deepen and enhance their knowledge on Kanji and Japanese culture. Recommended Course Background: AS.378.315 and AS.378.316 or equivalent.
Prerequisites: AS.378.415 or instructor permission
Instructor(s): M. Nakao; S. Katagiri
Area: Humanities.

AS.378.416. Fourth Year Japanese II. 3.0 Credits.
By using four skills in participatory activities (reading, writing, presentation, and discussion), students will develop reading skills in modern Japanese and deepen and enhance their knowledge on Kanji and Japanese culture. Lab required. Recommended Course Background: AS.378.415
Prerequisites: AS.378.415 or instructor permission
Instructor(s): M. Nakao; S. Katagiri
Area: Humanities.

This course is designed for graduate students (in East Asian Studies, Public Health, History of Medicine, History, etc.) and undergraduate students with a strong interest in improving Japanese reading skills. The main goal of the course is to learn strategies for reading and comprehending materials written in Japanese without using a dictionary. Specific strategies and techniques are introduced, followed by practice. Class materials include a broad spectrum of native materials, including novels, newspapers, scholarly articles, essays, historical papers, and so forth. A diverse range of articles and essays are selected to introduce and enforce various ways of reading Japanese effectively. 2 credits for undergraduate students.
Instructor(s): M. Johnson
Area: Humanities.

AS.380.101. First Year Korean. 4.5 Credits.
Introduces the Korean alphabet, hangeul. Covers basic elements of the Korean language, high-frequency words and phrases, including cultural aspects. Focuses on oral fluency reaching Limited Proficiency where one can handle simple daily conversations. No Satisfactory/Unsatisfactory.
Cross-listed with East Asian Studies
Instructor(s): J. Song; S. Lee.
AS.380.102. First Year Korean II. 3.0 Credits.
Focuses on improving speaking fluency to Limited Proficiency so that one can handle simple daily conversations with confidence. It provides basic high-frequency structures and covers Korean holidays. Continuation of AS.380.101. Recommended Course Background: AS.380.101 or permission required.
Prerequisites: AS.380.101 or instructor permission
Instructor(s): J. Song, S. Lee.

AS.380.201. Second Year Korean. 4.0 Credits.
Aims for improving oral proficiency and confident control of grammar with vocabulary building and correct spelling intended. Reading materials of Korean people, places, and societies will enhance cultural understanding and awareness. Project due on Korean cities. Existing demonstrable skills in spoken Korean preferred.
Prerequisites: AS.380.101 AND AS.380.102 or instructor permission
Instructor(s): S. Lee
Area: Humanities.

AS.380.202. Second Year Korean II. 3.0 Credits.
Aims for improving writing skills with correct spelling. Reading materials of Korean people, places, and societies will enhance cultural understanding and awareness, including discussion on family tree. Continuation of AS.380.201. Recommended Course Background: AS.380.201 or equivalent.
Prerequisites: AS.380.201 or equivalent.
Instructor(s): S. Lee
Area: Humanities.

AS.380.301. Third Year Korean. 3.0 Credits.
Emphasizes reading literacy in classic and modern Korean prose, from easy essays to difficult short stories. Vocabulary refinement and native-like grasp of grammar explored. Project due on Korean culture. Cross-listed with East Asian Studies
Prerequisites: AS.380.202 or equivalent.
Instructor(s): S. Lee
Area: Humanities.

AS.380.302. Third Year Korean II. 3.0 Credits.
Emphasizes reading literacy in classic and modern Korean prose. By reading Korean newspapers and professional articles in one’s major, it enables one to be well-versed and truly literate. Continuation of AS.380.301. Cross-listed with East Asian Studies Prerequisite: AS.380.301 or equivalent.
Prerequisites: AS.380.301 or instructor permission
Instructor(s): S. Lee
Area: Humanities.

AS.380.401. Fourth Year Korean. 2.0 Credits.
This course is designed for those who have finished AS 380.302 or beyond advanced mid level of competency in Korean in four skills. By dealing with various topics on authentic materials including news, articles on websites, short stories, this course aims to help students enhance not only linguistics knowledge and skills, but also current issues in Korea. It is expected that, by the end of the term, students will be able to discuss a variety of topics and express opinions fluently in both spoken and written language.
Prerequisites: AS.380.302 or instructor permission
Instructor(s): S. Lee
Area: Humanities.

The Department of Economics offers programs designed to improve the understanding of important economic problems and to provide the tools needed for the critical analysis of these problems and for dealing with them in practice.

On the undergraduate level, the department provides both for those who want to become professional economists and for those interested in a specialty related to economics, such as business, law, government, history, health care management, or environmental engineering. Still other students are simply interested in improving their understanding of society or making informed assessments of economic policies as citizens or making wise decisions about personal finances.

On the graduate level, the department provides advanced training for students preparing for careers as professional economists. The program encompasses such fields as macroeconomics, microeconomic theory, econometrics, labor economics, international economics, industrial organization, economic development, and finance, with an emphasis on the application of economic theory and quantitative methods. Because of the small number of graduate students admitted, they can work closely with faculty in graduate courses and seminars, and have easy and informal access to faculty members.

Undergraduate Programs
The introductory courses AS.180.101 Elements of Macroeconomics and AS.180.102 Elements of Microeconomics are open to all students. Courses at the 200-level have Elements of Economics (AS.180.101 and AS.180.102) as prerequisites.

AS.180.301 Microeconomic Theory (or AS.180.401 see below) and AS.180.302 Macroeconomic Theory courses have AS.180.101 and AS.180.102 as well as Calculus I (AS.110.106 or equivalent) as prerequisites. All 300-level courses above 301 and 302 have Microeconomic and/or Macroeconomic Theory (AS.180.301, AS.180.302) as prerequisites (or, with permission of the instructor, corequisites), as well as Elements of Economics and Calculus. Some 300-level courses have additional prerequisites; see individual course listings. Independent study is available, subject to the consent of the department and of the faculty member with whom the student wants to work.

Subject to the consent of the instructor, graduate courses at the 600-level are open to qualified undergraduates. The 600-level courses for which advanced undergraduates are most likely to be qualified are AS.180.601 Consumer & Producer Theory and AS.180.603 Macroeconomic Theory I.

Requirements for the B.A. Degree
(Also see Requirements for a Bachelor's Degree. (p. 7))

For both the economics major and minor, a minimum grade of C- or better is required for all courses meeting the requirements and courses may not be taken satisfactory/unsatisfactory. Courses from study abroad or taken at other universities may count towards requirements only if they are approved by the department's director of undergraduate studies. Internships, independent studies, and intersessions courses do not apply towards major or minor requirements. Summer courses at universities other than Johns Hopkins DO NOT count toward the major or minor, except with prior approval of the Director of Undergraduate Studies for Economics.

Major Requirements:
Economics Core
AS.180.101 Elements of Macroeconomics * 3
AS.180.102  Advanced courses. C
AS.180.301  Microeconomic Theory
or AS.180.401  Advanced Microeconomic Theory
AS.180.302  Macroeconomic Theory
AS.180.334  Econometrics
or AS.180.434  Advanced Econometrics

** Economics Electives **

Three 200- or 300-level economics courses
Two 300-level economics courses

*** Mathematics ***

AS.110.106  Calculus I (Biology and Social Sciences)
or AS.110.108  Calculus I

Statistics

EN.553.111  Statistical Analysis I
or EN.553.112  Statistical Analysis II
or EN.553.211  Probability and Statistics for the Life Sciences
or EN.553.310  Probability & Statistics
or EN.553.311  Probability and Statistics for the Biological Sciences and Engineering
or EN.553.420  Introduction to Probability
or EN.553.430  Introduction to Statistics
or AS.280.345  Public Health Biostatistics

* Students who use exam credits to satisfy the AS.180.101 Elements of Microeconomics and/or AS.180.102 Elements of Microeconomics requirements must take additional courses in the department to reach a total of 10 courses in the department.

** Please note: 180.203 "Faculty Research in Economics", a S/U one-credit course, does not count as one of these three courses.

*** AS.180.401 Advanced Microeconomic Theory is a faster-paced and more intensive version of Microeconomic Theory AS.180.301. You can use either AS.180.301 or AS.180.401 to satisfy the requirement for the economics major. Both AS.180.301 and AS.180.401 will be offered during the same time slot, so the logistics of switching from AS.180.301 to AS.180.401 should be seamless, should you decide to make the switch.

The prerequisites for AS.180.401, like the prerequisites for AS.180.301, are AS.180.102 and one semester of calculus. Note: you may not take both AS.180.301 and AS.180.401.

**** AS.180.434 Advanced Econometrics is a faster-paced and more intensive version of Econometrics AS.180.334. You use can either AS.180.334 or AS.180.434 to satisfy the requirement for the economics major. Both AS.180.334 and AS.180.434 will be offered during the same time slot, so the logistics of switching from AS.180.301 to AS.180.401 should be seamless, should you decide to make the switch.

Note: You may not take both AS.180.334 and AS.180.434.
Also Note: In Spring 2018 we will again offer both AS.180.334 and AS.180.434.

Additional Notes for Students

- EN.553.111 (p. 211) Statistical Analysis I or equivalent (any of the Statistics courses listed above) is a prerequisite for Econometrics.

and AS.180.522 (p. 211) Senior Thesis the department does not necessarily offer all 200- to 500-level courses every year. Students should plan their programs accordingly, in consultation with faculty.
- The Senior Honors Thesis sequence (AS.180.521 (p. 211) Research in Economics and AS.180.522 (p. 211) Senior Thesis) cannot be used to satisfy any of the requirements for the major.

Sample Program

A typical program might include the following sequence of courses:

** Freshman **

<table>
<thead>
<tr>
<th>Fall</th>
<th>Credits</th>
<th>Spring</th>
<th>Credits</th>
</tr>
</thead>

</table>

Total Credits: 41

* Total Credits of 41 include AS.180.106 Calculus and EN.550.111 Statistical Analysis.

** Students trying to take these courses after freshman or sophomore year are likely to run into serious schedule conflicts in the junior and senior years because of the need to fulfill the prerequisites for advanced courses. Consult with faculty at an early stage.

Honors Program in Economics

Departmental honors are awarded to those students who satisfy the following requirements:

- All economics courses applicable to the major have been taken in the department.
- AS.180.521 Research in Economics and AS.180.522 Senior Thesis. The thesis may not be counted as one of the five economics electives.
- A grade point average of at least 3.5 for all economics courses.
**Minor in Economics**

Students with a major in another department may be awarded a minor in economics with satisfactory work in the following courses:

- AS.180.101 Elements of Macroeconomics 3
- AS.180.102 Elements of Microeconomics 3

Four economics courses at the 200- or 300-level (not including 180.203)

No substitution of courses in other departments for economics electives may be made. Students who use exam credits to satisfy the AS.180.101 Elements of Macroeconomics and/or AS.180.102 Elements of Microeconomics requirements must take additional courses in the department to reach a total of 6 courses.

**Center for Financial Economics (CFE)**

Founded in 2008 and housed in the Economics Department in the Krieger School of Arts and Sciences at Johns Hopkins, the Center for Financial Economics blends the study of finance and economics, providing in-depth training and cutting-edge research in both. The dual research and teaching missions of the Center are premised on the belief that a deep understanding of modern economies requires an integrated treatment of finance and the broader economic forces driving economic progress. The recent financial crisis vividly illustrates the vital need for improved understanding of these issues on the part of practitioners, policymakers, and academics.

The CFE offers an undergraduate minor, producing expertise in finance within the context of a top-notch liberal arts education. The minor will equip students with a thorough foundation in the workings of financial markets and their role in the broader economy, providing a foundation for careers in finance, business, academics, and government. The Center is working toward offering a financial economics major and a Ph.D. in financial economics.

**The Minor in Financial Economics**

The main objective of the minor is to provide students with training in the conceptual framework, guiding concepts, and technical tools of modern finance. The broader goal is to provide insights into the large and the small—the macro and micro—of how this framework helps us understand the workings of the economy. The minor in financial economics includes four required courses and two elective courses chosen from the list below.

**Required Courses**
- AS.180.101 Elements of Macroeconomics 3
- AS.180.102 Elements of Microeconomics 3
- AS.180.263 Corporate Finance 3
- AS.180.367 Investment-Portfolio Management 3

**Elective Courses (Select two of the following)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit</th>

<td>Topics in International Macroeconomics and Finance</td>
<td>3</td>
</tr>
</tbody>
</table>

Students may also take relevant courses in related departments, such as AS.180.317 Economics of Fixed Income Instruments or AS.180.336 Macroeonomic Strategies or EN.660.203 Financial Accounting.

Total Credits 18

The minor is open to all majors. A minimum grade of C- or better is required for all courses and they may not be taken satisfactory/unsatisfactory. One cannot take both the economics and financial economics minor. For economics majors, there is a restriction on double-counting: the two elective courses counting toward the minor cannot also count toward the economics major.

**Graduate Programs**

**Requirements for Admission**

The admission of each applicant is decided by the Department as a whole and rests upon his/her academic record (especially economics and mathematics courses), GRE test scores, recommendations of scholars and instructors, and other pertinent information including a match between the research interests of the applicant and the faculty. To apply for admission, applicants are required to upload unofficial transcripts of all previous college and university study to their online application. Failure to upload unofficial transcripts will result in an inability to complete and submit the online application. In addition, we require at least two letters of recommendation. These recommendation letters should come from individuals who can comment on your scholarly skills. All applicants must submit scores from the Graduate Record Examination. Admitted students nearly always have very high quantitative GRE scores. Foreign applicants, who have not earned a degree in a university where English is the sole language of instruction, must take the TOEFL to satisfy the department that they are fluent in English. The department requires the TOEFL with a minimum score of 100 (internet based), 600 (paper based) or 250 (computer based), or IELTS with a bandscore of 7 in place of the TOEFL.

Students should have a knowledge of economic theory and statistics and a strong background in mathematics including differential and integral calculus and linear algebra. Almost all of our students enter with at least two semesters of calculus and linear algebra. In admissions decisions, we like applicants to have taken other mathematics courses as well, including more advanced calculus, differential equations, probability, and real analysis. We especially welcome applications from under-represented minorities, as diversity is important in our graduate program.

**Requirements for the M.A. Degree**

The department does not admit students from outside Johns Hopkins University who intend to work only for an M.A. However, it does offer this degree as an intermediate step toward the Ph.D. or as a final degree to some of those who do not complete their doctoral work.

Beyond the general university requirements, the department requires for the master's degree either two years of satisfactory graduate course work or one year of satisfactory graduate course work and an acceptable master's essay.

**Requirements for the Ph.D. Degree**

**Basic Course Work.** Students take two years of course work. The first year is comprised of two semesters each of microeconomic theory, macroeconomic theory, and mathematical methods, and one-semester course in statistics and econometrics. In the second year, students take electives—four in the fall semester and three in the spring semester. Students may also take relevant courses in related departments, such

**Comprehensive Exam.** This exam is administered by the department and consists of two written examinations designed to test the candidate’s knowledge of both microeconomics and macroeconomics. The written examinations are taken before the beginning of the third term.

**Research Paper.** A research paper is submitted at the end of the fourth term.

**Dissertation.** This should be an original investigation worthy of publication, prepared under the supervision of three members of the faculty. A dissertation proposal is due during the sixth term. The candidate must submit the dissertation in final typed form at least three weeks before the date of the Graduate Board Oral Examination. The committee that administers the examination includes faculty from outside the department. Though it is feasible to finish in four years, it is typical to complete the Ph.D. in five or six years.

**Financial Aid**
The department offers a Departmental Fellowship to all enrolled students. This fellowship covers full tuition costs plus an annual stipend of $29,000 and full student health insurance coverage. During a student’s first year of study, this fellowship support is provided with no teaching assistantship duties. Beginning in the second year of study, students who are performing satisfactory, will again receive the same Departmental Fellowship coverage as in their first year. In addition, during years 2, 3, 4 and 5, this will involve a teaching or research assistantship assignment. The department guarantees financial support for a minimum of five years of graduate study, conditional on satisfactory performance and potentially a sixth year as well depending on student performance and the availability of funds.

**Carl Christ Fellowship**
In the academic year 1989–90, the department established the Carl Christ Fellowship fund to honor one of its faculty members for his distinguished service and achievements. The proceeds of the fund are used to support outstanding graduate students at the dissertation stage of their research.

For further information about graduate study in economics, contact the director of graduate admissions, Department of Economics at econadmissions@jhu.edu.

For current faculty and contact information go to [http://econ.jhu.edu/directoryindex/faculty/](http://econ.jhu.edu/directoryindex/faculty/)

**Faculty**

**Chair**
Laurence M. Ball
Research Interest: Macroeconomics

**Professors**
Christopher Carroll
Research Interests: Macroeconomics, Public Finance

Brendan Daley
Research Interest: Finance

Gregory Duffee
Carl Christ Professor of Economics. Research Interest: Finance

Mark Gersovitz
Research Interests: Economic Development, Public Finance

Bruce Hamilton

Yingyao Hu
Research Interests: Econometrics, Empirical Industrial Organization, Labor Economics

Olivier Jeanne
Research Interests: International Macroeconomics, Monetary Policy

Edi Karni
Scott and Barbara Black Professor of Economics. Research Interests: Economics of Uncertainty and Information, Decision Theory, Microeconomic Theory

M. Ali Khan
Abram Hutzler Professor of Political Economy. Research Interests: Mathematical Economics, Economic theory, History of Economic Thought, International and Development Economics

Robert Moffitt

John K. H. Quah
Research Interest: Microeconomic Theory

Richard Spady
Research Interests: Econometrics, Industrial Organization.

Jonathan Wright
Research Interests: Time Series Econometrics, Empirical Macroeconomics, Finance

**Associate Professors**
Ying Chen
Research Interests: Game Theory, Information Economics, Political Economy

Elena Krasnokutskaya
Research Interests: Industrial Organization, Applied Microeconomics, Applied Econometrics

**Assistant Professors**
Marcelo Fernandez
Research Interest: Economic Theory

Nicholas Papageorge
Broadus Mitchell Assistant Professor. Research Interests: Health, Labor and the Economics of Innovation

**Professors Emeriti**
Louis Maccini
Research Interests: Macroeconomic Theory, Money, Econometrics

H. Peyton Young
Research Interests: Game Theory, Evolutionary Economics, Microeconomic Theory

**Fellows**
Robert Barbera
Co-Director of the Center for Financial Economics. Research Interests: Real Interest Rate/Real Growth Linkages, Global Energy Supply/Demand Issues
Barclay Knapp
Research Interests: Managerial Economics, Business Strategy

Lecturers
Somasree Dasgupta
Research Interests: International Trade, Economic Growth, Macroeconomics

Kevin Heerdt
Research Interests: Derivatives, Corporate Governance, Role of Speculation, Alternative Investment Industry, The Financial Industry

Muhammad Husain
Research Interests: Microeconomic Theory, Labor Economics, Econometrics

Lauren Liu
Research Interest: Microeconometrics

Barbara Morgan
Research Interests: Labor Economics, Public Policy

Ludmila Poliakova
Research Interests: Macroeconomics, Development Economics

Joint Appointments
David Bishai
Professor (Bloomberg School of Public Health) Research Interest: Health Economics.

Filipe Campante
Research Interests: Political Economy and Development

Itay Fainmesser
Assistant Professor (Carey School of Business) Research Interest: Business Economics

Steve H. Hanke
Professor (Department of Environmental Health and Engineering) Research Interests: Applied Economics, Microeconomics, Macroeconomics, Finance.

Pravin Krishna
Professor (SAIS) Research Interest: International Trade

Jian Ni
Associate Professor (Carey Business School) Research Interests: Pricing Strategy, Industrial Organization, Healthcare

Mitsukuni Nishida
Assistant Professor (Carey Business School) Research Interest: Industrial Organization

Alessandro Rebucci
Assistant Professor (Carey Business School) Research Interests: Financial Institutions, International Finance, Macroeconomics, International Real Estate

Emilia Simeonova
Assistant Professor (Carey Business School) Research Interests: Health Economics, Children’s Health, Development Economics

Shubhranshu Singh
Assistant Professor (Carey Business School) Research Interests: Marketing Strategy, Marketing Management

Carlos Vegh
Fred H. Sanderson Professor of International Economics (SAIS) Research Interest: International Economics

For current course information and registration go to https://sis.jhu.edu/classes/

Courses
AS.180.101. Elements of Macroeconomics. 3.0 Credits.
An introduction to the economic system and economic analysis, with emphasis on total national income and output, employment, the price level and inflation, money, the government budget, the national debt, and interest rates. The role of public policy. Applications of economic analysis to government and personal decisions. Prerequisite: basic facility with graphs and algebra.
Instructor(s): R. Barbera
Area: Social and Behavioral Sciences.

AS.180.102. Elements of Microeconomics. 3.0 Credits.
An introduction to the economic system and economic analysis with emphasis on demand and supply, relative prices, the allocation of resources, and the distribution of goods and services, theory of consumer behavior, theory of the firm, and competition and monopoly, including the application of microeconomic analysis to contemporary problems.
Instructor(s): B. Hamilton
Area: Social and Behavioral Sciences.

AS.180.203. Faculty Research in Economics. 1.0 Credit.
This course will consist of a series of informal lectures by various professors in the Department of Economics. Each lecture will consist of a description of a professional research project which he/she has undertaken over the course of his/her profession career. S/U grading only.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): B. Hamilton.
Area: Social and Behavioral Sciences.

AS.180.214. The Economic Experience of the BRIC Countries. 3.0 Credits.
In 2001, Jim O’Neill, the Chief Economist at Goldman Sachs, coined the acronym BRIC to identify the four large emerging economies, Brazil, Russia, India and China. These economies have since had an amazing run, and have emerged as the biggest and fastest growing emerging markets. In this course, we look at the economic experiences of the BRIC countries for the past 50 years. We discuss the reasons that have contributed to their exceptional growth rates, with particular emphasis on their transformation into market economies. We also analyze the challenges that these countries continue to face in their development process.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): S. Dasgupta
Area: Social and Behavioral Sciences.
AS.180.217. Game Theory in Social Sciences. 3.0 Credits.
Game Theory is the study of multiple person decision problems in which the well-being of a decision maker depends not only on his own actions but also on those of others. Such problems arise frequently in economics, political science, business, military science and many other areas. In this course, we will learn how to model different social situations as games and how to use solution concepts to understand players' behavior. We will consider various examples from different fields and will play several games in class. The emphasis of the class is on the conceptual analysis and applications and we will keep the level of mathematical technicalities at the minimum – high school algebra and one term of calculus will be sufficient. Students who took AS.180.117 are not eligible to take AS.180.217.
Prerequisites: Students may not have previously taken AS.180.102 or instructor permission
Instructor(s): Y. Chen
Area: Social and Behavioral Sciences.

AS.180.228. Economic Development. 3.0 Credits.
A comprehensive survey of economic behavior by households, farms and firms in poor countries and the role of and for governments. Discussions include measurement of income levels, economy-wide equilibrium, sources of growth, agriculture and industry, international trade and investment, savings, population, fertility, education, health, income distribution and public finances. Applies economic theory rigorously to interpret and evaluate the economic experience of poor countries. Diagnostic test on Elements of Economics is required in the second week. Grading based on 3 exams and one paper.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): M. Gersovitz
Area: Social and Behavioral Sciences.

AS.180.238. Rethinking Economics After the Great Recession. 3.0 Credits.
The financial crisis that began in the United States in 2007 threw virtually the entire world into recession. This class will look at the causes of the crisis and at how it unfolded. It will look into the conventional wisdom of economists, circa 2006, and why that wisdom proved to be so wrong. It will examine the financial innovations that contributed to the crisis, at the reasons financial regulators were blindsided, and at the reforms enacted after the crisis.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): F. Norris
Area: Social and Behavioral Sciences
Writing Intensive.

AS.180.240. JHU Bologna: History of Banking. 3.0 Credits.
Economics course offered on the JHU Summer Program in Bologna. Permission required. Must be taken for a letter grade. Open to students on the JHU/Bologna summer program only.
Instructor(s): J. Faust; R. Barbera
Area: Social and Behavioral Sciences.

AS.180.242. International Monetary Economics. 3.0 Credits.
This course presents International Monetary Economics theory and applies it towards gaining an understanding of recent events and current policy issues. The theory presented in this course covers a broad range of topics including exchange rate determination, monetary and fiscal policy in an open economy, balance of payments crises, the choice of exchange rate systems, and international debt. The insights provided by these theoretical frameworks will enable us to discuss topics such as the current global financial crisis, global financial imbalances, the Chinese exchange rate regime, and proposed changes in the international financial architecture.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): S. Dasgupta
Area: Social and Behavioral Sciences.

AS.180.248. Financial Writing and Analysis. 3.0 Credits.
There is an immense chasm between economic and financial commentary in academic discussions and that provided by private sector analysts and the press. Some of the difference is merely semantic, but much of the difference has real substance. Academic and nonacademic commentators tend to simply write off the other as being clueless in some way. Sorting out which bits of each style of analysis are most valuable and synthesizing them into a coherent commentary is a rare and valuable skill. This is a hands-on course with a goal of building skills reading and writing commentary in financial economics. The course begins critically studying commentary regarding prominent topics in the news over the recent months and then moves to writing “explainer” pieces for publication on the Center for Financial Economics blog. Students will work in teams both analyzing commentary, and writing and critiquing the work of fellow students.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): F. Norris
Area: Social and Behavioral Sciences
Writing Intensive.

AS.180.252. Economics of Discrimination. 3.0 Credits.
This course examines labor market discrimination by gender, race and ethnicity in the United States. What does the empirical evidence show, and how can we explain it? How much of the difference in observed outcomes is driven by differences in productivity characteristics and how much is due to discrimination? How have economists theorized about discrimination and what methodologies can be employed to test those theories? What has been the impact of public policy in this area; how do large corporations and educational institutions respond; and what can we learn from landmark lawsuits? The course will reinforce skills relevant to all fields of applied economics, including critical evaluation of the theoretical and empirical literature, the reasoned application of statistical techniques, and analysis of current policy issues. Seniors by Permission Only.
Prerequisites: AS.180.102
Instructor(s): B. Morgan
Area: Social and Behavioral Sciences
Writing Intensive.
AS.180.261. Monetary Analysis. 3.0 Credits.
This course analyzes the financial and monetary system of the U.S. economy and the design and implementation of U.S. monetary policy. Among other topics, we will examine the role of banks in the economy, the term structure of interest rates, the stock market, the supply of money, the role of the Federal Reserve in the economy, the objectives of monetary policy in the United States and current monetary policy practice.
Prerequisites: AS.180.101 and AS.180.102
Instructor(s): L. Poliakova
Area: Social and Behavioral Sciences.

AS.180.263. Corporate Finance. 3.0 Credits.
This course is an introduction to the financial management of a corporation. Students study the following broad questions. How should a firm decide whether to invest in a new project? How much debt and equity should a firm use to finance its activities? How should a firm pay its investors? How do taxes affect a firm's investment and financing decisions? What determines the value of a firm? The emphasis throughout the course is on the economic principles that underlie answers to these questions.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): G. Duffee
Area: Social and Behavioral Sciences.

AS.180.266. Financial Markets and Institutions. 3.0 Credits.
Understanding design and functioning of financial markets and institutions, connecting theoretical foundations and real-world applications and cases. Basic principles of asymmetric information problems, management of risk. Money, bond, and equity markets; investment banking, security brokers, and venture capital firms; structure, competition, and regulation of commercial banks. Importance of electronic technology on financial systems.
Prerequisites: AS.180.101 AND AS.180.102
Instructor(s): J. Wright
Area: Social and Behavioral Sciences.

AS.180.268. Seminar on Financial Regulation. 3.0 Credits.
This course examines regulation of the financial system in the United States and its effects on the economy. It considers proposals for reform and the ongoing implementation of the Dodd-Frank Act of 2010. A major part of the course will be student research projects and class discussion of the projects.
Prerequisites: AS.180.261
Instructor(s): L. Ball
Area: Social and Behavioral Sciences.

AS.180.280. The History and Future of the Hedge Fund Industry. 3.0 Credits.
The precursors to modern hedge funds began more than 50 years ago, but in the 1990s the hedge fund, or alternative investments, industry began a period of rapid growth and evolution. With growth came controversy. Some argue that hedge funds, by allowing immense amounts of capital to be rapidly and freely deployed, play a vital role in pushing prices toward the efficient markets ideal. Others claim that hedge funds may accentuate speculative price dynamics, threatening the stability of the financial sector. While many hedge funds claim to offer outstanding returns to investors, data suggest that many clients end up paying high fees for unspectacular results. This course examines these and other controversies, while tracing the history of the alternative investments industry over the last 25 years.
Prerequisites: AS.180.101 AND AS.180.102 AND (AS.180.266 OR AS.180.263 OR AS.180.367)
Instructor(s): K. Heerdt
Area: Social and Behavioral Sciences.

AS.180.289. Economics Of Health. 3.0 Credits.
Application of economic concepts and analysis to the health services system. Review of empirical studies of demand for health services, behavior of providers, and relationship of health services to population health levels. Discussion of current policy issues relating to financing and resource allocation.
Prerequisites: AS.180.102
Instructor(s): D. Bishai
Area: Social and Behavioral Sciences.

AS.180.301. Microeconomic Theory. 4.5 Credits.
An introduction to the modern theory of allocation of resources, starting with the theories of the individual consumer and producer, and proceeding to analysis of systems of interacting individuals, first in the theory of exchange, then to systems which include production as well.
Prerequisites: AS.180.102 AND (AS.110.106 OR AS.110.107 OR AS.110.108 OR AS.110.109) OR equivalent.;AS.180.101 may be taken concurrently.
Instructor(s): M. Husain
Area: Social and Behavioral Sciences.

AS.180.302. Macroeconomic Theory. 4.5 Credits.
The course provides a treatment of macroeconomic theory including a static analysis of the determination of output, employment, the price level, the rate of interest, and a dynamic analysis of growth, inflation, and business cycles. In addition, the use and effectiveness of monetary and fiscal policy to bring about full employment, price stability, and steady economic growth will be discussed.
Prerequisites: AS.180.101 and (AS.110.106 or AS.110.107 or AS.110.108 or AS.110.109);AS.180.102 may be taken at the same time as AS.180.302.
Instructor(s): L. Poliakova
Area: Social and Behavioral Sciences.
AS.180.303. Topics in International Macroeconomics and Finance. 3.0 Credits.
The course will review selected topics in international macroeconomics and finance. The topics for the Fall of 2015 include: financial globalization; international portfolio diversification; the problems posed by “sudden stops” in capital flows to emerging markets; global imbalances and global demand rebalancing; how different exchange rate regimes have fared in the global financial crisis; sovereign default in the light of the Argentine experience; and the ongoing Russian currency and financial crisis. The course involves mathematical modeling as well as data analysis.
Prerequisites: Pre-reqs: AS.180.101 AND AS.180.102 AND AS.180.302
Instructor(s): O. Jeanne
Area: Social and Behavioral Sciences.

AS.180.309. Economics of Uncertainty and Information. 3.0 Credits.
In this course we'll discuss the theory of decision making in the face of risk, the theory of risk aversion and its applications to financial and insurance markets. Building on the theory of individual decision making under risk, we will study the economic implications of asymmetric information, the type of market failures produced by adverse selection and moral hazard problems, and the models that were advanced to analyze these problems, including incentive contracts, screening and signaling equilibria.
Prerequisites: AS.180.301
Instructor(s): E. Karni.

AS.180.310. Economics Of Antitrust. 3.0 Credits.
This course explores the economic rationale for, and consequence of, antitrust laws. In addition to economic analysis we will study landmark antitrust cases.
Prerequisites: AS.180.301 OR AS.180.401
Instructor(s): B. Hamilton
Area: Social and Behavioral Sciences
Writing Intensive.

AS.180.312. Evaluating Public Policy: Experimental and Quasi-Experimental Research Design in Social Science. 3.0 Credits.
The purpose of the course is to show how experimental, quasi-experimental and non-experimental methods can be used to advance scientific knowledge about topics in economics. It will teach students the empirical techniques required to analyze experimental and non-experimental data to draw causal inference. The course will begin with a primer on the use of experimental methods in economics, specifically in the context of evaluating welfare programs and labor market policies. Students will then proceed to learn the empirical methods that can be employed to establish cause and effect, both when data is obtained through a randomized control trial (experimental data), or when randomization occurs naturally (quasi-experimental data). The tools and topics that are covered will not only be relevant to economics students, but will also be of interest to students from other social science departments.
Prerequisites: AS.180.301 AND (EN.550.420 OR EN.550.310 OR EN.550.112 OR EN.550.113 OR EN.550.211 OR EN.550.311 OR EN.550.430 OR EN.550.435 OR EN.550.111 OR AS.280.345)
Instructor(s): S. Qayyum
Area: Social and Behavioral Sciences
Writing Intensive.

AS.180.314. Mathematical Economics. 3.0 Credits.
This course traces the extent to which modern economic theory, particularly as it pertains to pure competition in market and non-market games under the rationality postulate.
Instructor(s): M. Khan
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.180.317. Economics of Fixed Income Instruments. 3.0 Credits.
Students study economic principles and state-of-the-art mathematical models used to value fixed income securities and their derivatives. The course emphasizes advanced practical applications as well as theory. Students will develop their own computer code to price fixed-income instruments and evaluate their risks. Students must be familiar with both statistics and differential equations.
Prerequisites: AS.180.301 AND (EN.550.111 OR EN.550.112 OR EN.550.310 OR EN.550.420 OR EN.550.430) AND (AS.110.302 OR EN.550.291 or permission of the instructor)
Instructor(s): G. Duffee
Area: Social and Behavioral Sciences.

AS.180.334. Econometrics. 3.0 Credits.
Introduction to the methods of estimation in economic research. The first part of the course develops the primary method employed in economic research, the method of least squares. This is followed by an investigation of the performance of the method in a variety of important situations. The development of a way to handle many of the situations in which ordinary least squares is not useful, the method of instrumental variables, concludes the course.
Prerequisites: AS.180.301 OR AS.180.401, may be taken concurrently, one semester of calculus, AS.280.345 OR EN.540.305 OR EN.550.211 OR EN.550.111 OR EN.550.310 OR EN.550.311 OR EN.550.420 OR EN.560.435.
Instructor(s): M. Husain
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.180.336. Macroeconomic Strategies. 3.0 Credits.
Will sketch out a strategy for anticipating economic turning points. Business cycle basics, monetary policy/financial market/real economy interactions will be reviewed. Long-term growth issues will be explored.
Prerequisites: AS.180.101 AND AS.180.102 AND AS.180.302 or instructor permission.
Instructor(s): R. Barbera
Area: Social and Behavioral Sciences.

AS.180.345. Rationality: Meaning and Measurement. 3.0 Credits.
Economists generally work with a number of classic models of how people behave in different contexts. These models (such as utility maximization and expected utility maximization) are widely used because they are tractable and elegant, but are they also accurate models of human behavior? In this course, we will examine the axiomatic foundations of these models, explore their implications for choice behavior, and discuss the empirical and experimental strategies economists have developed to test these models.
Prerequisites: AS.180.301
Instructor(s): K. Quah
Area: Social and Behavioral Sciences.
AS.180.351. Labor Economics. 3.0 Credits.
The course discusses various issues in labor markets from the perspective of economic theory. We first study the major forces at work that shape labor market behavior; firms' labor demand and workers' labor supply. Then we discuss the equilibrium behavior of employment and wages. Using these tools, we also cover various applied topics in labor economics, such as minimum wage regulations, male-female wage differentials, human capital investment, worker mobility, and unemployment.
Prerequisites: AS.180.302 AND (AS.180.334 OR AS.180.434) (including instrumental variables estimation) is required.
Instructor(s): S. Dasgupta
Area: Social and Behavioral Sciences.

AS.180.352. Public Economics. 3.0 Credits.
This course explores issues related to expenditure and tax policies of governments, as well as views regarding the purpose of government and criteria for evaluating government actions. The course also includes a discussion of how group or collective choices are made within society, how environmental policies affect the level of pollution, and the importance of public debt.
Prerequisites: AS.180.301 OR AS.180.401
Instructor(s): M. Husain
Area: Social and Behavioral Sciences.

AS.180.354. Econometrics of Unobservables. 3.0 Credits.
Empirical data may not contain all the variables suggested by economic theories. This course introduces methodologies to identify and estimate economic models containing unobservables. Recommended Course Background: AS.180.301 and AS.180.334.
Instructor(s): Y. Hu
Area: Social and Behavioral Sciences.

AS.180.355. Economics of Poverty/Inequality. 3.0 Credits.
This course focuses on the economics of poverty and inequality. It covers the measurement of poverty and inequality, facts and trends over time, the causes of poverty and inequality with a focus on those related to earnings and the labor market, and public policy toward poverty and inequality, covering both taxation and government expenditure and programs. By the nature of the material, the course is fairly statistical and quantitative. Students should have an intermediate understanding of microeconomic concepts. Basic knowledge of regression analysis is also helpful.
Prerequisites: AS.180.301
Instructor(s): R. Moffitt
Area: Social and Behavioral Sciences.

AS.180.361. Rich Countries, Poor Countries. 3.0 Credits.
Why are some countries rich while some other countries poor? Why does a country's income per person generally grow over time? We try to analyze these questions using the theoretical and empirical growth literature. We will study seminal growth models, and also try to explain cross-country income differences in terms of factors like geography, institutions and global integration. Knowledge of regression analysis (including instrumental variables estimation) is required.
Prerequisites: AS.180.302 AND (AS.180.334 OR AS.180.434)
Instructor(s): S. Dasgupta
Area: Social and Behavioral Sciences.

AS.180.363. Sex, Drugs and Dynamic Optimization: The Economics of Risky Behavior. 3.0 Credits.
We apply the tools of economic analysis to understand behaviors that are enjoyable today, but may have negative consequences in the future.
Prerequisites: (AS.180.301 OR AS.180.401) AND AS.180.302; AS.180.334 can be taken concurrently.
Instructor(s): N. Papageorge
Area: Social and Behavioral Sciences.

AS.180.365. Topics in Macroeconomics. 3.0 Credits.
This course builds on AS.180.302 (Macroeconomic Theory) to consider the leading macroeconomic controversies of today (such as the appropriate monetary and fiscal policies of the Federal Reserve and U.S. Government). The classes will include frequent student presentations.
Prerequisites: AS.180.302
Instructor(s): L. Ball
Area: Social and Behavioral Sciences.

AS.180.367. Investment-Portfolio Management. 3.0 Credits.
Prerequisites: (AS.180.301 OR AS.180.401) AND (EN.550.111 OR EN.550.112 OR EN.550.310 OR EN.550.311 OR EN.550.420 OR EN.550.430)
Instructor(s): J. Wright
Area: Social and Behavioral Sciences.

AS.180.369. Industrial Organization. 3.0 Credits.
Investigation of firm behavior in markets characterized by imperfect competition. Imperfect competition lies in between monopoly and perfect competition and characterizes most major industries in modern capitalist economies. Central issues to be covered in the course include what determines the intensity of competition? What determines the extent of entry and exit? How is it that some firms consistently dominate their industries?
Prerequisites: AS.180.301 OR AS.180.401
Instructor(s): E. Krasnokutskaya
Area: Social and Behavioral Sciences.
AS.180.389. Social Policy Implications of Behavioral Economics. 3.0 Credits.
Economists increasingly incorporate insights from psychology into models of rational decision-making. Known as "behavioral economics", this line of research considers how, for example, emotions, rules-of-thumb, biased beliefs and time-inconsistent preferences influence how we make choices. Behavioral economics increasingly pervades policy discussions on topics as diverse as: obesity, the role of media, subprime mortgages and voting patterns. Behavioral models are certainly novel, but do they help us to design superior social policies? With the goal of preparing students to address this question, this course (1) provides a thorough overview of the main contributions of behavioral economics, highlighting departures from more traditional economic models and (2) emphasizes how behavioral economic models might (or might not) improve how we think about social policy.
Prerequisites: AS.180.301 OR AS.180.401; AS.180.334 OR AS.180.434 can be taken concurrently.
Instructor(s): N. Papageorge
Area: Social and Behavioral Sciences.

AS.180.390. Health Economics & Developing Countries. 3.0 Credits.
Prerequisites: AS.180.301 or AS.180.401; Students may not take AS.180.390 if they took AS.180.391.
Instructor(s): M. Gersovitz
Area: Social and Behavioral Sciences
Writing Intensive.

AS.180.391. Economics of China. 3.0 Credits.
Discussion of the economic experience of Post-War China, primarily emphasizing topics rather than historical narrative: agriculture, industry including corporate governance and public enterprises, international trade, population, migration, education, health, public finances among other topics.
Prerequisites: AS.180.301 OR AS.180.401; Students may not take AS.180.390 if they took AS.180.391.
Instructor(s): M. Gersovitz
Writing Intensive.

AS.180.401. Advanced Microeconomic Theory. 3.0 Credits.
This course covers roughly the same material as Microeconomic Theory 180.301 but in a more formal and mathematically rigorous way. You can use either 180.301 or 180.401 to satisfy the requirement for the economics major. 180.301 and 180.401 are offered during the same time slot, so the logistics of switching from 180.301 to 180.401 should be seamless, should you decide to make the switch. This course is suitable for those students who prefer a more formal treatment of economic theory and who are planning to take some of the more technically demanding electives in economics at a later stage. NOTE: you may not take both 180.301 and 180.401.
Prerequisites: You may not take both AS.180.401 and AS.180.301; AS.180.102 and any two semesters of calculus (or equivalent)
Instructor(s): K. Quah
Area: Social and Behavioral Sciences.

AS.180.434. Advanced Econometrics. 3.0 Credits.
This is a faster-paced and more intensive version of Econometrics 180.334. You can use either 180.334 or 180.434 to satisfy the requirement for the economics major. This course is suitable for those students who prefer a more technical treatment of econometric methodologies. NOTE: you may not take both 180.334 and 180.434.
Prerequisites: Students may only receive credit for either AS.180.334 or AS.180.434; AS.180.301 or AS.180.401, one semester of linear algebra, one semester of calculus, AS.280.345 or EN.580.305 or EN.550.211 or EN.550.111 or EN.550.310 or EN.550.311 or EN.550.420 or EN.560.435.
Instructor(s): Y. Hu
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences.

AS.180.501. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.180.502. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.180.521. Research in Economics. 2.0 Credits.
The assignment in this course is to complete the initial stages of research for the Senior Honors Thesis in Economics. Students will work independently under the supervision of a research/thesis advisor. The contact (in spring of Junior year) should be the course instructor listed for this course. He/she will coordinate registration and grade-reporting, and will also be available to discuss research ideas and to help put students in touch with possible thesis advisors. Open to Senior and Junior Economics majors. Note: This course can not be counted as one of the five elective economics courses required for the Economics major.
Instructor(s): M. Gersovitz.

AS.180.522. Senior Thesis. 3.0 Credits.
Students enrolled in this course will complete the Senior Honors Thesis under the supervision of a thesis advisor (who will have been chosen by the student prior to registration for AS.180.521). The formal course instructor will be in charge of overseeing registration and submitting grades. He/she will also be available for discussions of progress or problems on the thesis. Please note that your thesis advisor can be any faculty member in the Department of Economics, and need not be the same person as the course instructor. (This course cannot be counted as one of the 5 elective economics courses required for the Economics Major.)
Prerequisites: AS.180.521
Instructor(s): Staff
Writing Intensive.

AS.180.595. Economic Internship. 1.0 Credit.
Instructor(s): L. Ball.

AS.180.597. Research. 3.0 Credits.
Instructor(s): N. Papageorge.

AS.180.599. Independent Study. 3.0 Credits.
Instructor(s): E. Krasnokutskaya; N. Papageorge; S. Dasgupta.

The mathematical theory of general static equilibrium. The course will emphasize the formal mathematical expression of economic ideas and the ability to give a loose economic intuition a coherent logical meaning. Different mathematical structures in general equilibrium theory will be isolated and discussed. The text will be Debreu's book "Theory of Value". Recommended Course Background: AS.110.106, AS.180.301, and AS.180.302 or permission of the instructor.
Instructor(s): M. Khan
Area: Social and Behavioral Sciences.
The course will cover decision theories relevant to economics and their related analytical tools. We aim to discuss the following topics: standard theories of firm and consumer behavior; decision making under risk; revealed preference analysis; monotone comparative statics; bounded rationality.
Instructor(s): K. Quah.

AS.180.603. Macroeconomic Theory I.
A comprehensive treatment of macroeconomic theory, including static analysis of aggregate output employment, the rate of interest, and the price level; aggregative theory of investment, consumption, demand and supply of money; empirical work on aggregative relationships.
Instructor(s): C. Carroll.

First term: a comprehensive treatment of macroeconomic theory, including static analysis of aggregate output employment, the rate of interest, and the price level; aggregative theory of investment, consumption, demand and supply of money; empirical work on aggregative relationships. Second term: the macrodynamic theory of growth, cycles, unemployment and inflation, and selected subjects.
Instructor(s): O. Jeanne.

AS.180.605. Advanced Macroeconomics I.
Topics of recent research in macro-economics. Content will vary from year to year. Likely topics include implicit contract theory, search theory and unemployment, disequilibrium macroeconomic models, monetary policy and the control of inflation, contract-based rational expectations models, imperfect competition in macrodynamic models, business cycle models, empirical tests of rational expectations models, theories of investment behavior, and debt neutrality. Open to 2nd year Grad Students and up.
Instructor(s): L. Ball.

AS.180.606. Advanced Macroeconomics II.
Topics of recent research in macroeconomics. Prof. Ball's course covers nominal rigidities, dynamic-consistency theories of inflation, inflation inertia and the costs of disinflation, monetary policy, costs and benefits of price stability, benefits of output stabilization, alternative policy rules, measuring inflation, unemployment, efficiency-wage theories, the behavior of the NAIRU, macro in middle-income countries, high inflation and stabilization, currency crises. Prof. Carroll's course analyzes implications of the buffer-stock and habit formation theories of consumption for comovement of aggregate variables and asset pricing. The models are applied to study the phenomena of declining U.S. saving rate, the dynamic relationship between saving rates and growth, and the equity premium puzzle.
Prerequisites: Prereq: AS.180.603
Instructor(s): C. Carroll.

AS.180.607. Macroeconometrics I.
The course is an attempt to provide a framework for discussing the techniques that are used in macroeconomic analysis. Generally the bias that it has is one of looking at these from the perspective of someone analyzing macroeconomic data for policy analysis. Consequently, many of the applications considered are drawn from the type of research conducted in central banks and finance ministries. Its emphasis is therefore upon the issues raised by the analysis of time series of macro-economic data. Today there is an emerging literature that looks at micro-economic data as well as conducting cross-country studies. We will tend to ignore that material as the methods used in such research are essentially those of micro-econometrics, although sometimes with adjustments made to reflect the nature of macro-economic time series.
Prerequisites: AS.180.633
Instructor(s): J. Wright.

AS.180.608. Macroeconometrics II.
This course will cover a range of topics in time series econometrics and empirical macroeconomics and finance that arise in current research and policy analysis. Key topics include GMM estimation, filtering, forecasting, structural VARs, and modeling stock and bond returns. It assumes a knowledge of the basics of time series econometrics. Both theoretical and empirical work will be included. Bayesian simulation methods that are very important in current research methods will be emphasized. This course should be taken by people with an interest in either empirical macro or empirical finance and may be helpful in searching for a dissertation topic.
Instructor(s): J. Wright.

AS.180.609. Core Mathematics for Economics.
This course will develop the necessary mathematical language and tools that are to be regarded as a pre-requisite for graduate study in economics at Johns Hopkins. Specifically, the course will focus on set theory, linear algebra and real analysis.
Instructor(s): M. Khan
Area: Social and Behavioral Sciences.

AS.180.611. Economics of Uncertainty.
This course offers a review of subjective expected utility theory of decision making under uncertainty and choice based subjective probabilities. It also explores the motivation for the recent developments of non-expected utility theories under risk and under uncertainty. It examines the role of completeness and awareness in these theories as well as the theories of menu choice and random choice behavior.
Instructor(s): E. Karni
Area: Social and Behavioral Sciences.
This course traces the extent to which modern economic theory, particularly as it pertains to pure competition in market and non-market games under the rationality postulate, is grounded in the language of probability and measure theory. Special attention will be paid to the formal expression of ideas such as economic and numerical negligibility, on the one hand, and diffuseness and conditional independence of information, on the other. Towards this end, the course will develop rigorous formulations of basic ideas of (conceptual rather than computational) probability and apply them: first, to develop the fundamental theorems of welfare economics, including the core theorems; and second, to large anonymous and non-anonymous games as well as to finite-agent games with private information. The course will be self-contained from the technical point of view but will presuppose a level of mathematical maturity that ought typically to be achieved by taking courses such as AS.180.615 and AS.180.601
Instructor(s): M. Khan.

This course concerns dynamic optimization in both continuous and discrete time. More specifically, it develops Pontryagin's maximum principle and the Euler-Lagrange conditions in the calculus of variations, on the one hand, and the basic tools of deterministic dynamic programming, on the other. The course will be self-contained from the technical point of view but will presuppose a level of mathematical maturity that ought typically to be achieved by taking a course such as AS.180.600.
Instructor(s): M. Khan.

AS.180.622. Game Theory.
This course only runs the first half of the semester but is as challenging as a full semester course. Students registering for this doubly intensive course also need to register for the equally intensive course of AS.180.623, Economics of Information, that is also as challenging as a full semester course and runs the second half of the semester. These courses complement each other and should be taken together in one semester.
Corequisites: AS.180.623
Instructor(s): Y. Chen
Area: Social and Behavioral Sciences.

AS.180.623. Economics of Information.
This course only runs the second half of the semester but is as challenging as a full semester course. Students registering for this doubly intensive course also need to register for the equally intensive course of AS.180.622, Game Theory, that is also as challenging as a full semester course and runs the first half of the semester. These courses complement each other and should be taken together in one semester.
Corequisites: AS.180.600 AND AS.180.601
Instructor(s): E. Karni
Area: Social and Behavioral Sciences
Writing Intensive.

AS.180.626. Computational Methods.
This class will introduce students to the computational tools that are used to get things done in scientific research. Such tools include, but are not limited to, unix bash shell scripting, LaTeX/Beamer, virtual machines, git and github, tools for parallel computation, cloud services, and others. Brief treatments of special-purpose tools (like Mathematica for symbolic math) will conclude this part of the class. After this introduction, the course will involve an intensive introduction to the use of the Python language for scientific computation purposes, including a discussion of why Python dominates other choices like Matlab and Julia. The final third of the course will apply the tools in a practical application to a specific problem identified jointly between the instructor and the student. There is no required text; readings will be assigned in class. (The characteristic that distinguishes this class from alternatives is that this class will not teach specific algorithms nor frontier computational techniques; rather, it aims to expose students to a broad set of tools that they will use regularly thereafter).
Instructor(s): C. Carroll
Area: Social and Behavioral Sciences.

AS.180.632. Topics in Applied Microeconometrics.
This course teaches methods for using micro-data to recover structural parameters of microeconomic models. We cover static models, but focus largely on single-agent dynamic programming, including “full solution” methods along with innovations that permit circumvention of daunting computational tasks. Additional topics will be partially based on students’ interests, but will likely include: general equilibrium models, static and dynamic games, matching models, unobserved heterogeneity, structural methods with experimental data and biased expectations.
The goal is to teach students to use structural methods in their own research, and so we will delve into the nuts and bolts of structural work, examining how researchers actually get from raw data to results. This includes: how the sub-sample for analysis is chosen, how the model is specified, how the programming problem is solved, which moments are generated, how these are matched to the analogous moments in the data and, importantly, how identification is established.
Instructor(s): N. Papageorge.

Mathematical models of economic behavior and the use of statistical methods for testing economic theories and estimating economic parameters. Subject matter will vary from year to year; statistical methods, such as linear regression, multivariate analysis, and identification, estimation and testing in simultaneous equation models, will be stressed.
Prerequisites: AS.180.636
Instructor(s): Y. Hu.

AS.180.634. Panel Data Models & Applications.
This course is a reading course for the panel data models in the economics department. We will focus on econometric theories that are commonly used in panel data analysis, although many of these techniques can be applied to other areas as well. In addition, we will discuss applications of these theories. The course material will start form chapter 10 & 11 in Wooldridge's book which covers linear panel data models. And then we discuss the discrete choice models from chapter 7 of Hsiao's book. After these, we will try to read papers related to panel data models.
Instructor(s): Staff.
AS.180.636. Statistical Inference.
Theory and applications of statistical inference. Topics include probability and sampling, distribution theory, estimation, hypothesis testing, and simple regression analysis. Statistical applications will be drawn from economics. Limited to graduate students in Economics except by permission of the chair. Recommended Course Background: AS.110.201, AS.110.302
Instructor(s): Staff.

AS.180.637. Microeconometrics I.
This is an advanced graduate course on major econometric techniques and models that are used in empirical microeconomics. The first half of the course introduces econometric theories of nonlinear extremal estimation, nonparametric estimation, and semiparametric estimation. The second half of the course illustrates applications of these theories to limited dependent variable models, selection models, and endogenous treatment models with unobserved heterogeneity.
Prerequisites: AS.180.601 AND AS.180.622 AND AS.180.633 AND AS.180.636
Instructor(s): L. Liu.

AS.180.638. Microeconometrics II.
This course is the second in the micro-econometrics sequence in the Economics Department. It will introduce a selection of models and techniques that are useful when a researcher wants to estimate a structural model, i.e. a model derived from economic theory. Structural models that try to incorporate restrictions derived from economic theory are used in empirical IO, but also in quantitative marketing research, labor economics, and other fields that consider individual decision making. No attempt will be made to be comprehensive. Instead we will focus on a few areas that have been well-researched in recent years: dynamic discrete choice, microeconomic models with latent variables, program evaluation, the empirical analysis of auctions and non-separable models. Some topics will be included only if time permits. The models and methods developed for these areas are relevant for other cases. The emphasis is on the interaction between economic theory and econometrics. Basic issues are specification and (nonparametric) identification, computational problems and the use of simulation, semi-parametric estimation to avoid functional form and distributional assumptions that cannot be derived from economic theory.
Prerequisites: AS.180.601 AND AS.180.622
Instructor(s): Y. Hu.

AS.180.640. Topics in Economic Theory.
In this course we will discuss a variety of topics in Economic Theory that are either not covered or only partially covered in the regular courses. Topics may include Individual and Social Choice Theory, Auctions Theory, Medical Decision Making. For each subject there will be introductory lectures followed by readings and students’ presentations of recent contributions.
Prerequisites: AS.180.601 AND AS.180.602
Instructor(s): E. Karni
Area: Social and Behavioral Sciences.

This is a graduate course in international trade. It will develop basic analytical tools and frameworks used in the general equilibrium analysis of international trade. Recent research topics will be discussed in the second half of the course.
Prerequisites: AS.180.601 AND AS.180.603
Instructor(s): P. Krishna.

AS.180.642. International Monetary Economics.
A link between the balance of payments and asset accumulation/decumulation, microeconomics of international finance and open-economy macroeconomics. The section on open-economy macroeconomics covers approaches to balance-of-payments adjustments, theories of exchange rate determination and monetary, fiscal, and exchange-market policies under fixed and flexible rate regimes.
Instructor(s): O. Jeanne.

AS.180.643. Topics of Game Theory.
This course covers topics such as repeated games, dynamic games, bargaining and strategic communication.
Prerequisites: AS.180.622
Instructor(s): Y. Chen
Area: Social and Behavioral Sciences.

AS.180.645. Topics in Economic Theory.
This course will cover two topics in economic theory. We will cover the theory of monotone comparative statics and supermodular games; this topic will be useful to students doing research in theory or in structural econometrics, where comparative statics tools/insights are often needed for model building. The other half of the course will cover matching markets, which typically deal with assignment problems without the use of transfers. Examples of these include school choice, course allocation, and organ exchange. We will cover the theoretical underpinnings, field applications, and empirical evaluations of these markets.
Instructor(s): K. Quah; M. Fernandez
Area: Social and Behavioral Sciences.

AS.180.646. Revealed Preference and Comparative Statics.
The overall theme of this course is the observable implications of optimizing choice. We will cover the theory of monotone comparative statics and supermodular games. We also discuss results in the revealed preference literature, such as Afriat’s Theorem, that deal with the consistency of data with different canonical models. The course is useful to students doing research in pure or applied theory, where comparative statics tools/insights are often needed for model building. It could also be interesting to those with an empirical focus who would like to know more about revealed preference approaches to testing models and drawing inferences from them.
Instructor(s): K. Quah
Area: Social and Behavioral Sciences.

AS.180.651. Labor Economics I.
Theories of the allocation of time and supply of labor, human capital, demand for labor, market equilibrium, and income distribution. As time allows, other topics, such as unemployment, unions, and compensating differences are discussed. Corequisite: AS.180.601
Instructor(s): R. Moffitt.

The course covers a set of numerical methods that are used to compute and estimate economic models, such as solution methods for nonlinear equation systems, numerical integration, approximation, and optimization. As examples, we discuss dynamic models and their applications in IO and labor economics, including dynamic discrete choice, dynamic games, two-step methods (CCP-based methods), and general equilibrium models.
Instructor(s): Y. Takahashi.
AS.180.662. Asset Pricing.
This course is an introduction and guide to the most important issues in asset pricing. It begins with classic concepts such as the Capital Asset Pricing Model and the Arbitrage Pricing Theory and continues through continuous-time dynamic no-arbitrage models. It covers both basic theory and classic empirical research. Recommended Course Background: AS.180.604, AS.180.633, AS.180.636 or instructor’s permission.
Instructor(s): G. Duffee.

AS.180.672. Industrial Organization.
First term: This course covers methods in applied empirical Industrial Organization. The focus will be on the use of econometric analysis and data both for descriptive and measurement purposes, and to test the predictions of economic theories. The course will cover demand estimation, cost and production function estimation, and estimation of auction models. Second term: The emphasis in this course is on empirical analysis of firm behavior. The first part of the course focuses on models of the internal organization of the firm. The second part considers empirical analysis of firm behavior in markets, with an emphasis on the “new industrial economics.”
Instructor(s): E. Krasnokutskaya.

AS.180.673. Advanced Economics of Labor.
This course is for graduate students at the 3rd year and above who wish to participate in a semester in-depth readings and discussion topics in labor economics and in econometric methods typically used in labor economics and in many other applied microeconomics fields. Students will have to participate in discussions of materials in each class. The topics covered in each semester are partly a function of student interest and their dissertation topics.
Instructor(s): R. Moffitt
Area: Social and Behavioral Sciences.

AS.180.690. Advanced Econometrics.
Advanced econometric techniques are often essential to innovative empirical work, but finding and implementing the right methods for a particular problem poses formidable challenges. This course/seminar aims to address these challenges by combining lectures and discussions of foundational econometric methods in areas of student interest (whether those interests be specific for thesis work or more speculative) with examples of implementation, including software development, in more of a ‘workshop’ environment. The emphasis will be on drawing on the resources of econometric theory to address specific empirical issues while at the same time developing implementation skills.
Instructor(s): R. Spady.

This course is for students working on the dissertation for the Ph.D. in Economics. It is graded pass-fail
Instructor(s): G. Duffee
Area: Social and Behavioral Sciences.

This is a weekly seminar series that brings in speakers from other universities to present their research in the field of applied microeconomics. Graduate Students only.
Instructor(s): Y. Hu
Writing Intensive.

This is a seminar series devoted to the presentation of research in microeconomic theory, typically by speakers from outside the department. Graduate students only.
Instructor(s): M. Khan.

This course features lectures by economists from other universities. They present research findings at the frontier of the field. Graduate students only.
Instructor(s): C. Carroll.

The purpose of this seminar is to train students to do research in economics. This course is for second year graduate students in the Ph.D program in Economics. Graduates Students Only.
Instructor(s): E. Karni.

AS.180.698. Research/Teaching Practicums.
The purpose of the Ph.D. program in economics is to train students to teach and to do research in economics. This course is for graduate students in the Ph.D. program in economics to obtain graduate credit for work off campus that provides training and the development of skills in teaching and/or research. Before the practicum is begun, the graduate student must identify a sponsoring faculty member or seek permission from the student’s faculty adviser. The faculty member or adviser must sign a form that certifies that graduate credit will be granted, verifies the nature of the work to be performed by the student, and explains how the practicum helps to fulfill a degree requirement. Once completed, the sponsoring faculty member or adviser submits a grade of pass or fail for the student. The course may be used for curricular practical training. Economic majors /Graduate students only.
Instructor(s): Staff.

AS.180.899. Independent Study.
Instructor(s): Staff.

Cross Listed Courses
Sociology
AS.230.374. Poverty and Public Policy. 3.0 Credits.
This course examines the causes and consequences of U.S. urban poverty, its implications for health and wellbeing, and explores strategies for addressing it. We cover the major theoretical explanations scholars have advanced to explain the persistence of urban poverty including labor markets, residential segregation, welfare policy, family structure, and the criminal justice system. Within each topic area, students are introduced to a range of interventions aimed at alleviating urban poverty. Students will conduct a formal policy analysis of 20 pages and participate in a mock congressional hearing. Enrollment restricted to Social Policy minors only.
Prerequisites: Students that took AS.360.372 may not take AS.230.374.
Instructor(s): K. Edin
Area: Social and Behavioral Sciences
Writing Intensive.
Interdepartmental

AS.360.247. Introduction to Social Policy: Baltimore and Beyond. 3.0 Credits.
This course will introduce students to basic concepts in economics, political science and sociology relevant to the study of social problems and the programs designed to remedy them. It will address the many inequalities in access to education and health care, unequal treatment in the criminal justice system, disparities in income and wealth, and differential access to political power. The focus will be on designing effective policies at the national and local level to address these pressing issues. This course is open to all students, but will be required for the new Social Policy Minor. The course is also recommended for students who are interested in law school, medical school, programs in public health, and graduate school in related social science fields. This course does not count as one of the required courses for the Economics major or minor, but it is required for the Social Policy Minor. Cross list with Sociology, Economics and Political Science. Freshman, Sophomore and Juniors only.
Instructor(s): B. Morgan; S. Deluca
Area: Social and Behavioral Sciences
Writing Intensive.

AS.360.372. Poverty and Public Policy. 3.0 Credits.
This course examines the causes and consequences of U.S. urban poverty, its implications for health and wellbeing, and explores strategies for addressing it. We cover the major theoretical explanations scholars have advanced to explain the persistence of urban poverty including labor markets, residential segregation, welfare policy, family structure, and the criminal justice system. Within each topic area, students are introduced to a range of interventions aimed at alleviating urban poverty. Students will conduct a formal policy analysis of 20 pages and participate in a mock congressional hearing. Permission of instructor required.
Instructor(s): K. Edin
Area: Social and Behavioral Sciences
Writing Intensive.

AS.360.380. Making America Social Policy. 3.0 Credits.
This course analyzes the distinctive US welfare state in historical and comparative perspective. We begin with a survey of the policy context, an historical overview from the poorhouses through the Great Society, and a tour of welfare states across the rich democracies. We then survey developments – and explain the actual workings of policy – across jobs, education, welfare, pensions, and health care. We explore the institutional and political factors behind their divergent trajectories through conservative revival and the age of Obama. Students will write a seminar paper exploring policy development over time in a program or area of their choosing. Enrollment restricted to Social Policy minors only.
Instructor(s): D. Schlozman
Area: Social and Behavioral Sciences
Writing Intensive.

AS.360.528. Problems in Applied Economics. 2.0 Credits.
This course focuses on a monetary approach to national income determination and the balance of payments. Money and banking, as well as commodity and financial markets, are dealt with under both central banking, as well as alternative monetary regimes. Particular emphasis is placed on currency board systems. Students learn how to properly conduct substantive economic research, utilizing primary data sources, statistical techniques and lessons from economic history. Findings are presented in the form of either memoranda or working papers of publishable quality. Exceptional work may be suitable for publication through the Johns Hopkins Institute for Applied Economics, Global Health, and the Study of Business Enterprise. Advanced excel programming skills are required and students are expected to be pre-screened for research at the Library of Congress in Washington, D.C.. Bloomberg certification is a requisite.
Prerequisites: EN.660.203
Instructor(s): S. Hanke
Writing Intensive.

Environmental Health and Engineering
EN.570.428. Problems in Applied Economics. 3.0 Credits.
This course focuses on a monetary approach to national income determination and the balance of payments. Money and banking, as well as commodity and financial markets, are dealt with under both central banking, as well as alternative monetary regimes. Particular emphasis is placed on currency board systems. Students learn how to properly conduct substantive economic research, utilizing primary data sources, statistical techniques and lessons from economic history. Findings are presented in the form of either memoranda or working papers of publishable quality. Exceptional work may be suitable for publication through the Johns Hopkins Institute for Applied Economics, Global Health, and the Study of Business Enterprise. Advanced excel programming skills are required and students are expected to be pre-screened for research at the Library of Congress in Washington, D.C.. Bloomberg certification is a pre-requisite.
Prerequisites: EN.660.203 AND AS.180.101 AND AS.180.102
Instructor(s): S. Hanke
Area: Social and Behavioral Sciences
Writing Intensive.

EN.570.470. Applied Economics & Finance. 3.0 Credits.
This course focuses on company valuations, using a Probabilistic Discounted Cash Flow Model. Students use the model and primary data from financial statements filed with the Securities and Exchange Commission to calculate the value of publically-traded companies. Using Monte Carlo simulations, students also generate forecast scenarios, project likely share-price ranges and assess potential gains/losses. Stress is placed on using these simulations to diagnose the subjective market expectations contained in current objective market prices, and the robustness of these expectations. During the weekly seminar, students company valuations are reviewed and critiqued. A heavy emphasis is placed on research and writing. Exceptional work may be suitable for publication through the Johns Hopkins Institute for Applied Economics, Global Health, and the Study of Business Enterprise. Advanced excel programming skills are required and students are expected to be pre-screened for research at the Library of Congress in Washington, D.C.. Bloomberg certification is a pre-requisite.
Prerequisites: EN.660.203 AND (EN.570.428 OR AS.360.528)
Instructor(s): S. Hanke
Area: Quantitative and Mathematical Sciences, Social and Behavioral Sciences
Writing Intensive.
EN.570.504. Financial Market Research. 3.0 Credits.
This course investigates the workings of financial, foreign exchange, and commodity futures markets. Research is focused on price behavior, speculation, and hedging in these markets. Extensive research and writing of publishable quality are required. Exceptional work may be suitable for publication through the Johns Hopkins Institute for Applied Economics, Global Health, and the Study of Business Enterprise. An approved research proposal is a pre-requisite.
Instructor(s): S. Hanke
Writing Intensive.

English

http://english.jhu.edu/

The Department of English offers separate undergraduate and graduate programs, each designed to suit the needs of its particular student body. The undergraduate program, in the context of university requirements and elective courses, provides the basis for a liberal education and prepares students for graduate work or professional schools, such as medicine and law, as well as professional teaching and literary scholarship. The graduate program prepares advanced students for professional teaching careers in English literature.

Facilities
Besides the Sheridan Libraries, Hopkins students have easy access to the 12 million volumes and innumerable historical manuscripts of the Library of Congress, as well as the library at Dumbarton Oaks, the Folger Library, the Freer Library, the library of the National Gallery, and many other specialized public collections. Students learn about advances in research and criticism and confer with leading American and European scholars and critics through participation in the activities of the Tudor and Stuart Club, the ELH Colloquium, and the department’s other programming.

Undergraduate Programs

Requirements for the B.A. Degree
(Also see Requirements for a Bachelor's Degree (p. 7.).)

In addition to demonstrating foreign language proficiency in at least one classical or modern foreign language, the English major requires students complete general courses in the humanities and social science, a required course in literary study (AS.060.107 Introduction to Literary Study), and nine additional English courses, of which at least three must be literature before 1800. Within the nine additional English courses, at least two and no more than four must be designated as lecture courses. Students may identify lecture courses by the presence of the POS-Tag ENGL-LEC in a course description in the schedule of classes. Pre-1800 literature courses are identified by the POS-Tag ENGL-PR1800. Additional details include:

• Only two courses towards the nine required English courses for the major may be taken outside of the department and those must be cross-listed with the English department.
• Only two independent studies or senior essay courses may apply towards the major.
• Students must earn a grade of C- or better in all major requirements and courses may not be taken satisfactory/unsatisfactory.
• Up to two courses taken through approved study abroad programs may be applied towards the major with approval of the director of undergraduate studies.

</tbody>
</table>

Advising for Students
All students, whether their goals are professional or not, should choose courses in consultation with their major advisor to suit their individual needs and satisfy departmental requirements. Students planning to enter graduate school in English should study a second foreign language. Students who have not yet been assigned to a major advisor may discuss departmental requirements and curriculum planning with the director of undergraduate studies.

Honors in English

Departmental honors are awarded to undergraduate English majors who achieve a cumulative average of 3.6 or higher for all English courses taken to satisfy the major requirements. For more information about
Honors in English, contact the director of undergraduate studies in English.

**Senior Essay Option**
Majors with a cumulative G.P.A. of 3.8 in English courses by the end of the fall semester of their junior year may apply to write a senior essay in the fall of their senior year. For further information and deadlines, contact the director of undergraduate studies in English.

**English Minor**
Students who wish to graduate with a minor in English must take AS.060.107 Introduction to Literary Study, generally within one year of declaring the minor. Six additional English courses are required, of which at least two and no more than three must be lecture courses. At least one of the six courses must be a pre-1800 course. Students must earn a grade of C- or better in all minor requirements and courses may not be taken satisfactory/unsatisfactory.

**Graduate Program**
The Department of English offers advanced programs and guided research leading to the Ph.D. degree in English and American literature in the following major literary fields: the Renaissance, the 18th century, the Romantic period, the Victorian period, American literature, and 20th-century literature.

The department accepts only full-time students working toward the Ph.D.; there is no autonomous M.A. program. Because of its small size and the close association between faculty and students, the department is able to offer an intensive program leading to the Ph.D. in five years.

**Requirements for the Ph.D. Degree**
Students are required to enroll in three graduate courses in each of the semesters of their first year of study and two in each of the semesters of their second year. By the end of the third year, students will have completed 10 graduate seminars, an oral examination in two fields, and examinations in one or two foreign languages. Fourth-year students will receive dissertation fellowships.

Teaching experience is regarded as an important part of the graduate program, and graduate students are required to teach in the department’s literature and expository writing courses during their second, third, and fifth years at Hopkins.

For further information about graduate study, contact the graduate coordinator at the Department of English or go to http://english.jhu.edu/graduate/.

For current faculty and contact information go to http://english.jhu.edu/people/.

**Faculty**

**Chair**
Mark Thompson
19th- and 20th-century African-American literature, 20th-century German Idealism, French philosophy and aesthetics, theory.

**Professors**
Sharon Achinstein
Sir William Osler Professor of English: Early modern literature, poetry and poetics, gender

Christopher Cannon
Bloomberg Distinguished Professor: Medieval literature, philosophy

Mary Favret
British Romanticism, late 18th- early 19th-century English literature, war Studies, gender and genre, literature and violence

Lawrence Jackson
Bloomberg Distinguished Professor: African American Literature, Literary History, Biography, American History

Douglas Mao
British, Irish, and U.S. poetry and fiction since 1860; interdisciplinary study of modernism.

Andrew Miller
Literature and moral philosophy; nineteenth century British literature; literary theory

Christopher Nealon
American literature, aesthetic theory, poetry and poetics, the history of sexuality

Mark Thompson
19th- and 20th-century African-American literature, 20th-century German Idealism, French philosophy and aesthetics, theory.

**Associate professors**
Andrea Daniel
Early modern literature, critical theory, aesthetics.

Jared Hickman
American literature, intellectual and cultural history of Atlantic (anti) slavery, religion and radical politics, critical race studies.

Nadia Nurhussein
African American literature, late 19th- and early 20th-century American literature, Poetry and Poetics

Jesse Rosenthal
American literature, aesthetic theory, poetry and poetics, the history of sexuality.

**Assistant professors**
Jeanne-Marie Jackson
Theory of the novel, literature and philosophy, sub-Saharan African literature, Russian realism, global regionalisms.

**Professors emeriti**
Sharon Cameron

Frances Ferguson
Literature, aesthetic theory, and moral/legal philosophy in the 18th and early 19th centuries.

Neil Hertz
Professor Emeritus (Humanities): Romantic literature and critical theory.

Ronald Paulson

Eric Sundquist
Andrew W. Mellon Professor Emeritus of the Humanities: American literature and culture, including African American and Jewish American; literature of the Holocaust.

Research professor
Larzer Ziff
Caroline Donovan Professor Emeritus of English Literature: American literature.

Joint appointments
John T. Irwin
Professor (Writing Seminars): American literature.

Lecturers
Aliza Watters
Lecturer: Expository Writing Program

Anne-Elizabeth Murdy Brodsky
Senior Lecturer: Expository Writing Program.

Williams Evans
Senior Lecturer: Expository Writing Program.

Patricia Kain
Senior Lecturer and Director: Expository Writing Program.

George Oppel
Lecturer: Expository Writing Program.

Marisa O'Connor
Lecturer: Expository Writing Program.

For current course information and registration go to https://sis.jhu.edu/classes/

Courses
AS.060.100. Introduction to Expository Writing. 3.0 Credits.
Introduction to "Expos" is designed to introduce less experienced writers to the elements of academic argument. Students learn to recognize "The Fundamental Structure of Academic Argument" as they learn to read and summarize academic essays, and then they apply the fundamental structure in academic essays of their own. Classes are small, no more than 10 students, and are organized around three major writing assignments. Each course guides students' practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each "Intro" course teaches students to avoid plagiarism and document sources correctly. "Intro" courses do not specialize in a particular topic or theme and are available to freshmen only.
Instructor(s): A. Brodsky; M. O'Connor; P. Kain; W. Evans
Area: Humanities
Writing Intensive.

AS.060.102. The Novel and the American Family. 3.0 Credits.
While America and the “American Dream” promise the possibility of unlimited individual development, the American family has often resisted this promise and cramped America’s style. In this course we will explore works by Philip Roth, Eudora Welty, Alice Walker, and Jonathan Franzen that dramatize this tension in devastating and hilarious ways. Against the backdrop of post-WWII America, these writers struggle with issues of race, sex, and the erosion of tradition, shedding light on the challenging relation between the individual and the family.
Instructor(s): R. Day
Area: Humanities.

AS.060.103. Novels After 9-11. 3.0 Credits.
This course explores various novels written in English in the wake of the tragedy of 9-11, from various perspectives around the globe. It asks how the form of the novel responded to the events of that date and its aftermath, and in doing so, considers the role of art in shaping our understanding of global events, violence, and the forces that produce them. This course offers a greater appreciation of the novel and its role in history, as well as a framework for comparing different perspectives on a major historical event. It should improve your skills as a reader of fiction and analyst and judge of what you read. In the course of the semester you will: 1) Survey how novels from a variety of positions and perspectives represent and understand the events of 9-11. 2) Learn to analyze the form of the novel, its various elements, and its role in culture and history. 3) Read and evaluate reviews of major novels, from different contexts. 4) Learn to write an intelligent and informed review of a novel.
Instructor(s): M. Favret
Area: Humanities
Writing Intensive.

AS.060.104. Counterfactual Literature and Film. 3.0 Credits.
This course will concern the imagination of our unled lives—the lives we might have led but have not. Robert Frost’s “The Road Not Taken” is the most familiar instance of this preoccupation, but Frost is only one of many artists for whom unled lives have been an ongoing concern—Thomas Hardy, Henry James, Virginia Woolf, Philip Larkin, Ian McEwan, and Sharon Olds are among the many others. Why are people so interested in what has not happened to them? And why should writers and film-makers in particular be so interested in these non-events?
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.107. Introduction to Literary Study. 3.0 Credits.
This course serves as an introduction to the basic methods of and critical approaches to the study of literature. Some sections may have further individual topic descriptions; please check in SIS when searching for courses.
Instructor(s): E. Sundquist; J. Hickman; J. Jackson
Area: Humanities
Writing Intensive.
AS.060.108. Time Travel. 3.0 Credits.
Why is time travel such a consistent and perplexing theme in literature and film over the last 150 years? Why is modernity so concerned with peeking backwards or forwards? This course will examine the history of time-travel fiction, from its beginning in utopian fiction through its box-office dominance in the 1980s, and into today. Writers will likely include Mark Twain, Edward Bellamy, Harold Steele Mackay, Ray Bradbury, Robert Heinlein, and Philip K. Dick. Movies will include *The Terminator*, *Back to the Future*, and *Primer*.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.111. How Not to Be Afraid of Poetry. 3.0 Credits.
What is poetry? And why don’t we like it? This course will explore what makes poetry turn ordinary language into something extraordinary, into shapes and sounds so that sometimes we find it difficult to understand and sometimes we find it gives us great delight. This seminar will open up a range of poetry written in English, including some of the greatest writers of the English language. This course is designed for the students without a strong background in reading poetry but who have the desire to gain it; the main emphasis is exploration of the world and words of poetry and developing an appreciation and analytical understanding of the ways poetry can express, advocate, record, and move. Assignments will include reading poems, becoming an expert about a single poet, attending public poetry readings, creating poems, and writing short weekly assignments about poems. You will be expected to be an active member in classroom discussion and activities. Pre 1800 course.
Instructor(s): S. Achinstein
Area: Humanities
Writing Intensive.

AS.060.112. Major Authors: Dickens and Film. 3.0 Credits.
From the earliest moments of cinema, Charles Dickens’ writing has proven extraordinarily stimulating for film-makers. Why might this be? What does it tell us about Dickens—and what does it tell us about the pleasures and demands of both fiction and film? To address these complex questions we’ll read a handful of Dickens’ works (most likely Oliver Twist, Great Expectations, Christmas Carol and Little Dorrit), watch their adaptations, and read a small set of critical essays. Requirements are likely to include two papers, response papers, and a class presentation.
Instructor(s): A. Miller
Area: Humanities.

AS.060.113. Expository Writing. 3.0 Credits.
“Expos” is designed to introduce more confident student writers to the elements of academic argument. Students learn to apply “The Fundamental Structure of Academic Argument” in academic essays of their own. Classes are capped at 15 students and organized around four major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each “Expos” course teaches students to document sources correctly and provides its own topic or theme to engage students’ writing and thinking. Please see the Expository Writing Program’s website for individual course descriptions to decide which sections of “Expos” will most interest you. “Expos” courses are available to freshmen, sophomores, and juniors, and to seniors by special permission from the English Department.
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.060.114. Expository Writing. 3.0 Credits.
“Expos” is designed to introduce more confident student writers to the elements of academic argument. Students learn to apply the paradigm of academic argument in academic essays of their own. Classes are capped at 15 students and organized around four major writing assignments. Each course guides students’ practice through pre-writing, drafting, and revising, and includes discussions, workshops, and tutorials with the instructor. In addition to its central focus on the elements of academic argument, each “Expos” course teaches students to document sources correctly and provides its own topic or theme to engage students’ writing and thinking. Please see the Expository Writing Program’s website for individual course descriptions to decide which sections of “Expos” will most interest you. “Expos” courses are available to freshmen, sophomores, and juniors, and to seniors by special permission from the English Department.
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.060.115. Reading Muslims in Global Fiction and Film. 3.0 Credits.
This course will explore representations of complex, fully-developed Muslim characters in fictions detailing experiences from the Balkans, the Indian Ocean, Britain, and the United States. These may include novels by Abdulrazak Gurnah, Orhan Pamuk, and Leila Aboulela, as well as films like A Separation (2011). In studying the way each text represents Muslims and their relationships to their faith, the class will analyze themes of belonging and identity politics, imagined relationships to geographies, and representations of individuality alongside rituals of belief. It will look at how race, socio-economic status, gender, and citizenship contribute to these representations, when and how these texts are read as political acts, and what contributions such fiction has made to aesthetics.
Instructor(s): N. Hashem
Area: Humanities
Writing Intensive.

AS.060.120. The Novel, the Sea, and the Geopolitical Sublime. 3.0 Credits.
What happens when the novel goes to sea? This course investigates how novels engage with the problem of knowledge posed by empire, both for writers from within the imperial metropolis trying to imagine the totality of the geopolitical world, and for writers who “write back” to the imperial center by using their regional literary traditions to bend novelistic conventions. Our inquiry has two parts: We will first consider how new conventions and techniques of novel-writing emerge when novelists try leaving the certainty of their national and regional boundaries to enter the confusion of uncharted territories; we will then move to postcolonial novels and consider how these write against the notion that their regions are chaotic and undecipherable, while at the same time using that very notion to claim epistemic power.
Instructor(s): S. Kazmi
Area: Humanities.
**AS.060.122. Hollywood and the Culture Industry. 3.0 Credits.**

For an average consumer in the first half of the twentieth century, American culture meant Hollywood, and “Hollywood” was something of an insult. Associated with mass produced spectacles of questionable artistic value, the American movie industry played a powerful role in defining “popular culture” as we understand it today. This course will examine how Hollywood contributed to the popularization of cultural production and consumption, and how Hollywood itself was constructed as a cultural icon. What are the myths and tropes that govern Hollywood? How does Hollywood transmit economic, social, national, gender, and racial ideologies? How did Hollywood, in the face of corporate hegemony, still manage to create some of the most enduring cultural artifacts of the twentieth century? The course will begin with readings by Nathanael West and F. Scott Fitzgerald, two authors who worked as screenwriters to support their aspirations as novelists. We will then turn to the crucial influence made by non-American writers on Hollywood, starting with Evelyn Waugh’s “The Loved One” about the “British Colony” Waugh discovered during a visit to Southern California. Two weeks will be spent on Frankfurt School theorists of popular culture Theodor Adorno and Max Horkheimer, and the final third of the course will focus on films. We will start by examining three filmmakers whose careers were defined by the “studio system,” the oligopoly that controlled American cinema during the so-called “classical era.” The course concludes with two weeks devoted to films about Hollywood by notable directors. Classes will be supplemented by relevant secondary scholarship.

Instructor(s): J. Hoffmann
Area: Humanities

**AS.060.123. Freshman Seminar: Prophecy After Science. 3.0 Credits.**

This course explores the history of prophecy from ancient Greek and Judaic sources to current intimations of technological singularity and ecological doom. We will focus on the influence of prophecy on the rise of science (and vice-versa). Readings will include texts by William Shakespeare, Francis Bacon, Mary Shelley, and Philip K. Dick.

Instructor(s): W. Miller
Area: Humanities
Writing Intensive.

**AS.060.124. Politics, History and Autobiography. 3.0 Credits.**

Students will write a mini-autobiography in the form of seven 3000 word essays, work shopped in class. Readings include A Small Place by Jamaica Kincaid and Brothers and Keepers by John Edgar Wideman.

Instructor(s): L. Jackson
Area: Humanities
Writing Intensive.

**AS.060.126. Feminist Fiction: Fundamentals. 3.0 Credits.**

Instructor(s): M. Favret
Area: Humanities.

**AS.060.127. Muslim Science Fiction. 3.0 Credits.**

This course will explore the wondrous and mysterious world of Islamic Sci-Fi. Writers of Muslim Sci-Fi have asserted a long tradition of speculative fiction and fantasy dating back to the 13th century. We will look into this literary history, beginning with earlier texts like The Arabian Nights, al-Qzwin'i's alien story Awaj bin Anfaq and Roquia Hussain's Sultana's Dream all the way through to modern texts like G. Willow Wilson's Alif the Unseen and Saladin Ahmed's Throne of the Crescent Moon. We will ask how this genre, as opposed to realism, might enable these writers to productively tackle themes of history, science, belief, and the politics of belonging and difference. We will pair our Muslim readings with more canonical science fiction works, such as Mary Shelley's Frankenstein, H.G. Wells’ The Time Machine, and more recently, Kazuo Ishiguro's Never Let Me Go, to think through the relationship of the SF writer to a particular cultural moment. We will also look at writers of afrofuturism and magical realism, like Octavia Butler and Gabriel García Márquez, to think about how other writers of color have employed fantasy and the fantastical, and to what ends.

Instructor(s): N. Hashem
Area: Humanities
Writing Intensive.

**AS.060.129. Writing Africa Now. 3.0 Credits.**

This course surveys post-2000 literary and cultural production from sub-Saharan Africa. Topics will include debates over genre and fiction’s relevance to African experience, legacies of canonical writing about independence, urban Africa as violent or “tragic” landscape, and problems of scale and geographical context. Readings by authors such as Adichie, Wainaina, Duiker, and Vladislavic, and students will be introduced to the main print and online arteries of African intellectual discussion. This class is for non-majors and does not count towards the English major or minor.

Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

**AS.060.139. Expository Writing: The Narrative Essay. 3.0 Credits.**

Telling stories is one of the first and most important ways that human beings try to make sense of the world and their experience of it. The narrative art informs fiction and nonfiction alike, is central to the writing of history, anthropology, crime reports and laboratory reports, sports stories and political documentaries. What happened? The answer may be imagined or factual, but it will almost certainly be narrative. This course focuses on the narrative essay, a nonfiction prose form that answers the question of “what happened” in a variety of contexts and aims to make sense not only of what happened but how and why. We will begin by summarizing narrative essays, will move to analyzing them, and in the second half of the course you will write two narrative essays of your own, the first based on a choice of topics and sources, the second of your own design. Authors may include James Baldwin, Annie Dillard, Chang Rae Lee, Danielle Ofri, George Orwell, Richard Rodriguez, Richard Selzer, and Abraham Verghese. You will learn the power of narrative to inform and persuade as you test that power in your own writing.

Instructor(s): P. Kain
Area: Humanities
Writing Intensive.
AS.060.141. Nineteenth Century Narrative and Early Film. 3.0 Credits.
This course will situate the birth of the movies within the context of 19th century fiction and visual technology. Filmmakers are likely to include Georges Melies, Sergei Eisenstein, D. W. Griffiths, Charlie Chaplin, Buster Keaton, King Vidor, and Rouben Mamoulian; novelists are likely to include Charles Dickens (Christmas Carol or Oliver Twist), Robert Louis Stevenson (Jekyll and Hyde), and perhaps Virginia Woolf (Mrs. Dalloway).
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.146. Detective Fiction. 3.0 Credits.
This course will look at the history of English-language detective fiction through the nineteenth and twentieth centuries. We will pay special attention to the way clues and suspense operate, the role of the reader in figuring out the mystery, and the complicated relationship of the detective with official authority. Authors will likely include some selection of Wilkie Collins, Edgar Allan Poe, Arthur Conan Doyle, Agatha Christie, Dashiell Hammet, and Raymond Chandler. This class is for non-majors.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.149. Freshman Seminar: Work and Worth in American Literature. 3.0 Credits.
“No man needs sympathy because he has to work, because he has a burden to carry,” Theodore Roosevelt proclaimed in his “Square Deal” speech of 1903. “Far and away the best prize that life offers is the chance to work hard at work worth doing.” Hard work is at the heart of the American dream, but with unemployment rates at historic highs and the global economy proceeding at a rapid clip, Roosevelt’s words resurrect old questions in a new world: What work is worth doing? Who gets the chance to do it? And what happens when people find themselves doing work that isn’t worth doing? In this course we will consider the meaning and consequences of work, from the heroic to the tragic, through a selection of American literature from the last days of slavery to the present. This course will consider work in all its forms, from the plantation to the boardroom, to help us develop the tools to interpret the varieties and values of labor in modern society.
Instructor(s): E. Tempesta
Area: Humanities
Writing Intensive.

AS.060.150. Freshman Seminar: Milton’s Paradise Lost: Contexts and Conversation. 3.0 Credits.
This course undertakes an in-depth study of what is arguably the greatest long poem in the English tradition, John Milton’s Paradise Lost. The poem, first published in 1667, is Milton’s take on the Judeo-Christian story of the Fall found in the Bible. Paradise Lost does not merely re-tell the biblical account, however. By expanding three chapters of Genesis into a twelve-book epic meant to rival its classical forbears—most importantly Virgil’s Aeneid—Milton’s poem makes room for new readings of an old story. This course encourages students to find their own new readings of the Genesis story by considering the historical contexts of the poem’s production as well as the conversations Paradise Lost continues to provoke to this day. In addition to reading and discussing the poem, students will become familiar with ongoing sites of critical debate, such as the representations of Satan and of Eve. To help negotiate these conversations, students will complete a guided research project that makes use of the materials available through the library’s Department of Special Collections, housed in Brody Learning Commons. In addition to early editions of Paradise Lost, this treasure trove of rare books offers a wide variety of materials which may deepen an encounter with Milton’s poem, from biblical illustrations to gardening manuals to marriage advice. Students will use the collection to ask questions such as: “How does Milton’s representation of Satan differ from earlier traditions of imagining the devil?” and “Does Milton’s approach to Eve reinforce or revise conventional ideas about women?” Sufficient class time will be dedicated to introducing students to Special Collections so as to facilitate their individual work over the course of the semester.
Instructor(s): R. Buckham
Area: Humanities
Writing Intensive.

AS.060.154. Zombies. 3.0 Credits.
This course, designed for non- and potential majors, aims to develop invaluable critical reading and writing skills by way of a fascinating and fun topic: zombies. Some of the questions we will ask as we learn to interpret and analyze a range of media are: Why does the zombie figure so prominently in modern literature and film? What particular anxieties does this figure of mindless violence disclose? Why does the zombie genre so often lend itself to political allegory? How do we make historical sense of this figure’s original association with Afro-Atlantic religions like Haitian voodoo? Texts may include: Mary Shelley, Frankenstein; William Seabrook, The Magic Island; Zora Neale Hurston, Tell My Horse; White Zombie, dir. Victor Halperin; I Walked With a Zombie, dir. Jacques Tourneur; the George Romero films; Shaun of the Dead, dir. Edgar Wright; Juan of the Dead, dir. Alejandro Brugués; Tony Burgess, Pontypool Changes Everything; Colson Whitehead, Zone One; iZombie, creators Rob Thomas and Diane Ruggiero-Wright.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.
AS.060.155. Expository Writing: Introduction to the Research Paper - Controversies in Adolescence. 3.0 Credits.
"Introduction to the Research Paper" is designed to introduce more experienced student writers to the fundamental skills of the research process. These include asking research questions, evaluating the usefulness of sources to answer them, synthesizing sources, reading sources critically, and developing arguments that deliver an original thesis. Students will work with a research librarian at the Eisenhower Library, with whom they will learn to navigate traditional databases as well as new media sources. The Research Paper is topic-based and divided into three linked units of instruction. The course culminates with a paper of 10-12 pages that draws upon the cumulative skills of the semester. Each course is capped at ten students and available only to those who have taken “Expository Writing” (060.113/114)
Instructor(s): A. Watters
Area: Humanities
Writing Intensive.

AS.060.159. James Joyce's Ulysses. 3.0 Credits.
As a class, we will read James Joyce's Ulysses in its entirety. Readings will be supplemented with appropriate secondary sources, but the focus will be the novel. No prior knowledge of Joyce is necessary.
Instructor(s): J. Hoffmann
Area: Humanities.

AS.060.164. The Marriage Plot: From Jane Austen to Bridesmaids. 3.0 Credits.
No device has been more essential to the modern novel than that of marriage. In this course we will examine the history of the marriage plot in literature and film, beginning with Jane Austen's Pride and Prejudice and concluding with the 2011 film Bridesmaids. We will have occasion to inquire into the significance of marriage to the form of the novel as well as the ways in which the marriage plot has been appropriated, adapted, and deconstructed in nineteenth-century novels and contemporary novels alike. This class will also include a digital component as we will all collaborate to create a growing database of tropes common to marriage plots.
Instructor(s): G. Shreve
Area: Humanities.

AS.060.171. Russian Classics & Their Afterlives. 3.0 Credits.
The idea of the "Russian Soul" has long been a source of captivation to English-language writers. How has their imagination of the dense nineteenth-century works for which Russian literature is best known evolved in the era of globalization? This course reads three major Russian novels in tandem with recent works that invoke them: Tolstoy's Anna Karenina with Nilo Cruz's 2003 Pulitzer Prize-winning play Anna in the Tropics; Dostoevsky's Demons with J.M. Coetzee's 1994 novel Master of Petersburg; and Turgenev's Fathers and Sons with Tom Stoppard's 2002 Coast of Utopia trilogy. We will attend both to the aspects of Russian writing that find perennial appeal, and to the nuances of Russian intellectual history that get lost in the clamor to claim it as universal.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.176. The Russian Novel: Tolstoy and Dostoyevsky. 3.0 Credits.
"If there is no God, how can I be a captain?" We'll examine this and other religious, philosophical, and historical questions in Tolstoy's and Dostoevsky's titanic novels. Readings (in translation) include War and Peace and The Brothers Karamazov. No prerequisites. Substantial reading; 6-8 page paper; 10 page paper; weekly exercises and quizzes. Freshman/sophomore seminar. This class is for non-majors.
Instructor(s): S. Cameron
Area: Humanities
Writing Intensive.

AS.060.201. The Nineteenth Century British Novel. 3.0 Credits.
Reading major novelists from the nineteenth century including Austen, C. Brontë, Dickens, Eliot, Hardy, and Conrad. We will pay attention to formal conventions, and relation to social and historical context.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.203. Bible as Literature. 3.0 Credits.
This course looks at the ways in which the Bible has and can be read as literature.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.204. Satan in Literature. 3.0 Credits.
What is it about Satan that has captured the literary imagination? From moral opposition to God in the Book of Job, to divine punishment in Dante's Inferno, from political revolution in Milton's Paradise Lost to irreverence of tradition in Salman Rushdie's The Satanic Verses, this class will examine the ways in which Satan has been used in literature to represent a variety of moral, political and social forces, from Ancient, Medieval, Renaissance and Modern eras.
Instructor(s): J. Chilton
Area: Humanities.

AS.060.205. Feminist Fiction: Violence, Sex and Gender. 3.0 Credits.
This course will start with passages from Lysistrata and the Book of Judges, and have as a running concern the overlapping structures of violence, race and gender. Novels will include the following pairs: Jane Eyre and Wide Sargasso Sea, The Bluest Eye and Bastard Out of Carolina, The Handmaid's Tale and Octavia Butler's novella Bloodchild.
Instructor(s): M. Favret
Area: Humanities.

AS.060.206. Friends and Enemies in Jane Austen. 3.0 Credits.
Jane Austen's novels are often treated as forms of escape from our complicated world to a simpler, more rational time. Arguably, however, her novels originally helped readers navigate profound social problems, particularly the difficulty of knowing friends from enemies. In this course, we will consider depictions of friendship and enmity in four of Austen's major novels. We will compare these novels to four recent films inspired by her works.
Instructor(s): W. Miller
Area: Humanities

AS.060.207. Shakespeare. 3.0 Credits.
Reading the major comedies, histories and tragedies alongside the narrative poem "Venus and Adonis" and the sonnets, this survey course considers Shakespeare's hybrid career as poet and playwright. Pre 1800 course.
Instructor(s): A. Daniel
Area: Humanities.
AS.060.208. British Literature I. 3.0 Credits.
British Literature I is a survey of English writing on the isle of Britain from the seventh to the seventeenth centuries. It traces the formal experimentation in poetry and prose, and in narrative, lyric, and drama, through which that writing eventually became pre-eminent in Britain. It will also attend to the social and cultural circumstances—in the court, in church, and in the evolving public and private spheres—that shaped the many genres that emerged in this rich 1000 years and developed a definition of ‘literature’ itself. Author’s read include Chaucer, Langland, Spenser, Shakespeare, Landy, Donne Herbert, Marvel, and Milton. Through lectures, class discussion, written responses, and longer essay assignments, students will master the fundamentals of English literary history as well as the techniques of critical reading and writing.
Instructor(s): C. Cannon
Area: Humanities.

AS.060.209. The Literary History of the Devil to 1800. 3.0 Credits.
This course reads major works in European literature before 1800 (give or take) depicting the devil. It examines the history of the various social, cultural and political guises under which the devil appears, and the function that representing radical evil performs, in literature and society. Among our readings will be Dante’s Inferno; Milton’s Paradise Lost; Goethe’s Faust, Part One, and many other major Satanic works.
Instructor(s): M. Thompson
Area: Humanities.

This course provides a framework for grasping the dazzling variety and explosive innovation of literature in English during the last quarter-millennium. Attending both to textual details and to historical contexts, we will see how Wordsworth, Austen, Keats, Tennyson, Dickens, Wilde, Woolf, Rushdie, and other writers extend and undo tradition, illuminate their times and places as well as our own, and conspire to bring to us the intense experience distinctive to great literary art.
Instructor(s): D. Mao
Area: Humanities.

AS.060.213. The Novel and Globalization. 3.0 Credits.
Novels have long been classified by the national origin of their author, and, for the most part, the great works of the nineteenth and twentieth centuries take place primarily in one country. In the postcolonial era of the 1980s and 90s, many prominent writers explored the process of diasporic movement from one country to another. Recently, though, there has been a lot of talk about a new kind of “rootless” novel that jumps between many locales around the globe. This course reads some of the prime examples of this genre in relation to its immigrant predecessors, identifying its key formal and thematic attributes (such as perspectival and geographical range, multi-stranded plots, and an acute consciousness of linguistic and generic hybridization). We will discuss the trade-offs inherent in developing many places rather than one in terms of style and character development, as well as the political and even ethical implications of abandoning the concept of “home.” Primary works by Abdulrazak Gurnah, Caryl Phillips, David Mitchell, Taiye Selasi, Chimamanda Adichie, and Imraan Coovadia.
Instructor(s): J. Jackson
Area: Humanities.

AS.060.214. Jane Austen. 3.0 Credits.
An in-depth study of Austen’s writing, from her juvenilia through her posthumously published novels, with an occasional glance to movie adaptations. The course will focus on persistent questions about Austen’s relationship to feminism, and issues of gender and sexuality, as well as issues of style and technique.
Instructor(s): M. Favret
Area: Humanities.

AS.060.219. American Literature to 1865. 3.0 Credits.
A survey course of American literature from contact to the Civil War.
Instructor(s): J. Hickman
Area: Humanities.

AS.060.222. American Literature, 1865 to today. 3.0 Credits.
This course is a survey of major developments in American poetry and narrative fiction from the end of the Civil War to the present day. Authors to be covered may include Mark Twain, Willa Cather, Henry James, James Baldwin, Toni Morrison, Emily Dickinson, Walt Whitman, Wallace Stevens, and John Ashbery.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.231. Novels Into Film. 3.0 Credits.
What does it take to turn a novel into film? How different are the demands and possibilities of these two forms? Why do some novels repeatedly attract filmmakers? And how should we evaluate films that adapt novels? Beginning with the novel Frankenstein and its various film progeny, we will look at a series of pairings between novels and films. These may include Austen’s Pride and Prejudice, Dickens’ Great Expectations, Tarkington’s The Magnificent Ambersons, Stoker’s Dracula and McEwan’s Atonement along with various critical readings about the genre of the novel and the medium of film.
Instructor(s): M. Favret
Area: Humanities.

AS.060.255. The Bible as Literature. 3.0 Credits.
This course looks at the Bible’s influence on literature by examining the use and impact of the most common biblical stories on canonical literary works. Pre 1800 Course
Instructor(s): M. Thompson
Area: Humanities.
AS.060.262. Literature and Knowledge. 3.0 Credits.
Can poems, plays, and imaginary narratives teach us something about the real world? Or does their fictional status make them unreliable as sources of knowledge? This course explores these questions by examining classical and contemporary discussions of the topic in conjunction with major works of literature. Primary sources include works by Shakespeare, Jane Austen, and William Golding, while the criticism will be represented among others by Aristotle, Dr. Johnson, and Martha Nussbaum.
Instructor(s): R. Maioli dos Santos
Area: Humanities

AS.060.265. Nineteenth Century British Novel. 3.0 Credits.
Reading major novelists from the nineteenth century including Austen, C. Brontë, Dickens, Eliot, Hardy, and Conrad. We will pay attention to formal conventions, and relation to social and historical context.
Instructor(s): J. Rosenthal
Area: Humanities

AS.060.301. Literary Theory. 3.0 Credits.
This course serves as an introduction to a wide range of critical approaches to literature through various canonical theoretical studies of the Book of Genesis.
Instructor(s): M. Thompson
Area: Humanities
Writing Intensive.

AS.060.302. Theology of the Narrative. 3.0 Credits.
"Everything happens for a reason." "I guess it wasn't meant to be."
People often impose a narrative logic on life events by reference—however attenuated—to a transcendent order of meaning. This course asks two basic questions: How do theological concepts such as God's omniscience, Providence, predestination, and prophecy get translated into particular narrative structures? How does narrative experimentation function as a critique of traditional theological viewpoints, particularly around the question of how divine agency is related to the existence of evil? Course texts may include: The Book of Job, Denis Diderot, Jacques the Fatalist; Olaudah Equiano, Interesting Narrative; Herman Melville, Moby-Dick; James Agee and Walker Evans, Let Us Now Praise Famous Men; James Baldwin, Go Tell It on the Mountain; Marilynnne Robinson, Gilead and Home; Scarlett Thomas, Our Tragic Universe; Terrence Malick, dir., The Tree of Life.
Prerequisites: AS.060.107 Intro to Literary Study, English Lecture Course, or Instructor approval.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.304. Large Novels. 3.0 Credits.
This course will look at novels that are not only large in size, but which also think about the meaning and methods of trying to capture huge segments of the world into a piece of art. How much can be fit into a novel? What is gained and what is lost? How large is too large? We will read Charles Dickens's Bleak House, Lev Tolstoy's War and Peace, and Herman Melville's Moby Dick.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.305. Sir Philip Sidney. 3.0 Credits.
Courtier, theorist, diplomat, soldier, and martyr, Sir Philip Sidney exemplified but also changed the cultural ideals of his Elizabethan moment. Hoping to evaluate Sidney's extravagant claim that "the poet, lifted up with the vigor of his own invention doth grow, in effect, into another nature", this course reads Sir Philip Sidney's innovations across a range of genres: literary theory ("An Apology for Poetry"), poetry ("Astrophel and Stella"), scriptural translation ("The Sidney Psalms") and prose romance ("The Countess of Pembroke's Arcadia"). The course concludes with an examination of his many afterlives as exemplary subject for biography, adaptation, homage and critical argument.
Instructor(s): A. Daniel
Area: Humanities
Writing Intensive.

AS.060.306. The Historical Novel. 3.0 Credits.
We're in the middle of dramatic social, technological and political change: how are we to understand it? This course will address this question by studying the historical novel. We're likely to start by reading Scott's Waverley and end with contemporary fiction. Throughout our focus will not be on particular historical facts or events but on the idea of history itself, the role of institutions and individuals within it, and the powers and limits of literary narrative.
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.307. Training\Writing Consult. 1.0 Credit.
A one credit course for those undergrads who have been nominated as Writing Center tutors. Permission required.
Instructor(s): A. Sheeran
Area: Humanities
Writing Intensive.

AS.060.313. Edmund Spenser. 3.0 Credits.
After a diagnostic introduction to his early poetry, this reading intensive seminar will concentrate upon Edmund Spenser's masterpiece, The Faerie Queene (1590/1596), which we will read in its entirety. Over the course of its sprawling Six Books and its concluding Mutability Cantos, The Faerie Queene marshals an enormous cast of characters (knights, ladies, magicians, giants, monsters) in order to allegorically represent the virtues of Holiness, Temperance, Chastity, Friendship, Justice and Courtesy. Through this framework, his text models the ethical regulation of the body, the aesthetic construction of gender, the politics of national myth-making, and the ongoing processes of colonial violence in which Spenser was himself complicit. But across its vast yet incomplete expanse, Spenser's text is always centrally concerned with the task of reading. Accordingly, students should emerge from their encounter with this demanding but rewarding poem with a deeper understanding of the task of interpretation itself. As a group we will collectively traverse the surface of the text, and work together to construct a functional account of allegory's effects. You will be asked to respond to the challenge of Spenser's work in class discussion, weekly short responses, and three analytic papers.
Instructor(s): A. Daniel
Area: Humanities
Writing Intensive.
**AS.060.314. Social Media Fictions. 3.0 Credits.**

Writers around the world are now searching for ways to incorporate new modes of social interaction - e.g. Facebook, Twitter, text messaging, and Skype - into their print work. This course explores the various techniques they have adopted for this purpose, with an eye to critically evaluating their implications for narrative structure and its "reality effect." From Teju Cole's very public experiments with the Twitter novel to a Zimbabwean writer's attempt to capture plot turns through SMS, we will discuss the ways in which narrative is helped or hindered by the ubiquity of social media. Writers studied will include Tendai Huchu, Zadie Smith, Jonathan Franzen, and Eben Venter.

Instructor(s): J. Jackson  
Area: Humanities  
Writing Intensive.

**AS.060.315. Poetry by Other Means. 3.0 Credits.**

In this course, we explore the makings of a new genre: the poet's novel. Reaching back to the modernist works of Gertrude Stein and Djuna Barnes to look for its resources and its models, searching for antecedents in the queer avant-garde of the 1970s, and finally delving into the key poets' novels of just the last five or ten years—including works written by Eileen Myles, Juliana Spahr, Ben Lerner, and Bhanu Kapil—we will collectively develop an account of its yet-uncharted territory and some of its attractions. Our work will open onto a series of questions about both the category of poetry and the significance of narrative, while following thematic threads of friendship, gender and sexuality, self-reflection, feeling, crisis, and utopia. Deans Teaching Fellowship course.

Instructor(s): C. Westcott  
Area: Humanities  
Writing Intensive.

**AS.060.316. Mapping the Global Metropolis. 3.0 Credits.**

Cities have long taken on a central role in literature, but much of our reading about urban space is confined to a few Western hubs. And while the city has traditionally been a space for fictional characters to develop into national subjects, much of the most innovative contemporary writing sees the city as a character of its own. This course will address the representational challenges of globalization through fiction and genre-bending memoir about contemporary metropolitan spaces that act as microcosms: Johannesburg, Lagos, Delhi, London, and New York. We will read primary works by Ivan Vladislavic, Chris Abani, Aravind Adiga, Zadie Smith, and Teju Cole, as well as supplementary excerpts from books including Capital, by Rana Dasgupta, Mike Davis' Planet of Slums, Ato Quayson's Oxford Street, Accra, and Loren Kruger's Imagining the Edgy City. Finally, the course will include theoretical readings about globality and representation, such as Fredric Jameson's essay on "Cognitive Mapping" and Arjun Appadurai's seminal book Modernity at Large.

Instructor(s): J. Jackson  
Area: Humanities  
Writing Intensive.

**AS.060.318. Contemporary Literature and Climate Change. 3.0 Credits.**

In this course we will study the ways literary texts have imagined and addressed climate change, from the turn of the 20th century until today. We will primarily focus on novels, but I will provide non-fictional background reading on the history of how we’ve conceptualized “climate,” and we will also read some poetry. We’ll think a lot about genre: how does climate change look in realist fiction? Science fiction? Poetry? Is apocalypse the only framework in which to view it? How do race, gender, class and geopolitics alter writers’ views on climate? Texts will include HG Wells, The Time Machine; Kim Stanley Robinson, New York 2140; Octavia Butler, Parable of The Sower; Emily St. John Mandel, Station Eleven; Brenda Hillman, Seasonal Works with Letters on Fire; and Allison Cobb, After We All Died. We’ll also draw on the Yale University Press anthology of climate writing, The Future of Nature.

Instructor(s): C. Nealon  
Area: Humanities  
Writing Intensive.

**AS.060.319. Values and Gender in Nineteenth-Century British Literature. 3.0 Credits.**

The course considers how nineteenth-century British authors—including Ruskin, Gaskell, Eliot, and Wilde—engage and oppose various sets of values in their representations of gender.

Instructor(s): M. Flaherty  
Area: Humanities  
Writing Intensive.

**AS.060.320. Icons of Feminism. 3.0 Credits.**

This course looks at four crucial figures who have haunted feminist thought and responses to feminism over the centuries. Sappho, known as the first female poet, remains an enigmatic icon of feminine desire and creativity; Antigone, the daughter of Oedipus and the heroine of Sophocles’s play Antigone, still inspires feminist analyses of women’s relationship to law, the state and civil society; and Joan of Arc, the militant maid of Orleans, troubles thinking about women and violence as well as women, religion and spirituality. The last figure is Mary Wollstonecraft, often cited as the first modern feminist. The course will examine literary works written about these iconic figures, as well as contemporary feminist writing about their influence and viability as models for the future of feminism.

Instructor(s): M. Favret  
Area: Humanities  
Writing Intensive.

**AS.060.322. Indian Ocean. 3.0 Credits.**

This course will explore the development of a cosmopolitan ethos in postwar fiction from the Indian Ocean region, with particular focus on South Africa, South Asia, and the Malay Archipelago. Authors will include Aravind Adiga, Pramoedya Ananta Toer, Lloyd Fernando, Tan Twan Eng, and J.M. Coetzee.

Instructor(s): J. Haley  
Area: Humanities  
Writing Intensive.
AS.060.324. Modern Literature and the Land. 3.0 Credits.
This course will examine literary representations of ecological change and environmental crisis. As a class, we will read four novels written in the early twentieth century, a period of unprecedented technological development. Needless to say, environmental upheaval was not unique to the modern period. Earlier writers marveled at the railroad’s influence on the landscape, while Victorian novelists grappled with the baleful ecological consequences of industrializing cities. Nevertheless there are key differences with the authors examined in this course: D.H. Lawrence, William Faulkner, Zora Neale Hurston, and Claude McKay. Whereas railroads united countries, and factories reorganized cities, the disruptions of the early twentieth century affected the entire planet. The telegraph and telephone, steam ships and airplanes knitted nations into a global network. In response, writers worked to register the local effects of these global events, translating planetary change into concrete examples of people adapting to a transforming landscape. In this course, we will reflect on the specific ways that humans influence the environment – how people bend the land to their will in light of specific historical conditions – and more important, how nature responds to those forces.
Dean's Teaching Fellowship Course.
Instructor(s): J. Hoffmann
Area: Humanities
Writing Intensive.

AS.060.325. George Eliot. 3.0 Credits.
In this course we will read the major novels (and some essays) by George Eliot, one of the most intellectually engaging of British novelists. Her fiction explores ethical, social, and aesthetic issues concerning sexual politics, the limits of morality, the demands of family, the desperation of skepticism, and the capacities of the novel form. Students should leave the course with a heightened sense of the powers of the novel and the seriousness of its ambitions. Texts are likely to include Adam Bede and The Mill on the Floss, but our focus will be on her two last and most ambitious novels, Middlemarch and Daniel Deronda.
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.326. Shakespeare: The Novel. 3.0 Credits.
What if King Lear had been a mother? What if the we thought about Othello through the lens of the Holocaust? What if the indigene Caliban was the hero, not the villain? What if Miranda chose Caliban over her European suitor? (The Tempest) Could a modern-day Kate be tricked into marriage and “tamed” (The Taming of the Shrew)? When contemporary novelists rewrite Shakespeare, they pose questions left hanging in the play and bring the plays into our own world. In this course, we will read Shakespeare plays (King Lear, The Tempest, The Taming of the Shrew, Merchant of Venice) along with contemporary novelists that rewrite – and confront – those plays (Jane Smiley, Caryl Phillips, J. M. Coetzee, Anne Tyler). Students will take up important literary questions about kinds of literature (plays vs novels), the canon, imitation, adaptation, and also address the themes of power, gender and sexuality, family dynamics, authority, colonization and the environment.
Instructor(s): S. Achinstein
Area: Humanities
Writing Intensive.

AS.060.327. Authority, Colonization and the Environment.
Area: Humanities
Instructor(s): S. Achinstein
This course will address the themes of power, gender and sexuality, family dynamics, literature (plays vs novels), the canon, imitation, adaptation, and also focus on the specific ways that humans influence the environment – how people bend the land to their will in light of specific historical conditions – and more important, how nature responds to those forces.

AS.060.330. Literature and the Environment: 1500-1700. 3.0 Credits.
This course is an introduction to study of literature and the environment with a focus on early modern literature. During the period 1500-1700, the ground was laid for a modern understanding of the relationship between humans and their environment, and we will explore how literature shaped that relation. Topics and authors may include: Nature v. Nurture (Sidney, Spenser, Shakespeare), Environmental genres (pastoral, georgic, creation stories); Nature v. Civilization (Montaigne, Bacon, Milton); Climate, Extreme Weather, the Little Ice Age (The Tempest, Dekker, Heywood’s Play of the weather); Land management, gardens, forestry, rivers (Marvell, Denham, Herrick, Jonson, Lanyer); Health and plague (Nashe, Defoe, Dekker); Country v. City (Philips). We will take up current discussions in ecocriticism, and students should be ready to engage with some critical reading and theory.
Instructor(s): S. Achinstein
Area: Humanities
Writing Intensive.

AS.060.332. Jewish American Fiction. 3.0 Credits.
This course will consider the development of Jewish American fiction over the past century through an examination of major authors and topics, with particular attention to novels whose historical trajectories reach geographically back and forth from America to Europe, and temporally back and forth across the Holocaust, the century’s defining event. These novels thus frequently have multiple settings and treat familial, communal, and intellectual life, along with topics such as emigration, anti-Semitism, and religious belief, over a span of several generations. The list includes authors whose works first appeared in Yiddish (Lamed Shapiro and Isaac Bashevis Singer) and authors whose sensibilities are decidedly American, but all write with attention to the tenuous assimilation, dislocation, trauma, and linguistic complexity that often marked twentieth-century Jewish life, no less in the United States at times than in Europe. Works studied will include: Dara Horn, In the Image; Rebecca Goldstein, Mazel; Bernard Malamud, The Fixer; Lamed Shapiro, The Cross and Other Jewish Stories; Isaac Bashevis Singer, Shosha; Cynthia Ozick, The Shawl; Nicole Krauss, A History of Love; Jerzy Kosinski, Steps; Philip Roth, Nemesis; Shalom Auslander, Hope: A Tragedy: A Novel
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.333. God on Trial. 3.0 Credits.
This course traces an illustrious literary tradition, spanning centuries, that dramatizes the subjection of a deity to a human legal inquiry. We will especially attend to how and with what implications massive theological and philosophical questions such as the existence and nature of the divine and the meaning of and proper ethical response to suffering are worked out through this very specific representational gambit. Texts may include: The Book of Job; Voltaire, Candide; Herman Melville, Moby-Dick; Fyodor Dostoevsky, The Brothers Karamazov; Rebecca Harding Davis, Life in the Iron-Mills; Elie Wiesel, The Trial of God; Tony Kushner, Angels in America; Margaret Atwood, The Handmaid’s Tale; James Morrow, Blameless in Abaddon; OMG: Oh My God! dir. Umesh Shukla; graphic novelists Jonathan Hickman et al., God is Dead.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.
AS.060.335. Black Satire. 3.0 Credits.
In this course, we will explore the use of satire in black literary and artistic traditions. Reading will likely include poems and novels by Paul Laurence Dunbar, George S. Schuyler, Claude McKay, William Melvin Kelly, Ishmael Reed, Fran Ross, Percival Everett, and others. In addition, we will venture into the genres of film (“Get Out”) and visual art (work by Glenn Ligon and Kara Walker, the latter currently on exhibit at the BMA). The politics of satire emerge in these texts particularly through the treatment of racial uplift and respectability ideologies, race relations, the legacies and histories of slavery, visions of utopia and dystopia, and the concept of the “post-racial.” With attention to the historical and cultural conditions under which these works were produced, we will address the ways in which satire can (or cannot) effect change in the world.
Instructor(s): N. Nurhussein
Area: Humanities
Writing Intensive.

AS.060.336. Victorian Modernity. 3.0 Credits.
This course will study the idea of modernity, a term that has been of continuing use in trying to understand ourselves and our society. We will focus on the major works of prose and poetry that attempted to come to terms with modernity in Victorian Britain. Texts are likely to include non-fiction prose by Mill, Arnold, Darwin, Nightingale, and Pater; Eliot’s novel Middlemarch; and poetry by Elizabeth Barrett and Robert Browning, Tennyson, Emily Bronte, Christina Rossetti, Hopkins, and Hardy.
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.337. James Joyce. 3.0 Credits.
A seminar covering the oeuvre of James Joyce, including but not limited to Dubliners, A Portrait of the Artist as a Young Man, Ulysses, and parts of Finnegans Wake. Selected readings in other writers and in relevant historiography; some attention to Joyce criticism.
Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

AS.060.338. Literary Scenes. 3.0 Credits.
From Paris in the 1920s to San Francisco in the 1960s and beyond, this course will cover literature produced within major and minor literary “scenes” of the 20th Century. Authors include Hemingway, Stein, Woolf, Ginsberg, Kerouac, and others. Dean’s Teaching Fellowship course.
Instructor(s): A. Zecca
Area: Humanities
Writing Intensive.

AS.060.339. Lunatics, Lovers, Poets: Obsessive Minds in Romantic and Victorian Verse. 3.0 Credits.
Focusing on the long nineteenth century, we will examine how major Anglo-American poets treat the complex relationship between madness, passion, and genius. Additional readings in philosophy and psychoanalysis. Dean’s Teaching Fellowship course.
Instructor(s): J. Hann
Area: Humanities
Writing Intensive.

AS.060.340. The Literature of Atlantic Slavery. 3.0 Credits.
This seminar will trace the historical development of the slavery debate in the Atlantic world through examination of key texts from a host of genres and locations—Quaker religious tracts, political documents like the Haitian Declaration of Independence, Cuban anti slavery novels, slave narratives, and “classics” of American literature like Melville’s Benito Cereno. We will consider how the institution of Atlantic slavery was variously represented, justified, and criticized, discovering in the process the deep structures of modern slavery discourse. Texts may include: Aphra Behn, “Oroonoko”; John Woolman’s “Journal”; Robert Wedderburn, “The Horrors of Slavery and Other Writings”; Gertrudis Gomez de Avellaneda, “Sab”; Frederick Douglass, “My Bondage and My Freedom”; Herman Melville, “Benito Cereno”; Harriet Beecher Stowe, “Dred”; Antonio Castro Alves, “The Slaves”.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.341. Milton. 3.0 Credits.
This class will study Milton’s poetry and prose across the whole of his writing career, with special attention to Paradise Lost, the great epic poem retelling the story of the fall of humankind. We will consider Milton’s literary background, his contemporary political and social milieu, as well as critical debates that surrounding the poet, who was accused of being ‘of the devil’s party.’ Pre-1800 course.
Instructor(s): S. Achinstein
Area: Humanities
Writing Intensive.

AS.060.342. Contemporary Novel of Ideas. 3.0 Credits.
The novel of ideas is often traced to 18th century French or 19th century Russian writing, but it has come broadly to signify works of robust philosophical contemplation. The inherently slippery term seems to indicate a work in which “form” is subsidiary to “content,” or at least, in which narrative structures adapt to prioritize thought rather than style, image, or even character. But how, exactly, and about what, do novels “think?” In large part, the novel of ideas is now conflated with a rote and recognizable brand of social realism. This course asks what might qualify as a novel of ideas today, both in terms of the novel’s changing relation to geographical space (and thereby the formal spaces in which philosophy might lurk), and of the particular “ideas” it critiques or puts forth. We will read novelists including J.M. Coetzee, Marlene van Niekerk, Jonathan Franzen, Teju Cole, and Ronan Bennett within a longer literary-philosophical tradition, with reference to works such as Candide, War and Peace, Thus Spoke Zarathustra, and Kierkegaard’s Diary of a Seducer.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.
AS.060.344. The American Renaissance in Technicolor. 3.0 Credits.
"The American Renaissance" refers to the boom in U.S. literary production between the 1830s and the 1860s that gave us the American writers who have achieved the greatest stature in the popular mind—Emerson, Thoreau, Hawthorne, Melville, Whitman. This work was in large part animated by literary nationalism—by the self-conscious effort to produce a distinctively "American" literature that could take its rightful place on the world stage. As such, questions about the meaning of American history and the nature of American identity were central to this work both as implicit impetus and explicit theme. Importantly, these questions were being asked during the heyday of "Manifest Destiny"—of Euro-American westward expansion, which displaced Native peoples and Hispanic settlers and perpetuated the enslavement of African Americans. The goal of this course is to read some of the major works of the period's canonical Euro-American male writers in conjunction with works by African, Native, Latino, and female American writers in order to gain a fuller picture of literary and cultural history during this formative moment. Texts may include: Ralph Waldo Emerson's essays and antislavery lectures; the anonymous historical romance of the Aztec conquest, Xicotencatl; William Apgess, A Son of the Forest, "Eulogy on King Philip"; Frederick Douglass, My Bondage and My Freedom; Henry David Thoreau, Walden, "Slavery in Massachusetts," "Plea for Captain John Brown"; Harriet Beecher Stowe, Uncle Tom's Cabin; Herman Melville, "Hawthorne and His Mosses," Benito Cereno, Moby-Dick; Nathaniel Hawthorne, tales and sketches, The Blithedale Romance; Walt Whitman, Leaves of Grass (1855 edition).
Prerequisites: AS.060.107 or English department lecture, or instructor permission.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.346. The American Romance. 3.0 Credits.
Reviewers in the nineteenth century noted that narrative fiction on either side of the Atlantic seemed to be moving in different directions—the social-realist panoramas of Charles Dickens and George Eliot were confronted by the metaphysical puzzle-boxes, allegorical curios, and sentimental interfaces of Edgar Allan Poe, Nathaniel Hawthorne, Herman Melville, Lydia Maria Child, and Harriet Beecher Stowe. In the period, this divergence was often characterized by reference to a generic or modal distinction between the novel—the very name of which advertised its modernity—and the romance, which was associated with medieval literary traditions. British novelists sensibly confined themselves to representing and anatomizing that which was probable in contemporary social reality, whereas American romancers insisted on violating verisimilitude via flights of fancy (e.g., deathless black cats and white whales), whether out of political activism, aesthetic indulgence, or esoteric exploration. The twofold objective of this course is, first and foremost, simply to engross ourselves with a series of compellingly weird narrative fictions by American writers that self-identify as—and self-consciously theorize—modern romance—a reward in itself; and, second, to trace the history of the romance/novel distinction from early nineteenth-century reviews to contemporary criticism, discovering in the process the cultural work this distinction—and its elision—has been made to do. Primary texts may include: Lydia Maria Child, Hobomok; Catharine Maria Sedgwick, Hope Leslie; Edgar Allan Poe, tales, Narrative of Arthur Gordon Pym; Nathaniel Hawthorne, tales, The House of Seven Gables, The Blithedale Romance; Herman Melville, Mardi; Harriet Beecher Stowe, The Minister's Wooing.
Prerequisites: Pre-req: AS.060.107 or permission of the instructor.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.348. Virginia Woolf and Bloomsbury. 3.0 Credits.
An exploration of the achievements and investments of one of the most influential coteries in the history of Britain. In addition to delving into key fictions by Virginia Woolf, we will examine novels by Leonard Woolf and E. M. Forster, art criticism by Roger Fry and Clive Bell, biographical essays by Lytton Strachey, economic writings by John Maynard Keynes, and poetry by T. S. Eliot.
Instructor(s): D. Mao
Area: Humanities
Writing Intensive.
AS.060.349. Clint Eastwood, Race, and the American Western. 3.0 Credits.
Drawing from the body of work reflecting the Hollywood gunfighter and outlaw folk-hero Clint Eastwood, the course will investigate American cinematic representations of slavery (and more specifically its absence), the Civil War and racial formation along the United States' southwestern frontier in films produced from the 1950s through the contemporary period. A focus on the cultural icon Clint Eastwood enables a close examination of American cinematic fantasies of the frontier, frontier violence and the desire to escape or erase the tensions of race and slavery that have deeply permeated the American cultural consciousness, particularly the creation of American masculine ideals. The course will also take decided note of the national shift from liberal "Great Society Programs" of the 1960s to the conservative "neoliberal" social and cultural ideals in the 1980s and 1990s. Our purpose is to consider the organization and reformation of hegemonic power by way of the complex morality play the western film evokes, typically considering the interstitial geographies between civilization and savagery, belonging and alienation, and metropolitan and colonial outpost. We will privilege in our discussions the contested frontiers of racial dominion. The curriculum is complicated by several significant points of departure from the traditional category of the Hollywood-based American western: a film to frame the question of colonialism and resistance, as well as examples of black cinematic efforts re-drawing boundaries of the racial frontier. (Are they formed at the Caribbean, the easternmost littoral? The postindustrial city? Do they correspond to the romance of organized crime and its fantasy of empire?)
Instructor(s): L. Jackson
Area: Humanities
Writing Intensive.

AS.060.351. Theory of the Novel. 3.0 Credits.
We all know a novel when we see one, but it's surprisingly hard to say just what one is. This seminar will introduce the theory of the novel by reading a number of novels along with the works of central thinkers about the novel. We will look at the connection of the rise of the novel form with ecological consciousness, British imperialism, the rise of capitalism, and theoretical materials where appropriate. A pre-1800 course.
Novelists will likely include Miguel de Cervantes, Johann Wolfgang von Goethe, Jane Austen, Gustave Flaubert, and Virginia Woolf.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

AS.060.352. John Keats' Guide to City Living. 3.0 Credits.
This course will take John Keats' poems and letter as a guide to London in the 1810's; from the anatomy theaters of the hospitals where he trained, to the raucous parties and poetry slams of his radical literary friends; from museums and theaters to brothels and sickrooms. Keats' intensely sensual poems are at once bookish and attuned to his environment: they provide lessons on how to abide in a large urban center. For his writing is intensely urban, even when it ventures far from the gloom of the metropolis. Reading the letters he wrote to his brother on the (then-) frontier in Kentucky, we can find yet another key to how he shaped London. We will look at maps of the city, see where the new housing developments were being constructed as old buildings were torn down, visit the jail where his friend, Leigh Hunt, was incarcerated for ridiculing the Prince Regent, see the theater posters and pamphlets Keats saw, as well as the parks and squares he could not enter. The goal for this course is to learn about Keats' work, but also to try to reconstruct how his city looked and sounded and felt and what, finally, it meant to the poet. Ideally, the course will collectively create a digitized map of Keats's London that serves as well as a guide to his poems.
Prerequisites: Pre-req: AS.060.107
Instructor(s): M. Favret
Area: Humanities
Writing Intensive.

AS.060.353. World Literature in Theory and Practice. 3.0 Credits.
This course takes stock of how the current hot topic of "world literature" has evolved from Immanuel Wallerstein's work on world-systems theory over the course of the last three decades. We will read work by a wide range of literary critics engaged with the topic of world literature, including Franco Moretti, Pascale Casanova, David Damrosch, Emily Apter, and Alex Beecroft, as well as major "world" novels by Herman Melville, Amitav Ghosh, and Chimamanda Adichie. Students will also be introduced to critical approaches that offer a conceptual alternative to the world literature framework, for example, Edward Said's ideas on worldliness and contrapuntalism, Gaston Bachelard's phenomenology of the home, Fredric Jameson's concept of cognitive mapping, and Eric Hayot's work on literary "world-creation." We will ask just how broadly the field can be defined before it loses its critical cohesion. In other words, does world literature exist?
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.355. Eighteenth Century British Literature. 3.0 Credits.
This course surveys major authors, genres, and literary movements from 1690-1800. Topics to be discussed include the gendered division of labor, ecological consciousness, British imperialism, the rise of capitalism, and the relation between literary and material labor. We will be reading a variety of texts in poetry, prose, drama, and the novel from authors including Alexander Pope, Daniel Defoe, Jonathan Swift, Eliza Haywood, Stephen Duck, Mary Collier, Mary Leaper, Samuel Richardson, Thomas Gray, Oliver Goldsmith, William Wordsworth, Anna Laetitia Barbauld, and William Blake. Texts will be supplemented with historical, philosophical, and theoretical materials where appropriate. A pre-1800 course.
Instructor(s): K. O'Briain
Area: Humanities
Writing Intensive.
AS.060.356. Gordimer and Coetzee: Politics and Form. 3.0 Credits.
A comparative study of major works by the South African Nobel Laureates Nadine Gordimer and J.M. Coetzee. Special attention to critical essays by both writers about each other, as well as about issues of shared historical and literary concern. Topics will include the role of the public intellectual in apartheid-era South Africa, competing scales of literary reception and evaluation (e.g. national, international, and universal), and the relationship between politics, form, and genre.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.358. Prophecy and Enlightenment. 3.0 Credits.
This class considers the relationship between prophecy and enlightenment. These two knowledge regimes, the revelatory and the rational, are often assumed to be opposed, with rationality triumphing over revelation in the seventeenth and eighteenth centuries. In recent years, notably post-9/11, we have seen a resurgence of this view from a variety of perspectives, whether that of the new atheism or that of historians of enlightenment. We will turn to a number of important primary texts associated with major enlightenment thinkers in order to interrogate more closely the opposition of prophecy and enlightenment at the point of its supposed origin. Doing so should help at once to clarify and complicate the important contemporary narrative pitting science against religion and vice versa. Later in the semester, we will turn to a number of twentieth-century thinkers who bring quite different perspectives to the role of revelation in the history of reason. Pre-1800s course.
Instructor(s): W. Miller
Area: Humanities
Writing Intensive.

AS.060.359. Posthumanist Literature. 3.0 Credits.
Much of the attention surrounding posthumanism has centered upon a late twentieth-century archive of speculative fiction. This 300-level course would take a longer view, tracing a prehistory of literary and critical discourses that challenge the distinction between humanity and its nonhuman others from the late enlightenment to the present day. Students will begin with sections from Jonathan Swift’s Gulliver’s Travels and A Modest Proposal, then progress through texts that link the humanist themes of exploration and conquest to problems of consumption and divergent forms of life, including Herman Melville’s Typee and Thomas M. Disch’s The Genocides. Next they will turn to the link between the bildungsroman, human enhancement, and the concept of "bare life." Readings in this section include Neal Stephenson’s The Diamond Age, Philip K. Dick’s Do Androids Dream of Electric Sheep, Franz Kafka’s "The Hunger Artist," and Primo Levi’s If This Is a Man. We will then consider the link between "monstrosity," hetero-normativity, and sexual abjection. Readings include Mary Shelley’s Frankenstein, James Baldwin’s Another Country, and Margaret Atwood’s Handmaid’s Tale. The course will conclude with two units on posthuman ethics. The first of these, on the concept of "singularity," will include J.G. Ballard’s The Drowned World and William Gibson’s Neuromancer. Finally, students will consider what Donna Haraway has termed "companion species," with readings to include Franz Kafka’s The Metamorphosis and J.M. Coetzee’s Elizabeth Costello. Critical readings will include selections from Katherine Hayles, How We Became Posthuman; Donna Haraway, “A Cyborg Manifesto”; Friedrich Nietzsche, Human, All too Human; Michel Foucault, The History of Sexuality, vol. I; Giorgio Agamben, The Coming Community and Homo Sacer; Jean Jacques Rousseau, Émile; H.G. Wells, Anticipations and Mankind in the Making; Nick Bostrom, Human Enhancement and Global Catastrophic Risks; Alan Weisman, The World Without Us; Peter Singer, Animal Liberation; J.M. Coetzee, The Lives of Animals; and introductory essays by Andy Miah and Neil Badmington.
Instructor(s): J. Haley
Area: Humanities
Writing Intensive.

AS.060.360. Politics, History and Autobiography. 3.0 Credits.
This is an intensive seminar exploring the political and historical dimensions of personal experience. The class is designed to introduce students to writing critically about their own lives and to understanding the function of autobiographical writing in the lives of black Americans. We function partly as a writers’ workshop and partly as a critical review. The final goal of the seminar is a polished 15-20 page autobiographical essay and a 5-7 page critical review of an autobiography, such as would be found in the New York Review of Books.
Instructor(s): L. Jackson
Area: Humanities
Writing Intensive.
AS.060.362. Art and the Arab Spring. 3.0 Credits.
Much has been made of the political ramifications of the Arab Spring: the potential move towards democratic representation, the realization of minority and gender rights, the economic liberalization of markets, the jockeying by world powers to assert influence in the region, and the revitalization of dissident movements. This course will turn its attention to the role of artistic representation in the Arab Spring in order to complicate these political discussions. We will explore widely, considering works of prose, poetry, film, music, performance art, and visual art, from photography to graffiti. We will think through how these mediums are used and to what end, whether as evidence of atrocities, as inspiration and mobilization of dissent, as satirical commentary, or to revitalize appreciation for artistic expression. We will also think about the impact of social media on distribution possibilities and implied audience and track how certain art forms invoke and are invoked by liberal or conservative discourses in complex ways.
Instructor(s): N. Hashem
Area: Humanities
Writing Intensive.

AS.060.363. Henry James. 3.0 Credits.
This seminar will focus on the novels and short fiction of one of the most brilliant crafters of prose and plot ever to write in English. Extensive attention will be devoted to the intricacies of James’s language; to his transatlantic situation; to his relationship to other authors; and to his place in the histories of literature, criticism, and theory. In a few instances, we will read his work in relation to writing by his brother, the pioneering philosopher and psychologist William James.
Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

AS.060.365. Literature and Modern Philosophy. 3.0 Credits.
Does literature have moral value? How might we begin to answer such a question? This course will survey major attempts by both writers and philosophers to understand the relation between morality and literature, especially fiction. Course will be taught by incoming professor Andrew Miller.
Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.366. Ellison. 3.0 Credits.
After his landmark novel “Invisible Man” appeared in 1952 and won the National Book Award, Ralph Ellison was one of the most highly regarded and influential American writers. Although his writing—beginning with the powerful short stories and criticism that he published in the 1930s and 40s—was steeped in African American history, literature, music, and folklore, he also thought of himself as part of the great tradition of American, European, and classical literature, from Homer through Joyce. He quickly set to work on a second novel dealing with the assassination of a racist senator during the height of the Civil Rights movement, but he came to the end of his life in 1994 without having completed the novel to his own satisfaction. This massive book, which appeared posthumously in a very abbreviated form as Juneteenth and more recently in the much longer Three Days before the Shooting, reveals the work of a master while at the same time it leaves critics and readers with an exceptional puzzle: What would his final intention have been? Why was he unable to complete the novel? How does it speak to the key issues of African American identity, freedom, and the American ideal that Ellison grappled with all his life? At the same time that he worked on his second novel, Ellison became one of the most prolific and important essayists of the twentieth century, and wrote brilliantly about American race relations from the era of segregation through the twentieth century. Even as he was celebrated by the literary establishment, however, Ellison at times found himself as odds with younger black writers and thinkers who felt that public activism, not just artistic greatness, was required of the African American writer. Using Ellison as a lens through which to see the course of American race relations from slavery to the present, the course will include study of all of Ellison’s major work: the short stories collected in “Flying Home”, “Invisible Man”, the essays collected in “Shadow and Act” and “Going to the Territory”, as well as others; and “Three Days before the Shooting”.
Instructor(s): E. Sundquist
Area: Humanities
Writing Intensive.

AS.060.367. The Fallen Woman in Victorian Literature and Culture. 3.0 Credits.
This course aims to trace how Victorian literature and culture created, negotiated, or even contested “the fallen woman,” the stereotype of a woman who transgressed the norms of appropriate sexual conduct. A fallen woman was a figure of illegitimacy: an adulteress, an unmarried mother, a seduced maiden, a prostitute, or even just a woman who didn’t meet the norms of gender and sexuality. Although such a phrase itself has disappeared today, we continue to see similar stereotypes of women in our own cultural imagination. By looking at a range of Victorian fiction, poems, and images, we will trace how representations of the fallen woman created, negotiated, or even contested stereotypes that were circulating around them. Students will read novels that address questions of gender and sexuality in Victorian discourse, including Elizabeth Gaskell’s Ruth, George Eliot’s The Mill on the Floss, and George Moore’s Esther Waters. Shorter texts will include Gaskell’s short stories, and poems by Christina Rossetti, Augusta Wester, and Thomas Hardy.
Instructor(s): S. Lee
Area: Humanities
Writing Intensive.
AS.060.368. Aesthetic Play in the Contemporary Global Novel. 3.0 Credits.

This seminar will explore the role of aesthetic play within contemporary world literature in order to ask the question: what challenges to global issues such as imperialism, racial and identity politics, gender parity and socioeconomic disparities are being made not only through subject matter, but through novel approaches to form? We will read short stories, novels, graphic novels, and watch films which subvert expectations about the structure of storytelling: these may include works by Mohsin Hamid, Margaret Atwood, China Miéville, Haruki Murakami, J. M. Coetzee, and Marjane Satrapi. We will also read critical scholarship on the subject of world literature like Pascale Casanova's World Republic of Letters and Aamir R. Mufti's "Orientalism and the Institution of World Literatures."

Instructor(s): N. Hashem
Area: Humanities
Writing Intensive.

AS.060.370. The Nineteenth Century Novel. 3.0 Credits.

In this course we will read some of the most significant—and enjoyable—of nineteenth-century novels, focusing on the questions they presented for their first readers and present for readers today. Our focus will be on the technical means by which the novelists achieve their effects. How do they convey the thoughts and feelings of their characters, for instance? How do they represent the interactions between their characters within broader social environments? How do these novels represent history? How do they represent different genders? By means of what literary devices do they do all this? Our aims in the course will be to understand the fiction of the period and to see how the devices used by these authors to conceive their psychological, ethical and political worlds continue to inform our conception of our world.

Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

AS.060.373. Literary Theory. 3.0 Credits.

Two great arguments structure literary criticism and theory: what makes something literature, and what makes something good literature? These arguments will surely never end; but to participate in them can be a great pleasure, and it can sharpen your appreciation of literary writing across the ages. This course will introduce you to the long conversation that has come to be called "literary theory," with the aim of helping you learn to love not only reading literature, but describing it. Our readings will range from Plato and Aristotle to Kant, Hegel, and Schédermacher, on to Marx, Freud, and Nietzsche, and finally to a range of recent thinkers.

AS.060.374. Border Crossings: Travel Writing and the Journeys of Nonfiction. 3.0 Credits.

The rise of "creative nonfiction", in tandem with the acceleration of "reality hunger" in recent years, has shifted scholarly attention (and book sales) in the direction of that which is perceived to be real or true rather than merely imagined or fabricated. But how fictional is "faction", and through what narrative means is the "real" produced? If nonfiction is a journey that involves the simultaneous opening and occulting of the real, then how does travel writing stitch together its quilts of place and emplacement? These are the kinds of questions we will be asking in this course, based on readings of celebrated contemporary nonfiction writers from across the globe: Haruki Murakami (Underground: The Tokyo Gas Attack and the Japanese Psyche), Katherine Boo (Behind the Beautiful Forevers: Life, Death, and Hope in a Mumbai Undercity), Bruce Chatwin (The Songlines), Jonny Steinberg (A Man of Good Hope), Paul Theroux (The Great Railway Bazaar), and V.S. Naipaul (The Enigma of Arrival). Only open to English Major/minors and Writing Seminars Majors

Area: Humanities
Writing Intensive.

AS.060.375. Art and Labor in the Enlightenment. 3.0 Credits.

In this seminar, we will investigate the relation between labor and aesthetics in the eighteenth century from three different perspectives. The first unit, "Empire and Colonization," will place narratives of imperialism in dialogue with early notions of aesthetics as sensory experience. The second, "Gendered Divisions of Labor," will take contemporary philosophies of beauty as a lens through which to read poetic and political representations of "women's work" in the period. The third unit, "Mechanization, Industry, and Nature," will consider industrial labor alongside accounts of the sublime. Some questions for discussion include whether this material upholds or contests political issues of forced labor and exploitation and how, if at all, art is an effective tool for social justice. We will read texts from a variety of genres and disciplines including poetry and prose by Behn, Wheatley, Defoe, Pope, Swift, Blake, and Wordsworth and works of political economy, philosophy, and art history by Locke, Hogarth, Smith, Burke, and Kant. Pre-1800 credit. This course is a Dean's Teaching Fellowship award.

AS.060.376. Staging Church and State in Early Modern England. 3.0 Credits.

Freedom of religion and the separation of church and state are among the fundamental principles of modern western government, and yet they are frequently misunderstood. Why would people believe they have a mandate from God to grant freedom of worship to religious minorities? Why did the state give up its monopoly on religion? What role should religious beliefs play in public life? These all remain live questions in today's political discourse, but today their complex answers tend to hide behind the ill-defined concept of secularity. This course examines a pivotal moment in the development of modern governance to ask what imaginative writing can tell us about the ways in which the early moderns sought to resolve these tensions between religious belief and participation in diverse civil society. Dean's Teaching Fellowship. Open Only to English Majors and Minors, and Writing Seminars majors.

AS.060.377. Re-Writing Democracy in America, 1865-1920. 3.0 Credits.
In his landmark two-volume work Democracy in America (1835, 1840), Alexis de Tocqueville famously argued that the ideal of democratic equality pervaded all aspects of life in America. Despite these claims, it was only after the Civil War, with the Reconstruction Amendments (1865-1870), that the language of equality made its way into the U.S. Constitution. Even as Africans Americans gained the promise of equality before the law by 1870, Jim Crow laws persisted well into the 20th century, while women did not win the long fight for suffrage until 1920. This course will consider how American writers between 1865 and 1920 consciously or unconsciously re-wrote Tocqueville's analysis of democracy in America to account for the opening up of political equality to once-excluded groups as well as the undemocratic realities that many people experienced in their everyday lives (in the form of discrimination, deepening class divisions, and gender inequality). Reading novels, poems, autobiographies and travel narratives from this era, we will explore the extent to which democratic reform registers in lives of everyday individuals, with an eye for those moments when state-level changes are reflected or, more commonly, come up short in practice.

AS.060.378. Advanced Introduction to African Literature. 3.0 Credits.
This course reaches beyond the much-taught postcolonial African realist canon to explore less-studied, more formally challenging works from across the continent, focusing on long-form prose and poetry. While texts will be clearly placed in an historical context, the emphasis in our readings will be on the inception, evolution, and intermingling of literary genres. How do seminal moments in African literary history complicate our received understandings of periodicity, mimesis, and the relation among selfhood, collectivity, and narration? What possibilities exist for theorizing African literature as a corpus, and what, conversely, are the descriptive and institutional limitations of “African Literature”? Primary texts will include “Ethiopia Unbound” (J.E. Casely Hayford); “Chaka” (Thomas Mofolo); “The Wrath of the Ancestors” (A.C. Jordan); “Song of Lawino” (Okot p’Bitek); and “The Promised Land” (Grace Ogot), as well as poetry by Shaaban bin Robert and H.I.E. Dhlomo, among others. We’ll pay some attention, too, to critical trends and contextualization.

Writing Intensive.

AS.060.379. Stage and Screen. 3.0 Credits.
Shakespeare’s King Lear has a paradoxical reputation in that it is arguably the greatest drama in English, yet it cannot be performed on stage, at least not without sacrificing its dramatic power. What happens when this notoriously unstageable play is turned into a film, as in Akira Kurosawa’s epic masterpiece Ran? Does Kurosawa compensate for the limitations of the stage? What is gained or lost when the drama takes place in Japanese instead of Shakespeare’s blank verse? This course will examine the ways that playwrights, theatre producers, and filmmakers manage the dramatic possibilities of text, stage, and cinema. Alongside their cinematic counterparts, we will read tragedies by Shakespeare, Marlowe, and Goethe, eighteenth-century comedies, and modernist dramas, and as a class, we will discuss the often fraught transition between literary text and dramatic spectacle. How do filmmakers convey psychological states through camera techniques and editing that are unavailable to producers of live performances? What dramatic effects can be achieved in the intimate setting of a theatre that are impossible at a twenty-screen cineplex, or on your couch while streaming Netflix? Along with addressing these questions, the course is intended to cultivate active, informed viewership in conjunction with close readings of the plays themselves. Authors likely to be included: Shakespeare - Romeo and Juliet, Hamlet, King Lear; Marlowe - Doctor Faustus; Goethe - Faust; Wycherley - The Country Wife; Congreve - The Way of the World; Samuel Beckett, Tennessee Williams, Arthur Miller, Rabindranath Tagore, Henrik IbSEN. Visual media will include recordings of performances and adaptations by Lawrence Olivier, Kurosawa, Satyajit Ray, Andrei Tarkovsky, Jan Švankmajer, and Dangerous Liaisons, starring Glenn Close and John Malkovich, plus the broadway musical, Damn Yankees!

AS.060.380. Romantic Poetry: Imagining the People. 3.0 Credits.
Perhaps the most influential moment in modern letters, the Romantic period not only straddled the age of democratic revolutions, abolition, mass media and industrialization, it ushered in the modern concept of Literature and its social role. Among the most pressing issues of Romantic poetry were those related to representing, speaking for and speaking to an imaginary creature called The People, not wholly commensurate with that other imaginary creature, The Nation or its Citizens. So for instance, the Ballad revival of the period brought into print the ancient songs of “the folk,” but the movement was riddled with fakes and forgeries. Rising literacy inspired working class poets, women and ethnic minorities to reshape the English language through poetry. Yet at the same moment, literary gentlemen began to produce their own version of a marginalized and dispossessed “people.” All these efforts can be set against a State effort to introduce the first national census, to account for all subjects of the crown. A struggle over who “counts” in the realm of literature clashed with fights over political institutions and the new science of political economy.

AS.060.383. Contemporary Russian Novel in English. 3.0 Credits.
Russia is back in the headlines, and its resurgence seems unlikely to waver anytime soon. But while many students are familiar with the 20th-century novelists like Tolstoy and Dostoevsky, more recent Russian writing is often a mystery. This course approaches contemporary Russia through the careers of its two major living novelists, Vladimir Sorokin and Ludmila Ulitskaya, both of whose work spans the late Soviet period (1980s and 90s) through today. In addition to questions of genre, translation, and contemporary Russian literary culture’s relation to Soviet models, we will consider how Sorokin and Ulitskaya have brokered Russia’s intellectual standing on a world stage. Works studied will include Ulitskaya’s Sonechka, The Funeral Party, and Daniel Stein, Interpreter, and Sorokin’s The Queue, Day of the Oprichnik, and The Blizzard.

AS.060.386. Reading the American Swamp. 3.0 Credits.
The Shape of Water, Creature from the Black Lagoon, Swamp Thing—what is it about the terrain of swamplands that inspires us to dream up hybrid creatures that live within them? This course takes a long view of the American fearful fascination with these amphibious landscapes, from the 18th century to today. In the 19th century especially, swampy landscapes came to evoke anxiety and rebellion among white slaveholders, while as many as two thousand escaped slaves found shelter and sustenance in the swamp’s mazy topography. Who and what was lurking just beyond the swamp’s wall of vines and veil of mist? Though the swamp of the 20th and 21st centuries retains a sense of dreary, foreboding mystery, a relatively new ecological discourse on swamplands (now called “wetlands”) has emerged calling for protection of the strange and delicate balance of marsh life. The precariousness of such ecosystems as the Florida Everglades comes to represent the toll two and a half centuries of environmental plunder has taken on the American landscape. At the same time, the 2016 presidential election saw the reemergence in American political rhetoric of calls to “drain the swamp” of the federal government. By turns, the swamp has represented growth and abundance, stagnation and decay, moral depravity, organic sanctity, and has played the roles of both harbinger of devastation and safe-haven of the oppressed. At each twist, texts imagining swamplands give us a unique glimpse into the aesthetic, social, and political anxieties and struggles of the moment. This course aims to track these historical shifts and develop an understanding of precisely how and why they occur, all the while asking what it is about swamplands that attracts our deepest worries and our eeriest curiosities.

AS.060.387. Black Empire. 3.0 Credits.
This course examines the transnational visions of Black Empire as articulated and framed by black thinkers, writers, and visual artists around the world, roughly between 1850 and 1950. We will consider how both individuals and groups (such as the United Negro Improvement Association) responded to imperialist maneuvers through discourses of Ethiopianism, Pan-Africanism, and anti-colonialism, and how these discourses interacted with one another in surprising ways, ways that reveal the black world’s simultaneous attraction to and rejection of the imperial model in the nineteenth and twentieth centuries. Our reading will include novels, poems, essays, and critical texts—at least two of which share a title with this course—by W. E. B. Du Bois, Pauline E. Hopkins, Sutton E. Griggs, J. A. Rogers, Langston Hughes, George S. Schuyler, Claude McKay, Brent Hayes Edwards, Paul Gilroy, Wilson Jeremiah Moses, Michelle Ann Stephens, and others.
Instructor(s): N. Nurhussein

Writing Intensive.

AS.060.388. Old World/New World Women. 3.0 Credits.
The course considers the transatlantic writing of three women in the early modern period, Anne Bradstreet, Aphra Behn, and Phillis Wheatley. We will consider issues of identity, spatiality, religion, commerce, enforced labor, sexuality, race, and gender, along with literary tradition, formal analysis and poetics. We will read a good deal of these early women writers. Foremost in our mind will be the question of how perceptions of space and time are mediated through the global experiences of early modernity.
Instructor(s): S. Achinstein

Writing Intensive.
**AS.060.390. Literature and Visual Modernity. 3.0 Credits.**
This course will study the idea of modernity, a term that has been of continuing use in trying to understand ourselves and our society. We will focus on the major works of prose, poetry, and painting that attempted to come to terms with modernity in the nineteenth century. Texts are likely to include non-fiction prose by Mill, Baudelaire, Darwin, and Benjamin; fiction by Henry James, Conrad, and Vernon Lee; poetry by the Brownings, Tennyson, and Hardy; and paintings (some at the BMA) by D.G. Rossetti, Turner and Cezanne
Instructor(s): A. Miller

Writing Intensive.

**AS.060.391. Early American Literature. 3.0 Credits.**
This course is an introduction to literatures drawn from across the Americas, although primarily the British North American colonies that would eventually become the United States, from first contact in 1492 up through the American wars of independence. Our readings are roughly organized according to chronology and genre. We will think about the adapted and emergent generic forms through which "the New World" was ongoingly invented, including genres like the Indian captivity narrative and the slave narrative that arguably make their debut in world literary history in the Americas during this time frame. We will conclude by attending to the rather late emergence of the novel in American literary history, reading four novels that appeared in the early US national period. The objective of the course is simply to contextualize and analyze a wide array of texts, each of which richly rewards the engaged reader, in order to trace the origins of American literatures. Course texts may include contact narratives (Columbus, Caminha, Smith, Hennenpin); conquest narratives (Mather, Las Casas, Poma de Ayala); Indian captivity narratives (Cabeza de Vaca, Rowlandson, Staden); slave narratives (Gronniosaw, Jea, Cugoano); revolutionary polemics (Paine, Bolivar); and the earliest American novels: William Hill Brown, The Power of Sympathy; Hannah Webster Foster, The Coquette; Leonora Sansay, Secret History or, the Horrors of Santo Domingo; Charles Brockden Brown, Arthur Mervyn. Fulfils the pre-1800 requirement.
Instructor(s): J. Hickman
Area: Humanities

**AS.060.392. Reading Ayn Rand. 3.0 Credits.**
This course will investigate Ayn Rand, both as a novelist and as an enormously influential thinker. Special attention will be paid to the Soviet and American contexts that produced Rand's work, as well as her place in a lineage of conservative thought, and the influence she has had on American politics. The approach of this course will be critical, but, I hope, fair. Readings will likely include Anthem and Atlas Shrugged, as well as selections from Rand's philosophical works: Capitalism: The Unknown Ideal and The Virtue of Selfishness.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

**AS.060.393. Geoffrey Chaucer: Ribaldry, Romance and Radical Religion. 3.0 Credits.**
Geoffrey Chaucer is sometimes called the 'father of English literature', but the deftness with which he captured the variety of the human condition, in poetic forms that were each, in themselves, startlingly new, was in so many ways an inheritance too rich for literary tradition to absorb. One reason to return to Chaucer's writing now is to see how funny (and even obscure) verse narrative can be, and how compelling a fourteenth-century love story remains. It is also to open a window onto a culture entirely different from our own but in which the power of language (the role of free speech), the freedom of the individual, the status of women, violent tensions between cultures and ethnicities and the role of religion in civil society were not only topical, but made the more so by Chaucer's powerful public intellectual vision and thought. Chaucer is timeless because he wrote so well that he always rewards reading (and the Middle English in which he wrote is very easy to master) but he is always worth reading because reading him is at once so eye-opening and such a pleasure, a way of stretching one's sense of the present by understanding (really understanding) a particular moment in the past. This class will pursue such understanding by paying particular attention to Chaucer's masterpieces, Troilus and Criseyde and The Canterbury Tales. But we will begin with a quick and easy workshop on Chaucer's language, and try to define, along the way, some of the more interesting aspects of his style. Our goal will be to learn to enjoy Chaucer's poetry by reading it carefully enough to take the full measure of what exactly it was about.

Writing Intensive.

**AS.060.394. Class Fictions. 3.0 Credits.**
This seminar investigates one of the central concerns of nineteenth-century fiction: social and economic class. Why did raising oneself from humble beginnings and falling into poverty, become such familiar stories? And why are they still so familiar today? We will look at how a number of writers approached the topic of class mobility, each with a unique blend of excitement and anxiety. Authors will likely include Jane Austen, Honoré de Balzac (in translation), Charles Dickens, and William Dean Howells. In order to understand our topic better, we will also look at a selection of theoretical work on the nature of class.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.

**AS.060.397. Thomas Pynchon. 3.0 Credits.**
Intensive reading of two major Pynchon novels, along with theories of modernity, postmodernity, etc.
Instructor(s): C. Nealon
Area: Humanities
Writing Intensive.

**AS.060.405. Psychoanalysis and Literature. 3.0 Credits.**
In this course we will read some foundational texts by Sigmund Freud, and pair them with a select group of literary works—Sophocles’ “Oedipus the King” and “Oedipus at Colonus”, William Shakespeare’s “Hamlet”, Edgar Allan Poe’s “The Purloined Letter”, Wilhelm Jensen’s “Gradiva”—which have inspired psychoanalytic ideas and generations of psychoanalytic literary interpretation.

AS.060.509. Senior Essay. 3.0 Credits.
The English Department offers qualified majors the option of writing a senior essay. This is to be a one-semester project undertaken in the fall of the senior year, resulting in an essay of 30-35 pages. The senior essay counts as a three-credit course which can be applied toward the requirements for the major. Each project will be assigned both an advisor and a second reader. In addition, students writing essays will meet as a group with the Director of Undergraduate Study once or twice in the course of the project. The senior essay option is open to all students with a cumulative GPA of 3.8 or higher in English Department courses at the end of the fall term of their junior year. Project descriptions (generally of one to two pages) and a preliminary bibliography should be submitted to a prospective advisor selected by the student from the core faculty. All proposals must be received at least two weeks prior to the beginning of registration period during the spring term of the junior year. Students should meet with the prospective advisor to discuss the project in general terms before submitting a formal proposal. The advisor will determine whether the proposed project is feasible and worthwhile. Individual faculty need not direct more than one approved senior essay per academic year. Acceptance of a proposal will therefore depend on faculty availability as well as on the strength of the proposal itself. When completed, the senior essay will be judged and graded by the advisor in consultation with the second reader. The senior essay will not be part of the Department's honors program, which will continue to be based solely on a cumulative GPA of 3.6 in English Department courses.

AS.060.604. Philology.
An examination of the many ways (both as old and then 'New', but also as the subject of a key 'return') that 'philology' has been claimed as the master category of literary study. The nuts and bolts of older philological procedures as well as the broadest theoretical claims for the term will be attended to.
Instructor(s): C. Cannon
Area: Humanities
Writing Intensive.

AS.060.605. The Decolonial Intellectual.
A recent resurgence of interest in decolonial theory raises important questions about the relationship between postcolonial literature and the institutions, as well as disciplinary frameworks, by which it's advanced. From Ngugi wa Thiong'o, to the contemporary Afropolitan theorist Achille Mbembe, U.S. universities have been host to many of decolonization's notable intellectuals. This seminar takes a synthetic approach to understanding the forms and histories by which decolonization has been articulated: we'll survey fiction, personal and political essays, and "theory" to make sense of the various tensions at decolonization's core (e.g. territorialization vs. de-territorialization, internationalism vs. cosmopolitanism, or text vs. context). Writers studied will include Frantz Fanon, Lewis Nkosi, Ayi Kwei Armah, Ngugi wa Thiong'o, Walter Mignolo, An Younetae, Kwame Nkrumah, Hamid Dabashi, Buchi Emecheta, and Sylvia Wynter, among others.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.606. Renaissance Comedy.
Why is comedy so easy to enjoy and so hard to think about? Is “the comic” a genre, a mode, an affective state, a social practice, or none/all of the above? What does comedy have to do with the body? What does it have to do with social location? What historical accidents, psychological barriers and cultural taboos must be re-considered in order to address these questions? Starting from classic texts in genre theory and psychoanalysis, this course try to put Aristotle and Freud into dialogue with recent early modern critical scholarship on affect, drama and the body. Possible texts/authors include: Aristotle’s Poetics; Sigmund Freud, Jokes and Their relation to the Unconscious; Rosalie Colie The Resources of Kind; Gail Kern Paster, The Body Embarrassed: Drama and the Disciplines of Shame in Early Modern England; Will Stockton, Playing Dirty: Sexuality and Waste in Early Modern Comedy; Julia Kristeva, Powers of Horror: An Essay on Abjection; Alenka Zupanic, The Odd One In: On Comedy, and others. The historical spine of the course will be a weekly sequence of classical and early modern comic plays by Plautus, Terence, Aristophanes, Peele, Lyly, Shakespeare, Jonson, Beaumont, Wycherley, Etheridge, and Behn.
Instructor(s): A. Daniel
Area: Humanities

AS.060.608. The Idea of Tradition.
The idea of tradition – of a body from texts from the past that helps explain the genealogy of the present – is central to literary criticism, and indeed to all of the humanities. But where did we get the idea that the present could be understood best through texts from the past? Can we imagine a humanities without it? This course will look at the development of the idea of tradition in the eighteenth and nineteenth centuries. We will pay particular attention to the connections between the developing ideas of tradition and the changing forms of literary expression in those periods—particularly the developmental novel. Novelist will likely include Goethe, Scott, Austen, Eliot and James. In terms of theory we will pay particular attention to questions of historicity and presentism in historiography, hermeneutics and Marxist theory. Theorist will likely include Vico, Shaftesbury, Dilthey, Lukacs, Heidegger, Adorno, Horkheimer, Gadamer, Jauss, Kosseleck, and T.S. Eliot.
Instructor(s): J. Rosenthal
Area: Humanities
Writing Intensive.
**AS.060.609. Extreme Criticism.**  
“How far can I go?” It is a question (memorably posed by Neil Hertz) of what we might call interpretive tact: what will your readers or listeners accept? How far can you take them with you as you enter into the interpretive possibilities that have come to matter to you, that you believe to be true, meaningful, important, interesting . . . ? When, eyes slowly unfocusing, do they start drifting away? That most of the critics we read are determinedly tactful is an occasionally dismaying thought. This seminar, by contrast, will engage the issue of interpretive tact by reading critics who might be thought to violate it. I’d like to think about the issue with a collection of interested students. Among the potentially tactless works we might discuss are Stanley Cavell’s essay on King Lear, Laura Kipnis’s Against Love: A Polemic T.J. Clark’s The Sight of Death, Michael Fried’s Flaubert’s “Gueuloir,” Avita Ronnell’s Telephone Book (or perhaps her less extreme Stupidity), Roland Barthes’ S/Z, Garrett Stewart’s Reading Voices, Franco Moretti’s Distant Reading, Lauren Berlant’s Desire/Love, William Empson’s Seven Types of Ambiguity, Lee Edelman’s No Future, Barbara Johnson’s “Bringing Out D. A. Miller” I’d be open to other suggestions by seminar members.  
Instructor(s): A. Miller  
Area: Humanities  
Writing Intensive.

**AS.060.610. What is Reading?.**  
What is reading? The question is not meant metaphorically. “We take for granted,” Mark Taylor writes, “our capacities to invent and interpret, and devote ourselves to exercising those capacities and publishing the results.” Yet, he continues, “It is the capacities themselves that need explaining. Reading is not giving a reading . . . Giving readings is important and could be done better if we understood reading. . . . The most amazing phenomenon our profession confronts, and the one for which we have the least explanation, is that a reader can make sense of a text, and that there are certain regularities across the individual senses made of a given text” (Taylor 19). This seminar aims to bring us close to understanding the “most amazing phenomenon our profession confronts,” drawing on recent work in cognitive psychology, history of the book, disability studies, and theories of media new and old. We will consider debates about modes of reading as different as paleography, Braille, and scansion, and reckon with the possibility of non-human reading. I hope to invite in faculty from Cognitive Science and Informatics, Disabilities Studies, Classics and Library Science to explain what they mean when they talk about reading. But the final goal of the seminar is to help us identify the importance of literary studies in that conversation. To what extent does the literary object teach us about reading?  
Instructor(s): M. Favret  
Area: Humanities  
Writing Intensive.

**AS.060.611. Early/Modern/Violence.**  
This course looks at the intertwining of the categories of secular and religious in the English literature of violence in the early modern period. Literary representations of, and meditations upon, violence will be considered in Spenser, Nashe, Marlowe, Milton and Behn. Early modern thinkers will include humanists, theologians and philosophers (Augustine, Ficino, Calvin, Hobbes, Spinoza, Locke). We will consider such topics as: How religion is (or is not) a ‘transhistorical’ category; how the Enlightenment’s critique of religion was founded on the experience of the ‘wars of religion’; the creation of religious Others; the connection between religion and the rise of the modern state; the war-peace distinction; the friend-enemy distinction; how the sacredness of human life is understood; the links between violence and humanitarianism (indeed, what is the human?); torture; ‘violence’ as a transhistorical category; the pairing of violence to justice. There will be engagement with contemporary thought of Arendt, Derrida, Benjamin, Zizek, Anidjar, Asad, Tilly, Virilio, Schmidt, Girard, Scarry, Taylor and others.  
Instructor(s): S. Achinstein  
Area: Humanities.

**AS.060.612. Poetry and Poetics After the Linguistic Turn.**  
This course is a survey of recent critical work on English-language poetry, mostly North American. Much of the work is by younger scholars. I have chosen to highlight this recent body of writing because I think that, taken together, it signals a shift away from what since the 1980s had been the dominant model for “reading” poetry, which was under the sign of “Theory.” Readings will include work by Jasper Bernes, Joel Nickels, Nadia Nurhussein, Margaret Ronda, Daniel Tiffany, and others.  
Instructor(s): C. Nealon  
Area: Humanities  
Writing Intensive.

**AS.060.613. American Movement.**  
This seminar will examine representations of people in motion in U.S. writing from 1900 to the present. Migration, international and intranational, will be central to our study, but we’ll also consider other forms of travel, transits of authorial and readerly attention, the policing and pleasures of vagrancy, and predicaments of stasis in both textual and critical/theoretical work around mobility. Our syllabus is still in process, but authors and directors studied may include Henry James, Anzia Yezierska, Claude McKay, Gertude Stein, Muriel Rukeyser, John Steinbeck, John Ford, Simone de Beauvoir, Victor Villaseñor, Juliana Spahr, and Jayne Anne Phillips.  
Instructor(s): D. Mao  
Area: Humanities  
Writing Intensive.
The field now known as “global Anglophone literature” has emerged from a complicated and rapidly advancing disciplinary lineage. A host of past and present recodings – including postcolonial, Commonwealth, Third World, global, transnational, world, and the Global South – provide a record of the wider profession’s anxieties in relation to non-Western literary traditions. This course prepares graduate students to be able to articulate some of the subtle differences in approach that this nexus of closely related terms may obscure, from the heyday of postcolonial theory in the 1980s and 90s to contemporary subfields like Indian Ocean studies. In addition to key critical texts by theorists including Edward Said, Gayatri Spivak, Franco Moretti, Peter Hallward, and Emily Apter, students will be introduced to some outstanding recent methodologies and critiques from the adjacent body of work on comparative literature.
Instructor(s): J. Jackson
Area: Humanities
Writing Intensive.

AS.060.615. The Literary and the Secular.
Embedded in many theses of secularization is an implicit process of tropologization—the sign that secularization is underway is precisely when sacred forms and contents begin to circulate as figures unmoored from their original devotional contexts and thereby become subject to everything from blasphemous parody to heterodox elaboration to blasé immanetization, in a word, to the whims of the literary imagination. This seminar will examine theories of secularization that reflect and reflect upon this tacit linkage of the secular and the literary and also trace crucial developments in the literary and intellectual history of Atlantic Romanticism (with a special focus on the distinctive genre of the American romance) that might offer alternative views of undeniable transformations perhaps ineffectively referred to the rubric of “secularization.” Secondary texts may include T.E. Hulme, “Romanticism and Classicism”; Carl Schmitt, Political Theology; Hans Blumenberg, The Legitimacy of the Modern Age; M.H. Abrams, Natural Supernaturalism; Charles Taylor, A Secular Age; Roberto Calasso, Literature and the Gods; Michael Kaufmann, “The Religious, the Secular, and Literary Studies”; Colin Jager, Unquiet Things: Secularism in the Romantic Age. Primary texts may include selected poetry of William Blake, Percy Shelley, Friedrich Hölderlin, and others; canonical theoretical definitions of the “romantic” from the Schlegels, Coleridge, etc.; Joseph Smith, The Book of Mormon; Edgar Allan Poe, Arthur Gordon Pym; Nathaniel Hawthorne, prefaces, selected tales, The House of Seven Gables, The Marble Faun; Herman Melville, Mardi; Harriet Beecher Stowe, Dred; Martin Delany, Blake or, the Huts of America.
Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

AS.060.616. Milton.
A seminar covering the career of John Milton, including all his major poetry and much of his prose. There will be attention to the history of printing, publication and concepts of reading and writing, as well as to current issues and topics within early modern studies that bear on Milton (e.g. materialism, secularization, ‘surface’ reading, political theology, quantitative vs hermeneutic methods, actor-network theory). As such, the course will also be an introduction to various methods in early modern studies.
Instructor(s): S. Achinstein
Area: Humanities
Writing Intensive.

AS.060.617. Black Print Culture.
Students interested in black print culture will engage in intensive archival research, both collaborative and individual, using the Sheridan Library’s Rare Book and Manuscript collections. Texts include poems, printed lectures, pamphlets, novels, periodicals, ephemera, correspondence, etc., alongside relevant critical and theoretical reading.
Instructor(s): N. Nurhussein
Area: Humanities
Writing Intensive.

AS.060.618. Modernism and Authenticity.
Could modernism as we know it have emerged absent anxiety about what it means really to live, really to feel, really to think? We will explore this question through a range of texts—long and short, fictional and non-fictional, poetic and in prose—by authors such as Friedrich Nietzsche, Oscar Wilde, Gabriele D’Annunzio, W. B. Yeats, T. E. Hulme, E. M. Forster, Mina Loy, T. S. Eliot, F. T. Marinetti, Gertrude Stein, Virginia Woolf, William Carlos Williams, Nella Larsen, Wallace Thurman, Walter Benjamin, Theodor Adorno, and Lionel Trilling. Topics to be considered will include decadent imposture, the attenuation of experience, enchanted and disenchanted violence, and technology-driven alienation.
Instructor(s): D. Mao
Area: Humanities.

This course offers a critical and historical introduction to the Frankfurt School.
Instructor(s): M. Thompson
Area: Humanities.

AS.060.621. The Cultures of the Sonnet in the English Renaissance.
This is a course on lyric theory in the Renaissance and as such is a good introduction to early modern literary study. We will take up the early modern form of the sonnet as a test case for the interaction between vernacularity and globalization. We will consider early modern topics including “invention,” “imitation,” and rhetoric, as well as explore formal concerns that are intertwined with political, social, cultural and economic experiences of early modernity. Along with the consideration of the emergence of literatures in new languages and nationalist differentiation, we will also consider mechanization (whether in print or literary trope) that produced both early modern literature and political life in an international system. We will consider such topics as sequence; modes of address; vernacularity and linguistic nationalism; the themes of love v. empire; the social role of the sonnet; the nature and materiality of writing; patronage and circulation; the question of private, occasional, and public poetry; the place of sonnets in manuscript collections; the histories of books; poetic subjectivity and objective thought; and we will also read a good many sonnets, largely in English, through close attention to language, media and transmission histories. Some contemporary literary theory on the sonnet will be introduced, as well as sonnets in European languages other than English, depending on the students’ interests and proclivities. Students will be expected to work in the manuscript and print collections of the Bodleian library to prepare a class report on their chosen topics. The class puts the sonnet in relation to other forms in Renaissance literature and thus should serve as a good survey of the period and its issues.

Instructor(s): A. Miller
Area: Humanities.

AS.060.622. Perspective.
Perspective, or point of view, is a seemingly inescapable term in critical
work on fiction. In this course we will study this concept as it has been
developed in literary studies and, contrastively, in art history and film
studies. We’ll enter two overlapping areas of study, one theoretical, one
critical. The first concerns the concept of perspective as developed in
literary theory, art theory, and film theory; the second concerns a set of
fictions, paintings, and films Our aims will be to develop a more adequate
understanding of the concept and to assess the implications of our
current usage of it.
Instructor(s): A. Miller
Area: Humanities.

AS.060.623. Cross-Period Literary Study.
This seminar will be an experiment in training graduate students to
develop an awareness of scholarship outside their own historical period,
so as to re-think contemporary questions of periodization and modernity,
as well as genre and form. The course will be organized around literary-
critical readings from recent scholarship from the classical period to the
21st century, and around visits from scholars, especially junior scholars,
working in those periods.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.624. Romanticism and the Ends of Affect.
This seminar will consider both what affect studies have learned from
Romanticism and the limits --practical, ethical, intellectual--of reading
Romantic poetry within the framework that has been constructed by
affect studies over the past two decades. It will provide a general survey
of scholarship on affect, of criticism attending to the self-consciously
affecting literary experiments of the age, and to primary works by a select
number of romantic writers, most probably Wordsworth and Coleridge's
Lyrical ballads, Joanna Baillie's Plays and the letters and poems of John
Keats.
Instructor(s): M. Favret
Area: Humanities
Writing intensive.

AS.060.625. Theory of the Novel.
This course will look at the development of novel theory from the
eighteenth century until the present. Authors will include Scott, Barbauld,
Dallas, Lewes, Eliot, James, Shklovsky, Tomashevsky, Jakobson, Bakhtin,
Lukács, Auerbach, Barthes, Jameson, Girard, Sedgwick, Moretti,
Armstrong, Miller, Hale, Lynch, and Woloch. Novelists will likely include
Madame de Lafayette, Austen, Goethe, and Wolfe.
Instructor(s): J. Rosenthal
Area: Humanities
Writing intensive.

AS.060.626. Reading for Race at the Movies and on TV, in the years
2015-16.
2015-16 was a radical, decisive two-year period for many things,
including film by and about African-Americans. This course seeks to
understand this phenomenon through current events, wider aesthetic
and historical trends, and the body of critical work devoted to reading
filmic representations of cultural and political ideologies. 2015-16 films
and TV shows under consideration will include: Moonlight; Creed; Hidden
Figures; Fences; Birth of a Nation; Straight Outta Compton; O.J: Made
in America; Atlanta; Black-ish; This Is Us; Luke Cage; The People v. O.J
Simpson.
Instructor(s): M. Thompson.

AS.060.627. Poetry and Performance.
This course will be devoted to the histories and theories of 19th-, 20th-
and 21st-century poetry and performance, beginning with William
Wordsworth’s and Samuel Taylor Coleridge's Lyrical Ballads. Upon
hearing the poets read, William Hazlitt remarked that “[t]here is a chant
in the recitation both of Coleridge and Wordsworth, which acts as a
spell upon the hearer, and disarms the judgment.” This early instance of
reception history will provide the backdrop for our discussion throughout
the semester. Besides Wordsworth and Coleridge, our reading list will
include verse, theory, and criticism by Robert Browning, Walt Whitman,
T.S. Eliot, James Weldon Johnson, Langston Hughes, William Carlos
Williams, Charles Olson, Allen Ginsberg, Norman Pritchard, Amiri Baraka,
Tracie Morris, Christian Bök, Lisa Gitelman, Frederick Kittler, Peter
Middleton, John M. Picker, Susan Stewart, and others.
Instructor(s): N. Nurhussein

Writing intensive.

AS.060.630. Mapping Frederick Douglass's Escape: An Historic Maryland
Odyssey.
This course provides an in-depth portrait of the historic Marylander
Frederick Douglass, born near Hillsboro in Talbot County, Maryland
around 1818, and who successfully escaped slavery in Baltimore in
September 1838. We will read Douglass's three autobiographies and
other writings, as well as two biographies of Douglass to understand his
importance in American life over time. The course includes three “living
classroom” components. At the Douglass/Meyers Museum at Fells Point,
Baltimore, students will learn 19th century techniques to build a sailing
such as Douglass learned when he worked in the shipyards. Students
will tour the Anacostia, DC Frederick Douglass Museum. The course
culminates with a sailing trip from Baltimore’s Fells Point to historic St.
Michael’s, kayaking along the Tuckahoe and Miles Rivers, and overnight
camping on the grounds of a former plantation on Maryland’s Eastern
Shore.
Instructor(s): L. Jackson
Area: Humanities
Writing intensive.

AS.060.631. Tyranny in Early Modern Literature.
In the Epistle to the Romans, Paul writes: “Let every soul be subject unto
the higher powers: for there is no power but of God: and the powers
that be, are ordained of God.” In the wake of such a declaration, what
constitutes tyranny? When is resistance to tyranny justified? What
forms of recourse are compatible with the Christian obedience enjoined
by Paul? How did early modern literature offer a means of leverage,
redress and coping with the depredations of “the powers that be”? In
search of provisional answers to these questions, this course tracks
the representation and rhetorical evaluation of the tyrant figure at the
intersection of political philosophy and literature. Political writings by
Aristotle, Plato, Marsilius of Padua, Dante, Jean Bodin, James I, John
Milton and Hanna Arendt are placed in dialogue with historical and
theoretical writing by Greg Walker, Stanley Cavell, Mary Nyquist and Terri
Snyder on tyranny, slavery, resistance theory and biopolitics. Literary
texts, principally drama and prose romances, will include The Wakefield
Master’s “Herod the Great”, Sir Philip Sidney’s “The New Arcadia”,
Christopher Marlowe’s “Tamburlaine”, Robert Greene’s “Planetomachia”,
William Shakespeare’s “Richard III” and “The Winter’s Tale”, Ben Jonson's
“Sejanus His Fall”, and Elizabeth Cary’s “The Tragedy of Mariam, Fair
Queen of Jewry”.

Writing Intensive.

In recent years, the literature of the middle of the twentieth century has come into its own. Now recognized as a period of exceptional invention, not merely the weak successor to the great age of high modernism, the 1930s through the 1960s gave us texts that, among other things, offer windows onto the birth of the postwar order. This course will examine challenging, fascinating, sometimes infuriating writing about World War II, the rise of the welfare state, and the “colonization in reverse” that brought the Windrush writers from the Caribbean to England. Authors studied may include Elizabeth Bowen, Anthony Burgess, T.S. Eliot, H.D., Richard Hoggart, George Lamming, Philip Larkin, Margaretting Laski, Sam Selvon, Alan Sillitoe, John Wain, Virginia Woolf, and John Wyndham.

Instructor(s): D. Mao
Area: Humanities
Writing Intensive.

This seminar offers an introduction to a key concept in contemporary critical theory and literary and cultural studies: settler colonialism, understood as a specific form of colonialism focused on the appropriation of land rather than the exploitation of labor and thereby involving the attempted elimination and replacement of indigenous polities and societies by an invading force. The course will have a dual focus: 1) tracing the theoretical distinction of settler colonialism from other forms of colonialism and tracking the critique implicit in this distinction of dominant forms of leftism that arguably presuppose a settler-colonial frame of reference; 2) tracing the history of what James Belich has called the “Anglo settler revolution” of the nineteenth century and engaging in a comparative analysis of the literatures produced in the course of that revolution in what are now Ireland, the United States, Canada, Australia, and elsewhere in the Pacific. We will especially attend to narrative fictions—often (self-) identified as “romances”—that chronicle settlement and register the temporal disruption of indigenous persistences and resistance. Secondary texts may include: Belich, Replenishing the Earth; Glen Coulthard, Red Skin, White Masks; Aileen Moreton-Robinson, The White Possessive; Eve Tuck and K. Wayne Yang, “Decolonization is Not a Metaphor”; Patrick Wolfe, Settler Colonialism and the Transformation of Anthropology. Primary texts may include: Charles Brockden Brown, Edgar Huntly; S. Alice Callahan, A Child of the Forest; Marcus Clarke, His Natural Life; Susanna Moodie, Roughing It in the Bush; Herman Melville, Typee; Sydney Owenson, The Wild Irish Girl; Simon Pokagon, Ogimawkti Mitigwaki (Queen of the Woods); John Richardson, Wacousta or, The Prophecy; Catharine Maria Sedgwick, Hope Leslie; and the FX television series, Taboo.

Instructor(s): J. Hickman
Area: Humanities
Writing Intensive.

This course will read the major writings of William Wordsworth as experiments in tracking feeling between individual and multitude. It will take advantage of two currents in recent criticism to work through the problem of how one feels with and for large numbers. On the one hand, this requires taking up models of sympathy and feeling that depart from those established since the eighteenth century, where models of sympathy relied on a 1-1 relationship between human persons. These alternative models attend to “multitudes,” and thus a different scale of life, human and not (e.g. Spinoza, Virno, Hardt and Negri). On the other hand, reading Wordsworth in this light requires a reconsideration of the art of numbers – that is, poetry – alongside and sometimes in opposition to the science of numbers called political economy.

Instructor(s): M. Favret

Writing Intensive.

AS.060.647. Capitalism for Humanists.

Recent global crises of capital accumulation have obliged both scholarly and journalistic accounts of capitalism to become more sophisticated and comprehensive. This course will be an introduction to some of those accounts. We will approach the problem of describing capital and its dynamics from several angles: conversations about combined and uneven development, about the racialization of enslaved and “surplus” populations; about the forms of social reproduction (often gendered) proximate to the wage; about technological change, robotification, and its implications for the production of capitalist value; about theories of the value-form itself. One aim of this course will be to think about how a better understanding of capital — its history and its mechanics — can make us better scholars of literature, so we will also devote ourselves to assessing the resources and the limits of earlier literary-critical accounts of literature’s relationship to capital accumulation.

Instructor(s): C. Nealon
Area: Humanities
Writing Intensive.

George Eliot’s novels have been the focus of some of the most deeply thought criticism of the Victorian period. In this seminar we’ll read a selection of those novels as they have invited the study of topics which may include the theory of the novel and of narrative; aesthetics and continental philosophy; representation and the nature of individuation; sympathy; the history of affect; formalism, politics, and ethics; the novel and emergent sciences. We’ll spend most of our time on Middlemarch and Daniel Deronda, along with her non-fiction prose and some of her translation work of Spinoza and Feuerbach. We’re likely to read criticism by Gallagher, Hertz, Woloch, Plotz, Anderson, and Duncan. Depending on student interest, we may also take up Eliot’s relation to earlier literary figures—Wordsworth being a likely candidate.

Instructor(s): A. Miller
Area: Humanities
Writing Intensive.

This course serves as an advanced introduction to the texts, issues and criticism surrounding African-American literature. In it, we will read works from the field’s major genres: the slave narrative; the novel; poetry; autobiography; the essay; and literary criticism. Authors under consideration will include: Wheatley; Du Bois; Douglass; Jacobs; Hurston; Hughes; Wright; Baldwin; Morrison.

Instructor(s): M. Thompson
Area: Humanities.
This course offers both a survey of late nineteenth- and early twentieth-century prose fiction of Britain and its empire and an examination of recent scholarship on literature’s relation to religion and the geographies of modernity. We’ll begin with three Victorian novels inhabiting the convergence between historical imagination and religious inquiry (Charles Kingsley, George Eliot, Walter Pater), move on to three turn-of-the-century narratives in which the momentum of the quest confronts sacred implacability (Olive Schreiner, Joseph Conrad, Rudyard Kipling), and conclude with three novels of the 1920s propelled by pagan ecstasy (E. M. Forster, D. H. Lawrence, Sylvia Townsend Warner). Primary readings will be accompanied by critical and theoretical texts from György Lukács, René Girard, Fredric Jameson, David Harvey, Leela Gandhi, and others.
Instructor(s): D. Mao
Area: Humanities.

AS.060.666. Whitman and Dickinson.
An examination of the formal, conceptual, and philosophical innovations in the work of the two major nineteenth-century American poets. We’ll consider the premises behind Whitman’s poetry of wholes (nothing left out) and Dickinson’s poetry of fragments. How does Whitman reconcile the need for formal universals with the emotional attachment to substantive particulars? How does Dickinson find a language for the off-the-map quality of private experience?
Instructor(s): S. Cameron

This course takes its cue from a basic etymological kinship between “discovery” and apocalypse (???????????", literally "un-covering"). How are world-building and world-ending related? What pathways join the literary and philosophical construction of new worlds with theological and theoretical scenarios of revelation, extinction, and doom? In search of answers, this course reads Renaissance narratives of cosmogony, proto-science fiction and utopian discovery alongside contemporary theories of “worlding”, environmental futurity, climate change, and planetary precarity. After commencing with Lucian and Plutarch, we will read a comprehensive sequence of early modern fictions in which utopias, new worlds and/or new planets are visited or “discovered”: Thomas More, Utopia; Robert Greene, Planetomachia; Tommaso Campanella, The City of the Sun; Johannes Kepler, Somnium (The Dream); Francis Bacon, New Atlantis; Margaret Cavendish, The Description of a New World, Called the Blazing World; Aphra Behn’s translation of Fontenelle’s Conversations on the Plurality of Worlds. These early modern texts will be read alongside works in primary philosophy and contemporary eco-theory that constellate key concepts: earth, planet, and world. Texts include Martin Heidegger, Being and Time; Jacques Derrida, “Of An Apocalyptic Tone Recently Adopted In Philosophy”; Timothy Morton, Hyperobjects: Philosophy and Ecology After the End of the World; Jeffrey Cohen, Prismatic Ecology: Ecotheory Beyond Green; Ray Brassier, “The Truth of Extinction” (from Nihil Unbound); Gayatri Chakravorty Spivak, “Planetarity” (from Death of A Discipline).
Instructor(s): A. Daniel
Area: Humanities.

AS.060.676. Facts and Fiction.
We will examine the vexed place of facts in literature and literary criticism. What are the historical and ideological preconditions for focusing on the study of people that never existed, and events that never occurred? And how did literary criticism privilege an analysis of meaning of works or literary moments, as opposed to verifiable, and reproducible facts? What does all of this tell us about the recent rise of quantitative literary analysis, and the strong resistance it has encountered? This discussion will include an examination of how different disciplines define notions like "fact," "argument," and "evidence"—in order to better understand our own discipline’s principles. In addition to a selection of eighteenth- and nineteenth-century novels yet to be determined, readings will include Émile Zola, Martin Heidegger, Wolfgang Iser, Hans-Robert Jauss, Hans-Georg Gadamer, Bertolt Brecht, Georg Lukács, Fredric Jameson, Theodor Adorno, Karl Popper, Mary Poovey and Franco Moretti.
Instructor(s): J. Rosenthal
Area: Humanities.

AS.060.682. The 21st Century University.
This seminar will focus on the changing contours of the American university in an era of economic instability and crisis. With a look back at the formative relationship between monopoly capitalism and the university in the 19th century, we will investigate the effect on the university of the unraveling of American economic power, with attention to the rise of administrative power and the loss of faculty governance, to the pressures of financialization, and to the contradictory situation into which the university is placed by student activism that calls its founding premises into question. We will also ask what intellectual life looks like under conditions of adjudicitation and de-politicization. Reading will include selections from Gerald Graff, Professing English, Christopher Newfield’s Ivy and Industry and Unmaking The Public University, Benjamin Ginberg’s The Fall of The Faculty, Stefano Harney’s and Fred Moten’s Undercommons, and [the x’s] The University Against Itself, as well as material produced by student and faculty activists in the university struggles of the last 5 to 10 years.
Instructor(s): C. Nealon
Area: Humanities.

AS.060.692. The Enlightenment, Aesthetics and Race.
This course examines the philosophical interplay between Enlightenment aesthetics and the construction of the concept of race. We will read texts in aesthetics and on human difference by Rousseau, Voltaire, Condorcet, Kant, Herder, Jefferson, Burke, Hume and others, in an attempt to see the points at which reflections on art and notions of human biological hierarchy intersect. Particular attention will be paid to the idea of the sublime as it pertains to early anthropological thought.
Instructor(s): M. Thompson
Area: Humanities.

Instructor(s): A. Daniel.

AS.060.800. Independent Study.
This course is a semester-long independent research course for graduate students. Students will have one-on-one assignments and check-in’s with designated faculty throughout the semester.

History of Science Technology

Classics

AS.040.145. Story and Argument from Homer to Petrarch. 3.0 Credits.
Stories entertain us, but we also tell them to make a point. This course will explore the ways that stories were used to make points by Greek and Latin authors from Homer to Petrarch, while also looking at, and comparing them to, the techniques of argument contemporaneous thinkers were developing. This is a course about narrative and rhetoric but also about how and in what way stories matter.
Instructor(s): C. Cannon
Area: Humanities.

History

AS.100.257. From Voice to Parchment: Media and Communication before the Printing Press, 800-1440. 3.0 Credits.
Epic traditions, call to Crusade, public curses, music of the troubadours: this course examines oral tradition and music—the "viral media" of pre-modern Europe—while tracing the impact of new recording technologies: early musical notation, manuscripts, and book production.
Instructor(s): J. Phillips
Area: Humanities, Social and Behavioral Sciences.

AS.100.326. From Blood Feud to Black Death: European Society in the High Middle Ages, 1000-1400. 3.0 Credits.
Explores the development of society and institutions in the medieval west including kingship and law, religion and difference, gender and ideology. Looks closely at social responses to change and adversity.
Instructor(s): A. Lester
Area: Humanities, Social and Behavioral Sciences.

AS.100.334. Billie Holiday and American Culture. 3.0 Credits.
A course examining introducing students to the life, times and music of Billie Holiday. We will read biographies, autobiographies, novels, and listen to music.
Instructor(s): L. Jackson
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

History of Science Technology

AS.140.674. Science and Medicine in Early Modern Atlantic World Culture.
How were changes in scientific and medical ideas reflected in cultural products of the early modern Atlantic world? We will study these ideas as they appeared in literary genres such as poetry, utopias, natural histories and travel narratives. Likewise, we will examine the visual culture of the Atlantic space for clues about changing conceptions about the natural world. Our expedition will encompass Anglophone, French and Hispanic regions, and will pay careful attention to hybrid cultural products that reflect the interaction between indigenous cultures and the (changing) European understanding of the natural world.
Instructor(s): M. Portuondo.

German Romance Languages Literatures

AS.211.295. Staging History: Theater and Society in the Courts of Europe. 3.0 Credits.
During the 17th century, the growth of the play-going public of London, Madrid, and Paris transformed theater into an exceptional channel for cultural expression. This course combines the study of theater history, including the spaces, audiences, actors, and playwrights, with the literary analysis of major plays by Christopher Marlowe, Ben Jonson, Lope de Vega, Pierre Corneille, and Madame de Villedieu. The main objective of this course is to examine and discuss early modern drama in light of contemporary life at court.
Instructor(s): F. Gomez Martos
Area: Humanities.

AS.211.333. The Holocaust in Film and Literature. 3.0 Credits.
How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — non-fiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Primo Levi and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Steven Spielberg). All readings in English.
Prerequisites: Cannot be taken by anyone who previously took AS.213.361
Instructor(s): S. Spinner
Area: Humanities.

AS.211.337. Wandering Jews? Jewish Migration in Film and Literature. 3.0 Credits.
Migration in all its forms has played a major role in shaping Jewish identity throughout history. From the Biblical exodus from Egypt through the beginnings of the diaspora under the Romans to the massive European Jewish immigration to America in the late 19th and early 20th centuries to the founding of the state of Israel, the migrations of Jews have also had a major place in Jewish literature. Going all the way back to the Bible, but focusing on the 20th century, this course will explore the ways in which literature and film represent the experience of migration, whether negative (compelled by expulsion or violence); positive (lured by economic or social opportunity); or somewhere in-between. We will examine poetry, plays, prose and film in Yiddish, German, Hebrew, and English (all in translation) on aspects of Jewish migration including the social and political factors motivating migration from the countryside to the shetel (town) to the city and from Central and Eastern Europe to the Americas, Palestine, and Israel. Issues under discussion will include: adaptation and assimilation; minority rights; what is the relationship of old and new or major and minor languages and literatures?; what is the place of tradition and heritage in a diasporic context? We will also consider the resonances between contemporary debates on migration and historical examples of these issues as they are reflected in literature and film.
Instructor(s): S. Spinner
Area: Humanities
Writing Intensive.
Instructor(s): S. Miglietti

a good deal of our time handling manuscripts and early printed books. We will discuss at length the history and the nature of dissent in the military and in relation to Israeli wars and will track changes in these relations. Significant portion of the course will be dedicated to the literary, cinematic and artistic aspects of Israeli dissent and their influence on Israeli discourse. We will explore the nature and role of specific genres and media such as the Israeli satire, Israeli television, newspaper op-ed and the recent emergence of social media. Students wishing to work in English exclusively for 3 credits should enroll in section one. Students who are fluent in Hebrew and are wishing to attend an additional hour-long Hebrew discussion session per week with Professor Cohen (time TBD in consultation with enrolled students) for 4 credits should enroll in section two.

Instructor(s): W. Stephens
Area: Humanities

Prerequisites: Students may not have taken AS.214.445.

AS.211.445. Rogues, Tricksters, and Saints: Boccaccio's Decameron. 3.0 Credits.
Boccaccio’s Decameron (1352), a collection of 100 short stories, ranges from the bawdy through the cynical to the romantic and even fantastic. It has inspired numerous writers, artists, musicians and film-makers. We will read Boccaccio’s masterpiece on its own terms and in relation to the development of story-telling, from gossipy “news” (novelle) to artistic short story, theatrical adaptation, literary fairy-tale, and the fantastic. The Decameron will be compared with its forerunners in saints’ lives, bawdy fabliaux, and moral exempla, and with its literary, theatrical, and cinematic imitators in Italy and Europe. Italian graduate students and undergraduate majors will attend an extra weekly meeting conducted in Italian.

Instructor(s): N. Stahl, Z. Cohen
Area: Humanities

Prerequisites: Students may not have taken AS.214.445.

AS.211.475. Inside the Writer’s Laboratory. 3.0 Credits.
How do books come to life? Behind every masterpiece is a tale of hard work, dialogue with other texts, and constant negotiations with social and material circumstances that evolve over time. This course opens up the “laboratory” of figures of the European Renaissance like Erasmus, Machiavelli, and Montaigne to explore the world of writerly culture in their manifold expressions, including authorial revision, self-translation, controversy, censorship, intertextuality, and forgery. Our own laboratory will be the Department of the Special Collections, where we will spend a good deal of our time handling manuscripts and early printed books. Course may be used to satisfy major requirements in both French and Italian sections.

Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.211.479. Dante’s Journey through the Afterlife. 3.0 Credits.
Dante’s Divine Comedy presents a complete picture of the medieval world-view in all its aspects: physical (the structure of the cosmos), historical (the major actors from Adam to Dante himself) and moral (a complete system of right and wrong). Dante shows how the Christian religion portrayed itself, other religions, the nature of God, humans, angels and devils, and human society. We will explore these topics both from the viewpoint of Dante’s own time, and in terms of its relevance to our own societal and cultural concerns.

Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.211.480. Religious Themes in Film and Literature. 3.0 Credits.
This course would be of interest to anyone who would like to learn about the intersection of religion and modern culture. At the center of the course will stand a close study of the representation of religious themes and their role in modern literature and cinema. The works which we will deal with are not considered religious and yet they include religious themes as part of their narrative, images, language or symbolic meaning. We will trace in various works from various countries and genre, themes such as: divine justice, providence, creation, revelation, the apocalypse, prophecy, sacrifice and religious devotion. We will also study the ways in which Biblical and New Testament stories and figures are represented in these works. The course will have a comparative nature with the aim of learning more about the differences between the literary and cinematic representations.

Instructor(s): N. Stahl
Area: Humanities.

AS.211.754. Modernist Primitivism.
This course will explore the aesthetics and politics of primitivism in European modernity, focusing on the visual arts and literature in German and Yiddish, but looking at the wider European context, including France and Russia. We will begin with the backgrounds of primitivism in Romanticism, looking especially at its ethnographic and colonial sources. We will then focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. Our central concerns will include: the attempt to create a modernist aesthetics grounded in ethnography; the primitivist critique of modernity; the place of primitivism in the historical avant-garde; the development of the notion of “culture” in modernity; and the aesthetics of modern ethnic and national identity. &nbsp;Key thinkers, artists, and writers to be considered include Herder; Gauquelin; Picasso; Wilhelm Worringer; Carl Einstein; Hannah Höch; and Emil Nolde.

Area: Humanities.

AS.212.205. Winter Is Coming: Writing and Rewriting French Dark Ages. 3.0 Credits.
This course will not aim at drawing the exhaustive literary landscape of French Middle Ages, neither will it be a Comparative Literature or History class. It may be considered a gateway to French Medieval literature, given that the Modern Fantasy has obviously improved the last decades, the latter being built as a rewriting of Medieval themes and Western European folklore. Looking at texts originally written in Old French, including prose and poetry, but also at the French Medieval iconography, we will try to understand the old roots of the Modern and so popular (but sacrificing) Fantasy Literature. Basic French will be required.

Instructor(s): M. Alhinho
Area: Humanities.
AS.212.478. Guillaume de Machaut: exploring medieval authorship in the digital age. 3.0 Credits.
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. The course aims to give students a thorough grounding in Machaut's literary and musical works, while also introducing them to digital tools to view and analyze original illustrated musical manuscripts of his work. Critical analysis of Machaut's work will be assessed not only through more traditional essay writing, but also through the creation of a multimedia digital edition of a section of his oeuvre using Omeka exhibition software. The course is designed so that no prior knowledge of musical notation or medieval French is necessary.

Writing Intensive.

AS.213.666. “To be continued” - Seriality in Literature and Other Media. 3.0 Credits.
Taught in German. By ending with the words "(To be continued) ["(Ist fortzusetzen)"]", Goethe’s Wilhem Meisters Wanderjahre not only reflects on the open form of the modern novel but also points toward serialized formats of fiction as they emerge in the 19th century due to advances in printing technologies. The publication of fiction in periodical installments in magazines or newspapers brings about the development of new genres (serialized novel/Feuilletonroman) along with specific serial narrative techniques. The cliffhanger e.g. – although invented earlier – becomes a prominent technique to create suspense. The course analyzes seriality with respect to narrative forms and genres across various media (literature, theater, film, TV) from the 19th century to the present. It further discusses serial aesthetics, seriality in structuralist and poststructuralist theory as well as the ambivalent status of seriality in the arts between avantgarde and popular culture. The course material will include: Stifter, Fontane, excerpts from the magazine “Die Gartenlaube”, Wagner, Freud, Kafka, Lévi-Strauss, Deleuze, Eco, Iser, “The Perils of Pauline” (serial, 1914), “Copycat” (Jon Amiel, 1995), “Twin Peaks” and current US-American TV series.
Instructor(s): E. Strowick
Area: Humanities
Writing Intensive.

AS.213.318. The Making of Modern Gender. 3.0 Credits.
Taught in English. Gender as we know it is not timeless. Today, gender roles and the assumption that there are only two genders are diligently contested and debated. With the binary gender system thus perhaps nearing its end, we might wonder if it had a beginning. In fact, the idea that there are two sexes and that they not only assume different roles in society but also exhibit different character traits, has emerged historically around 1800. Early German Romanticism played a seminal role in the making of modern gender and sexuality. For the first time, woman was considered not a lesser version of man, but a different being with a value of her own. The idea of gender complementation emerged, and this idea, in turn, put more pressure than ever on heterosexuality. In this course, we will explore the role of literature and the other arts in the making and unmaking of gender.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.321. Bodies and Pleasures. 3.0 Credits.
Taught in English. This course traces a literary history of sexuality from the Middle Ages to contemporary women's writing. We will analyze how sexual pleasure changed over time. In particular, we will discuss what role literature plays in the reproduction and transformation of bodily pleasures. The course explores how the pleasures of bodies are imagined in and through literature, but also whether words are bodies that give pleasure and perhaps even have their own pleasures. Authors discussed will include Boccaccio, Cleland, Rousseau, Schlegel, Kleist, Hoffmann, Novalis, Anim, Büchner, Freud, Rilke, Kafka, Rich, Foucault, Kristeva, Cixous, Giddens, and Winterson.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.616. The Aesthetic Discourse of Modernity.
When, in 1985, Jürgen Habermas published his lectures on The Aesthetic Discourse of Modernity, he pursued a double aim. He offered a critique of French Theory while at the same time providing a foundation for a normative category of modernity in the tradition of Hegel. Curiously there is one subject he does not touch on, though it seems necessary for a sufficient understanding of modernity: the realm of art and literature. This course will develop a critique of Habermas’ normative notion of modernity through re-readings of texts by Nietzsche, Benjamin, Horkheimer/Adorno, Derrida, Bataille and Foucault to elaborate an alternative category of aesthetic modernity. Taught in English. Reading knowledge of German and French is not required, but recommended.
Instructor(s): A. Geisenhanslueke
Area: Humanities.

AS.213.333. Shakespeare on the Opera Stage. 3.0 Credits.
From Rossini’s Otello to Cole Porter’s Kiss me Kate, from Verdi’s Macbeth to Leonard Bernstein’s West Side Story, the works of William Shakespeare have been an extraordinary source of inspiration for musical theatre. By exploring operatic adaptations of Shakespeare in different periods and contexts, this course will examine the ways in which composers and librettists have interpreted and reshaped the plays. The course, primarily focused on the 19th century Italian reception of Shakespeare and, in particular, on operas by Rossini and Verdi, will also consider the phenomenon within a broad transnational perspective up to include contemporary opera and musical.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.125. Freshman Seminar: Dangerous Liaisons: Words and Music Through the Ages. 3.0 Credits.
How do music and words interact? Do words have a priority on music or vice versa? Does music need words to be understood and interpreted? Are words filled with meaning by music? A variety of readings and musical examples will be discussed, including genres as diverse as medieval songs, madrigals, Romantic Lieder, opera, the American musical, and contemporary pop music. The seminar will include field trips to the Baltimore Museum of Art, the Meyerhoff Symphony Hall, the Peabody Institute, and the Evergreen Museum and Library. Students will also have the opportunity to attend a live HD broadcast of Mozart’s Don Giovanni from the Metropolitan Opera. No musical skills required; strong doses of curiosity most welcome.
Instructor(s): E. Refini
Area: Humanities.

AS.214.333. Shakespeare on the Opera Stage. 3.0 Credits.
From Rossini’s Otello to Cole Porter’s Kiss me Kate, from Verdi’s Macbeth to Leonard Bernstein’s West Side Story, the works of William Shakespeare have been an extraordinary source of inspiration for musical theatre. By exploring operatic adaptations of Shakespeare in different periods and contexts, this course will examine the ways in which composers and librettists have interpreted and reshaped the plays. The course, primarily focused on the 19th century Italian reception of Shakespeare and, in particular, on operas by Rossini and Verdi, will also consider the phenomenon within a broad transnational perspective up to include contemporary opera and musical.

Writing Intensive.
This course investigates how ecological factors inspired storytellers, influenced modes of literary publication, and determined reader responses in Europe before 1700. Students enrolling in section 2 will attend a supplementary one hour session at a time to be mutually decided and complete the work in Italian.
Instructor(s): T. Tower
Area: Humanities
Writing Intensive.

AS.214.477. Magic, Marvel, and Monstrosity in the Renaissance. 3.0 Credits.
Magic, Monstrosity, and Marvels or Wonders call into question what we see and experience: what is reality, what is illusion; what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the nature of reality were bound up with questions and issues very different from those of our time. With the exact sciences still being invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These and other works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors and graduate students (who should enroll in section 2) will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.479. Dante Visits the Afterlife: The Divine Comedy. 3.0 Credits.
Dante’s Divina comedia is the greatest long poem of the Middle Ages; some say the greatest poem of all time. We will study the Commedia critically to find: (1) What it reveals about the worldview of late-medieval Europe; (2) how it works as poetry; (3) its relation to the intellectual cultures of pagan antiquity and Latin (Catholic) Christianity; (4) its presentation of political and social issues; (5) its influence on intellectual history, in Italy and elsewhere; (6) the challenges it presents to modern readers and translators; (7) what it reveals about Dante’s understanding of cosmology, world history and culture. We will read and discuss the Commedia in English, but students will be expected to familiarize themselves with key Italian terms and concepts. Students taking section 02 (for 4 credits) will spend an additional four hours working in Italian at a time to be mutually decided upon by students and professor.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

Although naturally and historically intertwined, music and poetry tended to be described in the early modern period as competing rather than interacting. By looking at both literary and theoretical texts, the seminar aims to explore the ways in which this controversial relation is revealed by the interplay of poetics, rhetoric, and music theory. Reading materials will include classical sources (e.g. Plato, Aristotle, Pa.-Longinus, Quintilian) and their early modern interpretations. Special attention will be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni, whose works will be also discussed in the light of the contemporary development of musical genres (e.g. madrigals, opera). No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.640. Film Theory.
The seminar deals with film theory in its history and its current trends. We will examine structuralist, post-structuralist, feminist, Marxist, psycho-analytic and other theoretical approaches to understanding and interpreting the cinematic medium. We will look at several different genres of contemporary films from Italy, France, Spain, and Latin American Film, from auteur-films to independent documentary collectives, animation films to blockbusters. We will invite at least one film theorist and one filmmaker to class during the semester.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.214.684. The Commentary Tradition and the Birth of Literary Scholarship.
The practice of commenting on texts lies at the foundations of what we call today “literary criticism.” From the Bible to Dante’s Divine Comedy, from Greek and Latin poetry to medieval and Renaissance literary writings, the many questions posed by the commentators have contributed widely to the shaping of the modern notions of reading and interpretation. What do we look for when we read a text? How do we approach it? How does our reading interact with the author’s intention? To what extent is the commentator appropriating the author’s prerogatives? By exploring a wide range of case studies, the seminar aims to reassess the role of the commentary tradition within the development of literary scholarship and as a genre per se. Some sessions will take place at the Hopkins Special Collections and at the Walters Art Museum, where students will have the opportunity to work on both manuscripts and early prints, and select materials for their presentations.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.
Giambattista Vico's Principi di scienza nuova d'intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an "ideal" and "eternal" model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square "sacred history" (the presumed historical accuracy of the Bible) with "profane" or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this "old science" stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin

AS.215.312. The Great Latin American novel according to Carlos Fuentes. 3.0 Credits.
An investigation into the historical development of the great Latin American novel according to Carlos Fuentes new book on the subject. Course includes reading novels by machado de Assis, Garcia Marquez, Carlos Fuentes, Vargas Llosa, Cortazar and Piglia
Instructor(s): S. Castro-Klaren
Area: Humanities.

AS.215.315. Literature of the Great Recession. 3.0 Credits.
The Great Recession—sometimes called the financial crisis or the economic crisis of 2008—brought financial markets to a halt and created significant political turmoil across the North Atlantic. But its impact on culture, and literature especially, has often been ignored. This seminar will travel across Europe, from Dublin to Madrid, from London to Reykjavik in order to examine how literature has registered this most recent economic crisis. We will focus on how crisis is narrated and the ways in which literary works have managed to provide a voice for marginalized social, economic, and political demands.
Instructor(s): B. Seguin
Area: Humanities.

AS.215.353. Women Writing in Latin America: Prose and Poetry by Sor Juana, Mistral, Lisboa, Pizzamik, Castellanos, and other poets. 3.0 Credits.
The first objective of the course is to train students in close reading and analysis of literary texts. The second objective is to read prose and poetry by some of the canonical texts in the Latin American tradition written by women. Taught in English.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.361. A multidisciplinary Introduction to the Study of Latin America. 3.0 Credits.
The course brings together knowledges drawn from the fields of geography, history, anthropology, literature and art in order to provide access to the complexity of "Latin America". Students may opt do the reading in the original Spanish or Portuguese and also write in either language.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.406. Novelist Intellectuals. 3.0 Credits.
What does a novelist's op-ed about economics have to do with her literary writing? In what ways does a fiction writer's essays on the environment inform how we read her novels? What happens when we find the political opinions of a writer objectionable? This undergraduate seminar will consider what the Spanish writer Francisco Ayala termed "novelist intellectuals," that is, literary writers who actively participate in a society's public sphere. Considering writers from Madrid to New York, from London to Buenos Aires, we will ask how one should hold a novelist's fictional and non-fictional writings in the balance and explore ways of reading that allow us to consider the public intellectual side and the aesthetic side of a novelist together.
Instructor(s): B. Seguin
Area: Humanities.

AS.215.452. Che Guevara and Magical Realism. 3.0 Credits.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara's life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.489. Poetry in Latin America: A multilingual survey from 1200 to the present.. 3.0 Credits.
The course focuses on a presentation of the multiple traditions of poetry writing that make up the Latin American tradition from the Mexico poets at about 1200 to current writers in Latin America. Original poetry in Nahua, Maya-Quiche, Spanish and Portuguese will be read along side translations into English. Attention will be paid to translation theory.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.650. Mexico and the Invention of America.
Departing from O'Gorman, the course will entail a reconsideration of the discursive invention of Mexico-America. Anonymous, Sahagun, Clavijero, Humboldt, Dussel and Alzandua will conform part of the readings. Taught in English
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.
AS.215.653. The Poetics of Writing Prose and Poetry in Modern Latin America: Vallejo, Mistral, Borges, Paz, Lisboa, Castellanos and Pizarnik. This course will focus on the art of writing poetry, the art of reading poetry and the poetics of each of the poets whose work is the textual matter of the course.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

Instructor(s): E. Gonzalez.

AS.215.718. Contemporaneity and Crisis. How should one study contemporary literature and culture? Is “the contemporary” a period in and of itself? Does it require a distinct conceptual approach? This graduate seminar will examine various approaches that have emerged since Michel Foucault called his genealogies a “history of the present.” We will pay special attention to contemporary literature and culture’s most distinguishing feature today: crisis. Considering theories of crisis and “the contemporary” together, the course will explore how living in a time of overlapping crises—economic, political, social, cultural, environmental, and others—affects the way we interpret the world.
Instructor(s): B. Seguin
Area: Humanities.

AS.215.747. Borges in Theory. The course engages close readings of Borges critical essays and some of his fiction in order to establish the points of interpellation that Postmodern theory takes from or shares with Borges’s meditation on the problem of writing.
Instructor(s): S. Castro-Klaren.

Humanities Center
AS.300.113. Freshmen Seminar: Drama and Gender in Shakespeare’s England. 3.0 Credits.
In this seminar we will read male and female authored plays and discuss how they reflect contemporary social expectations in Tudor and Stuart England. Authors include William Shakespeare; Mary Sidney, Countess of Pembroke; Christopher Marlowe; Elizabeth Cary; Ben Jonson; and Mary Sidney, Lady Wroth.
Instructor(s): E. Patton
Area: Humanities.

Comparative Thought and Literature
AS.300.219. A History of Outer Space. 3.0 Credits.
Where did Outer Space come from? This course explores the history of Outer Space from the 18th century to today. In particular, it examines Outer Space as a place constructed by the interaction of political, militaristic, cultural, and scientific discourses. We will examine a wide variety of materials, from Star Trek to The X-Files to War of the Worlds in our quest to construct a history of the Final Frontier. There will be a field trip to the National Air and Space Museum.
Instructor(s): B. Stein
Area: Humanities
Writing Intensive.

Humanities Center
AS.300.283. Nineteenth-Century Science Fiction: Ecology, Utopia, and Catastrophe. 3.0 Credits.
This course will introduce students to some of the key texts of science fiction as the genre emerged during the nineteenth century. We will consider the intellectual contexts for the form’s development in Britain, France, and the United States, as well as its emerging narrative conventions. In particular, we will consider how early sci-fi writers used non-realistic modes to dramatize problems and discoveries were at once real and yet hard to fathom within the parameters of everyday cognition: deep geological time, alternative social arrangements, post-human landscapes. Texts may include H.G. Wells’ The Time Machine, Charlotte Perkins Gilman’s Herland, Samuel Butler’s Erewhon, Edward Bulwer Lytton’s The Coming Race, William Morris’ News from Nowhere, and Jules Verne’s 20,000 Leagues Under the Sea.
Instructor(s): S. Lecourt
Area: Humanities
Writing Intensive.

Comparative Thought and Literature
AS.300.302. Making Modern Poetry. 3.0 Credits.
Making Modern Poetry will explore the intersection and conversation between literature, art history, and graphic design by examining the rapid global development of poetry, art, and print from 1890 to 1930. We will read canonical modernist poets such as T.S. Eliot and Ezra Pound as well as those less familiar, like Mina Loy and César Moro, considering texts comparatively across national borders and through their relations to other arts. All readings will be in English.
Instructor(s): B. Gillespie
Area: Humanities
Writing Intensive.

AS.300.319. The Modernist Novel: Mann, Woolf, and Joyce. 3.0 Credits.
In this course, we will survey the major works of three of the greatest, most relentless innovators of the twentieth century—Thomas Mann, Virginia Woolf, and James Joyce—who explored and exploded narrative techniques for depicting what Woolf called the “luminous halo” of life.
Instructor(s): Y. Ong
Area: Humanities
Writing Intensive.

AS.300.320. Lover’s Discourse. 3.0 Credits.
Much of what we know about love and desire we owe to fiction’s ability to evoke these experiences. Consider for example that the publication, in Germany, of The Sorrows of Young Werther inspired young men across Europe to dress and behave just like him. We will study in this course a selection of love stories chosen because they break the mold and question their conventions. Taking a critical distance from these tales of seduction, we will examine not only the manifestations and meanings of love, but also the configurations of gender they inspire and reflect. Indeed, just as nowadays film and television represent, as well as mold, our identities as desiring subject, fictions from the eighteenth-century onwards have shaped our current understanding of gendered subjectivities. The readings for this seminar (all available in English) include: Austen, “Persuasion”; Balzac, “The Girl with the Golden Eyes” and “Sarrasine”; Barthes, “Lover’s Discourse”; Goethe, “The Sorrows of Young Werther”; Mann, “Death in Venice”; Rousseau, excerpts from “Julie or The New Heloise”; Sulzer, “A Perfect Waiter”, Winterson, “Written on the Body”.
Instructor(s): E. Ender
Area: Humanities.
AS.300.321. Rise of the Modern Short Story. 3.0 Credits.
A comparative tour of examples of short stories from three continents that emerged from earlier narrative forms in the 19th and 20th centuries. Attention will be given to new structural, rhetorical, and thematic concerns including the development of new sub-genres, e.g. fictions of detection, case histories, portraits of the artist, and the adaptation of several stories to newer media [at least 2 of the longer narratives translated to film will be screened]. A detailed syllabus of our readings will be available later in the summer; because there is no anthology that quite fits our needs, all the texts or translations, as well as critical and contextual notes will be supplied in digital forms. Note: there will also be an optional hour for questions & discussion TBA.
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.323. Shakespeare and Ibsen. 3.0 Credits.
William Shakespeare and Henrik Ibsen are the two most frequently performed playwrights in history, and both have been credited with reinventing drama. Shakespeare for the Elizabethan stage and Ibsen for the modern. In this course we will pair together plays by each author – those that stand in an explicit relation of influence as well as those that share a significant set of concerns – in order to investigate how each takes up and transform key problems in the literary, political, and philosophical tradition for their own historical moment. Plays to be studied: by Shakespeare, A Midsummer Night’s Dream, Hamlet, Othello, King Lear, The Tempest, A Winter’s Tale; by Ibsen, St. John’s Night, Hedda Gabler, Rosmersholm, The Wild Duck, The Master Builder, When We Dead Awaken.
Instructor(s): L. Lisi
Area: Humanities
Writing Intensive.

AS.300.329. Literature of the Everyday. 3.0 Credits.
The ordinary, the common, the everyday: why does literary realism consider the experiences of the average individual to be worthy of serious contemplation? In this course, we will read closely a set of novels by Flaubert, Mann, Dickens, Zola, Tolstoy, and Woolf from the period between 1850 and 1950 in which the development of realism reaches its climax. These novels explore the nature of work, family, the body, consciousness, and the changing relation between individual and tradition in modernity. We will situate these novels in their social, historical, and literary contexts, and establish a set of terms for the formal study of the novel as a genre (plot, character, setting, narrative, etc).
Instructor(s): Y. Ong
Area: Humanities
Writing Intensive.

Humanities Center

AS.300.335. Victorian Literature as World Literature. 3.0 Credits.
What does it mean to read literature in a global context? How are literary texts that we think of as products of distinct national cultures plugged into larger global systems – even if they seem unaware of it? In this course we’ll consider these questions through sustained readings of major Victorian literary texts such as Bram Stoker’s Dracula (1897) and Charles Dickens’s Great Expectations (1861). We will retrace how these books exercised cultural influence beyond the borders of Great Britain; how networks of trade, tourism, and imperial power brought authors from different cultures into contact with one another; and how Victorian texts have become a part of our culture in unexpected ways. Other primary texts may include Arthur Conan Doyle’s The Sign of Four (1890), the poetry of R. Chunder Dutt, and first-hand accounts of Oscar Wilde’s 1882 American lecture tour; critical readings will cover postcolonial theory, media theory, and histories of colonialism and urbanization.
Instructor(s): S. Lecourt
Area: Humanities
Writing Intensive.

Comparative Thought and Literature

AS.300.337. The Tragic Tradition. 3.0 Credits.
This course offers a broad survey of tragic drama in the Western tradition, from its origins in ancient Greece to the twentieth century. In weekly lectures and discussion sections, we will study the specific literary features and historical contexts of a range of different works, and trace the continuities and transformations that shape them into a unified tradition. Key questions and themes throughout the semester will include what counts as tragic, the tragedy of social and political conflict, the bearing of tragedy on the meaning and value of life, the antagonistic relation between world and humans, the promises and dangers of tragedy for contemporary culture. Authors to be studied: Sophocles, Euripides, Seneca, Shakespeare, Racine, Goethe, Ibsen, Strindberg, Chekov, Brecht, Pirandello, and Beckett.
Instructor(s): L. Lisi
Area: Humanities

AS.300.339. Introduction to Comparative Literature. 3.0 Credits.
This course offers an introduction to the history, theory, and praxis of comparative literature. We will read texts from some of the founding figures of the discipline and look at the most recent debates in the field, including translation studies, literary theory, and world literature, among others. Particular attention will be given to the methodologies and problems of studying literatures in different linguistic traditions and the relation between literature and other areas of thought and culture, such as philosophy, art history, and psychoanalysis. Case studies in comparative approaches to literature will provide concrete examples to our discussions.
Instructor(s): L. Lisi
Area: Humanities.
Humanities Center
AS.300.346. Forms of Moral Community: The Contemporary World Novel. 3.0 Credits.
Literary and philosophical imaginations of moral community in the post-WWII period (1950-2001). Texts include: Coetzee, Disgrace; McEwan, Atonement; Achebe, Things Fall Apart; Ishiguro, An Artist of the Floating World; Roy, The God of Small Things; Lessing, The Grass is Singing; Mistry, A Fine Balance; Morrison, Beloved; and essays by Levi, Strawson, Adorno, Murdoch, Beauvoir and Barthes on the deep uncertainty over moral community after the crisis of World War II. Close attention to novelistic style and narrative will inform our study of the philosophical questions that animate these works. What does it means to acknowledge another person’s humanity? Who are the members of a moral community? Why do we hold one another responsible for our actions? How do fundamental moral emotions such as contempt, humiliation, compassion, gratitude, forgiveness, and regret reveal the limits of a moral community? Cross listed with English.
Instructor(s): Y. Ong
Area: Humanities.

Comparative Thought and Literature
AS.300.349. Capitalism and Tragedy: from the 18th Century to Climate Change. 3.0 Credits.
In contemporary discussions of climate change, it is an increasingly prevalent view that capitalism will lead to the destruction of civilization as we know it. The notion that capitalism is hostile to what makes human life worth living, however, is one that stretches back at least to the early eighteenth century. In this class, we will examine key moments in the history of this idea in works of literature, philosophy, and politics, from the birth of bourgeois tragedy in the 1720s, through topics such as imperialism and economic exploitation, to the prospects of our ecological future today. Authors to be studied: George Lillo, Balzac, Dickens, Marx and Engels, Ibsen, Weber, Brecht, Arthur Miller, Steinbeck, Pope Francis, and contemporary fiction, politics and philosophy on climate change.
Instructor(s): L. Lisi
Area: Humanities.

Humanities Center
AS.300.363. Reading Judith Shakespeare: poetry and drama by women writers in Elizabethan England (ca 1558-1650). 3.0 Credits.
Virginia Woolf’s account of the thwarted career of Shakespeare’s hypothetical sister, Judith (in A Room of One’s Own) frames our reading of plays and poetry by Shakespeare and contemporary women writers, including Isabella Whitney, Elizabeth Cary, Mary Sidney, Aemelia Lanyer, Mary Wroth, and others. Students will create fictional biographies of “Judith Shakespeare” and her literary accomplishments. Cross listed with English, Theater Arts, Writing Seminars, and WGS.
Instructor(s): E. Patton
Area: Humanities
Writing Intensive.

AS.300.371. The Modernist Novel: James, Woolf, and Joyce. 3.0 Credits.
The purpose of this course is to survey works by three of the greatest, most relentless innovators of the twentieth century – Henry James, Virginia Woolf, and James Joyce – who explored and exploded narrative techniques for depicting what Woolf called the “luminous halo” of life. Selected works include: "The Beast in the Jungle," The Portrait of a Lady, Jacob’s Room, Mrs. Dalloway, To the Lighthouse, A Portrait of the Artist as a Young Man, and Ulysses.
Instructor(s): Y. Ong
Area: Humanities.
Center for Africana Studies
AS.362.201. African American Poetry and Poetics. 3.0 Credits.
In this course, we will follow the development of black poetry primarily as it has evolved in the United States. Beginning with the first published African American writers of the eighteenth century and ending with several important poets writing and performing today, we will consider the shape of the African American poetic tradition as commonly anthologized and as defined by our own theoretically-informed readings of the assigned literature. Attention will be given to both canonical and neglected literary movements and groups. Readings will include poetry and essays by Frances E.W. Harper, James Weldon Johnson, Langston Hughes, Gwendolyn Brooks, Amiri Baraka, Harryette Mullen, Tracie Morris, and others.
Instructor(s): N. Nurhussein.

AS.362.305. Black Periodical Studies. 3.0 Credits.
This course explores the ways in which nineteenth- and twentieth-century black periodical culture fostered (and, at times, hampered) the literary and cultural production of the African diaspora. Authors will likely include Frederick Douglass, "Ethiop (William J. Wilson)," Frances E.W. Harper, Pauline Hopkins, W.E.B. Du Bois, Marcus Garvey, Jean Toomer, Langston Hughes, Richard Bruce Nugent, and others.
Instructor(s): N. Nurhussein
Area: Humanities
Writing Intensive.

Study of Women, Gender, Sexuality
AS.363.302. Queer Identity?. 3.0 Credits.
What does "queer" mean? And who gets to say? This course examines tensions, ambiguities, and contradictions that have emerged in popular, political, and theoretical discourses over the past 25 years.
Instructor(s): J. Chilton
Area: Humanities, Social and Behavioral Sciences.

AS.363.326. Capitalism and Gender. 3.0 Credits.
This course explores a range of critical work relating capitalism to gender, sex, and sexuality: from theoretical accounts of witchcraft, marriage, and prostitution at the birth of capitalist social relations, to classic feminist debates around housework and reproduction, to contemporary thought on affect, finance, and the global dimensions of women's labor. As a centerpiece to the course we will read sections from Capital, interrogating the place of gender in Marx's text while developing a grasp of its arguments and influence.
Instructor(s): C. Westcott
Area: Humanities
Writing Intensive.

AS.363.445. Reading Judith Shakespeare: Women and Gender in Elizabethan England. 3.0 Credits.
If Shakespeare had a sister who went to London to be a writer, what would she write? Virginia Woolf's account of the thwarted career of Shakespeare's hypothetical sister, Judith, in A Room of One's Own frames our reading of plays and poetry by Shakespeare and contemporary women writers, including Isabella Whitney, Elizabeth Cary, Mary Sidney, Aemelia Lanyer, and Mary Wroth. Working within a selected historical context, students will create fictional biographies of "Judith Shakespeare," including her perspective on our identified authors and a sample or description of Judith's own literary accomplishments. Secondary course readings will reflect contemporary economic, political, and religious contexts.
Instructor(s): E. Patton
Area: Humanities
Writing Intensive.

Program in Museums and Society
AS.389.329. Author/Canon/Archive. 3.0 Credits.
Why are some literary works from the past reprinted, anthologized, and considered worthy of study, but not others? Why are some works "lost" and some "rediscovered," while others simply fall out of favor? Focusing on nineteenth- and early twentieth-century American literary culture, we will use rare books and archival materials from JHU collections to examine nineteenth- and early twentieth-century American literary culture, and we will use rare books and archival materials from JHU collections to examine Edgar Allan Poe, Walt Whitman, Emily Dickinson, Stephen Crane, Charles Chesnutt, and Zora Neale Hurston, along with a few authors you've never heard of, in terms of the relationship between authorship, stewardship, and status.
Instructor(s): G. Dean
Area: Humanities, Social and Behavioral Sciences.

AS.389.343. Edgar Allan Poe and His Afterlives. 3.0 Credits.
We will investigate the creative development and iconic afterlife of a canonical American author, Edgar Allan Poe, as a case-study in literary legacy and cultural heritage. What is the lifespan of a literary work, and how do works "stay alive" for later generations? Students will examine rare Poe materials and create a digital exhibition of Poe archives.
Instructor(s): G. Dean
Area: Humanities, Social and Behavioral Sciences.

AS.389.355. Literary Culture in the Nineteenth-Century Library. 3.0 Credits.
What did people actually read in the nineteenth century? What can we learn from their books and magazines? In this class, we read nineteenth-century English and American literary works and examine nineteenth-century literary objects from the collection of the George Peabody Library, to better understand the cultural and material environments within which literary works circulated. Featured writers likely to include Edgar Allan Poe, Charles Dickens, Harriet Beecher Stowe, Emily Dickinson, Mark Twain, Stephen Crane. Several field trips to the Peabody Library throughout the semester.
Instructor(s): G. Dean
Area: Humanities
Writing Intensive.

AS.389.359. Modernist Networks in the Archive. 3.0 Credits.
This class examines three American writers who built important and enduring networks, Ezra Pound, Gertrude Stein, and Langston Hughes. We will investigate the artefactual traces of their networks through recently acquired special collections materials and digital representations, in order to address questions about aesthetics and style, politics and power, race and gender, and what is and is not present in the literary archive.
Instructor(s): G. Dean
Area: Humanities.

Film and Media Studies
http://krieger.jhu.edu/film-media/index.html

The Film and Media Studies Program offers a comprehensive education in all aspects of the art, theory, and history of the moving image. We offer courses in both critical studies and filmmaking—including narrative, documentary, experimental film, animation and screenwriting—within a rigorous curriculum designed to foster critical understanding and historical knowledge. Student filmmakers and scholars explore the relationship of film and media to modern cultures, literatures, art, history, and philosophy in a new 20,000 square foot facility that offers an enhanced learning environment as well as all the tools available to professional filmmakers: a large sound stage, a recording studio,
computer labs, editing suites, a screening room, classrooms, and state-of-the-art equipment.

Our faculty, comprised of scholars and renowned filmmakers, is known for their dedication to teaching and to promoting a highly collaborative and nurturing environment. Our small size allows us to offer undergraduates an unusual amount of hands-on experience, intensive mentoring, and significant individual attention.

The majority of our students go on to attend graduate film school or to work in the film and media industries directly after graduation. Among our graduates are directors, screenwriters, producers, editors, actors, cinematographers, financial and marketing executives, film scholars and curators, entertainment lawyers, agents, digital technicians, and web designers. Our rapidly growing network of alumni provides graduates with essential support and mentoring, opening doors to a wide range of opportunities in the film and media industry. In addition, our undergraduates avail themselves of generous filmmaking grants and funding opportunities from a range of resources available only to FMS majors and minors.

Requirements for the B.A. Degree
(See also Requirements for a Bachelor’s Degree (p. 7).)

Because the department emphasizes the historical, cultural, and social context of cinema, Film and Media Studies is an excellent program for undergraduates interested in a broadly humanistic education as well as for those preparing for a career in the field. A departmental faculty advisor assigned to each undergraduate major helps plan individual courses of study. Undergraduates are encouraged to participate fully in all departmental activities.

In addition to core required courses, each student must complete either a critical studies or production track for the major. All courses applied toward the major must be taken for a letter grade and a grade of C- or better must be earned. The following courses are required for completion toward the major must be taken for a letter grade and a grade of C- or better must be earned. The following courses are required for completion toward the major.

Faculty

Director
Meredith Ward
film theory, media studies, popular culture theory, film history

Lecturers
Lucy Bucknell
Senior Lecturer: literature and film, film genres, screenwriting, American film

Linda DeLibero
Special Advocate for Alumni and Outreach: film culture and criticism, post-war and contemporary American cinema

John Mann
Senior Lecturer: film production, documentary film theory, experimental film

Laura Mason
Senior Lecturer: history and film, cultural history and media, French film

Matthew Porterfield
Lecturer: film production, screenwriting

Jimmy Joe Roche
Lecturer: digital video production

Karen Yasinsky
Lecturer: stop-motion and drawing animation, experimental film and video, visual theory

Affiliated Faculty
Anne Eakin Moss
Assistant Professor, Humanities Center

Suzanne Roos
Senior Lecturer; Coordinator, Intermediate French

Professor Emeritus
Richard A. Macksey

Courses

AS.061.105. Freshman Seminar: The Films of 1968. 2.0 Credits.
1968 was a year of protest and revolution around the globe, and a new audience of youthful cinephiles was hungry for movies that reflected the changing political and cultural landscape. The films of 1968 rose to the challenge, comprising a remarkable document of the times that collectively upended cinematic traditions and old ways of viewing with bold new forms and content. This course examines those cinematic visions—from classics like 2001: A Space Odyssey, Once Upon a Time in the West and Night of the Living Dead to influential groundbreakers like John Cassavetes’ Faces, Jean-Luc Godard’s La Chinoise and Lindsay Anderson’s If . . . —looking closely at individual films and examining both their contemporary contexts and their relevance today. Films will be viewed and discussed in class.
Instructor(s): L. DeLibero
Area: Humanities.

AS.061.140. Introduction to Cinema, 1892-1941. 3.0 Credits.
This course explores the fundamentals of film analysis and encourages students to embark on an exploration of the first half of our first century of movies. It teaches the basic elements of film form, as well as their use in films across the globe from the turn of the twentieth century through the start of World War II. Movements discussed include the silent comedy of Charles Chaplin, Buster Keaton, and Harold Lloyd, moody German Expressionism, the playful anarchy of Surrealism, the fundamentals of editing with Soviet Montage, the beauty of French poetic realism, the rule-breaking of Pre-Production Code cinema, the work of the young Alfred Hitchcock, and, of course, highlights of classical Hollywood filmmaking. Students must attend one screening weekly: either on Friday afternoon or Thursday evening. Lab fee: $50
Instructor(s): M. Ward
Area: Humanities
Writing Intensive.

AS.061.141. Introduction to Cinema, 1941-present. 3.0 Credits.
Introduction to Cinema provides an overview of American and international cinema from the post World War II era to the present. Through lectures and discussion, weekly screenings, and intensive visual analysis of individual films, we will explore the aesthetic, cultural, political, and economic forces that have shaped the art and industry of film over the past 70 years. Regular quizzes, writing assignments, class participation required. Mandatory film screenings.
Instructor(s): M. Ward
Area: Humanities
Writing Intensive.

AS.061.145. Introduction to Digital Video Production: Visual Language. 3.0 Credits.
This course is a study of the visual language used to create a moving picture. Through screenings and discussion of films, videos, and related readings, students will develop a visual critical facility and will demonstrate this facility in a few response papers to screenings and video projects. The course will focus on image construction, including composition, framing, movement inside the frame and use of light. Students will learn to be attentive to rhythm and tempo in picture editing and sound. In-class video assignments included, in which students will work in small groups of three. Lab fee: $100
Instructor(s): K. Yasinsky
Area: Humanities.

For current course information and registration go to https://sis.jhu.edu/classes/
AS.061.147. Introduction to Latin American Cinema. 3.0 Credits.
An introductory overview of the evolution of narrative feature filmmaking in Latin America, with an emphasis on comparing and contrasting myriad technical approaches to visual storytelling in different countries and eras. We address form and content, issues of identity, and politics and aesthetics. We will also discuss the influence, effect and dialogue between the films, their historical contexts and among each other. Filmmakers discussed include Cuarón, Martel, Silva, Alonso, Del Toro, Gutiérrez Alea, Reygadas, Salles, Subiela, Babenco, Sorín and Buñuel, among others. Co-listed with Program in Latin American Studies. AS.361.147. Film screenings on T 7:30-10:00 PM are mandatory. $40 lab fee. Instructor(s): R. Buso-garcia.

Area: Humanities.

AS.061.148. Storytelling for Film and Fiction. 3.0 Credits.
Through the analysis of narrative films, short fiction, myths, fairy tales, and ghost stories, and through the workingshopping of their own creative writing, students will explore the art and science of “a good story well told.” This course is an essential primer for upper-level screenwriting. Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.149. Movies We Love. 3.0 Credits.
Designed for non-majors, this course introduces students to some of the world’s great films. Through lectures and screenings scheduled at the Charles Theater or on Homewood campus, faculty from Film and Media Studies and other disciplines will present films they find uniquely significant and explore what makes them great. Lectures will take place in the state-of-the-art screening room at the new Film Center in Station North, a five-minute ride from Homewood on the JHU Shuttle. Instructor(s): L. DeLiber; L. Mason
Area: Humanities.

AS.061.150. Introduction to Film Production. 3.0 Credits.
This course introduces students to basic considerations of shooting 16mm film. Through lectures and practice, the course approaches the basics of light meter readings, basic camera operations and shot composition. The course also highlights specific readings from classical film theory to augment weekly shooting exercises. Each week students, working in groups, shoot film exercises, providing a general overview of film production. For the final project, each group shoots and edits (physical edits) a short (3-5 minutes) film on 16mm black and white reversal film stock. Lab fee: $200 Instructor(s): M. Porterfield
Area: Humanities.

AS.061.152. Introduction to Digital Video Production. 3.0 Credits.
This course introduces students to the world of digital filmmaking. Through screenings, production assignments, and in-class labs, students will develop proficiency in digital cameras, sound recording devices, and software. Students will work individually and in groups to produce several video projects. For their final projects students will pitch an idea and develop a more complex film. Lab fee: $100 Instructor(s): J. Roche
Area: Humanities.

AS.061.156. Lights, Camera, Action: On Location. 1.0 Credit.
This mini-course will explore the role of place in film; location not merely as setting, but as character, condition, mode of thought. Real and imagined, found and constructed worlds will be considered. Are all cinematic worlds virtual? In-class screenings and an emphasis on discussion over lecture. This 1-credit course will be graded Pass/Fail. Perfect attendance required. Class meets September 19, 26, October 3, 10.
Instructor(s): J. Mann; L. Bucknell
Area: Humanities.

AS.061.157. Lights, Camera, Action: Hidden Worlds. 1.0 Credit.
This mini-course will explore how cinema makes the invisible visible; how image and audio can reveal not only cultures and practices “invisible” to the mainstream, but also nuance and dimension in a world we only imagine we already see and hear. The camera is itself, in Pater’s words, the “sudden light [that] transfigures a trivial thing.” Fiction, nonfiction, and experimental films will be considered. In-class screenings and an emphasis on discussion over lecture. Four short written responses. Perfect attendance required.
Instructor(s): J. Mann; L. Bucknell
Area: Humanities.

AS.061.158. Lights, Camera, Action: David Lynch. 1.0 Credit.
An introduction to the basics of film analysis, through the work of contemporary American film and television director David Lynch. Though essentially cinematic, Lynch’s mysterious, dreamlike style, as evidenced by movies like Wild at Heart, Blue Velvet, Mulholland Drive, and Twin Peaks: Fire Walk With Me, invites a multitude of entry points for discourse. Short weekly written responses, in-class screenings, and emphasis on discussion over lecture. No prior experience in film studies required.
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.159. Lights, Camera, Action: Hitchcock. 1.0 Credit.
An introduction to the basics of film analysis, focusing on the work of the “Master of Suspense,” Alfred Hitchcock. Short weekly written responses, in-class screenings, and emphasis on discussion over lecture. No prior experience in film studies required. This one-credit course will meet on Sept. 21, Sept. 28, Oct. 5, and Oct. 12 and will be graded pass/fail.
Instructor(s): L. Bucknell; L. DeLiber
Area: Humanities.

AS.061.161. Introduction to Short Film Making. 3.0 Credits.
In this introductory course, students will create short films using digital camera equipment, sound recording devices and the film editing software program, PremierePro. We will watch a variety of films in class; hold readings and discussions based on assigned text, take technical workshops on sound, lighting and use a short workshop on 16mm film. We will study the history of filmmaking, with a strong focus on the avant-garde and experimental genres. We will also learn about current movements and trends that have developed throughout the world and have the opportunity to meet with Baltimore filmmakers in class. Students will finish the course with a greater understanding of the line of cinema and will have learned a range of techniques to create, experiment and develop their own language of visual storytelling. We will discuss, engage, explore and most of all have fun! No prior experience with film or video required.
Instructor(s): M. Rorison
Area: Humanities.
AS.061.163. Lights, Camera, Action: Screwball Comedy. 1.0 Credit.
An introduction to the basics of film analysis through a sampling of Hollywood screwball comedies from the thirties. In-class screenings and short written assignments. Emphasis on discussion over lecture. No prior experience in film studies required. This 1-credit course will meet September 17, 24, October 1 and 8, and be graded pass/fail. Perfect attendance is required.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.165. Lights, Camera, Action: Horror. 1.0 Credit.
An introduction to the basics of film analysis through a sampling of classic horror. In-class screenings and short written assignments. Emphasis on discussion over lecture. No prior experience in film studies required. This 1-credit course will meet September 16, 23, 30, & October 7, and be graded pass/fail. Perfect attendance is required.
Instructor(s): L. Bucknell

AS.061.201. Intermediate Video Production: Sound Art for Filmmakers. 3.0 Credits.
David Lynch once said “Films are 50 percent visual and 50 percent sound. Sometimes sound even overplays the visual.” This course is dedicated to challenging young filmmakers to conceptualize sound as sculpture and mine the evocative potential of sonic arts. Students will learn and create with a variety of modular synthesizers, digital recorders, and samplers. We will listen to a diverse spectrum of audio content such as musique concrète, plunderphonics, sound collage, and sound design for radio and cinema. Throughout the semester students will create several “imageless films.” In the final month of the semester, students will choose one sound project to refine and incorporate moving image. $100 Lab Fee.
Prerequisites: AS.061.150 OR AS.061.152
Instructor(s): J. Roche
Area: Humanities.

AS.061.202. Intermediate Film Production: Personal Essay Film. 3.0 Credits.
In this course students will consider variations of the personal essay film, wherein filmmakers explore their own experiences, both real and imagined. These films constitute dialogues between filmmaker and world using subjective approaches, including but not limited to first person narration. Students will make a short (4-6 minutes) 16mm film from original and possibly archival footage; their own filmic essays based upon personal experiences. We will look at the works of several essay filmmakers including Ross McElwee, Jean Luc Godard, Chris Marker, and Su Friedrich.
Prerequisites: AS.061.150
Instructor(s): J. Mann
Area: Humanities.

AS.061.205. Introduction to Screenwriting. 3.0 Credits.
In this course we will explore the basic principles of visual storytelling in narrative film as they apply to the design and execution of a screenplay. During the course of the semester, each student will work on different writing exercises while they search for their specific story and the best way to approach it. We will study different narrative tools and methods of screenwriting by analyzing films to ascertain how they work or fail to do so at script level. Through in-class critiques, group discussions and one-on-one sessions, students will apply these techniques to their own work as they undergo the process of designing, breaking down, outlining and writing a screenplay for a short film. In-class analysis and debate on the strengths and challenges posed by the students’ work will help shape the thematic emphasis of the second half of the course.
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.061.211. Intermediate Film Production: First Person/Third Person Essay Film. 3.0 Credits.
Each student shoots an essay film (16mm color and/or black and white) written either in first person or third person, or perhaps, both. The third person essay incorporates the ideas of various authors while the first person film is written chiefly from personal experience. Each film should run between 4-8 minutes. Lab Fee: $200. This course satisfies the Intermediate Film Production requirement.
Prerequisites: AS.061.150
Instructor(s): J. Mann
Area: Humanities.

AS.061.212. Assembling an Idea: The Documentary Process. 3.0 Credits.
A compelling documentary begins with a compelling idea. (The term “documentary” for our purposes, resists categorization.) But by the time that documentary is completed, the initial idea has likely gone through a radical and rigorous exploration. The initial idea may emerge from a sudden thought, a chance encounter. It is the moment when a constellation begins to form. The final driving idea behind a documentary may bear little resemblance to that first thought. We will begin with each of your ideas, perhaps, little more than a vague feeling. The painter, Paul Klee, wrote that “drawing is taking a line for a walk.” In this course we will take each of your ideas for a walk, imagining why and how the idea might be realized. The why and the how will involve imaginative thinking, seeking additional ideas that coalesce with that first thought. In this way we begin to assemble the constellation that is your idea. To some degree we are less concerned with the initial idea than the subsequent ideas it suggests. The process may involve archival image research, readings, your own writing, listening to music and sounds, and sometimes, just letting your idea wander off on its own. Our goal is to experience the growth of an idea into an articulated intention. That intention is then expressed through a plan incorporating visual style, sound design, and, if appropriate, text. There is no production requirement for this course. There is no requirement of film or video experience. You are required to bring with you an idea that has found you. The point of all of this is for each of you to engage, on a deep and thoughtful level, with an idea that has asked for your help.
Instructor(s): J. Mann.
AS.061.213. Screening Difference: Race in American Film. 3.0 Credits.
This course will explore how race and ethnicity have been represented in American film from the early 20th century to the present. Through in-class screenings, open discussion, and short, analytical written responses, students will learn the basics of film analysis and improve their critical thinking skills. No prior experience in film studies required.
Instructor(s): L. Meistrich
Area: Humanities
Writing Intensive.

AS.061.219. Special Topics: Animation Workshop. 3.0 Credits.
Students will produce several animations using hand-made techniques, including drawing animation, paper puppets and stop-motion. Screenings and readings will provide a historical and conceptual context to the exploration of animation as an experimental technique within both narrative and non-narrative works.
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.220. Special Topics: Silent Classics. 3.0 Credits.
A survey of silent era masterpieces. From Murnau's horror film Nosferatu to Keaton's slapstick comedy Sherlock Jr to Dreyer's great tragedy The Passion of Joan of Arc, these are films of exceptional beauty and artistry. Chaplin, Eisenstein, von Sternberg, and others also considered. Recommended course background: AS.061.140 or AS.061.141 or AS.061.145. Lab Fee: $50. Counts toward 200-Level critical studies requirement.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.221. Special Topics: Producing the Independent Film. 3.0 Credits.
This class will guide students through the process of producing an independent film in the United States. The chronology of lectures and coursework will follow the lifeline of a project, from conception through financing and development, production, postproduction, marketing, and exhibition. Students will learn how to package and pitch projects, budget and schedule a screenplay, develop a financing plan, supervise production and post-production, and mount a viable festival and distribution strategy. Lab Fee: $40
Instructor(s): M. Porterfield.

AS.061.222. Analyzing Popular Culture. 3.0 Credits.
This course provides an introduction to the critical analysis of popular culture through the major theoretical paradigms of media and cultural theory. The teaching method uses a combination of media studies and sociology to explore popular culture and is designed to encourage students to become more active critics. The course presents a range of media from contemporary popular music to film and television. Smaller subjects include the teen "pop" love song, the politics of representation, and the forming of subcultures.
Instructor(s): M. Ward
Area: Humanities
Writing Intensive.

AS.061.224. Special Topics: The Business of Film. 3.0 Credits.
Law and economics shape the movie business. This course will survey the legal doctrine and financial concepts of film production and distribution, providing both an overview of one particular industry (i.e., Hollywood) as well as an introduction to fundamental principles applicable to any industry. $40 Lab fee
Instructor(s): L. Meistrich
Area: Humanities.

AS.061.226. Special Topics: Writing About Film. 3.0 Credits.
A workshop that focuses on writing critical and analytical essays about movies recent and classic. Students will write progressively longer and more complex essays—submitting working drafts and making revisions—and participate in critiques and discussions of one another's writings. Fulfills Film and Media Studies expository writing requirement. Lab Fee: $50
Instructor(s): L. Mason
Area: Humanities
Writing Intensive.

AS.061.228. Almost Grown. 3.0 Credits.
An introduction to the major films and directors of the French New Wave that is also designed to help students consolidate their skills in the analysis of film. The course will examine the origins of the French New Wave, looking at the directors as critics and as passionate film fans, along with the institutional and historical context of the films. It will also ask how the French New Wave changed the process of filmmaking, and transformed the way we think about the work of the director—inspiring more vocations in filmmaking than any other movement in cinema history. Film screenings T 7:30-10:00PM. $40 lab fee.
Instructor(s): S. Roos.

AS.061.231. In Others' Words: Documentary as Collage. 3.0 Credits.
"In Others Words" explores an enigmatic relationship between images and words. Each student creates a short, 16mm film incorporating their filmed images with texts written by others (fiction and non-fiction). Guided by the notion of collage, these films become a new form of documentary, bringing together seemingly disparate elements to reconfigure our ways of seeing. Drawing from the photo-text works of Wright Morris and C.D.Wright's poetry, the course adheres to Paul Virilio's suggestion: "sometimes the best way to see better is to look differently." This is not about B roll. $125 lab fee.

Prerequisites: AS.061.150
Instructor(s): J. Mann.

AS.061.232. Intermediate Video: Dreams, Psychosis, and Altered States in Cinema. 3.0 Credits.
In this production course, students will create multiple video projects that reflect the representation of dreams, psychosis, and altered states in cinema. We will screen and deconstruct a variety of feature films, video artworks, and music videos to understand the mechanics and language of subjective realism as a narrative form. We will trace this stylistic lineage from its roots in art house cinema to its rise as an accepted Hollywood modality. We will also explore editing and software techniques that will further students' ability to create stunning works of strange beauty. Basic proficiency with digital cameras and editing is required. This class fulfills the intermediate film production requirement.
Instructor(s): J. Roche
Area: Humanities.
AS.061.233. Intermediate Digital Video Production: Adobe After Effects. 3.0 Credits.
This course will serve as an introduction to Adobe After Effects. Students will learn a variety of motion graphics techniques such as digital character animation, rotoscoping, motion tracking, chroma key compositing and automating 3D cameras. Through screenings and discussions students will gain insight into the myriad of ways After Effects is used in Film and Television. Throughout the semester students will complete several short video art projects.
Prerequisites: AS.061.152OR AS.061.145
Instructor(s): J. Roche
Area: Humanities.

AS.061.234. Intermediate Digital Video Production: Experimental Forms. 3.0 Credits.
This Production course focuses on key movements in both Experimental Film and Video Art. Production assignments will arise from: Structural Film, Performance Art, Lyrical Film, Psychedelic Video, and Experimental Ethnography. Students will explore how these movements developed outside (and at times in opposition to) the mainstream, and became integral to the aesthetics of contemporary art, film, and television. Students will think critically about the personal and societal function that video artwork serves, and gain insight into the history of Experimental Film. At the end of this course, students will have a more nuanced understanding of contemporary media art, and they will be more proficient in video editing and cinematography, which they can apply to future work on: commercials, music videos, webcasts, and feature films.
Prerequisites: AS.061.152 OR AS.061.145
Instructor(s): J. Roche
Area: Humanities.

AS.061.239. Film in the Age of Trump. 3.0 Credits.
As the unprecedented ascendency of Donald Trump has changed the world in record time, so has it changed the way we look at the world. Along with the attendant political and social implications, the rise of Trump has engendered altered perspectives on art and entertainment, posing questions about the power of film in an age of protest. This course will explore how films speak to us differently in this time of political and social upheaval. Through weekly screenings and discussion, a range of JHU faculty will look with fresh eyes at both classic and recent films—from Casablanca to Selma—whose narratives take on new meaning in the age of Trump. In addition, a series of renowned contemporary filmmakers will share their recent work and address how film and filmmaking have changed since the 2016 election. Course requirements are attendance, participation, and 3-4 short response papers. Screening and discussion will take place Wednesdays in in the beautifully restored Parkway Film Center, a historic 1915 movie theater that opens in Station North in spring, 2017. $50 lab fee.
Instructor(s): L. DeLibero.

AS.061.242. Teens On Screen. 3.0 Credits.
This course will explore changing representations of adolescence in films from the 1950s to today across a range of mainstream Hollywood, independent, and international films. We'll examine how this dynamic and misunderstood genre shapes and reshapes perceptions of youth, and we'll discuss the frank and sometimes explosive ways teen films address difficult questions of race, class and sexual identity, often in the guise of "pure" entertainment. Recommended Course Background: Introduction to Cinema I or Introduction to Cinema II, or permission of instructor.
Instructor(s): L. DeLibero
Area: Humanities.

AS.061.244. Film Genres. 3.0 Credits.
A survey of American genres: the Western, the Gangster Film, Science Fiction, Horror, Comedy, Melodrama, and others. Twice-weekly screenings. Short film responses and a final paper, 10pp.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.245. Introduction to Film Theory. 3.0 Credits.
This course offers an introduction to the major paradigms of film theory, with work ranging from Sergei Eisenstein to Andre Bazin. Frequent film screenings are designed to help illustrate film theory concepts. Designed around one operative question, “What is cinema?” the course explores the varied and divergent answers provided by the great thinkers of the cinema in the past century. Students are expected to enter the course ready to engage in discussion. Film screenings W 7:30-10:00 PM.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): M. Ward
Area: Humanities
Writing Intensive.

AS.061.248. American Masterpieces. 3.0 Credits.
An introduction to Hollywood cinema and the basics of film analysis through the close reading of selected 20th century American classics including Citizen Kane, On the Waterfront, Annie Hall, and others. Emphasis on discussion over lecture. Several short film responses and an essay with optional revision.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.249. Film History: Sound and Scores. 3.0 Credits.
This course will explore the history of film sound from the silent film era to the present day, examining the narrative and aesthetic purpose as well as the functionality of film music. The course will trace the history and development of film music and the process of film scoring through reading, lecture, and film viewing to explore how music and its relationship to film has changed over the last century. Class includes discussion and evaluation of different compositional styles and their purposes. $40 lab fee.
Instructor(s): H. Robbins; T. Dolby.

AS.061.252. School Daze. 3.0 Credits.
Teen angst and togas in comedies of American youth from The Graduate to Animal House to Lost in Translation. Course will provide an introduction to the basics of film analysis with an emphasis on discussion over lecture. Several short film responses and an essay with optional revision. No prior experience in the subject required.
Instructor(s): L. Bucknell; L. DeLibero
Area: Humanities
Writing Intensive.

AS.061.263. Poetry and the Moving Image. 3.0 Credits.
Using P. Adams Sitney's text: The Cinema of Poetry, this course will explore the relationship between poetry and the moving image. When experimental film began to define itself in the 1950s and 60s the terms cine-poem and film-poem were ubiquitous as identifying avant-garde cinema. Poetic structures in the moving image will be studied in relation to language, images and formation of meaning. Students will independently research a poet who greatly inspired and influenced a filmmaker/moving image artist and write on that filmmaker's work. One moving image project will be undertaken and completed during the semester as well. Weekly assignments will include screenings, reading, writing, and or video work.
Instructor(s): K. Yasinsky
Area: Humanities.
AS.061.264. Acting in Film. 3.0 Credits.
This class is intended for all students of film with the goal of providing them with the experience of acting in film, in both dramatic and comedic roles. The ability of the students as actors is not the focus. Instead they will understand how the writer, director and cinematographer can influence, inhibit or enhance performance. The students will explore practical methods used on set, different approaches to acting and working with directors, writers and crew. It will also include discussions of professional performances and screenings. Students must have strong verbal skills and be prepared to actively and regularly engage in acting exercises, including improvisation and reading aloud.
Instructor(s): K. Beller
Area: Humanities
Writing Intensive.

AS.061.265. Comedic Storytelling for Page and Screen. 3.0 Credits.
A workshop devoted to the art and science of a funny story well told. Students will analyze comic fiction, film, and classic television, and create their own short, comic works. 220.105, 220.106, or 061.148 recommended. This course satisfies the Film and Media Studies screenwriting requirement.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.270. Writing for the Screen. 3.0 Credits.
An Introduction to dramatic writing for film. Weekly film screenings. Several short, written exercises in story, scene, and character design, and a final complete script for a short film. AS.061.148 Storytelling for Film and Fiction or Introduction to Fiction and Poetry strongly recommended. This course is the equivalent to AS.061.205 Introduction to Dramatic Writing.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.271. Inside Station North TV/Webcast Show. 3.0 Credits.
Students will create a series of short episodes for a TV magazine show about the Station North Arts District surrounding the Film Centre. The pilot for this series was made by students of JHU and MICA in Spring 2016. You will be part of a small crew interviewing its resident artists and musicians, and covering local performances and events. You will get hand-on experience with background research, writing, liaison, shoot planning, operation of camera and sound equipment, and editing. You will also be involved in the marketing of the show, and broadcasting it via the internet or with the help of networks and distribution partners. A number of guest instructors from different professional fields will be on hand to help during classes. [NOTE: much of the activity around this class takes place outside of Friday class hours. There is online correspondence all week about research, planning and editing. You will need to have most of your Fridays completely free, and shoots may run late into the evening. You will need to organize some of your own transportation and food and drink. There are JHU and MICA shuttles to and from Station North; it is a relatively safe neighborhood, and you will generally be in a group, but you need to be aware of the risk of walking around late at night with valuable equipments!] Lab fee: $100
Prerequisites: AS.061.140 OR ( AS.061.141 AND AS.061.152)
Instructor(s): T. Dolby
Area: Humanities
Writing Intensive.

AS.061.301. Advanced Film Production: The mongrel film. 3.0 Credits.
In this course, each student is responsible for the design and production of a short 16mm film. The film may be shot on color and/or black and white negative stock. The format is Super 16mm. The film may include sync and/or non-sync sound. The idea behind the "mongrel" film is for the student to incorporate a variety of genres within this project. These may include stylistic elements typically associated with documentaries, experimental, narrative, animation, and lost and found films. $125 Lab fee
Instructor(s): J. Mann
Area: Humanities.

AS.061.309. Advanced Video Production: Influence and Anxiety. 3.0 Credits.
This is an advanced production course focusing on artistic influence. Each student will be working with and around a filmmaker who greatly inspires and influences their work. The evolution of style will be considered. The work will include screenings, readings, and short projects all feeding into a final movie. This course fulfills the advanced production requirement. Students should have completed an introductory and Intermediate Digital Video Production course prior to enrollment. $100 Lab fee
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.313. Story and Character Design: for the Screenplay. 3.0 Credits.
A workshop devoted to developing dimensional characters and compelling, original stories. Weekly screenings, short written exercises, and a longer final project. Weekly screenings M 7:30-10 PM.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.314. Screenwriting: Introduction to Scene. 3.0 Credits.
In the first half of the semester, students will be presented with prompts from a variety of media photography, literature, popular music, et al. intended to stimulate the imagination and spark ideas. These ideas will be explored, cultivated, and mined for their visual information, with emphasis on information that might appear in their filmic representation. In the second half of the semester, students will search independently for cinematic ideas with an eye toward the details of a scene. As students identify scenic elements, their ideas will be developed and carried through the traditional workflow: outline, scenario, and screenplay. At the end of the semester, students will have prepared short scripts ready for pre-production. Lab fee: $50
Instructor(s): M. Porterfield
Area: Humanities
Writing Intensive.

AS.061.316. Characters for the Screenplay. 3.0 Credits.
A workshop devoted to creating complex characters for the screen. Students will examine memorable film characters from the silent era to the present, with attention to how these characters are revealed through both the drama and the mise en scene. Weekly screenings. Short critical and creative written exercises and a longer, creative final project. $50 Lab Fee.
Prerequisites: AS.061.148 OR AS.061.270 OR AS.061.205
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.
AS.061.322. Women in Popular Film and Television. 3.0 Credits.
A survey of female beauty, villainy, comedy, and humanity in film and television from the silent era to the present. $50 lab fee.
Prerequisites: AS.061.140 OR AS.061.141 or permission of instructor.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.325. The Westerns of Ford, Leone, & Peckinpah. 3.0 Credits.
A study of three masters – John Ford, Sergio Leone, and Sam Peckinpah – their impact on the genre and on each other. Lab fee: $40
Prerequisites: AS.061.140 or AS.061.141 or Permission
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.328. Gangster Films. 3.0 Credits.
The bad guy as hero from Little Caesar to Goodfellas. Film screenings Th 7:30-10:00 PM, Sun 7:00-9:30 PM. Lab fee: $40.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.335. Monster Films. 3.0 Credits.
$40 and one core course or permission required. Monstrous others and monstrous selves in classic 20th century horror.
Prerequisites: AS.061.140 OR AS.061.141 or permission of instructor is required.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.339. A Cinema Of Anxiety: Film Noir. 3.0 Credits.
Postwar film noir: Fuller, Huston, Lang, Mann, Tourneur, and others.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.341. The Wilderness Within and Without. 3.0 Credits.
Savage landscapes and savage states of mind in films by Ford, Herzog, Boorman, Weir, and others. Lab fee: $50 Counts toward 300 or 400-level critical studies requirement.
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.348. Acting and Screenwriting for Narrative Productions. 3.0 Credits.
This pre-production course brings together student filmmakers from Maryland Institute College of Art (MICA) and from Johns Hopkins University (JHU), providing intensive training in the crucial aspects of preparing to shoot a successful narrative film. Students work with a professional screenwriter, allowing students to hone and improve their existing screenplays, practice the elements of writing for film, and learn how to do a script breakdown. Workshops on working with actors, taught by a professional actor, will teach students the ins and outs of casting and directing. Supplemental workshops will cover elements of pre-production such as budgets, production schedules, call sheets, and legal issues. Film screenings will train students to see films as festival curators do, with an eye toward what constitutes exciting, innovative filmmaking. This course is the prelude and prerequisite to Narrative Filmmaking II, a production course during which students will collaborate to shoot a short narrative film based on student screenplays.
Instructor(s): K. Beller
Area: Humanities.

AS.061.352. Media Workshop. 4.0 Credits.
Media Workshop mixes the theory and practice of media-making in a workshop environment that allows upper-level students to hone their craft as filmmakers. Based upon the idea of a creative community, the workshop is an advanced lab designed to give students a place to share ideas, create new work, and receive intensive and supportive critique. Work produced in this class will consist of non-narrative experimental exercises, exploring issues of the image, editing, perception, and sound. Students will read filmmaker-theorists like Sergei Eisenstein, Robert Bresson, Stan Brakhage, Maya Deren and Wim Wenders and will produce creative work inspired by the texts.
Instructor(s): M. Porterfield; M. Ward
Area: Humanities.

AS.061.353. Documentary Film Production. 6.0 Credits.
"7 in the City" is a multimedia journalism project that explores what it is like to be a seven-year-old growing up in Baltimore today. The project is modeled after the legendary British documentary Up series. The goal is to screen and publish the resulting documentaries and articles in partnership with a major media outlet. The class is being taught in partnership with the Hopkins MA in Writing Program. Students in this class will produce short documentaries (4 to 6 minutes) while the writing students will produce a series of articles and in-depth written profiles of seven year olds in different neighborhoods across Baltimore—focusing on public health issues, race, class, educational and economic disparities.
With an eye toward documenting the ethics and social justice issues surrounding disparate childhoods in the city, film students will gain hands-on practical experience in filming, editing, and producing a short documentary about a particular 7 year old living in the city. This course counts toward the advanced production requirement for FMS majors and minors in the production track. Students should anticipate extensive work outside of the scheduled class time.
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.356. Narrative Productions. 6.0 Credits.
This course is designed to immerse students in the creative and practical challenges of narrative production. It is our hope that you will emerge with a greater understanding of the professional structure of a film crew, as well as with an understanding of the collaborative creativity necessary to make a narrative short. We will work hard, but if you are interested in video, film and filmmaking, we guarantee you will learn a great deal. In this course students will be divided into teams, each of which will produce a short narrative film based upon a script written by a fellow student. All films will be fully student produced. Students will fill all principal roles: scripting, casting, producing, directing, designing, shooting, sound recording, and editing. Throughout the course, instructors will expose students to relevant films and film professionals in order to illuminate the key creative roles necessary in the making of any film. Instructors will serve as guiding role in the production of student projects, offering technical information and advice. Students will be evaluated not only on the films they produce, but also on their ability to create and contribute to the collaborative art of filmmaking. Lab fee: $100
Prerequisites: Prereq: AS.061.152
Instructor(s): M. Porterfield
Area: Humanities.
AS.061.358. Directing Actors. 3.0 Credits.
This class, intended for students of film, will explore the theory, practice, and ethics of directing actors for the screen. Texts, screenings, production, and performance exercises will be combined over the course of the semester. The goal of this workshop is to inspire young directors and enhance their ability to communicate with their cast with confidence and empathy.
Instructor(s): M. Porterfield
Area: Humanities.

AS.061.361. Documentary Film Theory. 3.0 Credits.
Counts toward 300 or 400-level critical studies requirement.
Instructor(s): J. Mann
Area: Humanities
Writing Intensive.

AS.061.364. The Films of Alfred Hitchcock. 3.0 Credits.
Close examinations of Hitchcock’s films from the Lodger to Frenzy. $40 lab fee.
Instructor(s): L. DeLibero
Area: Humanities
Writing Intensive.

AS.061.365. The New Hollywood: American Films of the Seventies. 3.0 Credits.
This course will explore the extraordinary renaissance in American film that arose from the death of the studio system and ended with the advent of the blockbuster. We’ll discuss how the political and cultural struggles of the Vietnam era affected what came to be called New Hollywood cinema; how classical Hollywood narrative was (or wasn’t) upended by the likes of Altman, Scorsese, Coppola, and Peckinpah; and how the films of this crucial period addressed or failed to address race, class and gender. Lab fee $50.
Instructor(s): L. DeLibero
Area: Humanities
Writing Intensive.

AS.061.369. The 1930s in Jazz, Film, and Poetry. 3.0 Credits.
The 1930s in Jazz, Film, and Poetry will focus on three art forms, jazz, film, and poetry, both separately and in conversation with each other during a decade of political, economic, technological, and cultural upheaval. A decade after the invention of amplifiers and public address systems, advances in sound recording and synchronized sound revolutionized film and recording arts. Jazz musicians, filmmakers, and poets collaborated on innovative and radical projects, often funded by the New Deal Federal Writers Project. Team-taught by faculty in Film and Media Studies, the Department of Jazz (Peabody), and the Center for Africana Studies, this course will bring together students from Peabody and the Krieger School of Arts & Sciences to engage with issues of art, culture, and politics during a turbulent decade.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): H. Robbins
Area: Humanities.

AS.061.370. Theorizing Popular Culture. 3.0 Credits.
This course examines popular culture’s role in everyday life, tracing its path from its origins to the present. It explores the aesthetics, politics and theory of cinema, television, popular music and internet culture, as well as the study of subcultures and fandom. The endpoint of the experience is to draw students into a more complex and conscious relationship to the mediascape that surrounds them. It also encourages the cultivation of an active practice of cultural critique. Students will debate issues central to a long history of dealing in popular culture, including the potential “dumbing down” of mass culture, the use of artistic formulas in the creation of popular works, the celebration of the popular in the notion of “popular art,” representations of race, gender, and sexuality in media, power and the question of the popular, and the basis of taste in media. It will apply it to a range of media as diverse as films, television programs, the punk and “pop” movements, and internet phenomena. A background in writing on media is encouraged. Lab fee: $40
Instructor(s): M. Ward
Area: Humanities
Writing Intensive.

AS.061.371. Unrealities: The Fantastic in Film & Fiction. 3.0 Credits.
The fantastic, the absurd, the blackly comic in films by Cocteau, Hitchcock, and others; and in the short fiction of Barthelme, Cortazar, Hrabal, and others. Several short creative exercises and a longer final project.
Instructor(s): L. Bucknell
Area: Humanities
Writing Intensive.

AS.061.372. French Crime Films, Thrillers, and Noirs. 3.0 Credits.
An exploration of French films about crime with a particular focus on the reciprocal relations between French and American cinema: how did the French tradition of poetic realism influence the American film noir—and why is our name for the genre one invented by French critics? How did French directors respond to American genre movies, and to the films of Hitchcock? Screenings will include films by Melville, Godard, Clément, Clouzot, Audiard, and Haneke.
Instructor(s): S. Roos.

AS.061.373. Intermediate Dramatic Writing: Film. 3.0 Credits.
This course will explore different approaches towards understanding the fabric of story as it pertains to film. Students will be exposed to key challenges in conceiving, structuring and executing a compelling, memorable and vibrant feature-length screenplay. By studying key examples, we will discuss possible solutions to these issues. In every class, students will share their work in progress and will help each other find approaches or solutions to their specific challenges and issues. We will analyze films with screenplays that effectively play with the form to create lasting, thought-provoking and affecting stories. Through in-class critiques, group discussions and one-on-one sessions, students will apply new tools and approaches to their own work as they undergo the process of designing, breaking down, outlining and writing a full step outline, a beat sheet and the first ten pages of a feature length screenplay. As the semester progresses, in-class analysis and debate on the strengths and challenges posed by the students’ work will shape the thematic emphasis of each class.
Prerequisites: AS.220.204 OR AS.061.205 OR AS.061.270
Instructor(s): R. Buso-garcia
Area: Humanities
Writing Intensive.
AS.061.374. Kubrick/Malick: The Poetics of Space. 3.0 Credits.
Beyond their balding pates, their notorious reclusiveness, and the relative paucity of their output, Stanley Kubrick and Terrence Malick share a mastery of cinematic space. This course will closely examine selected films from their work, with particular emphasis on their visionary manipulation of the epic vastness and lyrical intimacies of screen space. With this primary concern in mind, we will consider the directors' engagement with philosophies of history and time, their experiments with narrative and generic conventions, and their enduring fascination with the relationship between the human and natural worlds. Sunday 7:00pm-9:30pm weekly film screenings. $40 lab fee.
Prerequisites: AS.061.140 OR AS.061.141 OR PERMISSION OF THE INSTRUCTOR.
Instructor(s): L. DeLibero
Writing Intensive.

AS.061.375. Surrealism and Film. 3.0 Credits.
We will define Surrealism through primary texts, including those of Andre Breton, Antonin Artaud and Rene Daumal and other works that defined and influenced the movement in the early part of the 20th century. Using an understanding of the practice of surrealism found in the readings, as well as in surrealist games and automatic writing, we'll study a diverse group of filmmakers influenced by the practice, including Luis Buñuel, Joseph Cornell, Raul Ruiz and contemporary artists such as David Lynch. Assignments include weekly papers and one final creative project. Weekly film screenings Thursday 7:30-10:00 PM. $50 lab fee. Media, Online
Instructor(s): K. Yasinsky.

AS.061.376. Arts and Culture Journalism: Interactive Media, Online Publishing. 3.0 Credits.
Students will participate in the ongoing creation of BmoreArt.com, an online arts and culture publication that serves the Baltimore community. In conjunction with visiting professionals, students will investigate the Baltimore cultural community and create different types of editorial content using interactive media including film, video, sound, and writing. Students will produce creative content utilizing their individual areas of expertise - such as visual art, art history, music, literary arts, film, and theater - while working together as a professional organization. A strong emphasis will be placed on the student's collaborative participation and creative experimentation. Students with differing backgrounds in media will approach this project from unique perspectives, which will be valued and cultivated. Students with previous experience in journalism are welcome. An introductory writing or film course is suggested as a prerequisite.
Instructor(s): C. Ober
Area: Humanities
Writing Intensive.

AS.061.378. Automatic Animation. 3.0 Credits.
A hand-made, 2-D animation course based on ideas of automatism. Students will create their own animated movie during the semester. Readings will include Dada and Surrealist texts, poetry and theory of poetics including Eisenstein, Breton, Desnos, P. Adams Sitney and Lyn Hejinian. Weekly film screenings will include animations and experimental films using automatism for image and/or structural generation. Sounds ideas will be discussed and pursued related to the ideas explored throughout the semester. $125 lab fee.
Instructor(s): K. Yasinsky.

AS.061.379. Audio for Video. 3.0 Credits.
This 3-credit, 300-level class covers all creative and technical aspects of working in Logic X and ProTools to create professional soundtracks for film, video, commercials and games. It will enable filmmakers, composers and recording arts students to learn how to import and synchronize QuickTime video; 'spot' a clip; create tempo maps and click tracks, and blend the three key elements of film sound ie dialog, music and effects. Classes will be mainly taught with students at individual workstations, though some classes will be held on the stage (for miking and live recording techniques) as well as in the recording studio (dubbing and mixing.) Prerequisites: at least one production course (Intro to Film/Video Production, or Recording Arts); plus fluency in either Logic, ProTools, Final Cut or Premier.
Prerequisites: AS.061.150[C], AS.061.152[C], or other introductory film production course; fluency in either Logi, ProTools, Final Cut or Premier.
Instructor(s): T. Dolby.

AS.061.380. French Cinema of Immigration, Cultural Identity, and Difference. 3.0 Credits.
An exploration of a series of contemporary French films that bear witness to the contemporary reality - crucial to current politics and to the French presidential elections of 2017--of France as a multi-ethnic society and ask essential questions about cultural identity. Is cultural and ethnic identity something that you are born into or is it a role that you elect or perform? How should individuals living today understand their relation to historical injustices? Are there things that we can learn only through relationships with people from other cultures? Screenings include works of Abdellatif Kechiche, Jacques Audiard, Michael Haneke, Mathieu Kassovitz, Claire Denis, the Dardenes. Recommended Course Background: AS.061.140, AS.061.141, or an expository writing course.
Instructor(s): S. Roos
Area: Humanities.

AS.061.381. Sound on Film. 3.0 Credits.
This 3-credit upper-level course will offer undergraduates from both JHU and MICA an unprecedented opportunity to collaborate on all aspects of designing soundtracks for film. Utilizing a combination of pre-existing and in-progress pieces, student filmmakers will create soundtracks, from the initial phases of concept, ‘spotting’, and ‘temping’ through to composition and scoring in the final stages of recording, sound syncing and mixing. Students will work in small teams in a lab setting to create their soundtracks, exploring a variety of scenarios, following the post-production process typical of today’s film industry. Lab work will be supplemented by guest lecturer presentations on various aspects—practical, theoretical, and historical—of applying sound to film. Guests may include sound designers and engineers, composers, editors, and filmmakers working in live action, animation, and documentaries. At weekly screenings of classic and contemporary cinematic masterpieces students will analyze the evolving art and craft of the film soundtrack, applying the principals in their lab exercises. Lab fee: $50
Instructor(s): T. Dolby
Area: Humanities.

AS.061.388. Cinema Workshop - Cannes Film Festival. 3.0 Credits.
This workshop provides students with access to professional events at the Cannes Film Festival, including screenings, non-competitive programs, tributes, master classes and directors’ showcases. Students are expected to participate in festival events and take an active role in organized discussions, critiques and dialogues. Written and oral assignments. Special Application: Open to JHU Cannes Program participants only.
Instructor(s): L. Mason
Area: Humanities.
AS.061.389. Women Making Movies (Europe). 3.0 Credits.
This course introduces students to some of the most exciting female directors of the 20th century, asking how gender shaped the production and reception of their films. Do particular directors attribute any significance to the fact of being a woman? Does a director's gender shape her choice of subject or how she represents it? Does wider knowledge of works directed by women change our sense of the canon and authorship? Covers non-U.S. films, strongly encouraged for FMS majors and minors. Cross-listed with WGS. No pre-requisite.
Instructor(s): L. Mason
Area: Humanities.

AS.061.391. Love and Film. 3.0 Credits.
In this course, we explore different understandings of "love" and the way that film has dealt with the concept as a medium. We explore a variety of approaches to the question of "love" - from the agapic to the familial to the romantic - through a series of interdisciplinary readings ranging from philosophy to anthropology. We will also equally explore the question of how film has engaged with the question of love as a concept, and what depictions of human affection - from the general to the personal - it has offered us. Screenings are required for this course. Lab fee: $50
Instructor(s): M. Ward
Area: Humanities
Writing Intensive.

AS.061.393. Violent Attractions. 3.0 Credits.
Violence, ritualized and anarchic, celebrated and deplored in popular film from silent era melodrama and slapstick comedy to contemporary sports, crime, and combat films. Twice-weekly screenings; oral presentation; two essays, 6 & 12 pp. Lab fee: $50
Instructor(s): L. Bucknell
Area: Humanities.

AS.061.396. Modern Paris on Film. 3.0 Credits.
This course uses French film to examine the history of twentieth-century Paris. We will consider how filmmakers interpreted the social, political, and technological transformations that shaped Paris in the modern era, treating movies as expressions of change and means by which filmmakers comment on it. Taught in English. $50 lab fee.
Instructor(s): L. Mason
Area: Humanities.

AS.061.397. French Masculinities. 3.0 Credits.
Examines changing ideals of masculinity in France after 1960 as they found expression on film, rooting the work of iconic stars and directors in their cultural, political and historical contexts.
Instructor(s): L. Mason
Area: Humanities
Writing Intensive.

AS.061.399. Stop-Motion Puppet Animation. 3.0 Credits.
Students will create their own stop-motion models (puppets) based on a wire armature model. In small groups, students will design and create a simple set and make a short stop-motion movie using a DSLR camera.
The question of "why animate" will be explored in student projects and responses to screenings. We will study the history of stop-motion puppet animation from Starewicz to Svankmajer to Nick Park.
Instructor(s): K. Yasinsky
Area: Humanities.

AS.061.403. Sound on Film II. 3.0 Credits.
This course continues the explorations in sound and music for film begun in AS.061.381. This 3-credit upper-level course, sponsored by the Film and Media Studies Program at JHU and the program in Recording Arts and Sciences at the Peabody Institute, offers undergraduates and faculty/staff from both institutions an unprecedented opportunity to collaborate on all aspects of designing soundtracks for film. Classic and contemporary film scores are screened and analyzed. Then, using their own short films, students from the Film and Media Studies program work with Peabody students to create soundtracks, from the initial phases of 'spotting', composition and scoring, through the interim stages of studio recording and sound syncing, and on to final mixing of music with dialog and sound effects using industry-standard Digidesign ProTools.
Students work in small teams in a lab setting to create their soundtracks, exploring a variety of scenarios, including the implications of image-driven music vs music-driven images, and the various uses of acoustic and electronic sound. The course also touches on the logistics of music budget, licensing and copyright. Lab work is supplemented by guest lectures and faculty presentations on various aspects - practical and theoretical - of applying sound to film. Guest lecturers may include sound designers and engineers, composers, editors, and filmmakers working in live action, documentary or animated film. Screenings are provided on Sundays from 7:30-10:00 PM. In order to be admitted to the course, students must have completed at least one 5-10 minute short film to be used for scoring a soundtrack during the semester. $40 lab fee.
Instructor(s): T. Dolby.

AS.061.404. Advanced Screenwriting. 3.0 Credits.
Intensive workshop course where students will write both a first draft and a full revision of a feature length screenplay. Classes will be designed and centered on the specific challenges of the students' works-in-progress, with an emphasis on exploring and discussing different narrative approaches and solutions that will enhance their writing and revision processes. Select films will be screened and analyzed as they pertain to the students' scripts. Students will aim to have a polished draft of their screenplay to be submitted to industry-recognized screenwriting labs at the end of the semester.
Instructor(s): A. Rodgers
Writing Intensive.

AS.061.405. Deep Listening: Sound Studies in Film and Media. 3.0 Credits.
This course explores the sonic elements of film and media studies, and encourages a form of deep and attentive listening in students. Analyzing film, television, music, sound art, and the newer platforms for sound media, it teaches students the tools for sound analysis as well as the basics of sound theory. This course is designed to allow a deeper sonic appreciation of the media created that is created with the ears in mind, even more than the eyes. In this way, it works to "fill in" what is often missing from an education in media studies - a focus on the other sense of the audio-visual media we experience every day. Lab fee: $50 Counts toward 300 or 400-level critical studies requirement.
Prerequisites: AS.061.140 OR AS.061.141
Instructor(s): M. Ward
Area: Humanities.
AS.061.406. Animating Cartoons. 3.0 Credits.
A hand-drawn animation class focusing on the production of a character driven animation. The history of character animations will be studied through screenings and readings, and each student will produce an animation from their original cartoon or comic, or, work on a re-interpretation of an old cartoon animation using rotoscoping. Including in-class animation exercises. Lab fee: $50
Prerequisites: AS.061.219 OR AS.061.378 OR AS.371.140 OR permission of instructor
Instructor(s): K. Yasinsky.

AS.061.409. The Films of P. T. Anderson: Innovation and Influences. 3.0 Credits.
This course will investigate Paul Thomas Anderson's stylistic and narrative innovations, as well as cinematic influences such as Altman, Kubrick, Scorsese, and Welles.
Instructor(s): L. DeLibero
Area: Humanities.

AS.061.413. Lost & Found Film. 3.0 Credits.
This course explores various elements of film production and filmic expression through a somewhat nebulous field typically described as lost films. Lost films (or as they are sometimes called, "orphan" films) can be generally described as films that have, for a variety of reasons, fallen out of the public view. They frequently come from educational, scientific, medical, or industrial films from the 1950s and 1960s. Using these films as source materials, lost film filmmakers explore and expose cultural conventions, visual icons, and historical value materials. Each week, students are responsible for re-editing sources found on an internet archive site. The assignments follow thematic concerns related to film editing. Students complete a final project (4-8 minutes). All editing for the course is accomplished with non-linear software, generally Adobe Premiere or Final Cut.
Instructor(s): J. Mann
Area: Humanities.

AS.061.421. History and Film. 3.0 Credits.
How do films inform, shape, or fundamentally alter our sense of the past? What are the strengths and limitations of cine-history? This course pairs traditional and avant-garde fiction films and documentaries with essays about history, historiography, memory and the political uses of the past to investigate fast-changing relationships between image and text, film and history. Lab fee: $50 Counts toward 300 or 400-level critical studies requirement.
Instructor(s): L. Mason
Area: Humanities
Writing Intensive.

AS.061.440. Senior Capstone Project: Production. 3.0 Credits.
Permission Required. Production track students complete an independent film project.
Prerequisites: AS.061.301 OR AS.061.356
Instructor(s): J. Mann; J. Roche; L. DeLibero; M. Porterfield; M. Ward
Area: Humanities.

AS.061.441. Senior Capstone Project: Critical Studies. 3.0 Credits.
Critical studies track students complete an independent research project.
Instructor(s): L. DeLibero
Area: Humanities.

AS.061.443. Sen Proj-Digital Vid Prd. 3.0 Credits.
Instructor(s): J. Mann; J. Roche; M. Porterfield
Area: Humanities.

AS.061.501. Independent Study - Film. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.061.502. Independent Study-Film & Media. 3.0 Credits.
For students who wish to explore an aspect of film studies not covered by existing courses. The course may be used for research or directed readings/viewings and should include one lengthy essay or several short ones as well as regular meetings with the adviser. Permanently required: Lab Fee: $100 (if production related)
Instructor(s): Staff.

AS.061.503. Independent Study-Film/Media. 0.0 - 3.0 Credits.
Permission required
Instructor(s): J. Mann; J. Roche; L. DeLibero; M. Porterfield.

AS.061.504. Independent Study-Film. 3.0 Credits.
Instructor(s): J. Mann; L. DeLibero; M. Ward.

AS.061.505. Internship-Film/Media. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.061.506. Internship-Film & Media. 1.0 Credit.
Instructor(s): L. Bucknell; L. DeLibero; M. Ward.

AS.061.596. Ind Study - Film & Media. 3.0 Credits.
Instructor(s): Staff.

AS.061.599. Internship-Film & Media. 1.0 Credit.
Instructor(s): Staff.

This course provides students an introduction to the discipline of sound studies and its relationship to three eras of historical forms of technological media. Structured around a problematic of emitter, medium, and receiver, it explores how sound was encoded by its creators as a structure of meaning in early media cultures; how it emerged as a means of aesthetic creation with the rise and dominance of the cinematic medium; and last, how it reaches the infatuated individual listener in the new era of mobile earbud audio. Theorizing our relationship to media through the study of sound and listening, we find new histories to be explored, as well as new media aesthetics to be negotiated. Through engagement with thinkers such as economist Jacques Attali, auditory and cultural historians Emily Thompson and Jonathan Sterne, film sound theorists Michel Chion and Rick Altman, and sound studies scholar Michael Bull, we construct how technologically mediated listening allows us to understand the historical and theoretical components of sound's media aesthetics. Recommended Course Background: AS.061.245 for undergraduates or JHU graduate student status (open to all JHU graduate students).

**AS.060.122. Hollywood and the Culture Industry. 3.0 Credits.**

For an average consumer in the first half of the twentieth century, American culture meant Hollywood, and “Hollywood” was something of an insult. Associated with mass produced spectacles of questionable artistic value, the American movie industry played a powerful role in defining “popular culture” as we understand it today. This course will examine how Hollywood contributed to the popularization of cultural production and consumption, and how Hollywood itself was constructed as a cultural icon. What are the myths and tropes that govern Hollywood? How does Hollywood transmit economic, social, national, gender, and racial ideologies? How did Hollywood, in the context of corporate hegemony, still manage to create some of the most enduring cultural artifacts of the twentieth century? The course will begin with readings by Nathanael West and F. Scott Fitzgerald, two authors who worked as screenwriters to support their aspirations as novelists. We will then turn to the crucial influence made by non-American writers on Hollywood, starting with Evelyn Waugh’s “The Loved One” about the “British Colony” Waugh discovered during a visit to Southern California. Two weeks will be spent on Frankfurt School theorists of popular culture Theodor Adorno and Max Horkheimer, and the final third of the course will focus on films. We will start by examining three filmmakers whose careers were defined by the “studio system,” the oligopoly that controlled American cinema during the so-called “classical era.” The course concludes with two weeks devoted to films about Hollywood by notable directors. Classes will be supplemented by relevant secondary scholarship.

Instructor(s): J. Hoffmann

Area: Humanities.

**AS.060.379. Stage and Screen. 3.0 Credits.**

Shakespeare's King Lear has a paradoxical reputation in that it is arguably the greatest drama in English, yet it cannot be performed on stage, at least not without sacrificing its dramatic power. What happens when this notoriously unstageable play is turned into a film, as in Akira Kurosawa's epic masterpiece Ran? Does Kurosawa compensate for the limitations of the stage? What is gained or lost when the drama takes place in Japanese instead of Shakespeare's blank verse? This course will examine the ways that playwrights, theatre producers, and filmmakers manage the dramatic possibilities of text, stage, and cinema. Alongside their cinematic counterparts, we will read tragedies by Shakespeare, Marlowe, and Goethe, eighteenth-century comedies, and modernist dramas, and as a class, we will discuss the often fraught transition between literary text and dramatic spectacle. How do filmmakers convey psychological states through camera techniques and editing that are unavailable to producers of live performances? What dramatic effects can be achieved in the intimate setting of a theatre that are impossible at a twenty-screen cineplex, or on your couch while streaming Netflix? Along with addressing these questions, the course is intended to cultivate active, informed viewership in conjunction with close readings of the plays themselves. Authors likely to be included: Shakespeare - Romeo and Juliet, Hamlet, King Lear; Marlowe - Doctor Faustus; Goethe - Faust; Wycherley - The Country Wife; Congreve - The Way of the World; Samuel Beckett, Tennessee Williams, Arthur Miller, Rabindranath Tagore, Henrik Ibsen. Visual media will include recordings of performances and adaptations by Lawrence Olivier, Kurosawa, Satyajit Ray, Andrei Tarkovsky, Jan Švankmajer, and Dangerous Liaisons, starring Glenn Close and John Malkovich, plus the broadway musical, Damn Yankees!

**AS.070.262. Cuban Intellectuals, Cinema, and the State. 3.0 Credits.**

This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings are required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.

Instructor(s): L. Humphreys

Area: Humanities, Social and Behavioral Sciences.

**AS.070.337. Digital Media, Democracy, and Control. 3.0 Credits.**

This course examines how digital technologies enable new publics that circumvent state and social controls as well as how they are mobilized to confirm existing racial, gendered, and political hierarchies.

Instructor(s): L. Humphreys

Area: Humanities, Social and Behavioral Sciences Writing Intensive.

**AS.070.346. Cinema and Ethnography. 3.0 Credits.**

Films, like ethnographies, stage encounters with foreign worlds. We will investigate this parallel by examining, side-by-side, cinematic and anthropological representations of subjects like environmental conflict, urban poverty, religious pilgrimage and media culture.

Instructor(s): A. Pandian

Area: Humanities, Social and Behavioral Sciences

**History**

**AS.100.499. Film and Propaganda in Nazi Germany. 3.0 Credits.**

By examining a range of cinematic works—from explicitly ideological pseudo-documentaries to entertainment films—this course will explore the transmission of propaganda into the everyday culture of Nazi Germany.

AS.211.222. Italian Cinema: The classics, the Forgotten and the Emergent. 3.0 Credits.
This course traces the history of Italian cinema from the silent era to the new millennium, highlighting its main trends and genres, and reflecting on the major transformations modern and contemporary Italian society experienced over the twentieth and twenty-first centuries. We shall examine iconic films such as Vittorio De Sica’s Bicycle Thieves, Federico Fellini’s La Dolce Vita, Michelangelo Antonioni’s L’Avventura, and Pier Paolo Pasolini’s Mamma Roma, that received international recognition and influenced other national, cinematic productions. We shall also look at the work of less famous, or independent filmmakers who received less critical attention. While this class takes an historical approach, it also includes a theoretical component and introduces students to the specificity of the cinematic language, examining films in relation to the mise-en-scene, frame composition, camera movements, editing, and sound. This class is taught in English.
Instructor(s): L. Di Bianco
Area: Humanities.

AS.211.316. Brazilian Cinema and Topics in Contemporary Brazilian Society. 3.0 Credits.
Course is taught in ENGLISH - This course is an introduction to the academic study of cinema as a communicative art and to Brazilian film. The films selected focuses on films from the late 1950s to the present and highlight import episodes and challenges in the advancement of the Brazilian society as well as its cinematic production with a special view to the film aesthetics through analysis from a number of critical perspectives, including class, race, gender as well as ethnicity, nationalism or national identity, colonialism, social changes, and the politics of representation. In this sense, the films and documentaries that we will be watching and studying encompass the period from the rise of New Cinema (Cinema Novo) up to films exploring the most recent trends, including movies launched up to 2016. Students wishing to do the course work in English, for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. THERE IS NO FINAL EXAM. May not be taken on a Satisfactory / Unsatisfactory basis.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.

AS.211.326. We Conduct - Documentary Production Internship. 3.0 Credits.
To apply for this practicum, you should send an email of motivation to professor Wegenstein at berna@jhu.edu. During this internship will accompany Bernadette Wegenstein (director), Shana Hagan (cinematographer), and Judy Karp (sound recordist) on the documentary Vérité set, as they document the history of women orchestral conductors. The film profiles the conductors’ incredible dedication, devotion, mentorship, and love for music itself, and highlights the camaraderie and mentorship between generations of female conductors and musicians. Most importantly, it shows their power in pursuing a field not historically welcoming to women, breaking down barriers of gender and race. This documentary feature presents women from different walks of life, including Sylvia Caduff, Marin Alsop, Alexandra Arrieche, Lina Gonzalez, 16-year old aspiring conductors Sumaya Elkashif and Maya Johnson, and members of the Baltimore OrchKids afterschool music program for children. The intertwining stories of these women and children, each accompanied by the music they embody, will culminate to reveal their astounding accomplishments as they conduct — the music, and the worlds around them. Filming will take place mainly at the Peabody Conservatory. Some field-trips will be optional (including to foreign destinations). Please note that this class will be held as a practicum, and some of the dates and times will be flexibly adapted to the needs of the artists’ residency. If you have a very full calendar in the Spring it is best advised not to take this class.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.330. Curating Media Artists in Residence at JHU. 3.0 Credits.
The students will be closely involved with JHU’s Center for Advanced Media Studies (CAMS directed by Bernadette Wegenstein), and the Baltimore Museum of Art (curator Kristen Hileman) in preparing the BMA’s Black Box exhibit of Mary and Patrick Kelley’s new film, We Are Ghosts, set in a submarine: the film tells the story of life as experienced by the sailors in a U.S. submarine at the end of the second world war. Artist Mary Reid Kelley focuses on “minor aspects of life” in the submarine during non-combat – such as boredom, claustrophobia, and the effects of heavy drinking on the sailors. Included is also a restaging of Harry Truman’s announcement of the bombing of Hiroshima – told from the sailors’ point of view. While this new work will be on display in the BMA’s Black Box, Kelley’s 2016 film This is Offal (set in a morgue) will be showing at the museum. This film is centered around a dialogue between the ghost of a deceased woman, the victim of a suicide, and her animated organs. Students will also be traveling to Woodstock, NY on a field trip with professor Wegenstein for a studio visit with the artists at the beginning of the semester. Mary Reid Kelley is an artist who makes arresting, playful, and erudite videos that explore the condition of men and women throughout history. Drawing on literary and historical material, the videos involve intensive research and critical reassessments of standard historical narratives. Mary Reid Kelley is involved in every aspect of the videos’ creation—from writing the scripts (typically in highly structured poetic verse), to designing the sets, props, and costumes, to performing the leading roles—and all of the videos are produced by her and her partner, Patrick Kelley, at their private studio. Kelley is known for her feminist videos that recall the theater of the absurd and German Expressionist cinema. Please note that this class will be held as a practicum, and some of the dates and times will be flexibly adapted to the needs of the artists’ residency. If you have a very full calendar in the Spring it is best advised not to take this class.
Instructor(s): B. Wegenstein
Area: Humanities.
AS.211.331. Vagabonds and Ramblers: Space & Place in Women's Cinema. 3.0 Credits.
In recent times in Italy, a new generation of women filmmakers has found its own space in the traditionally male dominated film industry. This “counter cinema” abounds with female city walkers, migrants, vagabonds and other types of urban nomads, whose movement through space signifies a quest for freedom, gestures of protest and rebellion, and a search for place. We start by looking at the work of a pioneer filmmakers such as Elvira Notari, the first woman director in Italy, and then discuss the issue of gender and space in contemporary films by directors Francesca Comencini, Alice Rohrwacher, and Eleonora Danco. To enrich the analysis, we shall also examine films directed by non-Italians who deal with the theme of women’s mobility and their centrality/ marginality from different socio-geographic contexts. Other directors included will be Agnès Varda (France), Chantal Akerman (Belgium), Haifa al-Mansour (Saudi Arabia), and Xiaolu Guo (China). Readings will include essays by Laura Mulvey, Ann E. Kaplan, Linda Williams, and Patricia White.
Instructor(s): L. Di Bianco
Area: Humanities.

AS.211.333. The Holocaust in Film and Literature. 3.0 Credits.
How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — nonfiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Primo Levi and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Steven Spielberg). All readings in English.
Prerequisites: Cannot be taken by anyone who previously took AS.213.361
AS.213.361. Religious Themes in Film and Literature. 3.0 Credits.
This course would be of interest to anyone who would like to learn about the intersection of religion and modern culture. At the center of the course will stand a close study of the representation of religious themes and their role in modern literature and cinema. The works which we will deal with are not considered religious and yet they include religious themes as part of their narrative, images, language or symbolic meaning. We will trace in various works from various countries and genre, themes such as: divine justice, providence, creation, revelation, the apocalypse, prophecy, sacrifice and religious devotion. We will also study the ways in which Biblical and New Testament stories and figures are represented in these works. The course will have a comparative nature with the aim of learning more about the differences between the literary and cinematic representations.
Instructor(s): N. Stahl
Area: Humanities.

AS.213.305. Contemporary German Film. 3.0 Credits.
After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 15 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmarck’s The Lives of Others (Academy Award for Best Foreign Language Film, 2006), Caroline Link’s Nowhere in Africa (Academy Award for Best Foreign Language Film, 2002), Fatih Akin’s Head-On (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel’s Downfall (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker’s Goodbye, Lenin! (European Film Award, 2003). Nazi Germany, the Stasi, or the Reunification are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has developed known as “Berlin School” or “Nouvelle Vague Allemande”. Directors associated with the Berlin School are Christian Petzold, Angela Schanelec, Christoph Hochhäusler or Valeska Grisebach. Dissecting the everyday reality of post-wall Germany, this ‘counter-cinema’ draws on the New German Cinema of the 1970s (among others) to develop radical notions of realism and challenge narrative conventions. This course will give a survey on German Film since 2000 – discussing the historical and cultural context of selected movies as well as analyzing aesthetic strategies and concepts of realism in Contemporary German Cinema. Taught in German.
Instructor(s): E. Strowick
Area: Humanities.

AS.213.330. “What is an Image?” - Technology, Art and Visual Culture around 1900. 3.0 Credits.
Taught in English. This course is an interdisciplinary introduction to the theory of the image with an emphasis on its material and conceptual transformations in the modern period.
Instructor(s): J. Schade
Area: Humanities.

AS.213.349. Weimar Cinema: The Golden Age of German Film. 3.0 Credits.
Taught in German. German cinema of the 1920s is regarded as one of the "golden ages" of world cinema. The course centers on close readings of works which belong to the canon of German film, including The Cabinet of Dr. Caligari, Nosferatu, Metropolis, The Blue Angel, The Last Laugh, and M. Focusing on the question of cinema and modernity, we will discuss topics like modern aesthetics and visual perception, Expressionism in film, technology and the metropolis; the emergence of film genres (e.g. horror film, film noir, science-fiction film, and melodrama). The film analyses will be accompanied by a discussion of the varied scholarly approaches to Weimar Cinema.
Prerequisites: AS.213.361 AND AS.213.362
Instructor(s): E. Strowick.
AS.213.361. The Holocaust in Film and Literature. 3.0 Credits.
How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — nonfiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Elie Wiesel, Primo Levi, and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Quentin Tarantino). All readings in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.216.444. The Apocalypse in Literature and Film. 3.0 Credits.
“Everything which we loved is lost! We are in a desert” — this emotional assertion was the reaction to Kazimir Malevich’s 1915 painting The Black Square, as the artist himself recalled it. This sentiment of fearing, warning and even witnessing the end of the world as we know it, will stand at the center of the course. We will study the literary and cinematic representations of this apocalyptic notion and investigate its theoretical, theological, physiological and aesthetic aspects. We will seek to trace the narrative dynamics as well as literary and cinematic means of apocalyptic representations in works from various periods, languages, cultures and religions. Among the issues to be discussed: what is the apocalypse, biblical apocalypse, dystopia and nostalgia, trauma and post trauma, war and the apocalypse, the Holocaust as the end of civilization, the atomic bomb, realism and anti-realism, political changes and the apocalypse in popular culture.
Instructor(s): N. Stahl
Area: Humanities
Writing Intensive.

AS.216.421. The Divine in Literature and Cinema. 3.0 Credits.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and cinema. We shall analyze the work of women directors who recurrently employ the narrative strategy of flânerie to construct female narratives of displacement and liminality. We shall question how and to what extent this contemporary cinematic production is indebted to the masters of neorealism and the auteurs from the sixties. Critical and theoretical readings will include essays by Michel de Certeau, Siegfried Kracauer, Janet Wolff, Elizabeth Wilson, Anne Friedberg, Giuliana Bruno, and others.
Instructor(s): L. Di Bianco
Area: Humanities
Writing Intensive.

AS.216.307. Reflective Mirrors: Israeli and Palestinian Cinema. 3.0 Credits.
Palestinian and Israeli cinemas have emerged side by side, each depicting its Other as a deceiving mirror of its own self. This course will analyze the different images of these Others in both cinemas.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.216.398. Zionism: Literature, Film, Thought. 3.0 Credits.
This course studies the relations between modern Hebrew and Israeli culture and Zionism. Based on a close reading of both literary and non-literary Zionist texts, we will explore the thematic, social and political aspects of the Zionist movement. The course focuses on primary sources and its main goal is to familiarize students with the various ways in which Zionism was formed and understood. In the last part of the semester we will investigate the different meanings of Post-Zionism through contemporary literary and non-literary texts as well as recent Israeli films.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.214.689. Flânerie and Female Authorship in Contemporary Italian Cinema.
This course examines the prolific production of Italian women filmmakers inscribing their work into a national cinematic tradition. The most prominent visual leitmotif in films by directors such as Marina Spada, Francesca Comencini, Alice Rohrwacher and others, is that of the wandering woman contemplating the cityscape. What does the act of walking signify in these works? How do these filmmakers embrace and transform Italy’s cinematic tradition? After highlighting the figure of the city-walker in post-war classics by Roberto Rossellini and Vittorio De Sica, we shall discuss from a gender perspective films such as Fellini’s Nights of Cabiria, Pasolini’s Mamma Roma, and Antonioni’s La Notte, which feature female city-walkers who stroll throughout urban peripheries created during the country’s rush toward modernity. Then, we shall analyze the work of women directors who recurrently employ the narrative strategy of flânerie to construct female narratives of displacement and liminality. We shall question how and to what extent this contemporary cinematic production is indebted to the masters of neorealism and the auteurs from the sixties. Critical and theoretical readings will include essays by Michel de Certeau, Siegfried Kracauer, Janet Wolff, Elizabeth Wilson, Anne Friedberg, Giuliana Bruno, and others.
Instructor(s): L. Di Bianco
Area: Humanities
Writing Intensive.

AS.215.452. Che Guevara and Magical Realism. 3.0 Credits.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara’s life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish.
Instructor(s): E. Gonzalez
Area: Humanities.
Writing Seminars
AS.220.204. Introduction to Dramatic Writing: Film. 3.0 Credits.
Screenwriting workshop. This course will look at the screenplay as both a literary text and blue-print for production. Several classic screenplays will be analyzed. Students will then embark on their own scripts. We will intensively focus on character development, creating "believable" cinematic dialogue, plot development, conflict, pacing, dramatic foreshadowing, the element of surprise, text and subtext, and visual storytelling. Several classic films will be analyzed and discussed (PSYCHO, CHINATOWN, BLADE RUNNER). Students will learn professional screenplay format and write an 8-12 page screenplay that will be read in class and critiqued.
Instructor(s): M. Lapadula
Area: Humanities
Writing Intensive.

AS.220.218. Writers on Film. 3.0 Credits.
An interdisciplinary course focusing on the film writings of poets, novelists, critics, and essayists such as Virginia Woolf, H.D., James Agee, James Baldwin, and Pauline Kael; and films showing the intertitle and screenplay work of writers such as Anita Loos, F. Scott Fitzgerald, William Faulkner, and Jean Cocteau. Participants will write weekly assignments on film from a critical perspective.
Instructor(s): K. Stine
Area: Humanities
Writing Intensive.

AS.220.337. Intermediate Dramatic Writing: Film. 3.0 Credits.
An intensive workshop focusing on methodology: enhancing original characterization, plot development, conflict, story, pacing, dramatic foreshadowing, the element of surprise, text and subtext, act structure, and visual storytelling. Each student is expected to present sections of his/her "screenplay-in-progress" to the class for discussion. The screenplay Chinatown will be used as a basic text.
Instructor(s): R. Buso-garcia
Area: Humanities
Writing Intensive.

Comparative Thought and Literature
AS.300.312. Imagining Revolution and Utopia. 3.0 Credits.
What form should revolution take, and what should society look like after the revolution? What would happen to the state, family, home, status of women, human interrelations, and everyday life? These questions consumed radicals in 19th century Russia and Europe, and their answers helped to shape the political culture of the 20th century. This course examines theories of revolution and utopia and responses to them in literature, art and film. Primary case study is Russia and the Soviet Union, with a comparative look at influential European works.
Instructor(s): A. Eakin Moss
Area: Humanities
Writing Intensive.

AS.300.324. Cinema of the 1930s: Communist and Capitalist Fantasies. 3.0 Credits.
Comedy and musical comedy film flourished in the USA during the Great Depression as well as in the USSR during the Stalinist Great Terror. This course will compare films of the era in a variety of genres (musical, epic, Western, drama), examining the intersections between politics and aesthetics as well as the lasting implications of the films themselves in light of theoretical works on film as a medium, ethics and gender.
Instructor(s): A. Eakin Moss
Area: Humanities.

AS.300.399. Cinema and Philosophy. 3.0 Credits.
Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.353. Present Mirth: Stages of Comedy. 3.0 Credits.
A comparative survey of presentational comedies from Aristophanes to Beckett on stage and screen, with some attention to to the vexed question of theories of comedy [no laughing matter].
Instructor(s): R. Macksey
Area: Humanities
Writing Intensive.

AS.300.399. Cinema and Philosophy. 3.0 Credits.
Do movies have anything to say about philosophical problems? Why is contemporary philosophy so interested in cinema? What are the most productive ways of bringing films and philosophy into conversation? Why is contemporary philosophy so interested in cinema?
Instructor(s): R. McCreary; P. Marrati
Area: Humanities.

East Asian Studies
AS.310.206. Film and Performing Arts in China: 1949–present. 3.0 Credits.
This course explores Chinese film, music, and theater in post-1949 China. Through discussing scholarly works in history, theater, ethnomusicology, and film studies, students will be exposed to interdisciplinary approach to engaging with film, traditional theater (xiqiu), instrumental music, and popular music in China, Taiwan, Hong Kong, and Chinese diasporas. We will examine issues including nationalism, cultural hegemony, modernity, invented tradition, cultural policy, class, and gender. Supplemented by case studies, this course is organized around two overarching questions: how does film and performing arts inform us about the social history of China? How is expressive culture utilized in political agendas in the modern China?
Instructor(s): P. Tse
Area: Humanities.

Art
AS.371.303. Documentary Photography. 3.0 Credits.
In this course, we will explore different genres of documentary photography including: the fine art document, photojournalism, social documentary photography, the photo essay and photography of propaganda. Field trips offer opportunities to work in the field. Students will work on a semester-long photo-documentary project on a subject of their choice. Camera experience is a plus, but not a prerequisite. Students will be loaned a digital SLR for the semester.
Instructor(s): P. Berger
Area: Humanities.

German and Romance Languages and Literatures
http://grll.jhu.edu/

The Department of German and Romance Languages and Literatures offers graduate and undergraduate courses in the languages, literatures, and cultures of France, Germany, Italy, Portugal, Latin America, and Spain. The language program includes a wide range of courses from introductory through conversation and composition to civilization. The literature program treats all periods of literature from both historical and critical-theoretical perspectives. These courses emphasize the close reading of texts and modern theories of literary criticism, particularly those based on contemporary philosophy, psychoanalysis, anthropology, and linguistics. In addition, an active program of visiting professors...
French

French Major

The requirements below are for students starting at Hopkins in 2016/17 and later. Current juniors and seniors should refer to archived catalog versions.

All major requirements must be completed with a grade of C or better and may not be taken satisfactory/unsatisfactory. Requirements are:

<table>

* No more than one course may be taught in English.

Meeting each semester with the appointed faculty advisor is essential to ensuring a coherent and adequate course of study. Advising holds for majors and minors will only be released once the choice of coursework for the next semester has been discussed in full with the faculty advisor. As a rule of thumb, majors should make every effort to diversify their course choices in terms of period and approach.

Note about courses taken in study abroad programs:

A maximum of two upper-level courses can count toward the minimum requirements for the major under the AS212 prefix. Other courses can count only as additional transfer credits or as the equivalent of either Introduction à la littérature I or Introduction à la littérature II or, in exceptional cases, La France Contemporaine.

Any study abroad course that a student wishes to substitute for a JHU course must be pre-approved by the French Study Abroad Advisor before departure and re-approved by the French Study Abroad Advisor upon return and upon submission of ALL materials from the course. Because courses for which pre-approval is granted before departure may not in fact be offered, or be offered in a substantially different form, students must keep in close contact with the French Study Abroad Advisor during the initial weeks of the stay to ensure pre-approval for the final academic program.

For further information about study abroad credits, please see the study abroad page on the GRLL website (http://grll.jhu.edu/french/study-abroad).
**Honors in French**

Honors in French will be granted to majors who entered before Fall 2016 whose course work for the French major is completed at a GPA of 3.7 or higher.

For students entering in Fall 2016 or later, qualified majors meeting minimal GPA requirements (3.7 in all French classes) are eligible to complete a four-credit capstone thesis bearing Honors in French. This includes the 1-credit “Thesis Prep” and the 3-credit “Senior Thesis.” Note that these courses, usually taken in the Senior year, are in addition to the 10 required three-credit courses.

**Sample 4-year plan**

Students with previous exposure to French must take a web-based language placement test to determine the appropriate course level in which to enroll (Elements, Intermediate, Advanced, or an introductory upper-level course offering in French).

The plan below is conceived as a guideline for students starting with no previous skills or high school coursework in the French language. Beginning the three-tier language sequence in the Fall of the first year of matriculation is strongly recommended so that all major requirements (10 courses, taken at the Advanced 300-level and higher, for a total of 30 credits) can be completed by the senior year. The calendar of study may be accelerated by participation in a summer or semester-long Study Abroad-approved program in a French-speaking county. Note that of the ten courses required for the French major, only one may be a course taught in English (indicated under both the the 211 and 212 prefixes with a GRLL-ENGL pos tag).

**German Major**

Students are encouraged to declare their intent to major or minor in German in their sophomore year and to make an advising appointment with the Director of Undergraduate Studies to discuss their academic plans, including options for a study abroad semester or year.

Students must complete a minimum of 27 credit hours in German beyond AS.210.262 Intermediate German II.

Majors are required to complete the Advanced German sequence (AS.210.361 Advanced German I: Cultural Topics of the Modern German-speaking World and AS.210.362 Advanced German II: Contemporary Issues in the German Speaking World, which counts for 6 credits and is a prerequisite for upper level 213.xxx seminars taught in German). Of the remaining 21 credit hours, majors choose courses designated as 210.xxx, 211.xxx (with POS-TAG GRLL-GERM) and 213.xxx. A minimum of 12 credits must be completed in German literature, culture and thought in courses designated as 213.xxx. No more than 6 credit hours of translation courses may be used to fulfill major requirements. All major requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

The department strongly advises its majors to gain a knowledge of a second foreign language.

Major requirements are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AS.210.361</td>
<td>Advanced German I: Cultural Topics of the Modern German-speaking World</td>

Specific number of credit hours of language (210) and literature, culture,
The following 4-year plan presents a sample guideline for students starting with no prior knowledge in German. Beyond the completion of the Advanced German sequence, German major requirements stipulate a specific number of credit hours of language (210) and literature, culture, and thought (213) courses but not the completion of particular courses. Hence, the selection of courses suggested below is just a suggestion; students are free to choose other courses and vary the sequence as long as they complete the total number of credit hours and do not exceed the maximum number of credits for courses taught in English. Students with prior knowledge in German must take the departmental placement exam before registering for a German class. It is recommended that they discuss specific arrangements for the completion of their requirements with the DUS.

**Honors in German**
The Department of German offers an Honors Program for highly qualified undergraduates. Students must have a minimum GPA of 3.5 to qualify for the program. Students will work on a project in German literature and thought under the guidance of a faculty advisor. The program is completed by a senior essay more comprehensive in scope than a seminar paper. Students interested in the honors program should meet with the Director of Undergraduate Studies no later than the spring semester of their junior year to discuss the requirements and outline the research project to be conducted the following year.

**Sample 4-year plan:**
The following 4-year plan presents a sample guideline for students starting with no prior knowledge in German. Beyond the completion of the Advanced German sequence, German major requirements stipulate a specific number of credit hours of language (210) and literature, culture, and thought (213) courses but not the completion of particular courses. Hence, the selection of courses suggested below is just a suggestion; students are free to choose other courses and vary the sequence as long as they complete the total number of credit hours and do not exceed the maximum number of credits for courses taught in English. Students with prior knowledge in German must take the departmental placement exam before registering for a German class. **German Minor**
Students are encouraged to declare their intent to major or minor in German in their sophomore year and to make an advising appointment with the Director of Undergraduate Studies to discuss their academic plans, including options for a study abroad semester or year.

Students must complete a minimum of 18 credit hours in German beyond Elementary German (210.161-162) and Intermediate German (210.261-262).

Minors are required to complete the Advanced German sequence (210.361-362), which counts for 6 credits and is a prerequisite for upper-level 213.xxx seminars taught in German. Of the remaining twelve (12) credits, minors choose courses designated as 210.3xx; 211.xxx (with approval) and 213.xxx. A minimum of three (3) credits must be completed in German literature, culture and thought courses designated as 213.xxx. No more than three (3) credits of translation courses may be used to fulfill minor requirements. All minor requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

**German B.A./M.A. Degree**
The department offers highly qualified Hopkins undergraduate students the option to complete a combined degree in five years. Please see the Graduate tab for details.

**Italian**

**Italian Major**
Language courses through Intermediate Italian I and II (AS.210.251-252) or equivalent placement as well as Advanced Italian I and II (AS.210.351-352). Two courses (6 credits) from the "Italian Journeys" series, including "Medieval and Early Modern" (AS.214.362) and "Modern and Contemporary" (AS.214.363) Four courses (or the equivalent of 12 credits) from the Italian Culture series (AS.211.200-499) and the Italian Literature series (AS. 214.200-499). May also include one course in
Italian film/history/art history (as long as it is approved by the DUS) and one independent study in the senior year (taken after completing an Italian Literature series course). At least two of the four courses (or the equivalent of 6 credits) must be conducted in Italian. All major requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

**Required Core Courses**

**Electives**

- Two AS.211.2xx-4xx or AS.214.2xx-4xx taught in Italian 6
- Two AS.211.2xx-4xx (related to Italian) or AS.214.2xx-4xx taught in English or Italian 6

* Please note that the Italian program offers 1-credit courses in Italian culture (211.xxx) taught in English that can be freely combined as long as the total number of credits taken satisfies the general requirements.

**Honors in Italian**

Students have the opportunity to earn honors in the major by successfully completing an honors senior essay. Italian majors who select this option may enroll, during either fall or spring semester of their senior year, in a for-credit independent study dedicated to the preparation of the honors senior essay.

**Sample 4-year plan:**

The plan is conceived as a guideline for students starting with no previous skills in Italian language. The sequence of language courses is strongly recommended in order to complete all the requirements for the major by senior year. It is conceivable, though, to postpone Italian Elements to sophomore year. The sequence of courses below is just a suggestion; the sequence can be arranged otherwise as long as (1) the student majoring in Italian takes two courses from the "Italian Journeys" series; and (2) at least two of the remaining four courses are taught in Italian. One independent study in the senior year is acceptable towards the completion of the requirements and is required to graduate with honors in Italian. Students with previous skills in Italian are recommended to take a language placement test and discuss with the DUS specific arrangements for the completion of their requirements.

**Total Credits: 38**

**Italian Minor**

Language courses through Intermediate Italian I and II (AS.210.251-252) or equivalent placement as well as Advanced Italian I and II (AS.210.351-352). One course (3 credits) from the "Italian Journeys" series, including "Medieval and Early Modern" (AS.214.362) or "Modern and Contemporary" (AS.214.363) Three additional courses (or the equivalent of 9 credits) from the Italian Culture series (AS.211.200-499) and the Italian Literature series (AS.214.200-499). One independent study is acceptable toward the course requirements, provided it is taken after completing a course from the Italian Literature series. At least two of the four courses (or the equivalent of 6 credits) must be conducted in Italian. All major requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

**Portuguese**

The study of Portuguese gives you access to the diverse cultural and literary worlds of Brazil, Portugal and the Portuguese-speaking African and Asian countries. In fact, Portuguese is the third most spoken European language, and the most widely spoken language in South America. Today, there are more than 200 million native Portuguese speakers throughout the world from Angola to Brazil and from Portugal to the distant island nation of East Timor in the Pacific. The Portuguese program in the Department of German and Romance Languages and Literatures offers not only the three levels of language training, but also a growing number of courses on literature as well as the culture and civilization of Brazil. We do not currently offer a major or minor in Portuguese but Portuguese may be used as the third language in the three-language option of the Romance Languages major.

**Romance Languages Major**

The Department offers a Romance Languages major in two different configurations: a dual-language option, where the student specializes in two Romance languages, and a three-language option, where the student specializes in three Romance languages. Students interested in pursuing a Romance Languages major should get in touch with the Directors of Undergraduate Studies for each language. Students majoring in Romance Languages will be assigned an advisor for each relevant language, including a primary advisor in their main field of specialization.
All major requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

### Required of All Romance Languages Majors

- **AS.211.400** Topics in Romance Literatures 3
- Completion of a dual language or triple language option 36-42
- Total Credits 39-45

### Dual Language Options

Students must complete the requirements listed below for two languages (French, Italian, or Spanish). They must also take the 3-credit, capstone course **AS.211.400 Topics in Romance Literatures**

#### French

- **AS.210.301** Advanced French I: Achieving Accuracy 3
- **AS.210.302** Advanced French II: Reaching Fluency 3
- **AS.212.333** Introduction à la littérature française 3
- **AS.212.334** Introduction à la littérature française II 3
- Three French courses from the AS.211.3xx-4xx or AS.212.3xx-4xx series, at least one of which must be at the 400 level 9
- Total Credits 18

#### Spanish

- **AS.210.311** Advanced Spanish I 3
- **AS.210.312** Advanced Spanish II 3
- **AS.215.231** Introduction to Literature in Spanish 3
- Three Spanish courses from the AS.211.3xx-4xx or AS.215.3xx-4xx series. One course may be an independent study. 9
- Total Credits 18

#### Italian

- **AS.210.351** Advanced Italian I 3
- **AS.210.352** Advanced Italian II 3
- **AS.214.362** Italian Journeys: Medieval and Early Modern 3
- **AS.214.363** Italian Journeys: Modern and Contemporary Green Literature 3
- Three Italian courses from the AS.211.3xx-4xx or AS.214.3xx-4xx series. One course may be an independent study. 9
- Total Credits 18

### Three Language Options

Students must complete the requirements of two languages (French, Italian, or Spanish) as described in the Languages 1 and 2 section and also complete the requirements of an additional language (French, Italian, Portuguese, or Spanish) as described in the Language 3 section. Students must also take the capstone course, **AS.211.400 Topics in Romance Literatures**

#### Languages 1 and 2

**French**

- **AS.210.301** Advanced French I: Achieving Accuracy 3
- **AS.210.302** Advanced French II: Reaching Fluency 3
- **AS.212.333** Introduction à la littérature française 3
- **AS.212.334** Introduction à la littérature française II 3
- Two French courses from the AS.212.3xx-4xx series, at least one of which must be at the 400 level 6
- Total Credits 15

**Spanish**

- **AS.210.311** Advanced Spanish I 3
- **AS.210.312** Advanced Spanish II 3
- **AS.215.231** Introduction to Literature in Spanish 3
- Two Spanish courses from the AS.211.3xx-4xx or AS.215.3xx-4xx series 6
- Total Credits 15

**Italian**

- **AS.210.351** Advanced Italian I 3
- **AS.210.352** Advanced Italian II 3
AS.214.362 or AS.214.363  
**Italian Journeys: Medieval and Early Modern**  
**Italian Journeys: Modern and Contemporary Green Literature**  

Two Italian courses from the AS.211.3xx-4xx or AS.214.3xx-4xx series  

Total Credits  

**Language 3**  
The student must satisfy their third language requirement as described below:  

**French**  
AS.210.301  
**Advanced French I: Achieving Accuracy**  
3  
AS.210.302  
**Advanced French II: Reaching Fluency**

**Brazilian Culture & Civilization**  
3  
One Portuguese course from the AS.210.3xx or AS.211.3xx series  

Total Credits  

**Spanish**  
Student need to have received a B- or better in AS.210.212 Intermediate Spanish II to proceed into a Spanish major or minor.  

**Spanish Major**  
All major requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.  

**Core Requirements**  
AS.210.311  
*Advanced Spanish I*  
3  

or one course from the AS.215.3xx-4xx series if AS.210.311 waived with placement score  
AS.210.312  
*Advanced Spanish II*  
3  
or AS.210.317  
*Adv Spanish Composition*  

or one course from the AS. 215.3xx-4xx series if AS.210.312 waived with placement score  
AS.215.231  
**Introduction to Literature in Spanish**  
3  

**Additional Electives**  
Choose one from the following list:  

**Spanish**  
AS.210.413  
**Curso de Perfeccionamiento**  
3  
AS.211.380  
**Modern Latin American Culture**  
AS.211.390  
**Modern Spanish Culture**  

With department approval, one course about Latin America or Spain taken in another department (or AS.215.2xx-4xx course)  
Four courses from the 215.2xx-4xx series, distributed between the cultures and literatures of Spain and Latin America.  

Total Credits  

* Prerequisites through AS.210.312 may be satisfied by taking a placement examination. Native speakers should consult with the department. Any language requirement waived by exam must be documented on the transcript before the end of the sophomore year.  

**Spanish Study Abroad**  
It is strongly recommended that majors spend one semester abroad and/ or attend summer or intersession programs. Currently, the department offers a fall program in Madrid, Spain, as well as the Argentina and Peru summer programs organized by the Program in Latin American Studies. Students are expected to consult with the Director of Undergraduate Studies, their department advisor, and the Office of Study Abroad prior to studying abroad. With the approval of the Director of Undergraduate Studies, up to two (2) Spanish courses taken abroad in non-JHU programs or at another institution may be used toward the major.  

**Sample 4-year plan**  
This plan assumes the student is starting at the beginning level of the language.

Spanish Language and Hispanic Cultures Minor

Students may choose one of these two specialized minors: Spanish for the Professions or Spanish Language and Hispanic Cultures. It is also recommended that Spanish minors study abroad for a semester, a summer, or an intersession. With the approval of the Director of the Spanish Language Program, only two Spanish language courses taken abroad (in programs other than Johns Hopkins programs) or at another accredited institution may be applied toward the minor, and only one additional Spanish language course will be approved for credit (but this course will not count toward the minor). For both minors, all minor requirements must be completed with a grade of C- or better and may not be taken satisfactory/unsatisfactory.

Total Credits: 38

* If a waiver was provided for Advanced Spanish I, students must take one Spanish course from the following: AS.210.316 Conversational Spanish, AS.210.4xx or AS.211.xxx or AS.215.2xx-4xx series.

** If a waiver was provided for Advanced Spanish II, students must take one Spanish course from the following: AS.210.317 Advanced Spanish Composition or AS.215.2xx-4xx series.

Study Abroad in Madrid, Spain

The Department offers the following courses as part of the study abroad program in Madrid, Spain (Universidad Carlos 3):

215.340 Modern Spanish Literature

This course covers some representative Spanish literary works of the 20th century, and is divided into four sections: pre-Civil War texts (1900–1939), post-Civil War texts (1939–1975), the literature of the Transition (1975–1982), and contemporary literature (1982–2008). Ramón de Valle-Inclán, Miguel de Unamuno, Federico García Lorca, Antonio Buero Vallejo and Adelaida García Morales are some of the authors whose work will be studied. Three exams and a short research paper in addition to class attendance and participation are required.

215.342 Twentieth-century Latin American Literature

The object of this course is to familiarize students with representative literary works of authors such as Horacio Quiroga, Juan Rulfo, Ernesto Sábato, Jorge Luis Borges, Pablo Neruda and Garbriel García Márques, among others. Discussions of literary historical tendencies, esthetic conceptions and narrative techniques will be based on close reading of assigned works. Two exams and two papers in addition to class attendance and participation are required.

215.412 Spanish Theater

This course will cover the development of the history of Spanish theater: authors, esthetic tendencies and historical and cultural contexts. From the early period, the reading of Calderón de la Barca’s La vida es sueño introduces the student to Golden Age Spanish Theater, which will be discussed in the context of the corales de comedias, Spanish society and culture. The emphasis of the course, however, is placed on more recent Spanish theatrical works by authors such as Ramón de Valle-Inclán, Alfonso Sastre, Sanchis Sinisterra and Alonso de Santos. A short essay is required on the Golden Age section of the course; a second (voluntary) paper will analyze Valle Inclán’s Luces de bohemia. There will be a final exam. Attendance and participation are required.

215.305 Spanish Art

Spanish Art covers architecture and art from earliest times. The course is divided into three sections: architecture and urbanism in Spain from antiquity to the 20th century, Spanish painting from Mannerism to the 19th century, and contemporary painting and sculpture. Visits to various museums in Madrid—The Prado, Reina Sofia, Sorolla—are included and required. Class assignments, attendance, demonstrated interest and class participation count heavily toward the final grade. There is also a final exam.

211.290 Modern Spanish Culture

Spanish culture will be studied in its historical and social contexts between 1931 and 1982. Movies, textbooks, popular music, photography,
posters, literary works and censorship and the Movida Madrileña will constitute the material studied before and after Franco’s dictatorship. Visits to museums (Reina Sofía) and monuments (Valle de los caídos) are an integral part of the course. A final paper and exam are required, as is class attendance and participation.

Graduate Programs
Requirements for the M.A. degree
The department does not accept applications for the M.A. degree as a terminal degree.

German B.A./M.A. Degree
The department offers highly qualified students the option to complete a combined degree in five years. To receive the B.A./M.A. degree, the student must complete advanced courses in German literature and pass the departmental written and oral master's examinations. Students interested in this option should make an appointment with the Director of Undergraduate Studies no later than the spring of their junior year to discuss the options available to them.

Graduate Ph.D. Requirements
In addition to general university requirements for the Ph.D., the following regulations apply to graduate students in the Department of German and Romance Languages and Literatures:

To be accepted into the Ph.D. program, students must demonstrate by an exceptionally strong academic record that they are capable of advanced study in literature. They will choose French, German, Italian, Latin American, or Spanish literature as the major field of interest. The student will normally take two to three years of graduate courses and devote the fourth year to study and research in the country on which the student’s study concentrates. The well-prepared student can expect to receive the Ph.D. after five years of study. The graduate program in German and Romance Languages and Literatures emphasizes work in three complementary areas: literary history, close textual analysis (including explication de texte), and theory of interpretation. By way of preparing students in a variety of critical schools, the faculty and the visiting professors offer training in the different disciplines pertaining to critical theory, including philosophy, theory of language, psychoanalytic theory, intellectual history, and cultural anthropology.

In addition to the major language, the Ph.D. candidate must demonstrate proficiency in one or two other languages besides English, depending on the specialization. (See below for further information.)

A dissertation proposal, presented to the faculty and students in their section, is required before official admittance to candidacy for the Ph.D. for French, Italian and Spanish graduate students.

French
For students who choose to specialize in an early modern period (medieval, Renaissance, or 17th century), proficiency in Latin is required by the end of the third semester. Students may also choose a minor field: another Romance literature, modern criticism, comparative literature, medieval studies, or some other field connected with the student’s major field.

German
In addition to fulfilling the general university requirements for advanced degrees, candidates for the M.A. must demonstrate fluency in spoken German, be able to write German reasonably well, have a good knowledge of the history of German language and literature, be familiar with the general cultural background, and have read extensively in German literature, particularly in the periods after 1700. During their first two years at Hopkins, candidates for the M.A. degree must pass two topical examinations. After the M.A., two major qualifying papers are required under the supervision of two advisors, chosen by the candidate, before work on the dissertation can be undertaken.

Italian
In addition to the major language, the student must demonstrate proficiency in two other foreign languages. The student must take a minimum of five semesters of graduate courses. After this period, normally in the third year, the student will take examinations which, if completed successfully, will lead to candidacy for the Ph.D.

Spanish
In addition to the major language, the student must demonstrate proficiency in two other foreign languages. The student must take a minimum of four semesters of graduate courses. After this period, normally in the third year, the student will take four field examinations which, if completed successfully, will lead to candidacy for the Ph.D.

Graduate Study Abroad
The Department encourages and expects graduate students to do research abroad during their program of study. In the French section, an exchange program with the École Normale Superieure offers the opportunity for graduate students to study in Paris, where they are encouraged to participate to research programs at ENS, EHESS, and other Universities; an exchange program with University Paris-Diderot-Paris 7 offers the opportunity for graduate or post-graduate students in French to study and teach in Paris; and the University of Geneva offers a fellowship each year for a grad student in the French section. Ph.D. students in the French section are also encouraged to apply for the Chateaubriand scholarship offered by the Embassy of France. Exchange programs with the FU Berlin (Friedrich Schlegel Graduate School of Literary Studies), the University of Hamburg, and the Humboldt University, offer the opportunity for graduate students in the German section to study in Germany. In addition, the German section offers Max Kade travel grants for research in a German-speaking country. Italian graduate students can take advantage of a wealth of formal and informal contacts with Italian scholars, archives, and institutes. Spanish students may elect to make their fourth year a non-teaching year. After presenting a research proposal to their advisor, with the approval of that advisor and the head of section, they may elect to go abroad for a semester or the entire academic year in order to conduct research essential to their dissertation.

Financial Aid
The department has a number of fellowships for graduate students. Awards include university fellowships, which carry stipends and teaching fellowships currently set at $28,500 per academic year for teaching one section of an undergraduate language course each semester, in addition to remission of tuition fees. All graduate students are expected to do four years of apprentice teaching of elementary and intermediate level undergraduate courses as part of their professional preparation. The amount of classroom teaching required is usually three to four hours a week. Students are admitted for five years, fully funded, subject to annual review to assure satisfactory progress. In addition, stipends (equivalent to that year’s teaching fellowship) are available for study abroad during the third or fourth year.

Fourth- and fifth-year graduate students may also compete for Dean’s Teaching Fellowships, which provide opportunities for the design and
teaching of undergraduate courses in literature, cultural studies, or
intellectual history.

Graduate students conducting research in Italian studies compete each
year for two Charles S. Singleton Travel Grants for study in Italy. This
program is administered by the department and is open to graduate
students from other departments.

Application Procedures
Prospective graduate students may visit the departmental website at
http://grll.jhu.edu for further information on programs and faculty. All
questions regarding the programs offered by the department should
be emailed to grll@jhu.edu. Prospective students are encouraged to
apply online through the secure Graduate Admissions website (https://
app.applyyourself.com/?id=jhu-grad).

For current faculty and contact information go to http://grll.jhu.edu/
directory/

Faculty
Chair
Derek Schilling
Modern and contemporary French literature; film esthetics and theory;
geocriticism; urban and suburban studies

Associate Professors
Katrin Pahl
German literature and philosophy around 1800, affect and emotion,
gender and sexuality, feminist and queer theory, psychoanalysis, rhetoric,
comparative literature, literary theory, Hegel, Kleist

Neta Stahl
Director of the Stuhlman Program in Jewish Studies

Courses
AS.210.101. French Elements I. 4.0 Credits.
Provides a multi-faceted approach to teaching language and culture to the novice French student. The first semester emphasizes listening and speaking, while laying the foundation in grammar structures, reading, and writing. This course is designed for true beginners: Students with any previous background must take the placement test (http://www.advising.jhu.edu/placement_french.php) and receive below 30 (or below 200 on Webcape). Must complete both semesters successfully in order to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis.

Instructor(s): C. Guillemard.
AS.210.102. French Elements II. 4.0 Credits.
The second semester of this intensive course for beginners provides students with the tools to read a play (Antigone by Jean Anouilh), to polish a written autobiography, and to develop their oral skills. A variety of cultural materials help students acquire grammatical structures and expand their vocabulary. May not be taken on a Satisfactory/Unsatisfactory basis. Pre-requisites: AS.210.101 or AS.210.103. New students must take the placement exam (http://www.advising.jhu.edu/placement_french.php) and contact the instructor: cguille1@jhu.edu.
Instructor(s): C. Guillemard.

AS.210.103. Learner Managed French Elements I. 3.0 Credits.
This beginner course is specifically designed for students who have had some exposure to French. They must take the mandatory placement test: http://www.advising.jhu.edu/placement_french.php, and receive between 30 and 49. They will cover the first semester of French Elements at a pace suited for “false beginners” with major online components to supplement class instruction. Must complete the year with 210.102 or 210.104 to obtain credit. May not be taken on a Satisfactory/Unsatisfactory basis. Instructor(s): B. Anderson.

AS.210.104. Learner Managed French Elements II. 3.0 Credits.
Continuation of the refresher course AS.210.103, offered for three credits and letter grade. Recommended for self-motivated students who have some knowledge of French and wish to continue their review of the language intensively. Major online component supplements in-class instruction. Prerequisites: AS.210.101 OR AS.210.103 or appropriate test score.
Instructor(s): B. Anderson.

AS.210.111. Spanish Elements I. 4.0 Credits.
This is an introductory Spanish language course. On completion of this course, the students will have acquired the basic communication and grammatical skills necessary for speaking, writing, listening and reading in Spanish. Students will demonstrate these skills through their performance in class, by completing several online assignments, and by taking part in three group presentations in addition to two comprehensive exams which focus on the following thematic topics: Food, Sports, Shopping, Travel, and Health. Students will also be introduced to the culture, history and geography of various Spanish and Latin American countries. The content covered in Spanish Elements I prepares the students for Intermediate Spanish. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after 4th class session. Prerequisite: AS.210.111 or appropriate placement exam score.
Instructor(s): J. Lirot; M. Tracy.

AS.210.112. Spanish Elements II. 4.0 Credits.
This introductory Spanish language course is a continuation of the content covered in Spanish Elements I. On completion of this course, the students will have further developed the communication and grammatical skills necessary for speaking, writing, listening and reading in Spanish. Students will demonstrate these skills through their performance in class, by completing several online assignments, and by taking part in three group presentations in addition to two comprehensive exams which focus on the following thematic topics: Food, Sports, Shopping, Travel, and Health. Students will also be introduced to the culture, history and geography of various Spanish and Latin American countries. The content covered in Spanish Elements II prepares the students for Intermediate Spanish. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after 4th class session.
Prerequisites: AS.210.111 or Spanish placement exam score.
Instructor(s): Staff.

AS.210.150. Program Abroad: Preliminary Portuguese. 3.0 Credits.
Summer Abroad Program. First semester college-level Portuguese. Students will develop basic listening, speaking, reading and writing skills. Some cultural readings are included. This course is intended for program participants with little or no prior Portuguese language instruction. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Writing Intensive.

AS.210.151. Italian Elements I. 4.0 Credits.
This is a four-credit course, and Italian Elements II (AS.210.152) must be completed in the Spring to receive credit. The aim of the course is to provide students with basic listening, reading, writing, speaking and interactional skills in the language. All classes are conducted in Italian; oral participation is strongly encouraged from the beginning. Students wishing to retain credits for Italian Elements I must complete Italian Elements II with a passing grade. No Satisfactory/Unsatisfactory option.
Instructor(s): Staff.

AS.210.152. Italian Elements II. 4.0 Credits.
Course helps students develop basic listening, reading, writing, speaking, and interactional skills in Italian. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course adopts a continuous assessment system (no mid-term and no final).
Prerequisites: AS.210.151 or Placement Exam Part 1.
Instructor(s): Staff.

AS.210.161. German Elements I. 4.0 Credits.
Four skills introduction to German language and culture. Develops proficiency in speaking, writing, reading, and listening skills through the use of basic texts, multi-media, and communicative language activities. Online tools required. Both semesters must be completed with passing grades to receive credit. May not be taken on a Satisfactory/Unsatisfactory basis. Tuesday section is a mandatory hour; choose your section based on the MWF time. Conflicts with Tuesday hour can be resolved after start of semester. Language Program Director: Deborah Mifflin. Students wishing to retain credits for German Elements I must complete German Elements II with a passing grade.
Instructor(s): D. Mifflin.
AS.210.162. German Elements II. 4.0 Credits.
Continuation to the introduction to the German language and a development of reading, speaking, writing & listening through the use of basic texts and communicative activities. The culture of the German-language countries is also incorporated into the curriculum. May not be taken on a Satisfactory/Unsatisfactory basis. Choose your section based on MWF schedule. Tuesday hour is mandatory but flexible and conflicts with Tuesday hour can be resolved after the start of the semester.
Prerequisites: AS.210.161 or appropriate score on placement exam.
Instructor(s): D. Mifflin.

AS.210.163. Elementary Yiddish I. 3.0 Credits.
Year-long course. Includes the four language skills, reading, writing, listening, and speaking, and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Students wishing to retain credits for Elementary Yiddish I must complete Elementary Yiddish II with a passing grade.
Instructor(s): B. Lang.

AS.210.164. Elementary Yiddish II. 3.0 Credits.
Year-long course that includes the four language skills--reading, writing, listening, and speaking--and introduces students to Yiddish culture through text, song, and film. Emphasis is placed both on the acquisition of Yiddish as a tool for the study of Yiddish literature and Ashkenazic history and culture, and on the active use of the language in oral and written communication. Both semesters must be taken with a passing grade to receive credit. Recommended Course Background: AS.210.163 or instructor permission.
Instructor(s): B. Lang.

AS.210.171. Accelerated Italian Elements I for Advanced Spanish Speakers. 4.0 Credits.
Course draws on the many similarities between Spanish and Italian to help students develop basic listening, reading, writing, speaking, and interactional skills in Italian in an accelerated fashion. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course is taught in Spanish and Italian. Students completing both semesters with a grade of A- or higher will be able to place into Advanced Italian I (AS210.351)
Instructor(s): A. Zannirato
Area: Humanities.

AS.210.172. Italian Elements II for Advanced Spanish Speakers. 4.0 Credits.
Course draws on the many similarities between Spanish and Italian to help students develop basic listening, reading, writing, speaking, and interactional skills in Italian in an accelerated fashion. The content of the course is highly communicative, and students are constantly presented with real-life, task-based activities. Course is taught in Spanish and Italian. Students successfully completing the course with a grade of A- or higher will be allowed to place into Advanced Italian I (AS210.351)
Prerequisites: AS.210.171 with a grade of A- or higher.
Instructor(s): A. Zannirato
Area: Humanities.

AS.210.177. Portuguese Elements I. 4.0 Credits.
This one-year course introduces students to the basic skills in reading, writing, and speaking the language. Emphasis is placed on oral communication with extensive training in written and listening skills. Class participation is encouraged from the very beginning. All classes are conducted in Portuguese. Students must complete both semesters with passing grades to receive credit. May not be taken on a Satisfactory / Unsatisfactory basis. No previous knowledge of Portuguese is required.
Instructor(s): F. De Azeredo Cerqueira.

AS.210.178. Portuguese Elements II. 4.0 Credits.
This course expands students knowledge of the basic language skills: reading, writing, listening, speaking. It uses a multifaceted approach to immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa. The focus of the course is on oral communication with, however, extensive training in grammar. The course is conducted entirely in Portuguese. Lab work required. Students must complete both semesters with passing grades to receive credit.
Prerequisites: AS.210.177 or equivalent score on placement test or instructor approval.
Instructor(s): F. De Azeredo Cerqueira.

AS.210.201. Intermediate French I. 3.0 Credits.
This course develops skills in speaking, listening comprehension, reading, and writing. Systematic review of language structures with strong focus on oral communication and acquisition of vocabulary, extensive practice in writing and speaking; readings and films from French-speaking countries. Recommended Course Background: AS.210.102 or AS.210.104 or score between 65 and 89 on Placement test I.
Prerequisites: Students who have taken AS.210.203 [High Intermediate French] are ineligible to register for AS.210.201
Instructor(s): S. Roos
Area: Humanities.

Focus on oral communication; develops skills in oral and written expression, listening comprehension, and reading, with extensive study of films and readings from French-speaking countries. Online component via Blackboard. Continuation of AS.210.201. Recommended course background: AS.210.201 or AS.210.203.
Instructor(s): S. Roos
Area: Humanities.

AS.210.208. Intermediate French II Through Acting. 3.0 Credits.
This 5-week intensive course will cover the material of Intermediate French II. Through examining excerpts of popular French theater plays (by Camus, Sartre, Feydeau, Ionesco, and others), this class proposes to 1) improve French speaking and writing skills (pronunciation, intonation, vocabulary, syntax, argumentative reasoning, creative writing) 2) understand the linguistic nuances and socio-cultural practices expressed in the texts 3) learn the basic tools of acting (body language, vocal projection, physical expressivity, emotional expression, stage direction, improvisation, etc.). The course will include watching filmed representations of plays, as well as a performance at the end of the term. The daily hour overlapping with the Advanced class will focus on personalized, interactive, and level-based exercises.
Prerequisites: AS.210.201 OR AS.210.205 or appropriate placement.
Instructor(s): K. Haklin
Area: Humanities.
AS.210.209. The Sounds of French. 3.0 Credits.
This course introduces students to the sound system of French: its development over centuries, its standardized Parisian form versus regional and international dialects and accents, and the popularity of "word games" (abbreviations, acronyms, and verlan). The course will include extensive practice in perceiving, articulating, and transcribing sounds, words, and intonation groups through viewing film clips, listening to songs, and completing in-class lab assignments. Recorded speech samples obtained at the beginning, middle, and end of the semester will allow students to track their progress in moving toward more native pronunciation and intonation. May be taken concurrently with AS.210.205 or AS.210.305.
Instructor(s): Staff
Area: Humanities.

This 5-week intensive course will cover the material of Intermediate French I with an emphasis on listening comprehension and speaking: an attractive selection of classic and contemporary French movies (Les Intouchables, Manon des Sources, La Vie en rose, Sugar Cane Alley, among others) will enhance students' acquisition of the language and will deepen their understanding of French and francophone cultures. The daily hour overlapping with the Advanced class will focus on personalized, interactive, and level-based grammar followed by group discussion on the movies. Creative role-play activities will develop students' fluency.
Prerequisites: AS.210.102 or appropriate placement; placement exam link available at grll.jhu.edu
Instructor(s): C. Guillemard
Area: Humanities.

AS.210.211. Intermediate Spanish I. 3.0 Credits.
Intermediate Spanish I is a comprehensive study of Spanish designed for students who have attained an advanced elementary level in the language. The course is organized around a thematic approach to topics relevant to contemporary Hispanic culture. Students will practice the four language skills in the classroom through guided grammatical and creative conversational activities and through the completion of three comprehensive exams. Outside of class, students will complete extensive online assignments and write three major compositions (as part of the three exams). In addition, students will broaden their knowledge of Hispanic culture by viewing a Spanish-language film and by reading several literary selections. Successful completion of Intermediate Spanish I will prepare students for the next level of Spanish (Advanced Spanish I). There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th.
Prerequisites: AS.210.211 or appropriate Spanish placement exam score.
Instructor(s): G. Chirinos Delgado; N. Martinez-Velez
Area: Humanities.

AS.210.212. Intermediate Spanish II. 3.0 Credits.
Intermediate Spanish II is a comprehensive study of Spanish designed for students who have attained a mid-intermediate level in the language or who have completed Spanish 212. The course is organized around a thematic approach to topics relevant to contemporary Hispanic culture. Students will practice the four language skills in the classroom through guided grammatical and creative conversational activities and through the completion of three comprehensive exams. Outside of class, students will complete extensive online assignments and write three major compositions (as part of the three exams). In addition, students will broaden their knowledge of Hispanic culture by viewing a Spanish-language film and by reading several literary selections. Successful completion of Intermediate Spanish II will prepare students for the next level of Spanish (Advanced Spanish I). There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after September 13th.
Prerequisites: AS.210.211 or appropriate Spanish placement exam score.
Instructor(s): Staff
Area: Humanities.

AS.210.225. Advanced French I. 3.5 Credits.
Taught in French. Course continues building on the four essential skills for communication presented in French I courses (listening, speaking, reading, writing) on topics of increasing complexity. Course adopts a continuous assessment system. May not be taken with a letter grade.
Prerequisites: AS.210.209.
Instructor(s): A. Zannirato; L. Proietti
Area: Humanities.

AS.210.250. Program Abroad: Objective Portuguese - Level III. 3.0 Credits.
Summer Abroad Program. Third semester college-level Portuguese. Students develop basic listening, speaking, reading and writing skills. Cultural readings included. The class is designed to further develop and strengthen the language skills acquired in Portuguese 210.177 & 210.178. Open to Brazil Program applications only. Course must be taken for a letter grade.
Prerequisites: AS.210.250.
Instructor(s): F. De Azeredo Cerqueira
Writing Intensive.

AS.210.251. Intermediate Italian I. 3.0 Credits.
Taught in Italian. Course continues building on the four essential skills for communication presented in Italian Elements courses (listening, speaking, reading, writing) on topics of increasing complexity. Course adopts a continuous assessment system. May not be taken with a letter grade.
Prerequisites: AS.210.251 or placement exam score.
Instructor(s): A. Zannirato; L. Proietti
Area: Humanities.

AS.210.252. Intermediate Italian II. 3.5 Credits.
Taught in Italian. Course continues building on the four essential skills for communication presented in Intermediate Italian I (listening, speaking, reading, writing) on topics of increasing complexity. Course adopts a continuous assessment system. May not be taken with a letter grade.
Prerequisites: AS.210.251 or placement exam scores (Parts I, II).
Instructor(s): A. Zannirato; L. Proietti
Area: Humanities.

AS.210.261. Intermediate German I. 3.0 Credits.
Taught in German. This course continues the same four-skills approach (speaking, writing, reading, and listening) from the first-year sequence, introducing and practicing more advanced topics and structures. Expansion and extension through topical readings and discussion and multi-media materials. Online tools required. Language Program Director: Deborah Mifflin
Prerequisites: AS.210.162 or placement by exam.
Instructor(s): H. Wheeler
Area: Humanities.
AS.210.262. Intermediate German II. 3.0 Credits.
Taught in German. This course is designed to continue the four skills (reading, writing, speaking and listening) approach to learning German. Readings and discussions are topically based and include fairy tales, poems, art and film, as well as readings on contemporary themes such as Germany's green movement. Students will also review and deepen their understanding of the grammatical concepts of German.
Prerequisites: AS.210.261 or placement exam.
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.263. Intermediate Yiddish I. 3.0 Credits.
This course will focus on the Yiddish language as a key to understanding the culture of Yiddish-speaking Jews. Topics in Yiddish literature, cultural history and contemporary culture will be explored through written and aural texts, and these primary sources will be used as a springboard for work on all the language skills: reading, writing, listening, and speaking.
Prerequisite: AS.210.164 or equivalent, or permission of instructor.
Prerequisites: AS.210.164 or Permission of instructor.
Instructor(s): B. Lang
Area: Humanities.

AS.210.265. Individualized Yiddish Practicum. 3.0 Credits.
This course will allow students at any stage of Yiddish language acquisition to hone their skills in reading, writing, listening and speaking. The program will be individualized for each student according to his or her needs while at the same time providing joint activities in which all can participate.
Instructor(s): B. Lang
Area: Humanities.

AS.210.266. German Conversation. 1.5 Credits.
This course is designed for intermediate and above students who wish to improve their conversational and oral presentational language skills. The syllabus aims to provide useful, relevant language and necessary discourse structures to hold conversations and presentations on varied topics of an everyday, as well as academic nature. Students will practice German to build confidence, develop fluency, and improve pronunciation and accuracy. Short texts, audio and films will provide the basis for discussion. Students’ fields of study and interests will be incorporated into the syllabus and tasks will be matched to the ability level of the students enrolled. Recommended Course Background: AS.210.262 or two years of college German or equivalent. May be taken concurrently with other courses in German. May be taken Pass/Fail. Not for major or minor credit.
Instructor(s): Staff.

AS.210.275. Fast Portuguese for Spanish Speakers and speakers of other Romance Languages I. 4.0 Credits.
This course is designed as an accelerated introductory course for speakers with a sound knowledge of Spanish and other romance languages. The course will cover the basics of Portuguese grammar and present selected aspects of the cultures of the Portuguese speaking countries. All classes are conducted in Portuguese. Students must complete both semesters with passing grades to receive credit. THERE IS NO FINAL EXAM. May not be taken on a Satisfactory / Unsatisfactory basis. No previous knowledge of Portuguese is required.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.210.277. Intermediate Portuguese I. 3.0 Credits.
More advanced training in the skills of the language with emphasis on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. All classes are conducted in Portuguese. Lab is required. May not be taken on a Satisfactory/Unsatisfactory basis. Prereq: AS.210.178, or placement test.
Prerequisites: AS.210.178 or equivalent score on placement test or instructor approval.
Instructor(s): M. Spiker
Area: Humanities.

AS.210.278. Interm/Adv Portuguese. 3.0 Credits.
This course is conducted entirely in Portuguese. Emphasis is placed on vocabulary building, ease and fluency in the language through the use of a multifaceted approach. Materials used immerse students in the cultures of Brazil, Portugal, and Portuguese-speaking Africa, and reflect the mix of cultures at work in the contemporary Lusophone world. Lab work required.
Prerequisites: Prerequisite: AS.210.177 AND AS.210.178 or equivalent score on placement test or instructor approval.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.210.288. Portuguese: Conversation through Film & Music. 3.0 Credits.
Improve your Portuguese conversational and speaking skills through colorful Brazilian media. This course is designed for highly motivated undergraduate and graduate students who want to SPEAK Portuguese. Conversation sessions provide intensive work on communication skills through discussion on issues raised in films, news media & music. Grammar will be reviewed as needed outside of class with tutors or TA, freeing class time for more communicative activities. May not be taken on a Satisfactory / Unsatisfactory basis. Prereq: one semester of Portuguese (AS.210.177), two semesters of Spanish or Placement test.
Instructor(s): Staff
Area: Humanities.

AS.210.301. Advanced French I: Achieving Accuracy. 3.0 Credits.
Students in AS.210.301 will focus primarily on written expression, learning to 'decipher' classic and contemporary French texts, in order to expand their vocabulary and communicate their ideas in writing with clarity and accuracy. (A primary focus on oral expression is provided in AS.210.302; the two advanced-level courses may be taken in either order or simultaneously.)
Instructor(s): B. Anderson; K. Cook-Gailloud
Area: Humanities
Writing Intensive.

AS.210.302. Advanced French II: Reaching Fluency. 3.0 Credits.
Students in 210.302 will focus primarily on oral expression through individual and group work on contemporary media (music, film, current events) in order to expand their vocabulary and become fluent in conversation across social-cultural contexts. (A primary focus on written expression is provided in 210.301; the two advanced-level courses may be taken in either order or simultaneously.)
Instructor(s): A. Wuensch
Area: Humanities
Writing Intensive.
AS.210.306. Medical French. 3.0 Credits.
This interactive course is designed to provide students with specific linguistic tools used in medical and public health fields, as well as a comprehensive understanding of health care systems in the French and francophone world. Through a wide range of media (newspaper articles, scenes from TV series, excerpts of historical and literary texts) and group discussions, we will focus on topics such as physical and mental health, consultation and diagnosis, hospitalization, specialized fields (epidemiology, neurology, psychiatry, etc.) and deontology.
Prerequisites: Prereq: AS.210.201 OR AS.210.202 or equivalent or permission (kacg@jhu.edu)
Area: Humanities.

AS.210.309. The Sounds of French. 3.0 Credits.
This course introduces students to the sound system of French: its development over centuries, its standardized Parisian form versus regional and international dialects and accents, and the popularity of "word games" (abbreviations, acronyms, and verlan). The course will include extensive practice in perceiving, articulating, and transcribing sounds, words, and intonation groups through viewing film clips, listening to songs, and completing in-class lab assignments. Recorded speech samples obtained at the beginning, middle, and end of the semester will allow students to track their progress in moving toward more native pronunciation and intonation. Recommended Course Background: AS.340.101-AS.340.102 or equivalent; AS.210.301 (may be taken concurrently).
Instructor(s): B. Anderson
Area: Humanities.

AS.210.311. Advanced Spanish I. 3.0 Credits.
This course is a comprehensive study of the Spanish language focused on the continuing development of students’ communicative abilities and their knowledge of Hispanic cultures. Students will expand their use of basic structures of Spanish with a special emphasis on more difficult grammatical and vocabulary aspects, and further improve both their oral and written skills. Students will sharpen their critical thinking skills and listening abilities utilizing movies and written texts. This course combines an extensive use of an online component, class participation and three exams. Upon successful completion of this course, students will have acquired more complex language tools to become proficient in Spanish and its use in various professional contexts. There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after the third class session.
Prerequisites: AS.210.311 OR AS.210.312 or appropriate Spanish placement exam score.
Instructor(s): A. Hubbard, J. López Raja
Area: Humanities.

AS.210.312. Advanced Spanish II. 3.0 Credits.
This course is thorough review of the Spanish language focused on the development of students’ communicative abilities and their knowledge of Hispanic cultures. Students will both expand their knowledge of the basic structures of Spanish, with special emphasis on more difficult grammatical and vocabulary aspects, and further improve on oral and written skills. Students will increase their critical thinking skills and listening abilities utilizing movies and written texts. This course combines an extensive use of an online component, class participation and three exams. Upon successful completion of this course, students will have acquired more complex language tools to become proficient in Spanish and its use in various professional contexts. There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after the third class session.
Prerequisites: AS.210.311 or appropriate Spanish placement exam score.
Instructor(s): A. Hubbard
Area: Humanities.

AS.210.313. Medical Spanish. 3.0 Credits.
Medical Spanish is a comprehensive examination of vocabulary and grammar for students who either work or intend to work in medicine and health-related fields in Spanish-speaking environments. The student will be able to participate in conversations on topics such as contrasting health systems, body structures, disorders and conditions, consulting your doctor, physical and mental health, first-aid, hospitalization and surgery on completion of this course. In completing the course’s final project students will apply, synthesize, and reflect on what has been learned in the class by creating a professional dossier individualized to their professional interests. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Prerequisites: AS.210.311 or AS.210.312 or appropriate Spanish placement exam score.
Instructor(s): J. López Raja
Area: Humanities.

AS.210.314. Spanish for International Commerce. 3.0 Credits.
Spanish for international business is an overview of business topics in an international Spanish-speaking context with an emphasis on deep review of grammar and vocabulary acquisition. On completion of this course the student will have developed the ability to read and critically discuss business and government relations in Latin America and will have examine entrepreneurship, finance, marketing, business ethics, human resources and commerce in the Spanish speaking world. In completing the course’s final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own professional interests. Concepts learned in this course will be directly applicable to careers linked to international relations and will apply to various careers in business. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session. Language Program Director. Loreto Sanchez-Serrano
Prerequisites: AS.210.311 or or appropriate Spanish placement exam score.
Instructor(s): A. Hubbard
Area: Humanities.
AS.210.315. Spanish for International Relations. 3.0 Credits.
Spanish for international relations is an advanced examination of grammar and an analysis of international relations’ topics in Spanish. By completion of this course the student will have developed the ability to read, critically discuss and demonstrate mastery of political and socio-economic issues in Spanish-speaking environments. Potential topics include a survey of the professions in international relations, NGOs in Latin America, intellectual property, cultural diplomacy, remesas, regional coalitions and treaties, and the environment. Class presentations and final projects will allow students to apply, synthesize, and reflect on what has been learned in the class by participating in a global simulation that will include a written exercise individualized to their professional interests. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the 4th class session
Prerequisites: AS.210.311 or appropriate webcape score
Instructor(s): M. Ramos
Area: Humanities.

AS.210.316. Conversational Spanish. 3.0 Credits.
Conversational Spanish surveys high-interest themes, discusses short films by contemporary Hispanic filmmakers and offers a thorough review of grammar. The student will be able to participate in conversations on topics such as personality traits, social media, political power, art and lifestyles on completion of this course. Conversational skills mastered during the course apply to all careers interconnected by Spanish. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Prerequisites: AS.210.311 or appropriate Spanish placement exam score.
Instructor(s): L. Sanchez; M. Ramos
Area: Humanities.

AS.210.317. Adv Spanish Composition. 3.0 Credits.
This third-year course is a hands-on and process-oriented introduction to discussion and compositional analysis. On completion of this course, students will have improved their Spanish writing skills in various types of compositions they might be expected to write in academic settings and in real-life formats such as film reviews, letters to the editor, cover letters, etc. The course also focuses on refinement of grammar and vocabulary use. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after September 13th.
Prerequisites: AS.210.312 or appropriate Spanish placement exam score.
Instructor(s): L. Sanchez
Area: Humanities
Writing Intensive.

AS.210.319. ¡Salsa! The Afro-Antillean song. 3.0 Credits.
¡Salsa! The Afro-Antillean song surveys Caribbean music in an international Spanish-speaking context. As a language course, it reviews grammar and instils vocabulary acquisition through the close analysis of the biggest hits of salsa from the past one hundred years. In completing the course’s final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own personal musical interests. On completion of this course the student will have developed the ability to read and critically discuss music and its history in the Spanish-speaking Caribbean and will have examined cultural roots, market dominance, and media crossovers in the musical universe of the Spanish-speaking archipelago of the Antilles. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session. Co-listed with AS.211.319
Prerequisites: AS.210.311 or appropriate placement exam score.
Instructor(s): M. Ramos
Area: Humanities.

AS.210.325. Program Abroad: Objective Portuguese - Level III. 3.0 Credits.
Summer Abroad Program. Fifth semester college-level Portuguese. Students further improve conversation and comprehension proficiency. Develop reading and writing skills through literary analysis and grammar review. The class is designed to further develop and strengthen the language skills acquired in Portuguese 210.277 & 210.278. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Writing Intensive.

AS.210.325. Advanced Italian I. 3.0 Credits.
Course presents a systematic introduction to a variety of complex cultural and historical topics related to present-day Italy, emphasizing intercultural comparisons and interdisciplinarity, and encouraging a personal exploration of such topics. Course adopts a continuous assessment system (no mid-term and no final), and is conducted entirely in Italian. Year course; must complete both semesters for credit. No Satisfactory/Unsatisfactory option. Language Program Director: Alessandro Zannirato
Prerequisites: AS.210.252 or placement exam
Instructor(s): Staff
Area: Humanities
Writing Intensive.

AS.210.325. Advanced Italian II. 3.0 Credits.
Course presents a systematic introduction to a variety of complex cultural and historical topics related to present-day Italy, emphasizing intercultural comparisons, interdisciplinarity, and encouraging a personal exploration of such topics. Course adopts a continuous assessment system (no mid-term and no final).
Prerequisites: AS.210.351 or appropriate placement exam scores (Parts I, II and III).
Instructor(s): Staff
Area: Humanities
Writing Intensive.
AS.210.361. Advanced German I: Cultural Topics of the Modern German-speaking World. 3.0 Credits.
Taught in German. Topically, this course focuses on defining moments in cultural history in German speaking countries in the 2nd half of the 20th century. Films, texts and other media provide a basis for discussing events in post-war Germany from 1945 to 1989. A review and expansion of advanced grammatical concepts and vocabulary underlies the course. Focus on improving expression in writing and speaking. Language Program Director: Deborah Mifflin
Prerequisites: AS.210.262 or placement exam.
Instructor(s): D. Mifflin
Area: Humanities
Writing Intensive.

AS.210.362. Advanced German II: Contemporary Issues in the German Speaking World. 3.0 Credits.
Taught in German. Topically, this course focuses on contemporary issues such as national identity, multiculturalism and the lingering social consequences of major 20th century historical events. Readings include literary and journalistic texts, as well as radio broadcasts, internet sites, music and film. Students read a full-length novel. Emphasis is placed on improving mastery of German grammar, development of self-editing skills and practice in spoken German for academic use. Introduction/Review of advanced grammar.
Prerequisites: AS.210.361 or equivalent score on placement test.
Instructor(s): D. Mifflin
Area: Humanities
Writing Intensive.

AS.210.363. Business German. 3.0 Credits.
Taught in German. Course is designed to familiarize students with the vocabulary and standards for doing business in Germany. Taking a cultural approach, students read texts and engage in discussion that elucidate the works of business, commerce & industry in Germany, the world's third largest economy. Emphasis is placed on vocabulary expansion and writing as it relates to business.
Instructor(s): J. Birke
Area: Humanities.

AS.210.365. German for Science and Engineering. 3.0 Credits.
Taught in German. This course is designed to provide language training in German tailored to students of science & engineering. Germany has long been a world leader in engineering, most notably in chemical and mechanical engineering. Over the past decades, Germany also has taken a lead in environmental sciences and information technology. In addition, Germany is now becoming an increasingly attractive place to pursue degrees in the technical fields. This course will provide practice and expansion in all language skill areas: analysis of texts, hands-on-activities, preparation of presentations, and discussion of topics. Specific areas of interest to the course members will be taken into consideration for the selection of materials. [Does not replace 210.362 as prerequisite for upper level courses or as major requirement.]
Prerequisites: AS.210.262 OR AS.210.361 OR AS.210.362 OR EQUIVALENT OR PLACEMENT EXAM
Area: Humanities.

AS.210.368. Advanced Yiddish II. 3.0 Credits.
Continuation of Advanced Yiddish I (AS.210.367). Students will continue to hone their skills in all four language areas: reading, writing, listening, and speaking. In addition to advanced grammar study and readings in Yiddish literature, the course will take into account the interests of each individual student, allowing time for students to read Yiddish texts pertinent to their own research and writing.
Prerequisites: AS.210.367
Instructor(s): B. Lang
Area: Humanities.

AS.210.369. Yiddish Texts I. 3.0 Credits.
This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing).
Prerequisites: AS.210.368 or permission of instructor.
Instructor(s): B. Lang
Area: Humanities.

AS.210.370. Yiddish Texts II. 3.0 Credits.
Continuation of Yiddish Texts I. This course will give students who have completed Advanced Yiddish the chance to improve their proficiency. The curriculum will be determined according to the research interests of the students with an emphasis placed on reading primary texts fluently. Since the course is taught in Yiddish, students will also have ample opportunity to practice the other language skills (listening, speaking, writing). Recommended Course Background: Yiddish Texts I or permission of the instructor.
Instructor(s): B. Lang
Area: Humanities.

AS.210.371. From the yidishe gas to the Yiddish Farm: Yiddish Identity and Yiddish Community. 3.0 Credits.
In premodern Ashkenaz, the vernacular Yiddish was an important factor maintaining a distinct Jewish communal identity. With the advent of modernity, and the abandonment of Yiddish by some Jews as their daily language, the choice to speak Yiddish and to use it as a vehicle of modern cultural production became a distinct strand in the web of new Jewish identities. In this course, students will develop a sociolinguistic understanding both of the place of Yiddish in premodern Jewish society, and ways in which the language was -- and is -- seen as essential to living a Jewish life in the modern world. Since this is an advanced language course, readings, discussion and written work will be in Yiddish. Grammar will be reviewed as necessary, according to the needs of the students.
Instructor(s): B. Lang
Area: Humanities, Social and Behavioral Sciences.
AS.210.375. Avant-garde movements: The MODERNISM in Portuguese speaking countries. 3.0 Credits. 
This course surveys the avant-garde movements in Portuguese speaking countries, giving special attention to Portugal and Brazil. In the first half of the past century, Brazilian and Portuguese writers started a movement that later was considered as a revolution in the literary world. Analysis and discussion of the movement, on both sides of the Atlantic, will offer the opportunity to contemplate authors including, but not limited to Fernando Pessoa, Almada Negreiros, Sá-Carneiro, Branquinho da Fonseca, Gaspar Simões, Casais Monteiro, José Régio, and on the Brazilian side Mario de Andrade, Oswaldo de Andrade, Manuel Bandeira, Menotti del Picchia, and much later, Graciliano Ramos, Rachel de Queiroz, José Lins do Rego and obviously Jorge Amado. It explores the impact the Lusophone Modernism had in other avant-garde movements. Readings in Portuguese; the class is taught in Portuguese. THERE IS NO FINAL EXAM. May not be taken on a Satisfactory / Unsatisfactory basis. Prereq: one semester of Portuguese communicative activities. There is no final exam. May not be taken on a basis. Class may be done outside of class with tutors or a TA, freeing class time for more world. Grammar will be reviewed as needed in class, but most of it will also highlights cultural nuances of the professional Portuguese-speaking skills according to students’ individualized professional interests through the supervision of the instructor, students will read two complete works by major Brazilian, Portuguese, and/or Afro-Portuguese writers each semester, followed by intense writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. All classes are conducted in Portuguese. Prereq: 210.278 or placement test. Permission required
Prerequisites: AS.210.278 or equivalent score on placement test or instructor approval.
Instructor(s): M. Spiker
Area: Humanities
Writing Intensive.

AS.210.391. Advanced Portuguese Language & Literature I. 3.0 Credits. 
This third-year course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read two complete works by major Brazilian, Portuguese, and/or Afro-Portuguese writers each semester, followed by intense writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. The course is conducted entirely in Portuguese. No satisfactory/unsatisfactory. Pre-requisites: 210.391 or placement test. 
Prerequisites: AS.210.391 or equivalent score on placement test or instructor approval.
Instructor(s): E. Rosa
Area: Humanities
Writing Intensive.

AS.210.394. Portuguese for the professions. 3.0 Credits. 
Enjoy lunchtime while preparing for your future career. Portuguese for the professions is a comprehensive examination of vocabulary and grammar for students who either work or intend to work in a Portuguese speaking environment. It focuses on the development of advanced communication skills according to students’ individualized professional interests through conversations, readings, discussions, writings and media. The course also highlights cultural nuances of the professional Portuguese-speaking world. Grammar will be reviewed as needed in class, but most of it will be done outside of class with tutors or a TA, freeing class time for more communicative activities. There is no final exam. May not be taken on a Satisfactory / Unsatisfactory basis. Prereq: one semester of Portuguese (AS.210.177), Two semesters of Spanish or Placement test. 
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities.

AS.210.395. Advanced Portuguese Language & Literature II. 3.0 Credits. 
This course focuses on reading, writing, and oral expression. Under the supervision of the instructor, students will read several works by major Brazilian, Portuguese, and/or Afro-Portuguese writers, followed by intensive writing and oral discussion on the topics covered. Grammar will be reviewed as necessary. The course is conducted entirely in Portuguese. No satisfactory/unsatisfactory. Pre-requisites: 210.391 or placement test. 
Prerequisites: AS.210.391 or equivalent score on placement test or instructor approval.
Instructor(s): E. Rosa
Area: Humanities
Writing Intensive.

AS.210.405. Teaching French in Public School-Community Based Learning. 3.0 Credits. 
A Community-Based Learning (CBL) language course for upperclass students that: 1) establishes a mutually beneficial relationship between JHU students, a neighboring Elementary School, and their common community; 2) combines academic components (linguistic, pedagogical and social) with the experiential work with the community partner as a way to reinforce learning. Students participate in weekly meetings in French on campus to prepare for their classes and teach twice a week to 2nd, 3rd, or 4th graders at the Elementary school. Recommended course background: AS.210.301 or AS.210.302.
Instructor(s): C. Guillelmed
Area: Humanities.

AS.210.409. Le monde francophone. 3.0 Credits. 
This course examines both sociolinguistic and cultural aspects of the French-speaking world and the relationship between la francophonie and France itself. We focus on five regions—Sub-Saharan Africa (Cameroon and Senegal), Northern Africa (Morocco and Algeria), the Caribbean (Martinique and Haiti), North America (Quebec), and Europe (Belgium)—and consider language features unique to those regional varieties, the status of French as opposed to other indigenous languages and creoles, the demographics of their speakers, and the representation of their culture in media (particularly in short stories, poetry, song, and film). A semester-long research project on one of these main areas will allow students to combine their study of the French-speaking world with other disciplines of interest to them.
Instructor(s): B. Anderson
Area: Humanities.

AS.210.411. Translation for the Professions. 3.0 Credits. 
Spanish Translation for the Professions surveys the field of contemporary translation theory and provides practice of translation from English to Spanish. Translation exercises may include comparing and contrasting texts of literature, medicine, health, law, technology, politics, and journalism. Students will identify and differentiate terminology specific to these various fields and will focus on practicing correct uses of the grammatical structures relevant to the translation of both English and Spanish. In the course’s final projects students will apply, synthesize, and reflect on what has been learned in the class by completing a translation exercise individualized to their professional interests. Strategies of communication mastered in this course will help students of Spanish throughout their careers, in that achievement of the course objectives will help students discern, translate, and evaluate the usefulness of translations in different professional settings. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.
Prerequisites: AS.210.313 or AS.210.314 or AS.210.315
Instructor(s): M. Ramos
Area: Humanities
Writing Intensive.
AS.210.412. Community Based Learning - Spanish Language Practicum. 3.0 Credits.
This fourth-year course involves a specially designed project related to the student's minor concentration. On completion of this course, the student will be able to use the Spanish language in real world contexts. The student-designed project may be related to each student's current employment context or developed in agencies or organizations that complement student's research and experimental background while contributing to the improvement of his/her language proficiency. There is no final exam. May not be taken satisfactory/unsatisfactory. No new enrollments permitted after first week of class.
Prerequisites: AS.210.411
Instructor(s): L. Sanchez
Area: Humanities
Writing Intensive.

AS.210.413. Curso de Perfeccionamiento. 3.0 Credits.
This fourth-year course is an in-depth examination of the Spanish grammar, including a wider range of idiomatic expressions and usages than students might have previously encountered. On completion of this course, students will be able to achieve the ACTFL Advanced-Mid to high level in oral and written expression as well as in reading and listening skills. The course will also help to prepare students for the DELE Intermediate or Superior levels, offered by the Instituto Cervantes. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the 4th class session.
Prerequisites: (AS.210.312 OR AS.210.317) AND ( AS.210.314 OR AS.210.315)
Instructor(s): L. Sanchez
Area: Humanities
Writing Intensive.

AS.210.417. Eloquent French. 3.0 Credits.
This highly interactive, writing intensive course places emphasis on: 1) providing students with linguistic tools that will help them reach a high level of written proficiency (advanced lexical, stylistic and idiomatic expressions, linking words used to develop and enrich complex sentences, stylistic and grammatical differences between French and English) 2) enhancing students' analytical skills by introducing them to the French method of Explication de textes 3) teaching students to develop an academic style of writing by studying the different components of the dissertation francaise (introduction, problématique, argumentation, conclusion, utilisation de sources) 4) teaching students to develop their own style of writing. To that effect, we will study excerpts of French literary texts that deal with themes likely to enhance their own creative writing (lieux imaginaires, mémoire et autobiographie, création d'un personnage de roman, for example).
Instructor(s): K. Cook-Gailloud
Area: Humanities
Writing Intensive.

AS.210.450. Program Abroad: Objective Portuguese - Level IV. 3.0 Credits.
Summer Abroad Program. Emphasis on development of communication skills: the ability to comprehend both written and spoken texts, adrt o speak, read, and write in Portuguese with native-live proficiency. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Writing Intensive.

AS.210.451. Corso di Perfezionamento. 0.0 - 3.0 Credits.
This task-based course is designed to prepare students to acquire Effective Operational Proficiency in Italian (C1 level of the Common European Framework). By the end of the course, successful students will be able to 1) understand a wide range of demanding, longer texts, and recognize implicit meaning. 2) produce clear, well-constructed, detailed texts on complex subjects 3) express themselves fluently and spontaneously without much obvious searching for expressions, and 4) use language flexibly and effectively for social, academic, and professional purposes. Extensive independent work required. Course adopts a continuous assessment system (no mid-term and no final), and is conducted entirely in Italian. No Satisfactory/Unsatisfactory option. Recommended Course Background: AS.210.352 with a grade of B+ or higher, or appropriate placement exam score and interview with Language Program Director.
Prerequisites: AS.210.352 with a grade of B+ or higher, or appropriate placement exam score and interview with Language Program Director.
Instructor(s): A. Zannirato
Area: Humanities
Writing Intensive.

AS.210.501. French Independent Study/Language. 3.0 Credits.
Instructor(s): Staff.

AS.210.502. French Indep Stdy-Lang. 0.0 - 3.0 Credits.
Instructor(s): K. Cook-Gailloud.

AS.210.531. Independent study of Spanish. 3.0 - 4.0 Credits.
This course is geared towards the student's independent completion of requirements for courses in Spanish. You may complete 210.111-112 Spanish Elements, 210.211-212 Intermediate Spanish or 210.311 Advanced Spanish through this independent study. Students are responsible for completing all work assigned for his/her individual level. Please see individual course description for more information. Independent study of Spanish is taught online.
Instructor(s): E. Gonzalez
Area: Humanities
Writing Intensive.

AS.210.541. Italian Independent Study-Language. 0.0 - 3.0 Credits.
Prerequisites: AS.210.252 or higher or placement exam score Parts I and II.
Instructor(s): A. Zannirato.

AS.210.551. Portuguese Independent Study. 3.0 Credits.
Instructor(s): F. De Azeredo Cerqueira; S. Castro-Klaren.

AS.210.561. German Independent Study - Language. 3.0 Credits.
Instructor(s): D. Mifflin; H. Wheeler.

AS.210.592. French Independent Study-Summer. 3.0 Credits.

AS.210.615. Adquisición del español como segunda lengua. This course will aim to clarify for future teachers the important aspect of the Spanish language syntax, related to cultural aspects, second language acquisition, issues of technology and assessment to prepare them for the task they will face in their own language classes. The course will include a review of several topics of Spanish grammar, concepts of second language acquisition and applied linguistics. The course also will help to prepare students for the DELE Superior level offered by the Instituto Cervantes if they opt to take it.
Instructor(s): L. Sanchez
Area: Humanities.
AS.210.661. Reading and Translating German for Academic Purposes.
Taught in English. This is the first semester of a year-long course
designed for graduate students in other fields who wish to gain a reading
knowledge of the German language. Seniors who intend to do graduate
study in other disciplines are also welcome, with permission from
instructor. Instruction includes an introduction to German vocabulary
and grammatical structures as well as discussion of relevant translation
practices. The course is for students to gain confidence in reading a variety of texts, including those in their own fields of study. No
knowledge of German is assumed. Seniors by permission & Graduate
students only.
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.662. Reading & Translating German for Academic Purposes II.
Taught in English. Seniors by permission & Graduate students only. This
course is designed for graduate students in other departments who
wish to gain reading knowledge of the German language and translation
practice from German to English. This course is a continuation of the Fall
semester. Focus on advanced grammatical structures and vocabulary.
For certification or credit.
Prerequisites: AS.210.661 or permission of instructor.
Instructor(s): H. Wheeler
Area: Humanities.

AS.210.700. German Language Teaching Practicum I.
Provides methodological and practical support and oversight for
graduate student instructors teaching Deutsch als Fremdsprache in the
American university context. Two-semester sequence, includes
orientation during the week before semester begins. Required for German
Graduate Teaching Assistants in the first year of their teaching in the
program.
Instructor(s): D. Mifflin.

AS.210.701. German Language Teaching Practicum II.
Required for German Graduate Teaching Assistants in the first year of
their teaching in the program. Second semester of a two-semester
sequence.
Instructor(s): D. Mifflin.

AS.211.102. The Cosmic Imagination: How Literature Changes Our
Understanding of the Universe. 3.0 Credits.
Since time immemorial humankind has looked to the skies for clues as to
our origins, our destiny, and the nature of existence itself. In some ways,
one of the hallmarks of western science has been a story of viewing
the cosmos in ever-greater clarity and detail. Yet the very nature of the
universe—its massive size, the distance and obscurity of its farthest
reaches—requires the active intervention of our imaginations to picture
it, no matter how powerful the technologies we use. In this course we
will look at how western cultures from the middle ages to the present
have deployed the literary and philosophical imagination to try to grasp
the ungraspable, and how those attempts in some cases helped prepare
intellectuals and scientists to make very real advances in understanding
the universe.
Prerequisites: Students may not take and receive credit for AS.145.102
and AS.211.102.
Instructor(s): W. Egginton
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.211.104. Freshman Seminar: Weimar on the Pacific: German Exile
Culture in the United States. 3.0 Credits.
Freshmen seminar. After Hitler's seizure of power in 1933, the number
of artists and intellectuals who fled the Nazi regime soon rose into the
thousands. Many of these German expatriates ultimately settled in
the United States (e.g. Los Angeles, New York), where, simultaneously
attracted and alienated by their new surroundings, they made a
significant impact on American culture. The seminar will explore German
Exile Culture in the U.S. in its broad variety spanning a spectrum from
film to architecture, literature, and philosophy. Based on the aesthetic
and conceptual specificities of the artifacts, class discussions will focus
on the relations between art and politics, modernist and mass culture,
art and capitalism, culture and democracy. The seminar will close with a
look at postwar America and the McCarthy era, when European emigrants
became the target of suspicion as left-wing intellectuals.
Instructor(s): A. Krauss
Area: Humanities.

AS.211.174. Media of Propaganda. 3.0 Credits.
Today, promoting a particular political or personal point of view is not
viewed as "propaganda," but rather as building a community of equally
minded people. But where do we draw the line, and when does the use
of a medium in service of a certain message become intrusive and
misleading? What role do democracy and cultural values play in this use
or abuse of media? In this class the term "propaganda" will be evaluated
carefully and applied to such historical media case studies as the
informational use of the radio in World War One, Leni Riefenstahl's Nazi
propaganda films, the legendary success of advertisement campaigns
in the 1950s and 1960s, the AIDS movement and other mobilization
strategies from the 1980s to the 1990s, and the new values of friendship
and propaganda in our current facebook nation.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.202. Freshman Seminar: A Thousand Years of Jewish Culture. 3.0
Credits.
This course will introduce students to the history and culture of Ashkenazi
Jews through their vernacular, Yiddish, from the settlement of Jews in
German-speaking lands in medieval times to the present day. Particular
emphasis will be placed on the responses of Yiddish-speaking Jews to
the challenges posed by modernity to a traditional society. In addition to
studying a wide range of texts—including fiction, poetry, memoir, song,
and film—students will learn how to read the Yiddish alphabet, and will
prepare a meal of traditional Ashkenazi dishes. No prior knowledge of
Yiddish is necessary for this course.
Instructor(s): B. Lang
Area: Humanities.
AS.211.207. Waves of Feminism through Film and Media. 3.0 Credits.
This course will examine the movements known as second- and third-wave feminism as expressed in film and other media since the 1950s. Second-wave feminism— influenced in part by the French philosopher Simone de Beauvoir but driven by social and economic factors in the US and the post-war, industrialized west—departed from the practical exigencies of suffrage that drove the first wave before it and became concerned with defending the identity of women from being defined in terms of patriarchal norms. From popularized images of working women in US television series to the formalist experimentation of the France's New-Wave in cinema, the media of the sixties and seventies absorbed and explored many of second-wave feminism's central themes and critiques. Largely a critique of the perceived Euro-centrism of the second wave, third-wave feminism, coined in the early nineties, focused on the experience of women of color and those from the developing world who did not share the relatively privileged backgrounds of their predecessors. The second part of the course will examine how film and media since the nineties has incorporated and reflected this new inclusiveness, and strive to tell stories of women from a broad spectrum of backgrounds. We will take advantage of the visit to Hopkins by acclaimed media artist Sharon Hayes to examine how her own media practice has been shaped by successive waves of feminist thought and has in turn affected feminism. Other works will include the films of Agnès Varda and Shirin Neshat.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.211.222. Italian Cinema: The classics, the Forgotten and the Emergent. 3.0 Credits.
This course traces the history of Italian cinema from the silent era to the new millennium, highlighting its main trends and genres, and reflecting on the major transformations modern and contemporary Italian society experienced over the twentieth and twenty-first centuries. We shall examine iconic films such as Vittorio De Sica's Bicycle Thieves, Federico Fellini's La Dolce Vita, Michelangelo Antonioni's L'Avventura, and Pier Paolo Pasolini's Mamma Roma, that received international recognition and influenced other national, cinematic productions. We shall also look at the work of less famous, or independent filmmakers who received less critical attention. While this class takes an historical approach, it also includes a theoretical component and introduces students to the specificity of the cinematic language, examining films in relation to the mise-en-scène, frame composition, camera movements, editing, and sound. This class is taught in English.
Instructor(s): L. Di Bianco
Area: Humanities.

AS.211.250. Panorama of German Thought. 3.0 Credits.
This course explores the rich terrain of German literature and philosophical thought, from Kant to today. At each meeting, we will investigate canonical texts of the German intellectual tradition, with an eye to discovering their unity as “German” philosophical and cultural artifacts and icons, as well as with an interest in establishing their well-deserved place in the wider, global discourses of world literature. In this way, we will learn to think critically in and with these important literary and philosophical texts from German-speaking lands as a means of viewing and appreciating the full panorama of German thought. Among authors read and discussed will be Kant, Goethe, Schiller, Hegel, Kleist, Heine, Fontane, Nietzsche, Freud, Kafka, Heidegger, Mann and Bernhard. Readings and discussion will be in English. German is appreciated but not required.
Instructor(s): M. Dornbach
Area: Humanities
Writing Intensive.

AS.211.278. Freshman seminar: Eataly: An Exploration of Italian Food Cultures. 3.0 Credits.
Italian cuisine is often recognized as one of the finest in the world. This Freshman Seminar will offer an exploration of Italian food cultures past and present. Discussion topics will include the Slow Food Movement, the tension between local and global, food and social justice, and the representation of food in literature, film, and other media. The course is taught in English. No knowledge of Italian is required, and everyone will learn some Italian words and expressions.
Instructor(s): A. Zannirato; L. Proietti
Area: Humanities.

AS.211.294. Freshman Seminar: Soccer in Brazil: opium of the masses. 3.0 Credits.
The course is taught IN ENGLISH. Futebol offers a unique perspective on politics, race and citizenship in Brazil. This course seeks to understand Brazilian culture through the historic national pastime of futebol. In addition to the main textbooks chosen for the class, by reading a variety of texts from newspapers, academic journals, fiction and film, students will be able to find their own approach to understanding the phenomenon of futebol within the social and political traditions of Brazil. No knowledge of Portuguese is required, but those who can read in Portuguese will have an opportunity to do so. Everyone will learn some Portuguese words and expressions. This class may count toward the Minor in Portuguese.
Instructor(s): F. De Azerezo Cerqueira
Area: Humanities.

AS.211.295. Staging History: Theater and Society in the Courts of Europe. 3.0 Credits.
During the 17th century, the growth of the play-going public of London, Madrid, and Paris transformed theater into an exceptional channel for cultural expression. This course combines the study of theater history, including the spaces, audiences, actors, and playwrights, with the literary analysis of major plays by Christopher Marlowe, Ben Jonson, Lope de Vega, Pierre Corneille, and Madame de Villedieu. The main objective of this course is to examine and discuss early modern drama in light of contemporary life at court.
Instructor(s): F. Gomez Martos
Area: Humanities.

AS.211.300. Baptism by Fire. 3.0 Credits.
This course will examine the history of Muslims in Spain who lived under political and cultural pressure— at times even the threat of bodily violence—to convert to Christianity and renounce the Arabic Language during Spain’s so called ‘Golden Age’. By analyzing key historical and literary texts, "Baptism by Fire" will afford particular attention to the early modern history of baptism and Arabic book burnings, historical and fictional alike, which intricately shaped the politics of language, religion, and identity in Spain. Course readings include period selections written by key religious figures such as Cardinal Francisco Jiménez de Cisneros, prominent historians including Miguel de Luna, and renowned authors like Miguel de Cervantes, among others. Class discussions will furnish students with continual opportunities to refine their interpretative, analytical, and linguistic skills by engaging a variety of discursive genres that provide the tools to challenge traditional visions of Islam’s role in the history of Europe and one of its most powerful early modern kingdoms.
Instructor(s): L. Rogers
Area: Humanities.
AS.211.302. Casanova's Variations. 3.0 Credits.
Bored and exiled in the pine forests of rural Bohemia, far from the cities and the women he had loved and left, the aging Giacomo Casanova (1725-1798) spent his final years writing his memoirs. The Venice he grew up in no longer existed. The Paris he loved was riddled with Revolution. Writing was, he said, "the only remedy I could think of to keep me from going mad or dying of grief" (Willsher). Through a close reading of "Histoire de ma vie" (Story of my life), this course will explore different understandings of "moral order", "literary engagement," and "resistance". The question of how film adaptations have contributed to shaping these concepts will also be taken into consideration. Readings and discussions will be in English but majors in Italian, French, Romance Languages will have access to readings in original languages.
Instructor(s): G. Furci
Area: Humanities.

AS.211.304. Paris Souterrain: Paris Underground. 3.0 Credits.
This course will track uses of "the underground" in major canonical and peripheral literary works in the nineteenth century. Readings will include works by Balzac, Baudelaire, Hugo, and Zola.
Prerequisites: AS.211.402 OR HA.211.402
Instructor(s): R. Powers
Area: Humanities.

AS.211.312. Acting French: learning about French language and culture through theater. 3.0 Credits.
Performing a play in a foreign language not only improves language skills, but develops the ability to express oneself through the body and to communicate both efficiently and elegantly. Using excerpts from popular French stage plays by Camus, Sartre, Feydeau, Ionesco, Pagnol and Rostand among others, this course aims to help students to 1) improve French pronunciation, intonation, syntax, and vocabulary; 2) appreciate and understand linguistic nuance and socio-cultural practices; 3) learn fundamentals of acting that carry over into everyday communication, from body language and vocal projection to the expression of emotion and improvisation. Students will view filmed representations of select plays as well as present an end-of-semester staging. Recommended course background: AS.210.301.
Instructor(s): K. Cook-Gailloud; M. Alinhio
Area: Humanities.

AS.211.316. Brazilian Cinema and Topics in Contemporary Brazilian Society. 3.0 Credits.
The films selected focuses on films from the late 1950s to the present and highlight import episodes and challenges in the advancement of the Brazilian society as well as its cinematic production with a special view to the film aesthetics through analysis from a number of critical perspectives, including class, race, gender as well as ethnicity, nationalism or national identity, colonialism, social changes, and the politics of representation. In this sense, the films and documentaries that we will be watching and studying encompass the period from the rise of New Cinema (Cinema Novo) up to films exploring the most recent trends, including movies launched up to 2016. Students wishing to do the course work in English, for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. THERE IS NO FINAL EXAM. May not be taken on a Satisfactory / Unsatisfactory basis.

Writing Intensive.

AS.211.318. Women in Pre-Modern French Literature. 3.0 Credits.
This course will examine the changes in the relationship of women to literature in France up to the French Revolution from several points of view: (1) What were the social and intellectual contexts of gender distinctions? (2) How did men writing about women differ from women writing about women? (3) How were these questions affected by the changing norms of literary production? Texts by Marguerite de Valois, Mme. de Sévigné, Molière, Mme. de Lafayette, Prévost, Diderot, Rousseau, Mme d'Épinay and Revolutionery memorialists
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.211.319. ¡Salsa! The Afro-Antillean song. 3.0 Credits.
¡Salsa! The Afro-Antillean song surveys Caribbean music in an international Spanish-speaking context. As a language course, it reviews grammar and instils vocabulary acquisition through the close analysis of the biggest hits of salsa from the past one hundred years. On completion of this course the student will have developed the ability to read and critically discuss music and its history in the Spanish-speaking Caribbean and will have examined cultural roots, market dominance, and media crossovers in the musical universe of the Spanish-speaking archipelago of the Antilles. In completing the course's final project students will apply, synthesize, and reflect on what has been covered in the class by creating a professional dossier individualized to their own personal musical interests. Concepts learned in this course will be directly applicable to careers linked to intercultural and international relations while also apply to multiple careers in media, music industry and dance. There is no final exam. May not be taken satisfactory/unsatisfactory. Not open to native speakers of Spanish. No new enrollments permitted after the third class session.

Area: Humanities.

AS.211.326. We Conduct - Documentary Production Internship. 3.0 Credits.
To apply for this practicum, you should send an email of motivation to professor Wegenstein at berna@jhu.edu. During this internship will accompany Bernadette Wegenstein (director), Shana Hagan (cinematographer), and Judy Karp (sound recordist) on the documentary Vérité set, as they document the history of women orchestral conductors. The film profiles the conductors’ incredible dedication, devotion, mentorship, and love for music itself, and highlights the camaraderie and mentorship between generations of female conductors and musicians. Most importantly, it shows their power in pursuing a field not historically welcoming to women, breaking down barriers of gender and race. This documentary feature presents women from different walks of life, including Sylvia Caduff, Marin Alsop, Alexandra Arrieche, Lina Gonzalez, 16-year old aspiring conductors Sumaya Elkashif and Maya Johnson, and members of the Baltimore OrchKids afterschool music program for children. The intertwining stories of these women and children, each accompanied by the music they embody, will culminate to reveal their astounding accomplishments as they conduct — the music, and the worlds around them. Filming will take place mainly at the Peabody Conservatory. Some field-trips will be optional (including to foreign destinations). Please note that this class will be held as a practicum, and some of the dates and times will be flexibly adapted to the needs of the artists’ residency. If you have a very full calendar in the Spring it is best advised not to take this class.

AS.211.327. Italian Eco-cinema: Inconvenient Truths from 1945 to 2015. 3.0 Credits.
For centuries Italy, i.e. the Bel Paese, has been acclaimed for its natural beauty. However, during the country's rapid transformation from an agrarian to an industrial society, its natural wonders came under threat. Starting from the early post-war period to the current post-modern era, politically committed filmmakers have been unveiling Italy's "inconvenient truths." This class takes an eco-critical approach to Italian cinema, examining its ethics and aesthetics. We shall start with the works of iconic filmmakers such as Roberto Rossellini, Pier Paolo Pasolini, and Michelangelo Antonioni, and move to more contemporary films such as Matteo Garrone's Gomorrah, Alice Rohrwacher's The Wonders, and other feature and documentary films that embody the philosophies of the Slow Food and environmentalist movements.

Area: Humanities.

AS.211.328. Berlin Between the Wars: Literature, Art, Music, Film. 3.0 Credits.
Explore the diverse culture of Berlin during the heyday of modernism. During the Weimar Republic, Berlin became a center for theater, visual arts, film, music, and literature that would have an outsized impact on culture throughout the world and the twentieth century. The thinkers, artists, and writers drawn to interwar Berlin produced a body of work that encapsulates many of the issues of the period: the effect of the modern city on society; "the New Woman"; socialist revolutionary politics; the rise of the Nazis; and economic turmoil. While learning about interwar Berlin's cultural diversity, we will take a special look at works by Jewish writers and artists that engage with the question of ethnic, religious, and national identity in the modern world, specifically in the context of Berlin's rich Jewish history and the rise of anti-Semitism in the interwar period. All readings will be in translation.
Instructor(s): S. Spinner
Area: Humanities.

AS.211.330. Curating Media Artists in Residence at JHU. 3.0 Credits.
The students will be closely involved with JHU's Center for Advanced Media Studies (CAMS directed by Bernadette Wegenstein), and the Baltimore Museum of Art (curator Kristen Hileman) in preparing the BMA Black Box exhibit of Mary and Patrick Kelley's new film, We Are Ghosts, set in a submarine: the film tells the story of life as experienced by the sailors in a U.S. submarine at the end of the second world war. Artist Mary Reid Kelley focuses on "minor aspects of life" in the submarine during non-combat — such as boredom, claustrophobia, and the effects of heavy drinking on the sailors. Included is also a restaging of Harry Truman's announcement of the bombing of Hiroshima — told from the sailors' point of view. While this new work will be on display in the BMA's Black Box, Kelley's 2016 film This Is Offal (set in a morgue) will be showing at the museum. This film is centered around a dialogue between the ghost of a deceased woman, the victim of a suicide, and her animated organs. Students will also be traveling to Woodstock, NY on a field trip with professor Wegenstein for a studio visit with the artists at the beginning of the semester. Mary Reid Kelley is an artist who makes arresting, playful, and erudite videos that explore the condition of men and women throughout history. Drawing on literary and historical material, the videos involve intensive research and critical reassessments of standard historical narratives. Mary Reid Kelley is involved in every aspect of the videos' creation—from writing the scripts (typically in highly structured poetic verse), to designing the sets, props, and costumes, to performing the leading roles—and all of the videos are produced by her and her partner, Patrick Kelley, at their private studio. Kelley is known for her feminist videos that recall the theater of the absurd and German Expressionist cinema. Please note that this class will be held as a practicum, and some of the dates and times will be flexibly adapted to the needs of the artists' residency. If you have a very full calendar in the Spring it is best advised not to take this class.

AS.211.331. Vagabonds and Ramblers: Space & Place in Women's Cinema. 3.0 Credits.
In recent times in Italy, a new generation of women filmmakers has found its own space in the traditionally male dominated film industry. This "counter cinema" abounds with female city walkers, migrants, vagabonds and other types of urban nomads, whose movement through space signifies a quest for freedom, gestures of protest and rebellion, and a search for place. We start by looking at the work of a pioneer filmmakers such as Elvira Notari, the first woman director in Italy, and then discuss the issue of gender and space in contemporary films by directors Francesca Comencini, Alice Rohrwacher, and Eleonora Danco. To enrich the analysis, we shall also examine films directed by non-Italians who deal with the theme of women's mobility and their centrality/marginality from different socio-geographic contexts. Other directors included will be Agnès Varda (France), Chantal Akerman (Belgium), Haifa al-Mansour (Saudi Arabia), and Xiaolu Guo (China). Readings will include essays by Laura Mulvey, Ann E. Kaplan, Linda Williams, and Patricia White.
Instructor(s): L. Di Bianco
Area: Humanities.
AS.211.333. The Holocaust in Film and Literature. 3.0 Credits.
How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — nonfiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Primo Levi and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Steven Spielberg). All readings in English.

Prerequisites: Cannot be taken by anyone who previously took AS.213.361
Instructor(s): S. Spinner
Area: Humanities.

AS.211.336. We Conduct Documentary Production Practicum II. 3.0 Credits.
During this internship will accompany Bernadette Wegenstein (director), Shana Hagan (cinematographer), and Judy Karp (sound recordist) on the documentary Vérité set, as they document the history of women orchestral conductors. The film profiles the conductors’ incredible dedication, devotion, mentorship, and love for music itself, and highlights the camaraderie and mentorship between generations of female conductors and musicians. Most importantly, it shows their power in pursuing a field not historically welcoming to women, breaking down barriers of gender and race. This documentary feature presents women from different walks of life, including Sylvia Caduff, Marin Alsop, Alexandra Arrieche, Lina Gonzalez, 16-year old aspiring conductors Sumaya Elkashif and Maya Johnson, and members of the Baltimore OrchKids afterschool music program for children. AS.211.337. Wandering Jews? Jewish Migration in Film and Literature. 3.0 Credits.
Migration in all its forms has played a major role in shaping Jewish identity throughout history. From the Biblical exodus from Egypt through the beginnings of the diaspora under the Romans to the massive European Jewish immigration to America in the late 19th and early 20th centuries to the founding of the state of Israel, the migrations of Jews have also had a major place in Jewish literature. Going all the way back to the Bible, but focusing on the 20th century, this course will explore the ways in which literature and film represent the experience of migration, whether negative (compelled by expulsion or violence); positive (lured by economic or social opportunity); or somewhere in-between. We will examine poetry, plays, prose and film in Yiddish, German, Hebrew, and English (all in translation) on aspects of Jewish migration including the social and political factors motivating migration from the countryside to the shtetl (town) to the city and from Central and Eastern Europe to the Americas, Palestine, and Israel. Issues under discussion will include: adaptation and assimilation; minority rights; what is the relationship of old and new or major and minor languages and literatures?; what is the place of tradition and heritage in a diasporic context? We will also consider the resonances between contemporary debates on migration and historical examples of these issues as they are reflected in literature and film.

AS.211.341. Power and Resistance in French Political Thought. 3.0 Credits.
Even as a strong, divine-right monarchy emerged in France, following the Renaissance wars of religion, rebellious French thinkers never stopped questioning the foundations of power. They focused critically not only on the claims of authority issuing from the top, but also on the submissiveness of the governed and the reach of propaganda. This course examines how power shapes minds and bodies, from absolutism to the Revolution, to democratic laïcité. Readings include works by La Boétie, Montaigne, Loyseau, Bayle, Rousseau, Saint-Just, Maistre, Tocqueville, Foucault, Lefort, Rancière and the Assemblée Nationale. Readings and discussion in English.

Instructor(s): E. Russo
Area: Humanities.
AS.211.348. Holocaust Consciousness — An Intercultural and Interdisciplinary Approach Through Media Studies and Psychology. 3.0 Credits.
This course approaches Holocaust consciousness in the U.S. and Europe within a psychological and media-theoretical frame-work. It is also part of a larger research project between the Center for Advanced Media Studies at JHU and the Sigmund Freud University in Vienna. During the semester students will be tele-conferencing during five to six class sessions with students in the same course held at the Sigmund Freud University and taught by Professors Nora Ruck and Markus Brunner. Together we will examine Holocaust consciousness in the U.S. and Europe, and such phenomena as trauma, inter-generational transmission, and projection of the trauma of the victims’ and/or the perpetrators’ As primary materials we will be using war memoirs and documentary films (from the films of the “Bilderverbot” to today’s family ethnographies). Students will be teamed in small, inter-cultural groups to address both U.S. and a European perspectives on these materials. An excursion to the U.S. Holocaust Memorial Museum in Washington D.C. will also be part of the course.

AS.211.349. JHU Bologna Program: Food for Thought: Gastronomy, Politics & Identity. 3.0 Credits.
Italian Culture course offered on the JHU Summer Program in Bologna. Permission required. Must be taken for a letter grade. Open to students admitted to the JHU Summer Program in Bologna only.
Instructor(s): L. Di Bianco
Area: Humanities.

AS.211.350. Gritemos para no olvidar: A Survey of Heavy Metal Music and Culture in Latin America. 3.0 Credits.
Deans Teaching Fellowship: This course will explore the influence of Heavy Metal on culture in Latin America. It will offer a general survey of the history of Heavy Metal — both inside and outside of Latin America — and will discuss texts, movies, music videos, recorded interviews, pictures and websites in relation to their social, political and cultural contexts in Latin America.
Instructor(s): C. Pack
Area: Humanities.

AS.211.353. ¡Máscaras mexicanas!. 3.0 Credits.
Although masks are now global symbols of Mexican culture, the origins and evolution of the mask in Mexico are often shrouded in mystery. This course explores masked representations and stories of masking across a wide variety of media, including movies, comics, novels, plays, and wrestling performances. The question of the mask in Mexico is examined in different historical, literary, social, and religious contexts, with particular focus given to the masks of saints, gods, wrestlers, bandits, and superheroes. This course provides students with a basic understanding of Mexican history from the 19th to the 21st century, as well as different ways to engage theoretically with one of Mexico’s most iconic cultural emblems. Class taught in Spanish. Writing intensive. Recommend Course Background: As.210.311 or equivalent.
Instructor(s): C. Ray
Area: Humanities
Writing Intensive.

AS.211.358. Writing the Great War: French Literature and World War I. 3.0 Credits.
This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in French.
Prerequisites: AS.210.302 OR AS.212.333 OR AS.212.334 OR AS.211.401 OR AS.211.402
Instructor(s): C. Benaglia
Area: Humanities.

AS.211.361. Narratives of Dissent in Israeli Society and Culture. 3.0 Credits.
In this course we will study and analyze the notion of dissent in Israeli society and culture on its various literary and artistic forms. We will examine the emergence and the formation of various political and social protest movements, such as the Israeli Black Panthers, Israeli feminism and the 2011 Social Justice protest. We will discuss at length the history and the nature of dissent in the military and in relation to Israeli wars and will track changes in these relations. Significant portion of the course will be dedicated to the literary, cinematic and artistic aspects of Israeli dissent and their influence on Israeli discourse. We will explore the nature and role of specific genres and media such as the Israeli satire, Israeli television, newspaper op-ed and the recent emergence of social media.
Students wishing to work in English exclusively for 3 credits should enroll in section one. Students who are fluent in Hebrew and are wishing to attend an additional hour-long Hebrew discussion session per week with Professor Cohen (time TBD in consultation with enrolled students) for 4 credits should enroll in section two.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.211.363. The Italian-American Experience: From the Margins to the Mainstream. 3.0 Credits.
This course explores the many depictions, descriptions, and definitions of Italian-American ethnicity and identity in various media, from the narratives and poetry of the first Italian immigrants in the nineteenth century to the wildly popular, stereotype-promoting American films and television shows of today. Through literature, film, poetry, language, music, gender studies, and study of religious and cultural traditions, we will investigate how Italian-Americans express their identity to others.
Instructor(s): A. Falcone
Area: Humanities.

AS.211.364. Drama Queens: Opera, Gender, and the Poetics of Excess. 3.0 Credits.
What is a drama queen? According to the Oxford English Dictionary, a drama queen is “a person who is prone to exaggeratedly dramatic behaviour” and “a person who thrives on being the centre of attention.” While drama queens exist among us, the world of opera is certainly one of their ideal environments. Echoing back to their tragic fates, the powerful voices of Dido, Medea, Violetta, and Tosca never ceased to affect their empathetic public. In fact, excess and overreactions are two main features of the operatic experience both on stage and in the audience. By focusing on the ways in which operatic characters are brought to life, the course explores the social, political, and gender dynamics that inform the melodramatic imagination. Students will have the opportunity to attend live HD broadcasts of Verdi’s La Traviata and Tchaikovsky’s Eugene Onegin from the Metropolitan Opera. No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.
AS.211.366. Cuisine and Culture in Latin American Film. 3.0 Credits.
This course is a comprehensive study of presentations of food in Latin American Film. Cuisines are cultural symbols that bind together people in ritual and into a community. The goal of this class is to interpret how food habits function beyond providing calories and sustenance. Films from Latin America will be used as an entrée to discussing topics of food as medicine, family/community, and gender and as links to the history of Latin America. Students will be able to identify and differentiate between tropes of, as well as approaches to, food in film, and theories of food production, distribution and consumption in Latin America. Assignments will include a weekly film viewing, along with primary theoretical readings (in Spanish) around food and culture. Several presentations and a final project will focus on continuing research into food representations in films selected by individual students in which you will be able to apply what you have learned during this course to analyze additional works, thereby gaining a deeper understanding of Latin American cultures and values.
Prerequisites: Advanced Spanish I (210.311), or appropriate placement exam score
Instructor(s): J. Lirot
Area: Humanities.

AS.211.367. La Nouvelle Vague. 3.0 Credits.
Exploration des films les plus importants et des principaux cinéastes de la Nouvelle Vague française; introduction à l’analyse et à l’appréciation des films. Conducted in French. Recommended Course Background: AS.210.301 or permission of the instructor. Recommended screenings Tuesday 7:30pm. $40 lab fee.
Instructor(s): S. Roos
Area: Humanities.

AS.211.368. Program Abroad: Italiens: Politics, Culture, and Society. 3.0 Credits.
Course in Italian culture offered on the JHU summer program in Bologna. Open to students on the JHU Bologna Summer Program only. Permission required.
Instructor(s): E. Refini; S. Morgan
Area: Humanities.

AS.211.371. Kafka and the Kafkaesque. 3.0 Credits.
Franz Kafka is regarded as one of the most influential writers of the 20th century. To this day, his lucid and subtle prose continues to intrigue literary critics, writers of fiction, and readers with observations that create a fictive world at once strange and familiar, hopelessly tragic and hilariously comical. The related term “kaftaesque” refers to the unique character of a literary universe that is perceived as both eerie and resistant to any classification. In this course, we will analyze texts by Franz Kafka from a variety of perspectives: as investigations into modern institutions and bureaucracy, law, punishment and family structures. Special emphasis will be given to the exploration of Kafka’s poetic practice, i.e. to the material, rhetorical and performative quality of his writing. In addition to reading a selection of Kafka’s prose and analyzing several film adaptations, we will also discuss some influential commentaries on his work and discuss Kafka’s impact on the conceptualization of modernity. Students will gain an in-depth understanding of Kafka’s oeuvre while developing skills in critical analysis and literary close reading.
Instructor(s): A. Krauss
Area: Humanities.

AS.211.377. Transatlantic Mafias: Organized Crime in Mexico and Italy. 3.0 Credits.
Both Mexico and Italy deal with criminal organizations which daily challenge the state and its institutions yet at the same time maintain an episodic and illegal collaboration with them. This course intends to show, understand and discuss how mafias, in their many incarnations, interact with contemporary societies.
Instructor(s): M. Cantarello
Area: Humanities
Writing Intensive.

AS.211.380. Modern Latin American Culture. 3.0 Credits.
Taught in Spanish. This course will explore the fundamental aspects of Latin America culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Prerequisites: AS.210.312
Area: Humanities.

AS.211.390. Modern Spanish Culture. 3.0 Credits.
This course will explore the fundamental aspects of Spanish culture from the nineteenth to the twenty-first centuries. The course will offer a general survey of the history of Spain and will discuss texts, movies, songs, pictures, and paintings in relation to their social, political, and cultural contexts. This course will be of particular interest for students planning on spending a semester abroad in Spain—specially for those students going to the JHU Fall Semester in Madrid, at Carlos III University. Taught in Spanish. Recommended Course Background: AS.210.311 or appropriate Webcape score. NOTE: THIS COURSE IS NOW AS.215.390 as of 3/27/17
Prerequisites: AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.

AS.211.394. Brazilian Culture & Civilization. 3.0 Credits.
The course is taught in English. No knowledge of Portuguese is required. This course is intended as an introduction to the culture and civilization of Brazil. It is designed to provide students with basic information about Brazilian history, art, literature, popular culture, theater, cinema, and music. The course will focus on how indigenous Asian, African, and European cultural influences have interacted to create the new and unique civilization that is Brazil today. The course is taught in English, but ONE extra credit will be given to students who wish to do the course work in Portuguese. Those wishing to do the course work in English for 3 credits should register for section 01. Those wishing to earn 4 credits by doing the course work in Portuguese should register for section 02. The sections will be taught simultaneously. Section 01: 3 credits Section 02: 4 credits (instructor’s permission required)

Area: Humanities
Writing Intensive.
AS.211.397. Program Abroad: Brazilian Culture & Civilization. 3.0 Credits.
Summer Abroad Program. Intensive language and culture program offered in Rio de Janeiro, Brazil. The Culture and Civilization course strengthens students' language skills while deepening their understanding of Brazilian history and culture. Pre-req: 1 semester of Portuguese or 1 year of Spanish. Open to Brazil Program applications only. Course must be taken for a letter grade.
Instructor(s): F. De Azeredo Cerqueira
Area: Humanities
Writing Intensive.

AS.211.400. Topics in Romance Literatures. 3.0 Credits.
This year's "Topics in Romance Literatures" course is entitled "Voicing the Body: Sex and Desire in Medieval Poetry." If you think that medieval poetry is all about idealized love and spiritual sublimation, then this course will make you change your mind. We will explore works and authors from all across Europe, from the erotic "Carmina burana" to the voluptuous poetry of French troubadours and trouvères, from German love poetry to the sensual songs of Spain and the passionate verses of Italian poets such as Dante and Petrarch. The course will explore the ways in which medieval poets sing about bodily passions and voice the lovers' desire, with a special focus on the ways in which poetry interacted with music and was transmitted through music. The class is taught in English and all readings will be available in English. Students in Romance Languages (Italian, French, Spanish), depending on their language skills, will have the opportunity to work on the originals. A special reading list will be set up for graduate students who will take the course.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.211.401. La France Contemporaine. 3.0 Credits.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites, and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and francophone culture. Recommended Course Background: AS.210.301 or AS.210.302 or permission of instructor.
Instructor(s): A. Wuensch
Area: Humanities
Writing Intensive.

AS.211.402. La France Contemporaine II. 3.0 Credits.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and francophone culture. Recommended Course Background: AS.210.301-AS.210.302 or AS.210.301 or permission of instructor.
Instructor(s): A. Wuensch; B. Anderson
Area: Humanities.

AS.211.410. Toward Modernity: France 1848-1885. 3.0 Credits.
The second half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well a fascinating period of artistic creativity in literature and Art, considered as the rise of Modernity. We'll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berioz, Saint-Saëns, Fauré.
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.211.421. Almodóvar Measure for Measure. 3.0 Credits.
A select few films from Spain's renowned director and top cultural muse. Focus on inter species identities, cyborg antics, mythmaking through the altering of memories and remake of Hollywood studio and post-studio celebrities in the spectrum of perversity.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.211.431. Desecrating the Sacred Heart: Science, Religion and Art in Fin-de-Siècle France. 3.0 Credits.
This interactive course analyzes the stakes underlying the construction of Paris' controversial Sacré-Coeur Basilica in Montmartre. In the light of heated 19th-century debates on moral authority that opposed religious believers and partisans of a secular state inspired by a scientific ethos, we will consider how the advocates of both sides use specific rhetorical techniques in the public domain (newspaper articles, caricatures, speeches) and artistic devices (paintings, literary writings) to convince their audience of the validity of their claims. The course will open out onto contemporary debates that show similar ethical conflicts.
Instructor(s): K. Cook-Gailloud.

AS.211.445. Rogues, Tricksters, and Saints: Boccaccio's Decameron. 3.0 Credits.
Boccaccio's Decameron (1352), a collection of 100 short stories, ranges from the bawdy through the cynical to the romantic and even fantastic. It has inspired numerous writers, artists, musicians and film-makers. We will read Boccaccio's masterpiece on its own terms and in relation to the development of story-telling, from gossipy "news" (novelle) to artistic short story, theatrical adaptation, literary fairy-tale, and the fantastic. The Decameron will be compared with its forerunners in saints' lives, bawdy fabliaux, and moral exempla, and with its literary, theatrical, and cinematic imitators in Italy and Europe. Italian graduate students and undergraduate majors will attend an extra weekly meeting conducted in Italian.
Prerequisites: Students may not have taken AS.214.445.
Instructor(s): W. Stephens

AS.211.449. America Through French Eyes: French Travellers to America. 3.0 Credits.
From early colonial efforts in the sixteenth century through the time of the great political revolutions and down to the present, America has exercised a deep fascination on the French. This course will look at French representations of America in art, literature and political thought across the centuries. Through a range of materials including travel accounts, essays, novels, maps, paintings and film, we will investigate how French perceptions of America have shifted over time, often in response to changes in French society and culture. All texts will be read in translation. Course work will include visits to JHU's Special Collections and the Walters Art Museum downtown
Instructor(s): S. Miglietti
Area: Humanities

AS.211.472. Barbers and countesses: conflict and change in the Figaro trilogy from the age of Mozart to the 20th century. 3.0 Credits.
2016 marks the bicentennial of Rossini's irreverent masterwork The Barber of Seville, which premiered in Rome in February 1816. Thirty years earlier, in 1786, Mozart's The Marriage of Figaro had opened in Vienna. The two operas, based on the first two plays of Beaumarchais' controversial "Figaro trilogy", stage conflicts of class and gender, challenging the assumptions of the aristocracy as well as the ludicrous pretensions of the raising bourgeoisie. The same themes inform the post-modern portrayal of the past in John Corigliano's The Ghosts of Versailles (1991), which ideally completes the musical afterlife of the trilogy. By studying how the plays were adapted to the opera stage within their different cultural and historical contexts, the course will explore the representation of the ideological, social, and political turmoil that, eventually, culminated in the French Revolution. The course will also include field trips and screenings of movies such as Stanley Kubrick's Barry Lyndon (1975) and Milos Forman's Amadeus (1984). This course may be used to satisfy major requirements in both the French and Italian majors.
Instructor(s): E. Refini

AS.211.475. Inside the Writer's Laboratory. 3.0 Credits.
How do books come to life? Behind every masterpiece is a tale of hard work, dialogue with other texts, and constant negotiations with social and material circumstances that evolve over time. This course opens up the "laboratory" of figures of the European Renaissance like Erasmus, Machiavelli, and Montaigne to explore the world of writerly culture in its manifold expressions, including authorial revision, self-translation, controversy, censorship, intertextuality, and forgery. Our own laboratory will be the Department of the Special Collections, where we will spend a good deal of our time handling manuscripts and early printed books. Course may be used to satisfy major requirements in both French and Italian sections.
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive

AS.211.479. Dante's Journey through the Afterlife. 3.0 Credits.
Dante's Divine Comedy presents a complete picture of the medieval world-view in all its aspects: physical (the structure of the cosmos), historical (the major actors from Adam to Dante himself) and moral (a complete system of right and wrong). Dante shows how the Christian religion portrayed itself, other religions, the nature of God, humans, angels and devils, and human society. We will explore these topics both from the viewpoint of Dante's own time, and in terms of its relevance to our own societal and cultural concerns.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive

AS.211.480. Religious Themes in Film and Literature. 3.0 Credits.
This course would be of interest to anyone who would like to learn about the intersection of religion and modern culture. At the center of the course will stand a close study of the representation of religious themes and their role in modern literature and cinema. The works which we will deal with are not considered religious and yet they include religious themes as part of their narrative, images, language or symbolic meaning. We will trace in various works from various countries and genre, themes such as: divine justice, providence, creation, revelation, the apocalypse, prophecy, sacrifice and religious devotion. We will also study the ways in which Biblical and New Testament stories and figures are represented in these works. The course will have a comparative nature with the aim of learning more about the differences between the literary and cinematic representations.
Instructor(s): N. Stahl
Area: Humanities

AS.211.500. Independent Study-Portuguese Culture. 0.0 - 3.0 Credits.
Instructor(s): F. De Azeredo Cerqueira.

AS.211.501. Independent Study-French Culture. 0.0 - 3.0 Credits.
Instructor(s): Staff.

AS.211.638. The Possibility of the Novel: Theory and Poetics of the Genre.
This class will be taught by visiting Max Kade Professor, Anja Lemke. The class will analyze the novel as the classical genre of the possible. It will examine the question of form as taken up in the novel and its relation to different figurations of possibility as contingency, faculty, utopia etc. Readings will include classical texts on novel theory (e.g., von Birken, Huet, Blankenburg, Schlegel, Hegel, Lukács), theory included in novels (e.g., Goethe, Wilhelm Meister, Musil, Mann ohne Eigenschaften), texts that try to connect forms of narration with reflections on possibility (Blumemberg, Luhmann and recently Rüdiger Campe and Joseph Vogl) and some general reflections on the relation of the real to the possible (Aristotle, Leibniz, Agamben).
Instructor(s): A. Lemke
Area: Humanities
AS.211.641. Women Filmmakers from the Margins.
Filmmaking remains an overwhelmingly male-dominated profession, but women are making significant inroads, and in so doing are leaving their distinctive mark on the medium. In this seminar we will examine the films of a group of women auteurs (those who write and direct their own films) who have endeavored to speak from the margins—be they social, geographical, or sexual—and whose work has challenged mainstream cinematic norms. The filmmakers whose work we will analyze may include Jane Campion, Australia; Aurora Guerrero, Mexico-USA; Claudia Llosa, Peru; Mira Nair, India-USA; Marialy Rivas, Chile; So Yong Kim, Korea.
Instructor(s): B. Wegenstein
Area: Humanities
Writing Intensive.

AS.211.666. Graduate practicum: Mapping the Scholarly Landscape I (Research Skills).
Texts have lives. From handwritten manuscript to digital format, the various incarnations of the literary text have implications for literary scholarship. This course examines the many lives of a literary text and the issues of access, retrieval, and research. From online resources to the core printed reference works, this course acquaints graduate students with the range of scholarly apparatus in the field of literary studies. The course will be conducted in 6 two-hour sessions on Sept 15, 29, Oct 13, 27 Nov 10 and Dec 1.
Instructor(s): T. Rose-Steel
Area: Humanities.

AS.211.667. Graduate practicum: Mapping the Scholarly Landscape II (Tools for Professional development).
Spring Semester (coordinated by GRLL faculty with the participation of advanced grad students) 1. Preparing a syllabus, marketing your classes (DTF, Summer, Intersession) [with the participation of successful DTF/Intersession instructors] 2. Options for online teaching 2. Writing a conference paper abstract; conference presentations 3. Organizing a conference/symposium [led by advanced grad students] 4. How to get published (what, when, where) 5. Academic review writing 6. Options for fellowships/grants/career development
Instructor(s): E. Refini
Area: Humanities.

AS.211.670. The Gothic Meme in French Culture.
Medieval churches—embodied by French Romanesque and Gothic edifices—have an unexpected status in modern culture. They are visible as monumental reminders of the medieval past, but their true role is little understood. In fact, they were vibrant creators of culture and politics in their own time, and the origin of a dynamic cultural meme in the modern world. Misunderstanding of medieval culture began in the Renaissance. Unlike “Romanesque”—a term invented at the beginning of the 19th century—Renaissance writers coined the word “Gothic” as a pejorative descriptor for medieval architecture (considered “barbarous”), a term that quickly came to designate medieval culture in general. Only during the Bourbon Restoration (1814-1830), when French thinkers sought to reconstruct a heroic past to repair the rupture with French history wrought by the Revolution, did the “Gothic” Middle Ages experience revival and respect. Historians like Michelet and Guizot; writers like Hugo, Chateaubriand, Vigny; philosophers like Cousin, Royer-Collard, de Biran conceived new ways of looking at French history, where the Middle Ages inspired a new hybrid called “medievalism.” Medievalism enabled the transformation of “Gothic” into the modern meme “Goth,” with its overtones of apocalypse and mysticism. This seminar will trace the culture, history, and politics underlying the evolution of Romanesque and Gothic from the 11th to the 14th centuries. This medieval scenario will then serve as a backdrop against which to view the politics, history, and culture of the Bourbon Restoration when the reinvention of the Middle Ages by history and literature inspired a trajectory of national consciousness from abjection to the sublime.
Instructor(s): S. Nichols
Area: Humanities
Writing Intensive.

AS.211.707. Film and Philosophy: The Surrealist Cinema of Alejandro Jodorowsky.
The films of Chilean cult director Alejandro Jodorowsky have confounded, infuriated, and intrigued critics and audiences alike throughout his 50-plus-year career. In this seminar we will examine the expanse of his cinematic production in order to delve into fundamental philosophical questions of representation, violence, and the relation between visual imagery and poetry.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

AS.211.711. Adapting Myths for the Screen.
In this course we will look at examples of adaptations of sacred narratives for the screen from Pasolini’s adaptations of the gospels to Disney’s adaptations of Grimm, and the recent boom of 21st century fairy-tale films; we will be reading Jack Zipes’ The Enchanted Screen, and Fairy-tale Films Beyond Disney, ed. Jack Zipes, and Sacred Narratives: Readings in the Theory of Myth, ed. Alan Dundes, among others.
Instructor(s): B. Wegenstein
Area: Humanities
Writing Intensive.
AS.211.714. Ariadne's Threads: Metamorphosing Mythologies. Abandoned by Theseus, Ariadne lamenting on the shore of Naxos embodies one of the most powerful tropes in literature and the arts. The fate of the heroine who helped Theseus out of the labyrinth became herself a thread (indeed, an inexhaustible series of threads) running across the ages and populating the imagination of poets, painters, composers. After exploring in detail the classical sources that canonized Ariadne's myth (Catullus, Carmina, 64; Ovid, Heroides, 10) as well as references to the myth found in other classical authors (Homer, Hesiod, Pausanias, Plutarch, Propertius), we will turn to the reception of Ariadne in literature and music (Ariosto, Rinuccini-Monteverdi, Haydn, Nietzsche, Strauss-Von Hofmannsthal). The analysis of the various case studies will focus on the rhetorical and poetical devices used by poets and composers to reenact the vocal features of Ariadne's lament.
Instructor(s): E. Refini
Area: Humanities.

AS.211.754. Modernist Primitivism. This course will explore the aesthetics and politics of primitivism in European modernity, focusing on the visual arts and literature in German and Yiddish, but looking at the wider European context, including France and Russia. We will begin with the backgrounds of primitivism in Romanticism, looking especially at its ethnographic and colonial sources. We will then focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. Our central concerns will include: the attempt to create a modernist aesthetics grounded in ethnography; the primitivist critique of modernity; the place of primitivism in the historical avant-garde; the development of the notion of "culture" in modernity; and the aesthetics of modern ethnic and national identity. Key thinkers, artists, and writers to be considered include Herder; Gauguin; Picasso; Wilhelm Worringer; Carl Einstein; Hannah Höch; and Emil Nolde.
Instructor(s): S. Spinner
Area: Humanities.

AS.211.791. Film Theory and Critical Methods. Placed at the crossroads of aesthetics and politics, psychology and economics, the history of technology and popular culture, film has emerged as the interdisciplinary object of study par excellence. Based on intensive weekly viewing and on classic and contemporary statements in film theory, this seminar—required for the Graduate Certificate in Film and Media—opens up questions of film language, authorship, genre, spectatorship, gender, technology, and the status of national and transnational cinemas. Cannot be taken if student took any of AS.212.791, AS.213.791, AS.214.791, or AS.215.791.
Prerequisites: Cannot be taken if student took any of AS.212.791, AS.213.791, AS.214.791, or AS.215.791

Area: Humanities
Writing Intensive.

AS.212.150. Freshman Seminar: Before the Selfie. Autobiography and Self-Portraiture in Text and Photography. 3.0 Credits.
What strategies do contemporary writers and artists use to project a public image of a private self? How do emergent technologies impact the representation of the autobiographical self in relation to community? Focused on the history and present-day uses of literary and photographic self-portraiture in France since the Second World War, this course explores themes of Jewish identity, gay and queer subjectivity, and feminist critique by asking how we view others picturing themselves, illuminating our understanding of the construction of selfhood. Course taught in English, based on works translation from the French.
Instructor(s): A. Rogobete
Area: Humanities.

AS.212.170. Freshman Seminar: Writing the Great War. French Literature and World War I. 3.0 Credits.
This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in English.
Instructor(s): C. Benaglia
Area: Humanities.

AS.212.205. Winter Is Coming: Writing and Rewriting French Dark Ages. 3.0 Credits.
This course will not aim at drawing the exhaustive literary landscape of French Middle Ages, neither will it be a Comparative Literature or History class. It may be considered a gateway to French Medieval literature, given that the Modern Fantasy has obviously improved the last decades, the latter being built as a rewriting of Medieval themes and Western European folklore. Looking at texts originally written in Old French, including prose and poetry, but also at the French Medieval iconography, we will try to understand the old roots of the Modern and so popular (but sacrificing) Fantasy Literature. Basic French will be required.
Instructor(s): M. Alhinho
Area: Humanities.

AS.212.225. The Letter of the Law in 18th-c. France. 3.0 Credits.
Law: is it a science or an art? Fiction writers as well as jurists produce texts that relate to and often inflect social, moral and political values. However, these affinities are often a source of deep tension. In this course, we will be investigating the nebulous contours of binary concepts such as literature and belles lettres, jurisdiction and audience, public and private affairs, and mercy and justice, as "subjects" evolve into "citizens" in 18th-century France. After establishing a conceptual framework via juridical heavyweights such as Leibniz and Montesquieu, we will weave our way through the 18th century, moving between the increasingly similar spaces of the courtroom and the stage, before finally ending up at the foot of the guillotine, with Marie Antoinette and Maximilien Robespierre. Taught in English, but French minor/major credit possible by completing written work in French and by attending a weekly discussion section conducted in French. Students interested in the 4-credit French option should enroll in section 2. All others should enroll in section 1.
Special Notes: This course is meant to be a small class experience. Enrollment limits will be strictly enforced.
Instructor(s): N. Karam
Area: Humanities.
AS.212.229. French New Wave. 3.0 Credits.
An exploration of the major films and directors of the French New Wave that is also designed to help students consolidate their skills in the analysis of film. The course will examine the origins of the French New Wave, looking at the directors as critics and as passionate film fans, along with the institutional and historical context of the films. It will also ask how the French New Wave changed the process of filmmaking, and transformed the way we think about the work of the director--inspiring more vocations in filmmaking than any other movement in cinema history. Conducted in English.
Instructor(s): S. Roos
Area: Humanities.

AS.212.304. Paris Souterrain: Paris Underground. 3.0 Credits.
This course will track uses of "the underground" in major canonical and peripheral literary works in the nineteenth century. Readings will include works by Balzac, Baudelaire, Hugo, and Zola.
Prerequisites: AS.212.334 OR HA.212.334
Instructor(s): R. Powers
Area: Humanities.

AS.212.308. The Battle of the Sacré Coeur in Fin-de-Siècle Paris. 3.0 Credits.
This interactive course analyzes the stakes underlying the construction of Paris' controversial Sacré-Coeur Basilica in Montmartre. In the light of heated 19th-century debates on moral authority that opposed religious believers and partisans of a secular state inspired by a scientific ethos, we will consider how the advocates of both sides use specific rhetorical techniques in the public domain (newspaper articles, caricatures, speeches) and artistic devices (paintings, literary writings) to convince their audience of the validity of their claims. In other words, it is all about propaganda. The course will open out onto contemporary debates that show similar ethical conflicts. Recommended Course Background: AS.210.301 or AS.210.302.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.212.316. Poetry as Performance: Modern and Contemporary Voices from France. 3.0 Credits.
From the earliest decades of the 20th century onward, French poets nourished by European avant-garde artistic movements (futurism, dadaism, cubism) conducted radical experiments with typography, sound, and public performance. Poets freed their object from "traditional" poetic expression and, in a quest to explore such technologies as printing, sound recording, and film, gave their practice a newly public orientation. At the same time, other poets would shy away from performance to focus on language as a technology in itself (textualism, the early OuLiPo); on objects (Ponge); or on the expression of the subject (neo-lyricism).
Based on close readings of, and listening to, works by Apollinaire, Ponge, Bonnefoy and Heidsieck among others, this course aims to sketch the diverse voices and voix that have ushered French poetry into the digital age. Taught in French.
Instructor(s): V. Adams-Aumeregie
Area: Humanities.

AS.212.318. Women in Pre-Modern French Literature. 3.0 Credits.
This course will examine the changes in the relationship of women to literature in France up to the French Revolution from several points of view: (1) What were the social and intellectual contexts of gender distinctions? (2) How did men writing about women differ from women writing about women? (3) How were these questions affected by the changing norms of literary production? Texts by Marguerite de Valois, Mme. de Sévigné, Molière, Mme. de Lafayette, Prévost, Diderot, Rousseau, Mme d'Epinal and Revolutionary memorialists
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.326. Listening In: The Sounds of French Poetry. 3.0 Credits.
The sounds and rhythms of French language poetry have evolved sharply over time. How can listening to the musicality of poems enhance our understanding of poetic meaning? To attune the ear, develop poetic voice and a heightened sensibility to the visual and aural experience of poems, students will listen to, record, recite and translate poetry.
Readings will range from classical works such as Racine's Phèdre and Molière's Tartuffe to poets such as Baudelaire, Hugo, Mallarmé, and Tzara. Recommended Course Background: AS.212.333 or AS.212.334
Instructor(s): J. Whitaker
Area: Humanities
Writing Intensive.

AS.212.331. Paris 1900: the Great World Exhibition and the Beginning of Modernism. 3.0 Credits.
Held in Paris, the 1900 World's Fair introduced to the modern world such striking innovations as subways, moving images on giant screens, escalators, colossal electrical shows, and the first painting by Pablo Picasso to be shown on French soil. Focused on key cultural and socio-political events surrounding this momentous turn-of-the-century display of wealth and power, this course examines the paradoxes of a modernizing French nation which even as it promoted individual rights alongside technology and economic growth was headed towards world conflict. Students will perform original research by exploring the rare book collection at JHU as well as the substantial digital archives now documenting the period.
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.212.333. Introduction à la littérature française. 3.0 Credits.
Introduction à la Littérature française I and II propose reading and discussion of texts of various genres from the Middle Ages to the 21st century. This sequence is intended as an introduction to the methods, questions, and techniques of textual analysis through intensive reading, discussion, and production of written texts. Introduction à la littérature française I covers some of the greatest classics of French literature and thought from the Middle Ages to the Revolution. The two semesters may be taken in either order. This sequence is a pre-requisite to all further literature courses. Students may co-register with an upper-level course during their second semester. Recommended Course Background: AS.210.301-AS.210.302 or at least one semester of AS.210.301-AS.210.302 with a grade of A and written permission of the instructor. For more info see http://grll.jhu.edu/french/undergraduate/courses/
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): E. Russo; W. Anderson
Area: Humanities
Writing Intensive.
AS.212.334. Introduction à la littérature française II. 3.0 Credits.
Readings and discussion of texts of various genres from the Middle Ages to the 20th century. The two semesters (212.333 and 212.334) may be taken in either order. This sequence is a pre-requisite to all further literature courses. Students may co-register with an upper-level course during their second semester. Introduction à la littérature française II covers the time period from the Revolution to the present.
Prerequisites: AS.210.301 OR AS.210.302 or at least one semester of AS.210.301 or AS.210.302 with a grade of A and written permission of the instructor.
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.212.336. The Violence of the Stage. 3.0 Credits.
Modern French drama since World War II has been a privileged space for public representations of violence. Featuring works by playwrights from Sartre to Réza and from Beckett to Mouawad, this course examines the meanings and functions of violence in performance (murder, terrorism), as well as different possibilities for theatrical staging and film adaptation. Recommended Course Background: AS.212.334
Instructor(s): G. Briex
Area: Humanities.

AS.212.339. Constructing Poe: How 19th Century France created an icon. 3.0 Credits.
Just who was Edgar Allan Poe, and who is he today? This course explores how and why a multitude of 19th-century French writers constructed Poe as an author. Through selected works from Hugo, Baudelaire, Mallarmé, and Verne, to be read alongside Poe's original texts, we will study the means by which these figures projected uniquely French versions of this mysterious American writer. We will examine the ways by which power justified itself in order to foster obedience and consensus. Instructor Background: completion of 210.301, 201.302, or equivalent score on Placement test
Instructor(s): A. Alexander
Area: Humanities
Writing Intensive.

AS.212.340. Topics in French Cinema: Immigration, identité, différence culturelle. 3.0 Credits.
An exploration of immigration, identity, and cultural differences through the lens of recent French and Francophone films. Focus on discussion and analyses of film sequences in class and on oral presentations. Students will have the opportunity to progress in vocabulary, oral expression, and in critical analysis. Films studied include works of Kassowitz, the Dardennes, Kechiche, Hanek, and Audiard. Conducted in French. Recommended course background: completion of AS. 210.301 or equivalent score on Placement test.
Instructor(s): S. Roos
Area: Humanities.

AS.212.341. Power and Resistance: Approaches to French Political Thought.. 3.0 Credits.
Even as a coherent, rational conception of state power emerged in France in as early as the Renaissance, French thinkers never stopped challenging the ways by which power justified itself in order to foster obedience and consensus. In so doing, they focused critically as much on the claims of sovereignty issuing from the top as on the willingness of the governed to submit to them. The course will examine the dialectic between the legitimation and delegitimation of power, from the Renaissance wars of religion to the Revolution and beyond: the haunting fear of the corruption and death of the political body; the notion of permanent crisis; the right to revoke the social contract; the reach of power in shaping minds and bodies. Readings may include works by La Boétie, Bodin, Bayle, Rousseau, Sade, Saint-Just, Constant, Maistre, Tocqueville, Foucault, Lefort and Rancière. Readings and discussion in English.
Instructor(s): E. Russo; W. Anderson
Area: Humanities.

AS.212.342. Topics in French Cinema: Le crime dans le cinéma. 3.0 Credits.
Focus on French crime films, thrillers, and films noirs. Films studied will include movies by Jean-Pierre Melville, Dassin, Godard, Chabrol, French responses to US genre movies and to Hitchcock, and contemporary versions of the crime film in France (Jacques Audiard, Michael Hanek). Strong focus on discussion and analyses of film sequences in class and on oral presentations. Additional assignments will involve vocabulary and grammar study. Recommended Background: 210.301 or 210.302 or equivalent score on placement test
Instructor(s): S. Roos
Area: Humanities.

AS.212.344. Topics in French Cinema: Amour, Sexualité, Mariage. 3.0 Credits.
What is the nature of desire? Where does it come from, and what determines and conditions it? What do we fall in love with when we fall in love? An exploration of a series of films that ask essential questions about the psychological, political, and social stakes of human love, desire and sexuality, and about the institution of marriage. Focus on discussion and analyses of film sequences in class and on oral presentations. Students will have the opportunity to progress in vocabulary and oral expression. Films studied include works of Truffaut, Godard, Bunuel, Kechiche, Hanek, Breilat and Audiard. Requirements for this course: completion of 210.301, 201.302, or equivalent score on Placement test.
Instructor(s): S. Roos
Area: Humanities.

AS.212.353. La France Contemporaine. 3.0 Credits.
Students will explore contemporary French society and culture through a wide variety of media: fiction and non-fiction readings (graphic novels, news periodicals, popular magazines), films, music, art, websites, and podcasts. A diverse range of hands-on activities in addition to guided readings will help students develop cultural awareness as we discuss topics such as education, politics, humor, sports, cuisine, immigration, slang, and national identity, as well as the historical factors that have influenced these facets of French and francophone culture. Recommended Course Background: AS.210.301 or AS.210.302 or permission of instructor.
Prerequisites: Students may not have taken AS.211.401.
Instructor(s): A. Wuensch
Area: Humanities.
AS.212.358. Writing the Great War: French Literature and World War I. 3.0 Credits.
This course examines literary texts engaging with WWI and related topics such as class struggle, gender conflicts, and colonialism. Authors studied include H. Barbusse, J. Cocteau, L.F. Celine, A. Malraux. Course taught in French.
Prerequisites: AS.210.302 OR AS.212.333 OR AS.212.334 OR AS.211.401 OR AS.211.402
Instructor(s): C. Benaglia
Area: Humanities.

AS.212.362. Ecrire l'héroïsme au féminin [Writing Heroism in the Feminine]. 3.0 Credits.
How can we define a heroine? What distinguishes heroines from mere female protagonists? Who are the main heroines to have marked the French literary tradition? This course examines how writers have transformed the notion of heroism inherited from Ancient Greece and Rome to lend it different and distinctly gendered shapes in the figure of the female hero: bravery, scandal, crime, sacrifice, nationalism. Focus will be placed on the evolution of the concept from the 17th century to the end of the 20th century in novels and plays by Racine, Madame de Lafayette, Prevost, Balzac, Maupassant, Anouilh, Wittig, and Condé. Recommended Course Background: AS.212.333 or AS.212.334.
Instructor(s): L. Cariou
Area: Humanities.

AS.212.364. Not Another Fashion Victim: Shopping, Style, and Consumer Culture in Paris. 3.0 Credits.
Paris has long been considered a world center for fashion. This course examines the development of style and of consumer culture in the French capital since the 19th century. Readings from key historical and literary texts will lay the groundwork for understanding modern-day consumption and theories of fashion, taste, and social distinction. We will consider visual and print sources related to Parisian fashion (paintings, fashion plates, magazines) as well as films. Taught in English, but French minor/major credit possible by completing written work in French and by attending a weekly discussion section conducted in French. Students interested in the 4-credit French option should enroll in section 2. All others should enroll in section 1.
Instructor(s): K. Haklin
Area: Humanities.

AS.212.365. Twisted Roots: Writing "Creole" in the French Caribbean. 3.0 Credits.
This course examines rootedness and hybridity in contemporary literary and critical works from the French Caribbean, exploring the act of writing "Creole" as illustrative of innovative thought-constructs. French students will read and write in French and should register for section 02; other students will read translations and should register for section 01. Discussions will be conducted in English.
Instructor(s): R. Loescher
Area: Humanities.

AS.212.366. Avant la Révolution: littérature et critique sociale en France (1500-1789). 3.0 Credits.
This course will explore some key moments in the literature and thought of pre-revolutionary France, focusing on the ways that Renaissance and Enlightenment authors used literature to create alternative spaces from which to critique and rethink the worlds in which they lived. Readings will include Rabelais, Montaigne, Fontenelle, Montesquieu, Voltaire, Diderot, and Rousseau. Assessed work will include an oral presentation and a research paper on a topic of your choice. Throughout the course you will acquire finer critical and analytical skills, polish your oral and written French, and familiarize yourself with advanced research methods in the human sciences. Recommended course background: at least one semester of Introduction à la littérature française (I or II). For more info see http://grll.jhu.edu/french/undergraduate/courses/
Prerequisites: Pre-reqs: AS.212.333 OR AS.212.334
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.212.383. Ecrire l'ailleurs : littérature, voyage, utopie. 3.0 Credits.
Distant places have always exerted a particular fascination on the human mind. Many classics of European literature feature journeys to foreign lands, whether real or imaginary: from More's Utopia and Ariosto's Moon, to Bacon's New Atlantis and Swift's Lilliput. Through a range of examples from early modern France, we will explore the complex relationship between travel and the literary imagination. Topics to discuss include: the style, status, and models of travel literature; cultural encounter, Otherness, and self-representation; imaginary places and social critique. Readings will include fictional texts like Cyrano's Estats et empires de la Lune, genuine travel reports such as Champlain's Voyage au Canada, and works that skilfully mix fiction and reality, as in Montesquieu's Lettres persanes.
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.212.410. Toward Modernity: France 1848-1885. 3.0 Credits.
The second half of the Nineteenth Century in France is a period of dramatic political, social, historical, and technical experiments and profound changes. It is as well a fascinating period of artistic creativity in Literature and Art, considered as the rise of Modernity. We'll read texts by Hugo, Flaubert, Zola, Jules Verne, Baudelaire, Rimbaud, Mallarmé, Tocqueville, Michelet, and study works by Courbet, Manet, Monet, Berlioz, Saint-Saëns, Fauré. Co-listed with AS.211.410
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.
AS.212.417. Texts of/on the Terror from the French Revolution. 3.0 Credits.
Taught in French. During the first half of the semester we will take advantage of the renewed interest in scholarship on the Terror to deal with some of the most famous examples of Revolutionary rhetoric, focusing especially on the trial of Louis XVI and the late speeches of Robespierre. During the second half of the semester we will read literary works produced during the Terror and accounts of the Terror from authors such as Balzac, Dumas, and Michelet. We will be asking questions such as: What was the Reign of Terror and to what extent was its project dependent on public discourse? Why and how does the nature of public oratory change? What happens to definitions of "the literary" and of authorship in a terroristic context?
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.421. Textes et Performances: le théâtre français du 17e au 19e siècle. 3.0 Credits.
Le théâtre français, des classiques aux romantiques. There will be a performance component to this course. Recommended co-registration with 210.312. Acting French. For more information, see http://www.wilda.org/Courses/CourseVault/Undergrad/18thTheaterUG/SyllabusTheater.html
Instructor(s): W. Anderson
Area: Humanities.

AS.212.422. Esthétique et politique: autour des révoltes de Mai 68. 3.0 Credits.
What prompts a society to turn its back on tradition and to topple its most sacred institutions? This exploration of the French "Sixties" highlights the cultural ferment behind the historic student/worker revolts of May/June 1968, which brought the nation to a standstill. Through novels, essays, songs, and films, we will examine linkages between authority and desire; thought and action; revolutionary aspiration and the consequences of failed revolt.
Prerequisites: AS.211.401 OR AS.212.353
Instructor(s): D. Schilling
Area: Humanities.

AS.212.429. Honors Thesis Prep. 1.0 Credit.
This course will meet three times during the Fall semester to enable all French majors to prepare their thesis subject, thesis bibliography, and abstract prior to the writing of the Senior Thesis (AS.212.430) in the Spring semester of their senior year. This course is required of all French majors and must be taken during the Fall semester of their senior year. Schedule TBA upon consultation with the class list, as there are only three group meetings. The rest of the meetings are in individual appointments with the DUS or another chosen French professor.
Prerequisites: AS.212.333-334 and either prior enrollment or concurrent enrollment in AS.210.417 Eloquent French
Prerequisites: AS.210.417;AS.212.333 AND AS.212.334
Instructor(s): Staff
Area: Humanities.

AS.212.430. French Honors Thesis. 3.0 Credits.
An in-depth and closely supervised initiation to research and thinking, oral and written expression, which leads to the composition of a senior thesis in French. Recommended Course Background: AS.212.429
Instructor(s): D. Schilling; E. Russo; J. Neefs; W. Anderson
Area: Humanities
Writing Intensive.

AS.212.431. Style, Gender and Politics from Marie-Antoinette to the Burykni. 3.0 Credits.
From effeminate kings, to slutty queens, to post-revolutionary dandies, to the manifest invisibility adopted by some French citizens today, debates on the gendering and styling of political bodies have always been central to power struggles in France. Students will read from sociology, history and literature in order to understand the complex interplay among fashion, gender and political identity. Taught in English, but French minor/major credit possible by completing written work in French and by attending a weekly discussion section conducted in French. Students interested in the 4-credit French option should enroll in section 2. All others should enroll in section 1. Special Notes: This course is meant to be a small class experience. Enrollment limits will be strictly enforced.
Instructor(s): E. Russo
Area: Humanities.

AS.212.432. The Dreyfus Affair: Lying for Truth. 3.0 Credits.
In 1894 French military captain Alfred Dreyfus was found guilty of a crime of treason he did not commit. The true reasons for his arrest are still under debate today: was this a sheer act of antisemitism? Why did the army create false proof against a men they knew was innocent? What was the role of the press in propagating the Affair? This course proposes to approach the Dreyfus Affair in all its complex forms, while encouraging students to carry out original and innovative research based on a wide range of resources (caricatures and articles in the press, pamphlets, paintings, films, music, photographs, court transcripts, government archives, private letters, and hopefully more).
Instructor(s): K. Cook-Gailloud
Area: Humanities.

AS.212.442. Souvenirs de la France occupée 1940-1944 [Memories of Occupied France, 1940-1944]. 3.0 Credits.
How have writers and filmmakers active in France since World War II shaped the collective memory of German occupation, deportation, and liberation, both forging and contesting myths of the French nation through the wartime experience of resistance and collaboration? In what ways do distinct modes of written and audiovisual expression (fiction, testimony, documentary) conjoin with individual or group perspectives to color our understanding of France's "dark years"? See full description here: http://grll.jhu.edu/french/undergraduate/courses/
Prerequisites: AS.212.334 OR (AS.211.401 AND AS.211.402)
Instructor(s): D. Schilling
Area: Humanities.
AS.212.445. French romanticism across the arts. 3.0 Credits.
This course is designed to introduce you to a glamorous moment in French culture and the arts, namely the first half of the nineteenth-century. This was a time when talent and ingenuity, and a desire to mend the wounds left by war and terror created an aesthetic movement that brought its own form of revolution. What was it like then to be in Paris in the theater, at the ballet, in literary salons, at concerts, at the opera? How did such “cultural productions” shape the imagination and nourish the creative endeavors of many artists and writers? As there was no camera to document this moment, we’ll need to rely on writers to describe or, even better, evoke a universe of new aesthetic experiences that richly shaped the nineteenth-century literary world. What were these new visions and personal dreams? Why the exoticism? What was it like to live in a time that made it possible to carry your heart on your sleeve without ridicule? Literary writings will be our archive, as we explore such cultural offerings as romantic ballet, the stage (both as opera and theater), collaborations between musicians and writers, and translations of major romantic themes across the arts. With the help of texts and visual as well as musical examples, we will try to imagine what it means to declare yourself “un romantique.” Modern film excerpts and productions of romantic art will help us see the lasting effects of this period of cultural effervescence. Among the authors and creators whose work we will study are Victor Hugo, Nerval, Gautier, Baudelaire, Chopin and George Sand, Berlioz, Taglioni, as well as Shakespeare in French. Recommended Course Background: AS.212.302 and either AS.212.333 or AS.212.334
Instructor(s): E. Ender
Area: Humanities.

AS.212.449. France, terre des migrations [French Histories of Migration]. 3.0 Credits.
Comme le Canada ou les Etats-Unis, la France est une grande terre d’immigration qui depuis le 19e siècle a accueilli sur son sol des populations du monde entier. En examinant témoignages, textes de fiction et films documentaires, nous survivons les expériences contrastées de diverses vagues de migrants chassés par la faim, le chômage ou les persécutions. Quels mécanismes ont favorisé ou freiné l’intégration économique, sociale et civique de ces migrants qui ont rejoint la République française? Que veut dire “être immigré” aujourd’hui?
Prerequisites: AS.211.401
Instructor(s): D. Schilling
Area: Humanities.

AS.212.466. The Pleasures of Tragedy. 3.0 Credits.
Why do we experience pleasure in watching representations of bad things happening to people on stage? Are the emotions aroused by tragedy ethical or immoral? These are just some of tragedy’s many paradoxes, which have been explored by philosophers over time, from Plato to Augustine, to Rousseau, to Hume. This course proposes to explore some of the enigmas and conundrums raised by a genre which everybody agrees cannot be defined by common formal and thematic features, but which we all feel able to recognize when we see it. Is there an essence of tragedy that endures from 5th century Greece to today? Or are the things that make us call a play tragedy radically different according to time and place? Is tragedy related to philosophy, religion and politics? Tragedy has been declared in turn “dead” (killed by Christian notions of redemption, by political utopianism, by philosophical optimism, by the dissolution of language, etc.) and renewed, regenerated (through the sense of the absurd, postmodern immanence, irredeemable violence) – and indeed, there has been a flourishing of the genre in France in the late XXth century. Through readings of a selection of plays, both ancient and modern, and theoretical works, we’ll examine the metamorphosis of the tragic hero and heroine, the issues of gender, moral responsibility and the management of the spectator’s emotions. Readings from Sophocles, Aristotle, Corneille, Racine, Hegel, Kierkegaard, Anouilh, Sartre, Césaire, Koltès, Gably. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): E. Russo
Area: Humanities
Writing Intensive.

AS.212.467. The Pleasures of Tragedy. 3.0 Credits.

Readings from Sophocles, Aristotle, Corneille, Racine, Hegel, Kierkegaard, Anouilh, Sartre, Césaire, Koltès, Gably. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): E. Russo
Area: Humanities
Writing Intensive.

AS.212.468. Limit-Experience, Limit-Texts. 3.0 Credits.
Carrère, Chevillard, Darrieussecq, Delbo, Duras, Guibert, and Volodine. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): D. Schilling
Area: Humanities
Writing Intensive.

AS.212.469. Limit-Experience, Limit-Texts. 3.0 Credits.
Carrère, Chevillard, Darrieussecq, Delbo, Duras, Guibert, and Volodine. Course in French.
Prerequisites: AS.210.301 AND AS.210.302
Instructor(s): D. Schilling
Area: Humanities
Writing Intensive.

AS.212.470. Censorship in Language and Practice. From the Ancien Regime to Democracy. 3.0 Credits.
An exploration of the boundaries of acceptability when speaking about religion, government, sexuality and gender. Students will learn about the political, theological and legal basis of blasphemy and punishable behavior, and how they have changed from the time of divine-right monarchy to contemporary laïcité. Selected readings ranging from the clandestine culture of free-thinkers and rakes in the 17th century, to the trials and causes célèbres of the Enlightenment, to modern-day democratic polemics.
Prerequisites: AS.210.302
Instructor(s): E. Russo
Area: Humanities.
AS.212.471. Jules Verne. 3.0 Credits.
An overview of the corpus of the author of the "Voyages extraordinaires". The patron saint of steampunk authors explored through his novels the transformation of the modern world resulting from the explosion of technological advances in the industrial age, yet he was also an astute and erudite historical thinker, an amateur anthropologist whose work reflected many of the prejudices and challenges of his colonizing contemporaries. A dabbler in the new human sciences and their role in the development of cultural models, he provides a unique entryway into the fin-de-siècle French mind set. This class will be taught in French. For more information, see http://www.wilda.org/Courses/CourseVault/Undergrad/Verne/Syllabus.html Recommended Prerequisites AS.212.333 or AS.212.334
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.476. Into the Wild: Environmental Imagination across the Ages. 3.0 Credits.
How have people over the centuries construed their relationship to the natural environment? What literary and artistic traditions have shaped Western attitudes to nature, and how have these traditions and attitudes changed over time? "Into the Wild" will explore these questions through a range of textual and visual sources, including works in both verse and prose (e.g. pastoral and Romantic poetry, early exploration accounts, scientific treatises and works of science-fiction, short-stories and novels), paintings, engravings, music, and film. Course work includes visits to JHU's Special Collections and to the Baltimore Museum of Art. Recommended background: AS.212.333 or AS.212.334 either previously or concurrent
Instructor(s): S. Miglietti
Area: Humanities
Writing Intensive.

AS.212.478. Guillaume de Machaut: exploring medieval authorship in the digital age. 3.0 Credits.
Using new websites devoted to the lyrics and music of Guillaume de Machaut, the foremost poet and composer of the 14th-century French royal court, this seminar will explore the role of music and literature during the Hundred Years War. The course aims to give students a thorough grounding in Machaut's literary and musical works, while also introducing them to digital tools to view and analyze original illustrated musical manuscripts of his work. Critical analysis of Machaut's work will be assessed not only through more traditional essay writing, but also through the creation of a multimedia digital edition of a section of his oeuvre using Omeka exhibition software. The course is designed so that no prior knowledge of musical notation or medieval French is necessary.
Instructor(s): T. Rose-Steel
Area: Humanities
Writing Intensive.

AS.212.501. French Independent Study. 3.0 Credits.
Instructor(s): D. Schilling; E. Russo; J. Neefs; W. Anderson.

AS.212.502. French Indep Study-Lit. 3.0 Credits.
Instructor(s): E. Gonzalez; J. Neefs.

AS.212.596. Independent Study - Spanish. 3.0 Credits.
Instructor(s): E. Gonzalez.

AS.212.598. Internship. 1.0 Credit.

The development of the drame bourgeois and the theater criticism of the French Enlightenment. Authors to be studied include Racine, Le Sage, Marivaux, Voltaire, Diderot and Beaumarchais. For more information, please see http://www.wilda.org/Courses/CourseVault/Grad/Theater/Syllabus.html
Instructor(s): W. Anderson.

Readings in Balzac, Stendhal, Hugo, Musset and Nerval, plus viewings of Géricault, Delacroix, Daumier. Theories of Romanticism, from Baudelaire to present will be examined and commented as well.
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

What if Rousseau's description of the sentiment de l'existence were to join to the models of consciousness Damasio develops in The Feeling of What Happens? This course explores aspects of consciousness in French literature (Rousseau, Sand, Nerval, Amiel, Flaubert, Valéry, Proust, Sartre) in a dialogue with recent texts in theory, philosophy, neuroscience (e.g. Poullet, Merleau-Ponty, Sartre, Scarry, Noé, Humphrey, Damasio, Sacks).
Instructor(s): E. Ender
Area: Humanities
Writing Intensive.

AS.212.692. Research Methods.
Texts have lives. From handwritten manuscript to digital format, the various incarnations of the literary text have implications for literary scholarship. This course examines the many lives of a literary text and the issues of access, retrieval, and research. From online resources to the core printed reference works, this course acquaints graduate students with the range of scholarly apparatus in the field of literary studies.
Instructor(s): T. Rose-Steel

AS.212.696. Literature Confronts Science: Zola.
Zola worked with the theories of heredity of his time in the Rougon-Macquart novels. But he also attempted to use his understanding of biology and thermodynamics to reform the theory of the novel in general. This course will examine these two different effects of science on literature and try to see what leads an author to undertake such a project. For a more extended description, please see http://www.wilda.org/Courses/CourseVault/Grad/Theater/Syllabus.html. Advanced undergraduates with sufficient background may register for this course with permission of the instructor.
Instructor(s): W. Anderson.

AS.212.699. Cultures of Criticism from the Classics to Foucault.
From fault-finding to the crossover of aesthetic and political judgment, criticism never loses sight of its medical cognates critical and crisis. This course examines the emergence and the transformations of critical judgment in the arts, culture and politics, from the early days of its collusion with French monarchical propaganda, to the critical genealogies of the Enlightenment, to the postrevolutionary critique of history, to Foucault's critique of practices of veridiction. Works by Perrault, Bayle, Diderot, Rousseau, Tocqueville, Cassirer, Koselleck, Derrida, Barthes, Bourdieu, Foucault. Taught in English; most texts available in translation, but knowledge of French recommended.
Instructor(s): E. Russo
Area: Humanities.
AS.212.705. Fictions d’espace: geopoetique du roman de langue francaise.
En quoi consiste et par quels moyens se construit l’espace dans les fictions litteraires ? Quelles fonctions y jouent les toponymes, les descriptions de lieux ou les trajectoires des personnages ? Quels contrats l’écrivain peut-il passer avec son lectorat à l’égard du statut des espaces traversés et décrits, qu’ils se fondent sur le « réel » ou qu’ils soient fabriqués de toutes pièces ? Seront abordées dans cette introduction à la géopoétique narrative des œuvres de Balzac, Maupassant, Giono, Gracq, Duras, Chamoiseau, Sony et Echenoz entre autres.
Instructor(s): D. Schilling
Area: Humanities
Writing Intensive.

AS.212.707. French Documentary Filmmaking.
Overview of the history of French documentary filmmaking featuring works by Cavalier, Depardon, Epstein, Malle, Marker, Painlevé, Philibert, Resnais, Rouch, Simon, Varda, and Vautier. Emphasis will be placed on the rhetorical functions of editing and on the relation forged among filmmakers, their subjects, and the public. Extensive weekly viewing is required.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.719. Enlightenment and Revolution.
Writing Equality: the French Revolution. Enlightenment authors whose work is relevant to the Revolution (Montesquieu, Rousseau, Condorcet, etc.), Revolutionary authors and orators, and 19th-century authors like Balzac and Stendhal or historians like Tocqueville and Michelet who use literary topics to come to terms with the Revolution.
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

Victor Hugo as a prominent figure in the Nineteenth Century France and in Europe, and in French Literature. Poetry, Novels, Theater, Essays, outstanding political involvement, we will examine all aspects of Hugo’s works and poetics, as action in History and Modern politics. Close reading of poems from Les Contemplations and La Légende des siècles, of Le Dernier jour d’un condamné and Les Travailleurs de la Mer, of Hernani, and of Châtiments and some political discourses.
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

AS.212.729. Realism: Balzac Stendhal Flaubert.
We will examine what Auerbach called « le grand réalisme », reading three notable Nineteenth Century novels: Balzac’s Illusions perdues, Stendhal’s Lucien Leuwen, Flaubert’s L’Éducation sentimentale. We will consider how a new narrative art and a new art of prose brought new ways of understanding society, history, and human life.
Instructor(s): J. Neefs
Area: Humanities
Writing Intensive.

What is personal memory? This course offers both an in-depth journey through Proust’s Recherche and a way of tracing major scientific questions about the formation of memory in connection with autobiography and medical history. The process of human remembering – with its counterpart, forgetting – has emerged over the last thirty years as an extraordinarily rich field of investigation as well as of creative endeavors in the arts. Poised between literature and science, this course offers both an in-depth introduction to Proust’s ground breaking modern work on human time, A la recherche du temps perdu, and an investigation into a modern history of memory (a history that unfolds in the nineteenth and early twentieth century, and has made a surprising return in our contemporary understanding of remembrance). That Proust’s petite madeleine should have turned, in recent years, into the magical token of autobiographical recollection and provided, at the same time, an immensely productive clinical and neuro-scientific model of how memory works serves as our point of departure. That human memory is an experience and not merely a biological function – its existence depending on language – will be our running thread. Proust’s book, filled with immensely learned and complex descriptions of mnemonic processes, serves as our case-study. Proust’s investigations into remembering reveal fascinating aspects of the 19th century advances into the psychology and nosography of memory. These will in turn prompt us to read his work in light of present controversies in scientific research, as for example on the construction of memory, on “body-memory,” the interface between cognition and emotion, and the mind/brain debate. As it prompts many questions on the relation between fiction and experience, this journey through major themes of Proust’s quest for memory will invite a broader reflection on the relation between literary and philosophical investigations. Requirements: Short oral presentation and final research paper. Taught in English, reading knowledge of French desirable but not required. Most readings are available in English. Required for this course are vol. I, V, VI of In Search of Lost Time in the 2003 Modern Library edition (ISBN 978-0-375-75154 – 1 and 4 and 7). For a copy of the syllabus, with a list of main recommended readings, available in mid-June, please write to e.ender@jhu.edu
Instructor(s): E. Ender
Area: Humanities.

Throughout his life Rousseau presented himself by turns as the citizen of a Republic, a stateless outcast, the resident of a vanishing homeland of the heart, and the focal point of an international conspiracy. He invented new foundations for political communities that could never be implemented or were severely misunderstood during the revolutionary Terror. The families he portrayed were both patriarchal and defiantly anti-normative. He affirmed his desire to belong and insisted on his irreducible difference; he extolled friendship and engineered breakups. Through readings of Rousseau’s major political, autobiographical and fictional works we shall examine how and why communities, personal identity and citizenship are alternately built and destroyed. Course open to undergraduates.
Instructor(s): E. Russo.
AS.212.743. Marcel Proust, Literature and Art.
Proust's great sequence of novels À la recherche du temps perdu is also a
text of the Novel and indeed of Art. A close reading of Du côté de
chez Swann, À l'ombre des jeunes filles en fleurs, La Prisonnière and
Le Temps retrouvé, will put this to the test. Required editions: Proust's
Du côté de chez Swann, Gallimard, Folio, À l'ombre des jeunes filles en
fleurs, Gallimard, Folio, La Prisonnière, Gallimard Folio, Le Temps retrouvé,
Gallimard, Folio, Contre Sainte-Beuve, Gallimard, Folio. The seminar
is open to advanced undergrads, with authorization of the instructor.
Recommended course background: At least 2 212.3xx courses
Instructor(s): J. Neefs; M. Fried
Area: Humanities.

AS.212.750. Récits de la marge : voix périphériques et subcultures.
Examen de romans et récits modernes et contemporains où la marge
(géographique, ethno-sociale, sexuée) apparaît comme un lieu de parole
spécifique. L'histoire longue de la figure du 'zonard' et du 'jeune de
banlieue' permettra d'interroger les processus de légitimation littéraire
et l'émergence de subcultures qui suscitent des postures esthétiques
novatrices. Textes de Begag, R. Camus, Charef, Chraïbi, Clébert, Collard,
Djaïdani, Queneau...
Instructor(s): D. Schilling
Area: Humanities
Writing Intensive.

AS.212.751. Ecrans franco-algériens: exotisme, révolution, indépendance
From exoticist features of the 1920s and 1930s and political works
of the 1960s, to family sagas and personal essays looking back on a
conflicted past from the standpoint of the new century, Algeria has
featured prominently in the French cinematographic imaginary. The
independent North African nation has likewise produced compelling
narratives that address the colonial legacy, the armed struggle for
independence and its aftermath. Addressing from both sides of the
Mediterranean an entangled political and cultural history, this course
places in critical context conflicting screen representations as well as
the institutions, individuals, and publics associated with them. The
course will be taught in English, however most course materials will be in
French. Undergraduates may take with permission of the instructor and
completion of AS.212.333 and AS.212.334. Graduate students need not
have completed the prerequisite courses.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.768. Norms and Forms of Academic Communication.
How to write a book review, an article, a conference paper; how to choose
the appropriate journal for publication.
Instructor(s): W. Anderson
Area: Humanities
Writing Intensive.

AS.212.774. Classiques de la Renaissance.
In this seminar we will read two great classics of Renaissance France:
Montaigne's Essais (1580, 1588, 1595), a hodge-podge of erudite and
powerfully introspective pieces of short prose; and Aubigné's epic poem
Les Tragi ques (1616), written in response to the ravages of the civil war
that torn France apart in the late sixteenth century. In addition to being
two masterpieces of French prose and poetry respectively, Montaigne's
Essais and Aubigné's Tragi ques share a number of common features,
such as rich intertextual ties with ancient literary models (from Plutarch,
Virgil and Seneca to the Bible) and a complex genetic history resulting
from multiple waves of textual revision, both in manuscript and in print.
A close reading of these works will therefore allow us to address broader
issues in literary theory and practice advanced techniques for textual
analysis. Open to advanced undergrads
Instructor(s): S. Miglietti
Area: Humanities.

AS.212.778. Les écritures contemporaines aux confins des genres
[Contemporary French Writing Beyond the Genres.
Le système des genres littéraires consacré par la vieille trinité "roman,
poésie, théâtre" ne fait plus la loi. Depuis les années 1980 ont émergé
en France des formes d'écriture hybrides s’appuyant sur le montage,
le recyclage, le catalogue ou encore la traduction intermédiale. Notre objet
sera d'interroger le statut de l'objet littéraire et de la figure de l'écrivain
dans un paysage artistico-média tique que caractérisent la surproduction
de textes et d'images et une certaine déréalisation du lien social.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.781. L'entre-deux-guerres en toutes lettres [French Literature
Between the Wars].
French literary culture between the wars (1919-1939) promoted the
novel as a forum for social comment and formal experimentation alike.
Questioning the psychological biases of the ‘roman d’analyse’ and
reacting to the collective tragedy of the Great War, interwar writers
updated the French language as well as narrative ‘technique’ in light of
emergent theories (psychoanalysis, Marxism, phenomenology). Readings
from Aragon, Breton, Céline, Cocteau, Colette, Dabit, Malraux, Némirovsky,
Queneau, and Simenon.
Instructor(s): D. Schilling
Area: Humanities.

AS.212.783. Diderot, Power and Representation.
A reading of some of Diderot’s major works in light of his struggle to
break out of imposed and self-imposed hierarchies of style and manner,
and to reframe or reform radically the relationship between ethics,
politics, sexuality, gender and the arts. Special emphasis on Diderot’s self-
representation as arbiter of taste, mediator and mentor.
Instructor(s): E. Russo
Area: Humanities
Writing Intensive.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his “true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors’ films, such as Petronius’ Satyricon, about the worshipping of the most important female deity in late antiquity, Isis, in light of Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian the most important female deity in late antiquity, Isis, in light of Fellini’s writing through which Nietzsche negotiates the conflict between intellectual integrity and aesthetic appeal, truth and illusion. 

Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities
Writing Intensive.

AS.213.205. Outsiders, outlaws, outcasts. 3.0 Credits.
This course offers an introduction to the close reading of German-language literature in the original. Discussing literary works that portray subjects in the grip of experiential crises, we will examine the ways in which literature can represent breakdowns in established forms of sense-making and the emergence of novel forms of selfhood. Attention will be paid to writers’ divergent responses to the challenges of modernity, including the French Revolution and its aftermath, the decline of religious authority, the rise of mercantile capitalism and the natural-scientific worldview, and the transformation of humans’ relations with nature. Taught in German.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.251. Freshman Seminar: Friedrich Nietzsche. 3.0 Credits.
Nietzsche’s writings continue to inform contemporary thinking about morality, psychology, art, culture, and politics. He started out as a daring scholar of Greek antiquity, went on first to advocate and then to repudiate a grand project of cultural renewal, and eventually transformed his authorial persona into the site of an unprecedented theoretical experiment in which the most cherished ideals of Western culture were turned against themselves. In discussing his works we will focus on such themes as the struggle to affirm life in the face of the challenge of nihilism, modernity, cultural decadence, selfhood and individualism, the status of nature, and the effort to overcome metaphysical thinking. Close attention will be paid to the strategies of writing through which Nietzsche negotiates the conflict between intellectual integrity and aesthetic appeal, truth and illusion.
Instructor(s): M. Dornbach
Area: Humanities.

AS.213.104. Freshman Seminar: Weimar on the Pacific: German Exile Culture in the United States. 3.0 Credits.
Freshmen seminar. After Hitler’s seizure of power in 1933, the number of artists and intellectuals who fled the Nazi regime soon rose into the thousands. Many of these German expatriates ultimately settled in the United States (e.g. Los Angeles, New York), where, simultaneously attracted and alienated by their new surroundings, they made a significant impact on American culture. The seminar will explore German Exile Culture in the U.S. in its broad variety spanning a spectrum from film to architecture, literature, and philosophy. Based on the aesthetic and conceptual specificities of the artifacts, class discussions will focus on the relations between art and politics, modernist and mass culture, art and capitalism, culture and democracy. The seminar will close with a look at postwar America and the McCarthy era, when European emigrants became the target of suspicion as left-wing intellectuals.
Instructor(s): A. Krauss
Area: Humanities.

AS.212.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors’ work, i.e., the “road beyond neorealism” for Fellini, and Almodóvar’s queerness as expressed in his “true-and-false testimonies.” We will then proceed to read and watch some historical documents around the constructions of some of these directors’ films, such as Petronius’ Satyricon, about the worshipping of the most important female deity in late antiquity, Isis, in light of Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Fellini’s Satyricon; and Thierry Jonquet’s novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi Almodóvar’s The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi

AS.212.784. Founding Myths: Literature, Historicity, and the Nation.
National identities often coalesce around historical events that acquire the status of “founding myths”. In this seminar, we will draw upon French history to discuss how literature and art (including cinema) can contribute to forging and crystallizing a series of identity-making myths. Cases to consider include the burning of Joan of Arc in 1431, the massacres of St Bartholomew’s Day (1572), and the beheading of Louis XVI in 1793. By analyzing representations of these and other historical moments through a wide range of media, we will seek to penetrate the complex relationship between literature, fiction, and historicity in making national identity—a relationship that proves particularly problematic in the case of violent and divisive events such as those mentioned above. Among the authors studied will be Villon, De Thou, D’Aubigné, Marlowe, Shakespeare, Voltaire, Michelet, Dumas, Hugo, Brecht, Anouilh, Camus.

AS.213.265. Panorama of German Thought. 3.0 Credits.
German thought is a broad intellectual tradition that encompasses works in an astonishing number of fields including philosophy, aesthetics, sociology, epistemology, psychology, anthropology, history, religious studies, and cultural analysis. The most prominent representatives of this tradition include Luther, Leibniz, Kant, Humboldt, Hegel, Nietzsche, Marx, Warburg, Freud, Benjamin, Kracauer, Weber, Simmel, Cassirer, Auerbach, Adorno, Arendt, Heidegger, and Luhmann. Indeed, current approaches to understanding cultural, historical, and social phenomena as well as literary and artistic forms would not have been possible without the German intellectual tradition which, beginning with the Enlightenment, emphasized the role of the subject in constituting objects of knowledge and experience. This survey course will highlight important topics in German Thought, which may include the subject, consciousness and unconsciousness, Bildung and the idea of the university, the sublime and the uncanny, irony, hermeneutics and translation, the desire for knowledge, tragedy and repetition, civilization, symbolic forms and medial reproduction, memory, and authority in a historical scope. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.270. Die Erfindung der Moderne. 3.0 Credits.
Taught in German. An introduction to key conceptions of modernity elaborated in the German-language cultural context. We consider the rise of historical awareness and the question of whether history has a purpose, modernity’s difference from ancient and medieval times, secularization and the crisis of meaning, the role of intellectual reflection and subjectivity, the relation between cultural production, political power, and economic processes. Excerpts in the original German from works by Kant, Schiller, Novalis, Hegel, Heine, Marx, Nietzsche, Weber, Benjamin, Heidegger
Prerequisites: AS.210.362 or placement exam.
Instructor(s): M. Dornbach
Area: Humanities.

AS.213.303. Mini-Term: Feminist and Queer Theory. Past and Present. 2.0 Credits.
This course familiarizes participants with central texts in contemporary feminist and queer theory. We will read, discuss and engage with selections by Judith Butler, Gayatri Spivak, Jack Halberstam, Maria Lugones and Claudia Rankine. Many of these theorists, directly or indirectly, refer to philosophic concepts such as those addressed by the German Jewish thinker Walter Benjamin. We will therefore also examine a few philosophic echoes of these contemporary feminist and queer voices in 20th century German philosophy.
Instructor(s): E. Strowick; M. Nitis
Area: Humanities.

AS.213.304. German Aesthetic Thought. 3.0 Credits.
Central to modernity is the idea that certain perceptual experiences are worth having for their own sake, even if they do not directly serve any moral, political or cognitive aims. Aesthetics emerged in the eighteenth century as a theory of such experiences, and among them especially of the beautiful and the sublime. It soon became increasingly concerned with questions regarding the significance of art as a privileged realm of human production and experience. In the German-language intellectual lineage that begins with Kant, aesthetics moved from the margins of theoretical attention to its very center, where it could engage with some of the most pressing dilemmas of modernity. We read excerpts from relevant theoretical texts (Kant, Schiller, the early Romantics, Hegel) as well as texts that perform model cases of aesthetic reflection in relation to concrete works of art (Lessing, Kierkegaard, Nietzsche, Benjamin, Adorno).
Instructor(s): M. Dornbach
Area: Humanities.

AS.213.305. Contemporary German Film. 3.0 Credits.
After almost a quarter century of neglect, German cinema is on the map again. The many awards German films have been granted over the last 15 years speak to the renaissance of German Cinema since 2000. Among these movies are Florian Henckel von Donnersmarck's The Lives of Others (Academy Award for Best Foreign Language Film, 2006), Caroline Link's Nowhere in Africa (Academy Award for Best Foreign Language Film, 2002), Fatih Akin's Head-On (Golden Bear at the Berlin International Film Festival, 2004; European Film Award 2004), Oliver Hirschbiegel's Downfall (nominated for Academy Award for Best Foreign Language Film, 2004) or Wolfgang Becker's Goodbye, Lenin! (European Film Award, 2003).
Nazi Germany, the Stasi, or the Reunification are prominent topics of this internationally acclaimed Contemporary German Cinema. Parallel to these mainstream productions, an aesthetically far more adventurous cinema has developed known as “Berlin School” or “Nouvelle Vague Allemande”. Directors associated with the Berlin School are Christian Petzold, Angela Schanelec, Christoph Hochhäusler or Valeska Grisebach. Dissecting the everyday reality of post-wall Germany, this ‘counter-cinema’ draws on the New German Cinema of the 1970s (among others) to develop radical notions of realism and challenge narrative conventions. This course will give a survey on German Film since 2000 – discussing the historical and cultural context of selected movies as well as analyzing aesthetic strategies and concepts of realism in Contemporary German Cinema. Taught in German.
Instructor(s): E. Strowick
Area: Humanities.

AS.213.308. Schweigen in der Familie. 3.0 Credits.
We will study the psychic afterlives of involvements in WW1, National Socialism and the state security service of the GDR. In particular, we will focus on (auto-)biographical and documentary-film examinations of perpetrators in the family. Within the family, these stories are often shrouded in silence but nevertheless handed down across generations in powerful, less-than-explicit, and often distorted ways. Drawing on philosophy and psychoanalysis, we will discuss how the need for silence meets the need to hear and to talk. Recommended Course Background: AS.210.362.
Instructor(s): K. Pahl
Area: Humanities.
AS.213.310. Classic German Theater. 3.0 Credits.
Taught in German. In this seminar we will read some of the most important plays of German literature, by Lessing, Goethe, Schiller, Kleist, and Büchner. We will explore questions about the role of the theater toward the education of mankind in the spirit of the enlightenment. We will examine how tragedy is reconfigured around the context of the bourgeois family. We will study historical practices of stage production as well as modern filmic and theatrical productions. Finally, we will prepare an informal staging of a play.
Prerequisites: AS.210.361
Instructor(s): K. Pahl.

AS.213.313. Heidegger’s “Being and Time” and “Rectify”. 3.0 Credits.
This course will introduce students to Heidegger’s seminal work as seen through the lens of the TV series Rectify, which considers what it means to be “thrown” into the world and how we construct a meaningful horizon for our experiences. We will explore some of the fundamental concepts in Being and Time, including care, projection, fallenness, affect and time, and being-onto-death, and consider how these same issues are taken up in Rectify, which as a TV show has to develop its own visual vocabulary to explore the structure and nature of being in the world. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.318. The Making of Modern Gender. 3.0 Credits.
Taught in English. Gender as we know it is not timeless. Today, gender roles and the assumption that there are only two genders are diligently contested and debated. With the binary gender system thus perhaps nearing its end, we might wonder if it had a beginning. In fact, the idea that there are two sexes and that they not only assume different roles in society but also exhibit different character traits, has emerged historically around 1800. Early German Romanticism played a seminal role in the making of modern gender and sexuality. For the first time, woman was considered not a lesser version of man, but a different being with a value of her own. The idea of gender complementation emerged, and this idea, in turn, put more pressure than ever on heterosexuality. In this course, we will explore the role of literature and the other arts in the making and unmaking of gender.
Instructor(s): K. Pahl
Area: Humanities.

This course provides students with an introduction to foundational texts in the history of political thought. We will explore major concepts such as reason, right, and freedom. Students can expect to gain familiarity with works that have proven immensely influential in modern Europe and beyond, but will also be expected to consider ways in which such thinking has relevance for today’s world. Participation in discussions, and two short papers dealing directly with the ideas of two different thinkers will be required.
Area: Humanities.

AS.213.321. Bodies and Pleasures. 3.0 Credits.
Taught in English. This course traces a literary history of sexuality from the Middle Ages to contemporary women’s writing. We will analyze how sexual pleasure changed over time. In particular, we will discuss what role literature plays in the reproduction and transformation of bodily pleasures. The course explores how the pleasures of bodies are imagined in and through literature, but also whether words are bodies that give pleasure and perhaps even have their own pleasures. Authors discussed will include Boccaccio, Cleland, Rousseau, Schlegel, Kleist, Hoffmann, Novalis, Arnim, Büchner, Freund, Rilke, Kafka, Rich, Foucault, Kristeva, Cixous, Giddens, and Winterson.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.322. Museums and Jews, Jews in Museums. 3.0 Credits.
This course will examine the presence of Jews in museums. We will consider the history of the exhibition and collection of Jewish material culture in museums from the 19th century to the present day. Our main task will be to identify the various museological traditions that engage Jewish identity, including the collection of art and antiquities, ethnographic exhibitions, history museums, and Holocaust museums. Some of the questions we will ask include: how do museums shape identity? what is the relationship between the scholarly premises of many museums and their popular reception? and, centrally, what is the relationship between Jewish museums and museums of the Holocaust?
Instructor(s): S. Spinner
Area: Humanities.

AS.213.324. What is Jewish Culture?. 3.0 Credits.
We talk about Jewish literature, music, and art—but can a book, or a song, or a painting be Jewish? We will examine the premises of this question and the many answers that have been formulated in response to it focusing on modern European (and some American) culture. Jewishness as it relates to human identity has been conceived of as related to religion, ethnicity, race, nation, language, geography, and politics. But these keywords have also been used to engage with the question of the Jewish identity not of a person, but of a cultural product. To understand the implications of calling, say, a book Jewish, we will examine the history of the concept of culture and its emergence in the context of the formation of modern Jewish identity. We will examine theoretical and literary texts originally written in German, Yiddish, Hebrew, and English, as well as painting, photography, film, and architecture from Europe, Israel and the Americas. We will aim to arrive at an understanding of the ways that the idea of culture intersects with the formation of Jewish identity in modernity. All readings will be in English.
Instructor(s): S. Spinner
Area: Humanities.
AS.213.329. Berlin Ost-Ost-West. 3.0 Credits.
Today’s Berlin is a nerve center with strong impulses from Russia, Ukraine, Turkey, Vietnam, India, and other Eastern countries. Through contemporary literature and film, we will explore Berlin’s role in a globalized world: how Berliners resist, embrace, or simply describe the influx of people from Eastern countries; how West-Berliners have re-orientated themselves after the fall of the wall; how the majority adapts to the minorities; and how some migrant authors rework the German language by experimenting with translanguaging. By way of literary and filmic analysis, we will inquire if borders or limits can play a productive role; how the history of the divided city figures in the imaginary of immigrant authors; and how, for example, Turkish-German or Russian-German writers inscribe the tensions between East- and West-Berlin into a larger discourse on global East-West relations. Recommended Course Background: AS.210.362
Instructor(s): K. Pahl.

AS.213.330. “What is an Image?” - Technology, Art and Visual Culture around 1900. 3.0 Credits.
Taught in English. This course is an interdisciplinary introduction to the theory of the image with an emphasis on its material and conceptual transformations in the modern period.
Instructor(s): J. Schade
Area: Humanities.

AS.213.334. Kafka. 3.0 Credits.
Franz Kafka is one of the most important — and one of the most challenging — writers of the twentieth century. This course will investigate why both are true. We will analyze a wide range of his works and learn "how" to read Kafka. We will become familiar with his characteristic subjects: law, family, power, institutions; modernity. We will also attempt to become familiar with his characteristic forms and styles and attempt, in the process, to find out what makes Kafka "kafkaesque." We will also consider his impact on art, literature, film, and thought from his time to the present. All readings in English. German majors/minors should enroll in section 02.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.345. Healing and Health Beyond Theology. 3.0 Credits.
Nietzsche argues in The Gay Science that to bring about a new day we need a new health—“great health,” as he calls it, that enables us to surmount the sickness of our age and transcend ourselves. However much of an iconoclast Nietzsche considered himself to be, his idea of “great health” fits squarely within a theological tradition that claims that the condition for becoming a member of the ecclesia is faith, which cleanses the individual of sin and restores him to his original state. This course will examine the theological inheritance that has and continues to shape the notion of sickness and health dominant even in secular contexts, where well-being would seem to be regarded as a condition of the body rather than of the spirit. Reading to include works by Nietzsche, Kierkegaard, Augustine, Tillich, Heidegger, Scholem, Tolstoy, Büchner, Flaubert, and Kafka. Taught in English.
Instructor(s): R. Tobias
Area: Humanities
Writing Intensive.

AS.213.346. Uncanny Realism. 3.0 Credits.
Dominant in the second half of the 19th century, realism was a literary movement whose representatives devoted close attention to the quotidian particulars of a social world caught up in the transformations of modernity. Its German-language variants were often intensely local, portraying regional forms of life (in Westphalia, the Austrian and Swiss countryside, Friisa, Berlin and Brandenburg) with a richness of detail approaching that of ethnographic descriptions. Far from confining themselves to giving literal-minded inventories of observable facts, these authors portrayed social worlds haunted by intangible powers: ghosts, historical memories, and vestiges of religious experience in an increasingly secular world. We will explore this duality of local and spectral features in the works of Droste-Hülshoff, Stifter, Keller, Storm, and Fontane.
Prerequisites: AS.210.362 or equivalent
Instructor(s): M. Dornbach
Area: Humanities.

AS.213.348. Picturing Jews: Representing Jewish Identity in Modern Art, Film & Literature. 3.0 Credits.
This course will consider the different ways Jewish identity has been represented in the 19th and 20th centuries, focusing primarily on Central and Eastern Europe. Race, nationalism, religion, language, geography, politics—all helped shape different ways of understanding just what it meant to be a Jew, and all found expression in art and literature by both Jews and non-Jews. Looking at texts originally written in German, Yiddish, and Hebrew, including prose, poetry, journalism and drama, as well as painting, photography, graphic design, architecture, and film we will gain an understanding of the range of ways that Jewish identity could be understood and expressed as well as of the ideological stakes and historical contexts of such representations. Writers and artists examined will include Chagall, Kafka, Sholem Aleichem, and Bialik. All readings will be in translation.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.349. Weimar Cinema: The Golden Age of German Film. 3.0 Credits.
Taught in German. German cinema of the 1920s is regarded as one of the "golden ages" of world cinema. The course centers on close readings of works which belong to the canon of German film, including The Cabinet of Dr. Caligari, Nosferatu, Metropolis, The Blue Angel, The Last Laugh, and M. Focusing on the question of cinema and modernity, we will discuss topics like modern aesthetics and visual perception; Expressionism in film; technology and the metropolis; the emergence of film genres (e.g. horror film, film noir, science-fiction film, and melodrama). The film analyses will be accompanied by a discussion of the varied scholarly approaches to Weimar Cinema.
Prerequisites: AS.210.361 AND AS.210.362
Instructor(s): E. Strowick.

AS.213.350. Wie wir begehren. 3.0 Credits.
Taught in German. Human desire and sexuality prove of vital concern in German-speaking countries: from the invention by German sexologists of much of the terminology still in use today to the so-called sexual revolution in the late sixties to new perspectives on the topic today. We will study film, fiction and non-fiction. Recommended Background: AS.210.362
Instructor(s): K. Pahl
Area: Humanities.
AS.213.354. Introduction to German Poetry. 3.0 Credits.
This class will introduce students to German poetry from the eighteenth to the twentieth century. We will read selected poems by Goethe, Eichendorff, Mörike, George, Hofmannsthal, Rilke, Trakl, Celan, and Bachmann. In addition we will read several theoretical essays by poets and literary critics alike which examine the lyric form and the curious world that poetry constructs. Readings and discussion in German.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.356. The Holocaust in Film and Literature. 3.0 Credits.
How has the Holocaust been represented in literature and film? Are there special challenges posed by genocide to the traditions of visual and literary representation? Where does the Holocaust fit in to the array of concerns that the visual arts and literature express? And where do art and literature fit in to the commemoration of communal tragedy and the working through of individual trauma entailed by thinking about and representing the Holocaust? These questions will guide our consideration of a range of texts — nonfiction, novels, poetry — in Yiddish, German, English, French and other languages (including works by Elie Wiesel, Primo Levi, and Isaac Bashevis Singer), as well as films from French documentaries to Hollywood blockbusters (including films by Alain Resnais, Claude Lanzmann, and Quentin Tarantino). All readings in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.359. Kleist. 3.0 Credits.
Heinrich von Kleist was one of the most intriguing literary figures of the early nineteenth century in Germany. Neither Classicist nor Romanticist, he developed a unique style that combines such different elements as complex rhythmicality, drastic imagery, and philosophical precision. His novellas, plays, and nonfiction prose explore questions of gender, colonialism, the tragic, and of innocence and double dealing. Among the texts we will read together are "The Betrothal in St. Domingo" (Kleist's literary response to the Haitian revolution), "Penthesilea" (the play about lovers who can find each other only in war ends in a splatter scene), and "Marquise of O" (the story of a woman whose father rejects her because she finds herself pregnant, and yet she has no memory of the sexual intercourse that must have led to her current situation). Language of Instruction: German
Prerequisites: Pre-req: AS.210.362
Instructor(s): K. Pahl
Area: Humanities.

AS.213.361. The Holocaust in Film and Literature. 3.0 Credits.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.369. Dada's Ideologies: Literature, Art, & Politics. 3.0 Credits.
This course will examine the literary and political theories implied in, and encountered by, Dadaist works and praxes. Particular attention will be paid to Dadaist confrontations with the growth of modern mass media, the politics of World War I, and consumerist capitalism in the wake of Taylorism and Fordism. Readings include major Dadaists as well as Althusser, Benjamin, Debord, Gramsci, Irigaray, Lukács, Marx, Saussure, among others.
Instructor(s): J. Pelcher
Area: Humanities.

AS.213.371. Kafka and the Kafkaesque. 3.0 Credits.
Franz Kafka is regarded as one of the most influential writers of the 20th century. To this day, his lucid and subtle prose continues to intrigue literary critics, writers of fiction, and readers with observations that create a fictive world at once strange and familiar, hopelessly tragic and hilariously comical. The related term "kafkaesque" refers to the unique character of a literary universe that is perceived as both eerie and resistant to any classification. In this course, we will analyze texts by Franz Kafka from a variety of perspectives: as investigations into modern institutions and bureaucracy, law, punishment and family structures. Special emphasis will be given to the exploration of Kafka's poetic practice, i.e. to the material, rhetorical and performative quality of his writing. In addition to reading a selection of Kafka's prose and analyzing several film adaptations, we will also discuss some influential commentaries on his work and discuss Kafka's impact on the conceptualization of modernity. Students will gain an in-depth understanding of Kafka's oeuvre while developing skills in critical analysis and literary close reading.
Instructor(s): A. Krauss
Area: Humanities.

AS.213.373. Sex und Macht. 3.0 Credits.
We will discuss postwar and contemporary literature and films that grapple with the effect of unequal power structures on sexual relations. Taught in German.
Instructor(s): K. Pahl
Area: Humanities.
AS.213.374. Existentialism in Literature and Philosophy. 3.0 Credits.
This course explores the themes of existentialism, including the meaning of existence, the nature of the self, authenticity and inauthenticity, the inescapability of death, the experience of time, anxiety, freedom and responsibility to others, in literary and philosophical works. It will be examined why these philosophical ideas often seem to demand literary expression, or bear a close relation to literary works. Readings may include writings by Kierkegaard, Nietzsche, Tolstoy, Heidegger, Rilke, Kafka, Sartre, de Beauvoir, and Camus, among others. Course will be taught by the Kurrelmeyer Chair in German. Taught in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.375. Landscapes in Crisis: Perspectives of Modern Subjectivity. 3.0 Credits.
In crisis, groups and individuals face economical, environmental, physical or political necessities creating a critical status that ultimately hints towards a loss of something valuable: health, freedom, security, wealth, ... One might say, in a crisis, the outlook is grim. This seminar will focus on the one who is looking -- the subject that produces the outlook and that we consider a critical thinker. The critical thinker is a rather new phenomenon, it is strongly tied to a freedom of thought that allegedly allows us to paint and frame our own worldview. We will work with the emergence and variations of landscape from 14th century painting to late 20th century film, with an emphasis on historical turning points such as the French Revolution, the two world wars and the fall of the 'iron curtain' that led to today's world order. Writers, directors and painters will include, among others: Peter Brueghel the Older, Jean Jacques Rousseau, Edgar Allan Poe, John Dos Passos, Peter Weiss, Michel Foucault, Werner Herzog, Wim Wenders. All media and discussions in English.
Instructor(s): M. Heim
Area: Humanities.

AS.213.376. Art in Literature. 3.0 Credits.
Discussion in German. Since the Enlightenment, works of art have played a prominent role in literary texts, providing an occasion for texts to reflect on their status as art and to explore the possibilities and challenges unique to aesthetics. In this course we will examine novellas and poems that refer to paintings or other works of art to illuminate the nature of art and to reflect on phenomena that have no place in any other discourse. Readings to include works by Lessing, Eichendorff, Storm, Mörike, Adrian, Freud, and Hofmannsthal.
Prerequisites: AS.210.361 AND AS.210.362
Instructor(s): R. Tobias
Area: Humanities.

AS.213.377. Jewish Travel Literature. 3.0 Credits.
Exile; Diaspora; Wandering; Refugee; Immigrant—these are all keywords that have been closely associated with Jews and the Jewish experience. What binds them all is movement, whether individual or communal, voluntary or involuntary. This course will examine the connection between movement and Jewish culture and history through the various forms of Jewish travel writing. In looking at depictions of travel both fictional and historical from the Middle Ages to the 20th century we will revisit and interrogate many of these keywords to understand the ways they have been deployed to understand Jewish identity in literature and beyond. A central point of consideration will be the role of travel in shaping conceptions of Jewish identity as well as Jewish literature in the modern period. We will examine novels, short stories, reportage, and travelogues describing real and imagined journeys from and to Asia, the Middle East, Europe, and America. All readings will be in English translation, primarily from sources in Yiddish, Hebrew, and German.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.378. Major City, Minor Literature? Berlin in German–Jewish and Yiddish Literature. 3.0 Credits.
Between the two World Wars, a period of intense artistic and intellectual vitality, Berlin was an international center for theater, visual arts, and literature. Many important Yiddish-language writers were drawn to Berlin and, together with their German-language counterparts, produced a body of literature that explores issues of modernity and identity. By comparing works in Yiddish and German, we will learn about inter-War Berlin’s cultural diversity and richness, while also gaining insight into the particular issues of writing about Jewish identity in the 1920s, and the implications of writing in a minor language (Yiddish). We will read works by authors including Joseph Roth and Alfred Döblin in German, and Moyshe Kulbak and David Bergelson in Yiddish. All texts will be in translation. Some questions we will explore include: • What is a minority/minor language or literature? • How did German and Yiddish interact in cultural and social spheres? • Can texts in different languages comprise a single body of literature? • What did it mean to be German and what did it mean to be Jewish? • Are assimilation and hybridity useful concepts? • Is there such a thing as Jewish modernism? • How did literature of the period respond to the rise of the Nazi party and the intensification of antisemitism?
Instructor(s): S. Spinner
Area: Humanities.
AS.213.407. Museums and Identity. 3.0 Credits.
This course will explore the phenomenon of the “identity” museum through case studies involving Jewish and Holocaust museums around the world. The museum boom of the last half-century has centered in large part around museums dedicated to the culture and history of particular minority groups; recent notable (and relatively local) examples include the brand new Museum of African American History and Culture in Washington and the National Museum of American Jewish History in Philadelphia. Our understanding of the contemporary theory and practice of such museums will be based on an examination of the history of the various museological traditions that engage Jewish identity from the 19th century to the present, including the collection and display of art and antiquities, ethnographic exhibitions, history museums, and Holocaust museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. We will explore these topics through historical documents, theoretical readings, and case studies including visits to nearby museums. All readings in English.
Instructor(s): S. Spinner
Area: Humanities.

AS.213.433. Fictional Autobiographies and Autobiographical Fiction. 3.0 Credits.
This course will examine fictional works that pose as memoirs or autobiographies, which is not a genre unique to the twentieth century but which rose to prominence in the modern period as a result of historical developments. We will consider the aesthetic presuppositions that gave rise to the novel and culminated in the great realist narratives of the nineteenth century that claimed to do nothing less than represent real life situations. Novels such as Robert Walser’s Jakob von Gunten, Thomas Mann’s Felix Krull, Bernhard’s Aulsebschung, Beckett’s Malone Dies, and Coetzee’s Waiting for the Barbarians call these assumptions into question by focusing on the inner life of a hero who lives only in writing and writes to live. Fictional autobiographies provide a fertile ground for reconsidering such issues as what it means to tell a story and whether life takes the form of a story, which have gone unaddressed in narrative theory.

Instructor(s): A. Krauss; E. Strowick; K. Pahl; R. Tobias.

AS.213.613. Hermeneutics around 1800 (from Hamann to Büchner).
With Schleiermacher, hermeneutics defined itself as a universal theory of understanding which no longer focuses only on biblical and juridical exegeses but on linguistic utterances in general. It thus became the matrix for subsequent Geisteswissenschaften and paved the way for various critical approaches which even today remain highly influential. The course examines the genesis of modern hermeneutics through the lens of its philological and philosophical precursors, contemporary commentators and literary authors. Key issues will be the underlying concepts of textuality and language, historicity and the subject. Authors include: Chladenius, Meier, Hamann, Herder, Kant, Schlegel, Schleiermacher, Goethe, Rahel Levin Varnhagen, Jean Paul, Büchner.
Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.

AS.213.616. The Aesthetic Discourse of Modernity.
When, in 1985, Jürgen Habermas published his lectures on The Aesthetic Discourse of Modernity, he pursued a double aim. He offered a critique of French Theory while at the same time providing a foundation for a normative category of modernity in the tradition of Hegel. Curiously there is one subject he does not touch on, though it seems necessary for a sufficient understanding of modernity: the realm of art and literature. This course will develop a critique of Habermas’ normative notion of modernity through re-readings of texts by Nietzsche, Benjamin, Horkheimer/Adorno, Derrida, Bataille and Foucault to elaborate an alternative category of aesthetic modernity. Taught in English. Reading knowledge of German and French is not required, but recommended.
Instructor(s): A. Geisenhanslueke
Area: Humanities.

The seminar will investigate when and in which ways theatrical space was interpreted as a shelter for the fleeing. Starting with Greek tragedy and ending with Elfriede Jelinek’s postdramatical text “Die Schutzflehenden” we will discuss the relations between the institutions of theater and drama and political concepts of Asylum from a historical perspective. We will proceed on the basis of the idea that the stage offers temporary protection where refugees stop their journey, argue their case and expect a decision. Reading Aeschylus, Euripides, Goethe, Brecht and Jelinek, we will analyze different theatrical set ups and procedures in which the precarious state of the fleeing is and has been negotiated on stage. We will also deal with recent theater projects which open the stage to refugees and give them a platform outside Immigration offices. Reading Benjamin and Florens Christian Rang we will also discuss how the relationship of Asylum and theater is reflected in modern theory of tragedy.
Instructor(s): E. Vogel
Area: Humanities.

AS.213.635. Anthropology and Modernism.
This course will examine the reciprocal relationship between modernism and anthropology in Western and Central Europe, including examples from French, German, and Yiddish contexts. We will focus on the presence of anthropological and ethnographic discourses within various registers of modernist thought, literature, and visual culture, with special attention to visual and literary primitivism. We will also consider attempts by ethnographers to shape their practice in a modernist mold. Our central concerns will include the attempt to create a modernist poetics grounded in ethnography and the relationship between anthropological theory and ethnographic praxis in the modernist understanding of “culture.”
Instructor(s): S. Spinner
Area: Humanities.
AS.213.636. Hölderlin and His Readers.
Hölderlin’s works develop vast intellectual constructions in a poetic language of striking rhythmical power, while remaining anxiously concerned with the conditions of lyric utterance. Although his work responded to the literary and philosophically currents as well as the revolutionary politics and Philhellenism of his time, it proved untimely. Yet the same severe features that alienated contemporaries would lead such 20th-century poets as George, Rilke, and Celan to celebrate and emulate Hölderlin. We will examine how Hölderlin’s early contributions to post-Kantian idealism paved the way for his poetic project, as well as his odes and elegies, and some of the poetological writings. The late hymns will be discussed in detail against the backdrop of Hölderlin’s engagement with ancient tragedy and his Empedocles project. Since Hölderlin’s works have elicited literary criticism of the highest order as well as influential reflections on the aims and challenges of literary interpretation, our readings of Hölderlin will proceed in dialogue with such critical responses.
Instructor(s): M. Dornbach
Area: Humanities
Writing Intensive.

AS.213.650. Poetic Thought.
This course will examine essays and poems by Goethe, Hölderlin, and Rilke with an eye toward the ways in which their work addresses issues central to German Idealism and modern German thought. These include the relation of subject to object; the problem of the representation of the whole; the reconciliation of science and art; and the role of consciousness in the construction of the world. Readings to include texts by Goethe, Hölderlin, and Rilke with commentary by Heidegger, Gadamer, Henrich, Husserl, Benjamin, Szondi, and Allemann.
Instructor(s): E. Forster; R. Tobias
Area: Humanities.

AS.213.656. Thinking of the Environment.
Few concepts are more anthropocentric than the environment. Although the term is usually invoked to describe what is other than the human being, it places the human at the center of the universe by defining nature as the world surrounding him. This course will examine several literary and philosophical texts from Novalis to Celan that approach nature as a sphere alien to thought, which can never be known except through the rhetorical device of prosopopoeia, which gives face to what is inhuman. Readings to include works by Novalis, Schlegel, Tieck, Stifter, Rilke, and Celan.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.664. Dirt.
Near the outset of Büchner’s “Lenz,” the protagonist seeks to impress himself into the earth, “[E]r dehnte sich aus und lag über der Erde, er wühlte sich in das All hinein, es war eine Lust, die ihm wehe tat.” This course will examine the desire to merge with the surface of the earth and to become a planetary body, at once utterly material and utterly ethereal. The earth’s crust will emerge as the interface between cosmic forces and human existence, the atmosphere and the pedosphere. We will consider how history, biography, and geological time intersect in dirt, or what William Bryant Logan has recently called the “ecstatic skin of the earth,” in texts by Goethe, Alexander von Humboldt, Novalis, Nietzsche, Büchner, Walser, Rilke, Kafka, and Sebald.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.666. “To be continued” - Seriality in Literature and Other Media.
Taught in German. By ending with the words "(To be continued)" ["(Ist fortzusetzen)"], Goethe’s Wilhem Meisters Wanderjahre not only reflects on the open form of the modern novel but also points toward serialized formats of fiction as they emerge in the 19th century due to advances in printing technologies. The publication of fiction in periodical installations in magazines or newspapers brings about the development of new genres (serialized novel/Feuilletonroman) along with specific serial narrative techniques. The cliffhanger e.g. – although invented earlier – becomes a prominent technique to create suspense. The course analyzes seriality with respect to narrative forms and genres across various media (literature, theater, film, TV) from the 19th century to the present. It further discusses serial aesthetics, seriality in structuralist and poststructuralist theory as well as the ambivalent status of seriality in the arts between avantgarde and popular culture. The course material will include: Stifter, Fontane, excerpts from the magazine “Die Gartenlaube”, Wagner, Freud, Kafka, Lévi-Strauss, Deleuze, Eco, Iser, “The Perils of Pauline” (serial, 1914), “Copycat” (Jon Amiel, 1995), “Twin Peaks” and current US-American TV series.
Instructor(s): E. Strowick
Area: Humanities
Writing Intensive.

AS.213.668. Kleist.
This seminar will explore the narrative, dramatic, theoretical and quasi-journalistic work of Heinrich von Kleist along two lines of inquiry. We will read his literary experiments as reactions to the major shift in the sex-gender system and the new deployment of sexuality in the eighteenth century. We will discuss his unique role in the production, communication and interpretation of feeling across narrative and theater.
Instructor(s): K. Pahl.

AS.213.670. Theories of the Human in German Modernity.
Fifty years ago Michel Foucault advanced the influential argument that modern thought foundered on the circular undertaking to ground the possibility of human knowledge in actual knowledge of the human being. We survey various conceptions of the human developed in German modernity with a view to Foucault’s diagnosis. Against the background of pre-modern and early modern conceptions of the human, we focus on the tradition of anthropological thinking inaugurated by Herder, including spin-offs of German idealism in the writings of the later Schelling, Schopenhauer, and Marx. We consider the rivalry between twentieth-century philosophical anthropology (Plessner) and Heideggerian fundamental ontology, Hans Jonas’ phenomenology of the human, as well as recent disputes regarding the significance of the human standpoint.
Instructor(s): M. Dornbach
Area: Humanities.

AS.213.677. Impossible Intimacy.
Reading Ingeborg Bachmann and Elfriede Jelinek, we will analyze the condition of heterosexuality after fascism. “Fascism lies at the root of the relationship between a man and a woman,” Bachmann argues. And Jelinek continues to uncover structures of sexism, sadism and submission in the German language.
Instructor(s): K. Pahl
Area: Humanities
Writing Intensive.
AS.213.685. Theories of Translation (1530/1930).
Taught in German. It is one of the topoi of literary studies that translation presupposes interpretation and is thus bound to certain discursive premises. To investigate specifically how this connection between translation and interpretation has developed historically and is embedded in concerns of philosophy of language, the seminar reconstructs concepts (politics) of translation from Luther to Benjamin and Buber-Rosenzweig. One of the focal points is the emergence of a modern theory of representation between 1730 and 1820 (Gottsched, Venzky, Hamann, Herder, Schleiermacher), the effects of which are staged with the aid of different Shakespeare translations (Wieland, Lenz, Schlegel).
Finally, by including more recent contributions on the milieu of deconstruction/post-structuralism, the seminar seeks to reconsider interpretation from the standpoint of translation, and translation from that of interpretation.
Instructor(s): A. Krauss
Area: Humanities
Writing Intensive.

AS.213.689. Creativity.
Modernity requires creativity of the artist. But what does this mean? Creativity has been thought of as a gift, but also as a technique or an attitude that can be developed. It thus moves between the mysterious, the mechanical, and the relational. While creativity was of little importance for the normative poetics (Regelpoetik) of the Baroque, the Enlightenment demanded an emancipation from external rules, which led to the apotheosis of human creativity in the idea of the genius. Countering overly idealistic notions of autonomy and human artistic agency, others cultivated practices that acknowledge and even amplify the role of chance. This seminar will focus on the eighteenth and early nineteenth centuries and invite contributions on more recent poetics from its participants. Particular emphasis will be placed on interrogating the roles of the imagination, phantasy, and visualization in the creative process.
Instructor(s): K. Pahl
Area: Humanities

AS.213.701. The Frankfurt School.
Founded in the interwar years, the Frankfurt School gave rise to an array of reflections on modernity, emancipation, and ideology that have continued to inform critical theory and are now eliciting renewed interest. In this seminar we focus on various models developed by Frankfurt School theorists for approaching cultural phenomena. Following a brief review of Hegelian and Marxist legacies at work in the Frankfurt School, we consider relevant works by Walter Benjamin, Siegfried Kracauer, Max Horkheimer, and Theodor W. Adorno.
Instructor(s): M. Dornbach.

AS.213.705. Hegel’s Phenomenology of Spirit.
We will study key passages of The Phenomenology of Spirit from a queer-feminist perspective and engage with some of the feminist scholarship on Hegel.
Instructor(s): K. Pahl
Area: Humanities.

AS.213.706. Literature, Museums, Mimesis.
Can museums be literary? Can literature be museal? Throughout the twentieth century and into the present, the museum has repeatedly challenged models of representation, none more so than mimesis, both as aesthetic theory and representational practice. This has been a role played by museums, both in their traditional guises as repositories of objects and — as André Malraux presciently had it — as “imaginary museums.” This course will examine the larger disruption of mimesis, and more specifically literary realism, through the particular catalyzing effects of museums. We will deal with two primary museological phenomena: first, the introduction of the “primitive other” into European modernity via ethnographic museums; second, the museological commemoration and representation of trauma, specifically of the Holocaust. Special attention will be paid to discursive, formal, and rhetorical locations of overlap between the museal and the literary, including ekphrasis, linearity, volume, and collection. Readings will include fiction, poetry, and theoretical texts, as well as secondary sources examining particular museums and exhibitions. All texts in English.
Instructor(s): S. Spinner
Area: Humanities
Writing Intensive.

Taught in German. Categories such as the uncanny, motion, or seriality are not easily associates with German Realism. This course takes a fresh look at texts by Theodor Fontane, Adalbert Stifter, and Theodor Storm in order to explore the thesis of the modernity of Realism. We will analyze framing techniques, temporal structures (e.g. boredom or belatedness) as well as the interrelation between realist poetics and other discourses and media by which realist texts produce reality as perceived reality. The aesthetics and epistemology of Realism will further be discussed with respect to Erich Auerbach’s “Mimesis” and Roland Barthes’ “reality effect.”
Instructor(s): E. Strowick
Area: Humanities.

This course takes as its point of departure Klopstock’s efforts to model German poetry after music—“the harmony of the spheres”—which served as the impetus for Goethe’s and Schiller’s poetry and Hölderlin’s late hymns. We will examine his experiments with verse form and his notion of interiority as the backdrop for Herder’s theory of the Volkslied as a popular genre that joins word and music and expresses the soul of a nation. Music and poetry will emerge on the one hand as the glue that binds a community and on the other as a disruptive force that isolates its members. Its significance as a figure if not vehicle for transcendence will return again and again in works as varied as Achim von Arnim and Brentano’s Des Knaben Wunderhorn, Kleist’s “Heilige Cäcilie,” Hölderlin’s poetological writings, Schopenhauer’s Die Welt als Wille und Vorstellung, and Nietzsche’s Geburt der Tragödie among other texts.
Instructor(s): M. Dornbach; R. Tobias
Area: Humanities.
AS.213.741. Literature, Psychoanalysis, and Unassimilable Experience.
This course will consider experiences at the juncture between memory and forgetting, history and oblivion, narration and music. Such liminal experiences are frequently interpreted in psychoanalytic theory as trauma, though there is no reason that a purely negative definition should prevail. The suspension of the self and the concomitant immersion in the sensible world could just as well be regarded as an ecstatic experience. This course will examine the notions of immediacy, singularity, power, and sensuality in psychoanalytic theory (Freud, Lacan, Klein, Malabou) and beyond. Kleist's "Die heilige Cäcilie" and Kafka's "Josefine, die Sängerin" will serve as touchstones for our exploration of the ecstasy that literature at once produces and reproduces as a verbal representation and musical medium.
Instructor(s): K. Pahl; R. Tobias
Area: Humanities.

The course explores some aspects of the contradictory constitution of the modern subject as a subject that is split, opposed, in tension. Two archetypal figures of this split are the "bourgeois," as the social-economic subject, and the "citizen" as the political subject. The bourgeois and the citizen are defined by distinct and opposing conceptions of the "will" of education (Bildung), and of the relation between law and nature, normativity and facticity. In asking how to understand the conflictual relationship between these two basic figures of the modern subject, the course will focus especially on the paradoxes of "individual rights" (subjektive Rechte) as the fundamental mechanism of modern subject-formation. How do rights both empower subjects, while also contributing to forms of their disempowerment? To what extent do rights contain and organize the tensions between subjects understood as social or economic, and as political? CLASS BEGINS FEBRUARY 25 AND ENDS APRIL 1. Readings will include excerpts from (among others): Hegel, Marx, Nietzsche, Horkheimer and Adorno, Heidegger, Foucault, Balibar and Rancière.
Instructor(s): C. Menke; R. Tobias
Area: Humanities.

AS.213.755. Philosophy of the Novel.
The novel is unique among literary genres in its capacity to represent the inner life of characters portrayed in the third person. Neither poetry nor drama is equipped to convey the innermost thoughts of characters who do not speak for themselves but are instead narrated. This course will examine the implications of "third-person subjectivity" for the novel's claim to construct (or reconstuct) a world governed by ethical norms that are all but impossible to fulfill. In fact, the very impetus for the novel is the unresolvable tension between the ideals that a work posits and the choices its characters face in a world defined by compromise and limitation. What criteria for judgment does the novel provide? How does it establish a world it simultaneously critiques as devoid of meaning save the meaning posited by the subject? We will also investigate the use of novels and novelistic form in philosophy. Is it possible for novels to be treated not only as vehicles, but also as equivalents to philosophical views? How do novelistic forms provide new ways of thinking or philosophizing? Readings to include works by Lukács, Bakhtin, Hamburger, Sartr, Beauvoir, Ricoeur, Murdoch, Nussbaum, Diamond and novels by Coetzee and Flaubert.
Instructor(s): R. Tobias; Y. Ong
Area: Humanities.

AS.213.757. Rilke.
The concept of the "Weltinnenraum" has long dominated Rilke scholarship as a result of its two-fold sense as both the Innenraum der Welt and the Weltraum des Inneren. In this it captures the seeming autonomy of the world of things, characteristic of the New Poems, as well as the exploration of the cosmic dimensions the self, characteristic of the late work. This course will concentrate on the Duino Elegies and Sonnets to Orpheus with emphasis on the transformation of both world (or nature) and consciousness into song. In addition to Rilke's poetry, we will also read texts by Husserl, Heidegger, and Merleau-Ponty. Taught in English.
Instructor(s): R. Tobias
Area: Humanities.

AS.213.761. Literary Aesthetics.
This course explores literature in the context of the aesthetic tradition in philosophy. Themes include literature as mimesis, or the representation of reality, its relation to truth, untruth, and possibility; literature as the revealing of being, literary imagination, the distinctiveness of literary language and expression, the role of the literary author. Readings may include background selections from Plato and Aristotle, but the course will focus on philosophical interest in literature since the late 18th century, and may include Kant, Hölderlin, Nietzsche, Heidegger, Sartr, Blanchot, Bachelard, among other readings. Class will be taught by the Kurrelmeyer Chair in German. Taught in English.
Instructor(s): Staff
Area: Humanities.

AS.213.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors' work, i.e., the "road beyond neorealism" for Fellini, and Almodóvar's queerness as expressed in his "true-and-false testimonies." We will then proceed to read and watch some historical documents around the constructions of some of these directors' films, such as Petronius' Satyricon, about the worshipping of the most important female deity in late antiquity, Isis, in light of Fellini's Satyricon; and Thierry Jonquet's novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar's The Skin I Live In (2011). We will be reading Karen Pinkus' Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini's Rome, as well as Almodóvar's columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

AS.213.800. Independent Study-German.
Instructor(s): Staff.

AS.213.811. Advanced Reading in German Literature.
Students will read works in German from a variety of authors. Sessions with faculty will be arranged on an individual basis, as needed.
Instructor(s): K. Pahl; R. Tobias
Area: Humanities.

Instructor(s): Staff.

AS.213.813. German Qualifying Paper Preparation.
Instructor(s): Staff.
AS.214.125. Freshman Seminar: Dangerous Liaisons: Words and Music Through the Ages. 3.0 Credits.
How do music and words interact? Do words have a priority on music or vice versa? Does music need words to be understood and interpreted? Are words filled with meaning by music? A variety of readings and musical examples will be discussed, including genres as diverse as medieval songs, madrigals, Romantic Lieder, opera, the American musical, and contemporary pop music. The seminar will include field trips to the Baltimore Museum of Art, the Meyerhoff Symphony Hall, the Peabody Institute, and the Evergreen Museum and Library. Students will also have the opportunity to attend a live HD broadcast of Mozart’s Don Giovanni from the Metropolitan Opera. No musical skills required; strong doses of curiosity most welcome.
Instructor(s): E. Refini
Area: Humanities

AS.214.171. Freshman Seminar: Witchcraft and Demonology in Renaissance Europe. 3.0 Credits.
Who were the witches? Why were they persecuted for hundreds of years? Why were women identified as the witches par excellence? How many witches were put to death? (Answer: 30-40,000, between about 1400 and 1800.) What traits did European witchcraft share with witch-mythologies in other societies? After the witch-hunts ended, how did “The Witch” go from being “monstrous” to being “admirable” and even “sexy”? Answers are found in history and anthropology, but also in literature, folklore, music, and the visual arts. After an introduction to ancient and medieval witchcraft, we will study European witch-persecution between 1400 and 1800. The second half of the course will concentrate on artistic representations of witches in media ranging from manuscripts to movies, concentrating on Italy, France, Spain, and Germany.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive

AS.214.176. Freshman Seminar: Warrior Women from Ancient Times to Game of Thrones. 3.0 Credits.
Dean’s Teaching Fellowship This course will trace the origins of the warrior woman from ancient times through today’s pop culture and reflect on the multiplicity of its social, cultural, and political ramifications.

AS.214.278. Italian Film. 3.0 Credits.
This undergraduate seminar is an overview of 100 years of Italian film history covering such pivotal moments as the early Futurist films, the creation of Cinecittà, the Italian Neorealist film movement, the legendary Commedia all’italiana films, as well as a discussion of classic Italian auteurs such as Fellini, Pasolini, Wertmüller, Bertolucci, and such contemporaries as Garrone and Sorrentino.
Instructor(s): B. Wegenstein
Area: Humanities

AS.214.301. Survey of Italian Literature. 3.0 Credits.
Un viaggio dal Rinascimento alla modernità, per incontrare il genio italiano e conoscere la nostra umanità. Through readings from the most celebrated texts by Italian authors, we will travel from the early renaissance to the 20th century to encounter the struggles and triumphs of the human conscience, and the highest achievements of Italian culture. The course will explore poetry, short story, theatre, epic, and novel, with an introduction to Italian opera. Students will have the opportunity to read Dante Alighieri, Baldassarre Castiglione, Galileo Galilei, Giacomo Leopardi, Giorgio Bassani, and many others in original language, and to discover how these works are relevant in our own life and times. Taught in Italian. Recommended course background: Italian AS.210.252; may be taken concurrently with Advanced Italian II.
Prerequisites: Not open to students who have taken AS.214.302.
Area: Humanities
Writing Intensive

AS.214.302. The Agony and the Ecstasy from Dante to the Romantics. 3.0 Credits.
By exploring texts and topics in Italian literature and culture from the Middle Ages to modernity, this course will address the themes of suffering and triumph as they are expressed through several great authors, many of whom were fundamental to the development of the Western European tradition. These authors will include Dante, Petrarch, Boccaccio, Machiavelli, Ariosto, Tasso, Foscolo, Leopardi, and Manzoni. The course will also explore the relationship between these works and other forms of culture, such as painting and music. The course is taught in English with special sessions in Italian for Italian majors and minors, so as to count towards the Italian Major/Minor requirements.
Prerequisites: Not open to students who have taken AS.214.301.
Area: Humanities
Writing Intensive

AS.214.321. The Prince and the Demagogue: Machiavelli to House of Cards. 3.0 Credits.
Niccolò Machiavelli’s The Prince is undoubtedly one of the most influential political works in the history of western culture. Read and discussed in many ways, the early-sixteenth-century booklet has been the object of controversial interpretations, which have fueled its myth. Who is Machiavelli’s prince? Is he a tyrant, a good ruler, or a demagogue? How does Machiavelli’s prince move between ethics, politics, and rhetoric? Often evoked in contemporary political discourse and popular culture, Machiavelli’s prince embodies a flexible idea of power that is most difficult to pin down. Moving from a close reading of the text within its original context, this course will consider not only the classical sources that inform The Prince, but also the presence of Machiavelli in today’s political culture and fiction. Special attention will be given to the contribution of Italian philosopher Antonio Gramsci, whose interpretation of Machiavelli’s thought is one of gateways to the reception of The Prince in the 20th and 21st centuries. The course is taught in English. Italian Majors and Minors should register for section 02.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive
AS.214.324. Futurism and the birth of Avant-garde. 3.0 Credits.
The course will explore Futurism, the first great avant-garde movement in modern European history, and its vast and mostly unknown literary production. We will analyze Futurism in its social, literary, and historical background, as well as in its artistic contributions to Italian and European culture. We will focus on Filippo Tommaso Marinetti (1876 - 1944), founder of the movement and cornerstone of all its diverse souls and manifestations, and analyzing his manifestos, poetry, novels, tales and plays, we will shed light on the peculiarity of a movement that acted as the initial spark, and has given shape to the following literary and artistic avant-gardes of the XX Century. The final project for the course can be either a paper or a translation project. Reading knowledge of Italian is suggested.

AS.214.333. Shakespeare on the Opera Stage. 3.0 Credits.
From Rossini’s Otello to Cole Porter’s Kiss me Kate, from Verdi’s Macbeth to Leonard Bernstein’s West Side Story, the works of William Shakespeare have been an extraordinary source of inspiration for musical theatre. By exploring operatic adaptations of Shakespeare in different periods and contexts, this course will examine the ways in which composers and librettists have interpreted and reshaped the plays. The course, primarily focused on the 19th century Italian reception of Shakespeare and, in particular, on operas by Rossini and Verdi, will also consider the phenomenon within a broad transnational perspective up to include contemporary opera and musical.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

This course investigates how ecological factors inspired storytellers, influenced modes of literary publication, and determined reader responses in Europe before 1700. Students enrolling in section 2 will attend a supplementary one hour session at a time to be mutually decided and complete the work in Italian.
Instructor(s): T. Tower
Area: Humanities
Writing Intensive.

AS.214.347. Petrarch and the Beginnings of the Renaissance. 3.0 Credits.
This course will focus on the life, work, and thought of Francesco Petrarca, or “Petrarch.” Though known today primarily as the author of Italian love poetry, Petrarach considered his Latin work more lasting. We will explore both sides of his work, the vernacular and Latin (in English translation) to come to an understanding of his place in medieval intellectual history, the history of philosophy, and the history of literature.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

Our online shopping habits and political Facebook posts are being monitored by Google's administration as well as by governments across the globe. If we think this is harmless, it is because we assume that the era of the first Apple Watch is different from the era of the first Gutenberg press. But is this really the case? In this course, we will explore this issue by focusing on the emergence of the first institutionalized censorship during a foundational period of modern times -- the Renaissance. After addressing the reasons that motivated the creation of the first Index of Prohibited Books (1559), we will closely examine some of the most controversial works by Renaissance authors who were persecuted and banned for their religious, political, or scientific ideas (Erasmus of Rotterdam, Niccolò Machiavelli, Torquato Tasso, Galileo Galilei). The analysis of these texts will allow us to gain an understanding of both the dynamics of censorship and self-censorship in the Renaissance, and the logic behind power’s obsession with cultural control -- in those times like nowadays.

Area: Humanities
Writing Intensive.

AS.214.362. Italian Journeys: Medieval and Early Modern. 3.0 Credits.
Italy’s history as a unified country is fairly recent, but the very idea of “Italy” is a very old one. Indeed, many “Italies” have existed throughout the centuries, thus contributing - not without conflicts - to one of the richest cultures in the world. By exploring texts and topics from the Middle Ages to modernity, this course will address the cultural history and geography of Italy, focusing on both its centers (Rome, Florence, Venice, etc.) and its peripheries. A veritable journey through Italy, the course will address authors that were fundamental to the development of the Western European tradition (e.g. Dante, Petrarch, Boccaccio, Machiavelli, Ariosto, Tasso). The course will also explore the relationship between these works and other forms of culture, such as painting, music, cinema. The course is taught in English with section 02 available for Italian for Italian Majors and Minors so that the course will count towards their requirements.
Area: Humanities
Writing Intensive.

AS.214.363. Italian Journeys: Modern and Contemporary Green Literature. 3.0 Credits.
This course studies 20th and 21st century Italian literature from an ecological perspective. Focusing on the position of humans and non-humans in both natural and urban environments, and reflecting on how literature can raise environmental consciousness and change perceptions of the earth, we shall read classics and lesser-known literature from a variety of genres like poetry by Salvatore Quasimodo, Pier Paolo Pasolini, and Andrea Zanzotto, novels by Carlo Levi, Carlo Cassola, and Anna Maria Ortese, as well as children’s books by Dino Buzzati and Italo Calvino. This course is taught in English. Special sessions in Italian will be announced during the semester. Italian majors and minors should enroll in section 02.
Instructor(s): L. Di Bianco
Area: Humanities
Writing Intensive.
AS.214.374. Being Italian: Autobiography and Identity in Literature and Media. 3.0 Credits.
What does it mean to be Italian rather than French, American, or anything else? What's the difference between being Tuscan, Milanese, or Sicilian? Between being Christian, Jewish, Muslim, or “other”? How does the reality of Being Italian differ from the clichés that prejudice, commercialism, or mass media fads help to spread? Considering these questions can be important whether you want to use your Italian in business, in academia, or for sheer pleasure, whether you want to watch films, read books, or see the sights.
Prerequisites: AS.210.251 AND AS.210.252
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.376. Warrior Women from Ancient Times to Game of Thrones. 3.0 Credits.
This course will trace the origins of the warrior woman from ancient times through today's pop culture and reflect on the multiplicity of its social, cultural, and political ramifications.
Instructor(s): J. Gomez
Area: Humanities.

AS.214.377. Gendered Voices. 3.0 Credits.
The course will explore the notion of 'voice' in order to show how poetry, literature, philosophy, and music have been dealing with it throughout the ages. In particular, by focusing on classical figures such as the Sirens, Circe and Echo, as well as by considering the seminal discussions of the 'voice' in Plato and Aristotle, the course will address the gendered nature of the voice as a tool to seduce and manipulate the human mind. More specifically, the course will discuss the ways in which male and female voices embody different functions. Examples to be analyzed include texts by Dante, Petrarch, Ariosto, and Tasso. The course will also consider later rewritings of myths concerned with the voice such as Giuseppe Tomasi di Lampedusa's The Siren and Italo Calvino's A King Listens.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.390. Machiavelli: A Renaissance Master. 3.0 Credits.
Who was Niccolò Machiavelli? The author of the Italian Renaissance’s most famous book, The Prince, he also wrote histories, commentaries, comedies, and letters. And he had a career as a prominent Florentine diplomat, which ended tragically but informed everything he wrote. This course is intended to offer students an introduction to Machiavelli’s major works and to the intellectual, social, and political contexts that shaped his thinking.
Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

AS.214.393. Italian Opera and the Art of Adaptation. 3.0 Credits.
Italian opera, from its very inception, has developed in close dialogue with other art forms. The pioneering operas of Peri and Monteverdi based on the figure of Orpheus are part of a larger cultural movement that saw Renaissance philosophers (Marsilio Ficino), visual artists (Bronzino) and humanists (Angelo Poliziano) resurrect and transform the ancient Orpheus myth. The subsequent evolution of opera was influenced by (and influenced) innovations in stage comedy, the novel, and other art forms. In this course, we will explore these connections between the development of opera and other facets of Italian culture. No knowledge of Italian is required. The course will be taught in English; an additional Italian language discussion section will be offered for majors.
Instructor(s): J. Coleman
Area: Humanities.

AS.214.437. The Intellectual World of the Italian Renaissance. 3.0 Credits.
This course is intended to familiarize students with the intellectual world of Renaissance Italy, or more specifically, the "lost" Italian Renaissance of the long fifteenth century, from the time when Petrarch (1304-74) was in full maturity to the 1520s. During this period, most Italian intellectuals wrote the majority of their work in Latin – not the Medieval Latin of the Church and the universities but in what they saw as a more authentic Latin, like that used in ancient Rome, in the time of Cicero, Virgil, Quintilian, and others. These Renaissance "humanists," inspiring by the example of Roman, and eventually Greek, antiquity, believed that they were carrying out a cultural revival. Who were these humanists? Why then did they choose Latin (and a reformed Latin at that) instead of their "native" tongue as the language in which to effect this renewal? What did this choice afford them in terms of literature and philosophy? Why was this phase of literary and philosophical history undervalued in the evolution of modern scholarship? By the end of this course, you should be able to formulate answers to those questions. Some of the works of these authors still await editions, lying in manuscript libraries or difficult-to-access early printed editions. Many have now had their Latin texts edited, and a number have recently been translated into English. Students therefore have the chance to explore work in a field that is new and growing. A separate Renaissance Latin reading group will accompany the course for those who have studied Latin.

Area: Humanities
Writing Intensive.

AS.214.445. Boccaccio's Decameron and the Multiplicity of Story-Telling. 3.0 Credits.
Boccaccio's Decameron (1352), a collection of 100 short stories, ranges from the bawdy through the cynical to the romantic and even fantastic. It has inspired numerous writers, artists, musicians and film-makers. We will read Boccaccio's masterpiece on its own terms and in relation to the development of story-telling, from gossipy "news" (novelle) to artistic short story, theatrical adaptation, literary fairy-tale, and the fantastic. The Decameron will be compared with its forerunners in saints' lives, bawdy fabliaux, and moral exempla, and with its literary, theatrical, and filmic imitators in Italy and Europe. Italian graduate students and undergraduate majors will attend an extra weekly meeting conducted in Italian. Those students should enroll in section 2 which will be awarded 4 credits.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.
AS.214.477. Magic, Marvel, and Monstrosity in the Renaissance. 3.0 Credits.
Magic, Monstrosity, and Marvels or Wonders call into question what we see and experience: what is reality, what is illusion; what’s natural and what’s supernatural? What’s human and what’s more, or less, than human? During the Renaissance, ideas about the nature of reality were bound up with questions and issues very different from those of our time. With the exact sciences still being invented, the nature of the world was much less hard and fast for Renaissance people than it is for the modern educated person. The literary masterpieces of the Italian Renaissance provide vivid illustrations of the early modern sense of wonder. Foremost among these are the theatrical comedies which Italian authors revived in imitation of the ancients, and the romances, especially Ariosto’s Orlando furioso (1532) and Tasso’s Gerusalemme liberata (1581). These and other works influenced ideas about magical and marvelous phenomena across Europe for centuries to come. Works will be read and discussed in English. Italian majors and graduate students (who should enroll in section 2) will attend a weekly supplemental discussion in Italian and compose their written work in Italian.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.479. Dante Visits the Afterlife: The Divine Comedy. 3.0 Credits.
Dante’s Divina commedia is the greatest long poem of the Middle Ages; some say the greatest poem of all time. We will study the Commedia critically to find: (1) What it reveals about the worldview of late-medieval Europe; (2) how it works as poetry; (3) its relation to the intellectual cultures of pagan antiquity and Latin (Catholic) Christianity; (4) its presentation of political and social issues; (5) its influence on intellectual history, in Italy and elsewhere; (6) the challenges it presents to modern readers and translators; (7) what it reveals about Dante’s understanding of cosmology, world history and culture. We will read and discuss the Commedia in English, but students will be expected to familiarize themselves with key Italian terms and concepts. Students taking section 02 (for 4 credits) will spend an additional hour working in Italian at a time to be mutually decided upon by students and professor.

Instructor(s): C. Celenza
Area: Humanities
Writing Intensive.

Although naturally and historically intertwined, music and poetry tended to be described in the early modern period as competing rather than interacting. By looking at both literary and theoretical texts, the seminar aims to explore the ways in which this controversial relation is revealed by the interplay of poetics, rhetoric, and music theory. Reading materials will include classical sources (e.g. Plato, Aristotle, Ps.-Longinus, Quintilian) and their early modern interpretations. Special attention will be given to Torquato Tasso, Giambattista Marino, and Giambattista Doni, whose works will be also discussed in the light of the contemporary development of musical genres (e.g. madrigals, opera). No musical skills required.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.640. Film Theory.
The seminar deals with film theory in its history and its current trends. We will examine structuralist, post-structuralist, feminist, Marxist, psycho-analytic and other theoretical approaches to understanding and interpreting the cinematic medium. We will look at several different genres of contemporary films from Italy, France, Spain, and Latin American Film, from auteur-films to independent documentary collectives, animation films to blockbusters. We will invite at least one film theorist and one filmmaker to class during the semester.
Instructor(s): B. Wegenstein
Area: Humanities.

AS.214.655. Translating Knowledge: Brunetto’s Tresor and Dante’s Convivio.
By focusing on Brunetto Latini’s Tresor and Dante Alighieri’s Convivio, the seminar will examine the notion of “encyclopedic knowledge” in the Middle Ages. The two works – both examples of “translation” – call traditional ideas of knowledge into question. The seminar will study the Convivio as a response to the Tresor and will situate Dante’s project within a wider discussion of vernacular translation as a key tool for the dissemination of the classical tradition in the Middle Ages.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.666. Primo Levi Today: Seventy Years After the First Publication of If This Is a Man (Survivor in Auschwitz).
How have genocides been represented by people with different backgrounds and sexual identifications? How do written testimonies challenge or reinforce the hegemonic accounts of wars and genocides? How is the relationship between the “personal” and the “public/national” theorized in literary texts dealing with wars and other forms of political violence? What concepts or frameworks (Queer; Postcolonial; Community Studies) offer new approaches to the analysis of testimonial statements on collective traumatic events? This course aims at exploring these questions, using Primo Levi’s work as an anchoring point. Readings and discussions will be in Italian. COURSE IS OPEN TO UPPER LEVEL UNDERGRADUATES
Instructor(s): G. Furci
Area: Humanities
Writing Intensive.
This course will be taught from September 2 through October 14, 2015. The course aims to analyze the development of Foscolo's poetry in the years between the eighteenth and nineteenth centuries (1798-1807), namely the development from the sonnets and the odes to the poem I Sepolcri, starting off from the most common models of the famous contemporary poets (Parini, Monti, Alfieri, Pindemonte) to arrive at a new understanding of "lyric poetry." Furthermore, the lectures will focus on the discussions and controversies that arose with regards to the Sepolcri (with Pindemonte and others) immediately after publication, when the novelty of the poem aroused bewilderment and perplexity in many critics, readers and poets. The analysis of the anti-Foscolo writings that appeared at this time - and the replies of Foscolo himself - will show how most of the readers of that time, still tied to a static view of literary genres, were negatively affected by the audacity in the mixture of the various registers that characterize the poem (epic, lyric, elegy, satire, tragedy) held responsible both for the lack of formal and stylistic unity of the poem, and its complete obscurity. The class will be taught in Italian.
Instructor(s): F. Bausi
Area: Humanities
Writing Intensive.

AS.214.676. The Renaissance Comic Romance.
In the second half of the fifteenth century, Italian poets transformed the medieval adventure stories of Charlemagne's and Arthur's knights. Luigi Pulci's earthy, bourgeois Morgante and Matteo Maria Boiardo's romantic, courtly Orlando innamorato created two variants of a genre that led from Ariosto's Orlando furioso through Folengo's Baldus to inspire Rabelais's Gargantua and Pantagruel, Cervantes' Don Quixote, and, eventually, the European novel. The course concentrates on the works of Pulci, Boiardo, and Folengo, combining close analysis of their linguistic and narrative fabric with examples of their influence on later comic masterpieces.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.684. The Commentary Tradition and the Birth of Literary Scholarship.
The practice of commenting on texts lies at the foundations of what we call today “literary criticism.” From the Bible to Dante’s Divine Comedy, from Greek and Latin poetry to medieval and Renaissance literary writings, the many questions posed by the commentators have contributed widely to the shaping of the modern notions of reading and interpretation. What do we look for when we read a text? How do we approach it? How does our reading interact with the author's intention? To what extent is the commentator appropriating the author's prerogatives? By exploring a wide range of case studies, the seminar aims to reassess the role of the commentary tradition within the development of literary scholarship and as a genre per se. Some sessions will take place at the Hopkins Special Collections and at the Walters Art Museum, where students will have the opportunity to work on both manuscripts and early prints, and select materials for their presentations.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

AS.214.689. Flânerie and Female Authorship in Contemporary Italian Cinema.
This course examines the prolific production of Italian women filmmakers inscribing their work into a national cinematic tradition. The most prominent visual leitmotif in films by directors such as Marina Spada, Francesca Comencini, Alice Rohrwacher and others, is that of the wandering woman contemplating the cityscape. What does the act of walking signify in these works? How do these filmmakers embrace and transform Italy’s cinematic tradition? After highlighting the figure of the city-walker in post-war classics by Roberto Rossellini and Vittorio De Sica, we shall discuss from a gender perspective films such as Fellini's Nights of Cabiria, Pasolini's Mamma Roma, and Antonioni's La Notte, which feature female city-walkers who stroll throughout urban peripheries created during the country’s rush toward modernity. Then, we shall analyze the work of women directors who recurrently employ the narrative strategy of flânerie to construct female narratives of displacement and liminality. We shall question how and to what extent this contemporary cinematic production is indebted to the masters of neorealism and the auteurs from the sixties. Critical and theoretical readings will include essays by Michel de Certeau, Siegfried Kracauer, Janet Wolff, Elizabeth Wilson, Anne Friedberg, Giuliana Bruno, and others.
Instructor(s): L. Di Bianco
Area: Humanities
Writing Intensive.

The metaphor of the theatre of the world is a long-lasting one: from antiquity to our own days through the Middle Ages, the Renaissance, and the Baroque, the idea of the world as a stage has been the core of both dramatic writings and discourses on drama. By considering the metaphor and its meanings in a broad chronological perspective, the seminar aims to identify key moments in its evolution. In particular, it will focus on the ways in which – within the production of early modern morality plays – the metaphor of the theatrum mundi regained its literal meaning by being represented on stage. Along with a selection of allegorical plays and relevant visual materials, we will consider theoretical sources including classical and Christian authors, neo-platonic writings and medieval exegesis, Renaissance thinkers such as Pico della Mirandola and modern philosophers such as Walter Benjamin.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

This course explores the history and evolution of documentary filmmaking in Italy through the study of non-fictional works dealing with different social, political, and personal matters from the post-war period to the last decade. We shall screen the works of Vittorio De Seta, Ernesto De Martino, Alberto Grifi, Cecilia Mangini, Annabella Miscuglio, as well as the works of iconic directors such as Michelangelo Antonioni, Luchino Visconti, Pier Paolo Pasolini, and Ermanno Olmi, considering their fiction and non-fiction films in dialectical relationship to one another. Moreover, this course devotes particular attention to late, contemporary female production (e.g. Alina Marazzi, Costanza Quattriglio, and Eleonora Danco) that, through the use of found footage and hybrid modes, blurs the boundaries between fiction and non-fiction, the real and the surreal. Critical and theoretical readings include Marco Bertozzi’s Storia del documentario italiano, Bill Nichols’ Representing Reality, and others.
Instructor(s): L. Di Bianco
Area: Humanities.
AS.214.711. Dissolving Margins: Space and Female Subjectivity in the Work of Elena Ferrante.
Elena Ferrante is Italy's most acclaimed contemporary novelist, although her true identity remains unknown. Having been translated into multiple languages and published in 39 countries, with over a million of copies sold in the United States alone, her 'Neapolitan Quartet' triggered what has been called "Ferrante Fever." This course investigates the reasons behind this global, literary phenomenon while exploring themes such as female subjectivity and the interplay with space and society, the question of female authorship, women's participation in, or exclusion from, history, and the internal violence of a rapidly changing society. We shall read Ferrante's entire oeuvre: Troubling Love (1999) The Days of the Abandonment (2002), and The Lost Daughter (2006), the Neapolitan Quartet (2012-2014), as well the collection of letters and essays Frantumaglia. (2016). Theoretical readings will include essays by Julia Kristeva, Luce Irigaray, Steve Pile, and others.
Instructor(s): L. Di Bianco
Area: Humanities.

AS.214.716. Translation and Vernacular Readership in Italy, 1250-1500.
Translation is usually acknowledged as instrumental to the rise of vernacular readership in medieval and early modern Europe. By reconsidering seminal contributions such as Erich Auebarch's, this seminar will explore the textual and cultural implications of the translative process that played a major role in the medieval reception of antiquity. Special attention will be given to translation theory and its history.
Instructor(s): E. Refini
Area: Humanities
Writing Intensive.

Giambattista Vico’s Principi di scienza nuova d'intorno alla comune natura delle nazioni (1725, 1730, 1744) was intended to found an "ideal" and "eternal" model of human development, valid for all societies. Vico considered his project both philology and philosophy, and tried to revolutionize thinking about human history as practiced between about 1550 and 1700, by exposing misconceptions behind attempts to square "sacred history" (the presumed historical accuracy of the Bible) with "profane" or non Judeo-Christian concepts of history, both ancient and modern. The culture shock underlying this "old science" stimulated Vico to base philosophical and historical knowledge of mythology on a conception of narration. Recommended Course background: Italian and Latin
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.753. Tasso the Madman.
In late sixteenth-century Europe, Tasso's name was a synonym for madness. The Elizabethan stage hosted a play on "Tasso's Melancholy"; Montaigne belatedly recalled observing the "mad poet" in prison. Biographers and dramatists spread the myth into the nineteenth century, but Tasso's dialogues and letters tell a more complex and nuanced story of suffering and struggle, life and work.
Instructor(s): W. Stephens
Area: Humanities
Writing Intensive.

AS.214.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors' work, i.e., the "road beyond neorealism" for Fellini, and Almodóvar's queerness as expressed in his "true-and-false testimonies." We will then proceed to read and watch some historical documents around the constructions of some of these directors' films, such as Petronius' Satyricon, about the worshipping of the most important female deity in late antiquity, Isis, in light of Fellini's Satyricon; and Thierry Jonquet's novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar's The Skin I Live In (2011). We will be reading Karen Pinkus’ Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini’s Rome, as well as Almodóvar’s columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities.

Instructor(s): E. Refini; L. Di Bianco; P. Forni; W. Stephens.

AS.214.863. Italian Proposal Preparation.
Instructor(s): E. Refini; L. Di Bianco; P. Forni; W. Stephens.

3.0 Credits.
Comics and short stories are literary forms that succeed by at once embracing and defying their apparent limitations. This course provides a comparative understanding of the evolution of the two forms in Latin America by bringing together the works of legendary comic artists like Quino (Argentina), Rius (Mexico), and Los Bros Hernandez (USA) with short form masterpieces by authors including Jorge Luis Borges, Julio Cortázar, Elena Garro, and Rosario Castellanos. Students will learn critical strategies for approaching and evaluating marginalized and alternative literatures and will deepen their understanding of the histories and cultures of Latin America in the 20th and 21st centuries. Class taught in English.
Instructor(s): C. Ray
Area: Humanities.
AS.215.231. Introduction to Literature in Spanish. 3.0 Credits.
The main objective of this course is to examine and discuss specific authors and topics in literature in Spanish from the Middle Ages to the 20th century. The course is designed to cover a selection of Hispanic texts from Spain and Latin America. Literary genres to be studied will include narratives, poetry, and drama. The bulk of each class session will be dedicated to the discussion of the assigned readings. This course is taught in Spanish. This course is required for the major in Spanish.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.243. Freshman Seminar: The Middle Ages in Film. 3.0 Credits.
The Middle Ages and medieval themes are ubiquitous in popular movies of our times. This course studies the Middle Ages as they have been portrayed in film, with a focus on Spain. Course materials include studies on the imaginative uses of the Middle Ages as well as films like The Cid, Tirante el Blanco, Ladyhawke, and Destiny, among others.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.253. Borges on Islam, Judaism and Christianity. 3.0 Credits.
This course offers an introduction to the life and works of world-renowned Argentine author Jorge Luis Borges. It offers students an opportunity to make an in depth examination of several of his most notable essays, short stories, and a few of his poems. The class is centered on texts which refer directly or indirectly to the relationship between national identity and religion. Questions will arise, such as: are literary portrayals of Islam related to politics? Do all Argentines consider that Argentine-Jews are Argentinean? Why is this? If we are the West, what is the Orient?
Instructor(s): M. Ruhlmann
Area: Humanities.

AS.215.265. ELECTRIC APOCALYPSE: Rock in Latin America. 3.0 Credits.
Rap, Metal, Punk Rock, and the other children of Rock and Roll are a global phenomena, and can serve as a site wherein hegemonic ideological culture is contested and resisted. These musical vocabularies manage to noisily articulate the voice of otherwise silent resistance by cultivating a peculiar and often paradoxical relationship with violence. This course will take Tristan Garcia’s dialectic of “electric adolescence” as a point of departure for analysis of the relationship between music, violence, and social critique in Latin America.
Prerequisites: AS.210.212
Instructor(s): C. Ray
Area: Humanities.

AS.215.271. Life and Death: Philosophy in Spain. 3.0 Credits.
If there is an essence of Modern Spanish philosophy, the debate which raged between Miguel de Unamuno and José Ortega y Gasset provoked each thinker to realize that essence in profoundly divergent ways. And yet, what connects the two figures is a shared fascination with the rigorous investigation of their social reality and the mystery of the self. This course will examine the works and lives of Unamuno and Ortega y Gasset and, with the aid of Kierkegaard and Nietzsche, strive to understand their confrontation with eternity and mortality.
Instructor(s): C. Ray
Area: Humanities
Writing Intensive.

AS.215.307. Cervantes: Don Quixote and The Exemplary Novels. 3.0 Credits.
In this course we will read the most important narrative works of Miguel de Cervantes, Don Quixote and the Exemplary Novels, works that are widely understood to have changed western literature. We will read both works in the English translation by renowned translator Edith Grossman, who will also visit Hopkins during the semester. Those who wish to receive credit toward the Spanish major will read the books in the original and attend a separate section conducted in Spanish. Those students should enroll in section 2 of the course.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

AS.215.312. The Great Latin American novel according to Carlos Fuentes. 3.0 Credits.
An investigation into the historical development of the great Latin American novel according to Carlos Fuentes’ new book on the subject. Course includes reading novels by machado de Assis, Garcia Marquez, Carlos Fuentes, Vargas Llosa, Cortazar and Piglia
Instructor(s): S. Castro-Klaren
Area: Humanities.

AS.215.315. Literature of the Great Recession. 3.0 Credits.
The Great Recession—sometimes called the financial crisis or the economic crisis of 2008—brought financial markets to a halt and created significant political turmoil across the North Atlantic. But its impact on culture, and literature especially, has often been ignored. This seminar will travel across Europe, from Dublin to Madrid, from London to Reykjavik in order to examine how literature has registered this most recent economic crisis. We will focus on how crisis is narrated and the ways in which literary works have managed to provide a voice for marginalized social, economic, and political demands.
Instructor(s): B. Seguin
Area: Humanities.

The readings bring into consideration the question of terror (of war) and displacement as experienced by migrants in novels by prize winning authors such as Arguedas, Vargas Llosa, Alarcon, Riesco, Roncaglio and Silva Passuni.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.336. Don Quijote. 3.0 Credits.
A close reading and discussion primarily in Spanish of Cervantes’ masterpiece, with concentration on its major themes and contributions to the formation of the modern novel. We will use A. Murillo’s edition of the novel, Editorial Castalia.
Prerequisites: AS.210.311 AND AS.210.312
Instructor(s): H. Sieber
Area: Humanities.

AS.215.337. Teatro Espanol del Siglo del Oro. 3.0 Credits.
Close reading of various Spanish authors, among them Lope de Vega, Calderon de la Barca, Moreto, and Zorilla. Students should have taken courses beyond intermediate level or advanced Spanish. This class will be conducted primarily in Spanish as a seminar and will require active participation and discussion. Papers will be written in Spanish.
Undergraduate Seminar.
Instructor(s): H. Sieber
Area: Humanities.
AS.215.338. Introduccion a la literatura argentina. 3.0 Credits.
La literatura se enmarca en la realidad social y es una ventana hacia la cultura. En esta introducción consideraremos diferentes temas de especial importancia en la cultura y literatura argentina, como la separación entre la ciudad (puerto, civilización, contacto europeo) y el campo (provincias, barbarie, tradicionalismo rural) que empieza con el texto fundacional de Domingo F. Sarmiento, Facundo. Observaremos asimismo que esta influyente dicotomía se establece con la independencia política es modificada con la llegada masiva de inmigrantes a fin de siglo y finalmente pierde su fuerza con la dictadura militar de los años ’70 y con el desencanto neoliberal que estalla con la crisis del 2001.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.343. Nación criolla: cultura y literatura en el siglo XIX. 3.0 Credits.
El curso examina la formación de nuevas identidades hispanoamericanas y la búsqueda de un pasado que las haga legítimas, especialmente en el Cono Sur (Chile, Argentina, Uruguay). Consideraremos en particular las relaciones con el pasado español y con el pasado amerindio en textos políticos, críticos y literarios de figuras clave del siglo diecinueve, e.g. Domingo Faustino Sarmiento, Andrés Bello, Simón Bolívar, Esteban Echeverría, y José Victorino Lastarria.
Instructor(s): N. Altschul
Area: Humanities.

AS.215.345. Children & Adolescents in Latin America. 3.0 Credits.
Through the close reading of primary texts written by or about adolescents, this course examines youth participation in Latin American art and society from the mid 20th century. Students wishing to complete the writing portions of the course in Spanish or Portuguese should enroll in section 2 which will award 4 credits instead of the usual 3.
Instructor(s): L. Reynolds
Area: Humanities.

AS.215.350. Mexico: A cultural history from the Olmecs to the Mexican revolution of 1910. 3.0 Credits.
The offers a survey of Mexican culture from the formative years of the Olmecs (2000 b.c.) to the Mexican revolution of 1910. History of ideas, matrix social formations, art and literature are the focus of this historical overview.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.353. Women Writing in Latin America: Prose and Poetry by Sor Juana, Mistral, Lisoba, Pizarnik, Castellanos, and other poets. 3.0 Credits.
The first objective of the course is to train students in close reading and analysis of literary texts. The second objective is to read prose and poetry by some of the canonical texts in the Latin American tradition written by women. Taught in English.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.359. Modern Latin American Culture. 3.0 Credits.
This course will explore the fundamental aspects of Latin America culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Prerequisites: AS.210.312; Students may earn credit for AS.211.380 or AS.215.380, but not both.
Area: Humanities.

AS.215.361. A multidisciplinary Introduction to the Study of Latin America. 3.0 Credits.
The course brings together knowledges drawn from the fields of geography, history, anthropology, literature and art in order to provide access to the complexity of “Latin America”. Students may opt do the reading in the original Spanish or Portuguese and also write in either language.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.363. Film and Franquismo: Repression and Resistance in Spanish Cinema. 3.0 Credits.
This course will examine the cinema of Spain that was produced from the onset of the Spanish Civil War in 1936 until the death of dictator Francisco Franco in 1975. The films we will analyze include partisan documentaries, government propaganda shorts, escapist musicals, wry comedies, neo-realist thrillers, iconoclastic dramas, and meditations on national and personal trauma. In addition, we will contextualize our analyses by reading seminal works of Spanish cultural history, social criticism and film theory. This course is taught in English.
Instructor(s): C. Kozy
Area: Humanities.

AS.215.380. Modern Latin American Culture. 3.0 Credits.
Taught in Spanish. This course will explore the fundamental aspects of Latin America culture from the formation of independent states through the present—in light of the social, political, and economic histories of the region. The course will offer a general survey of history of Latin America, and will discuss texts, movies, songs, pictures, and paintings, in relation to their social, political, and cultural contexts. May not be taken satisfactory/unsatisfactory.
Prerequisites: AS.210.312; Students may earn credit for AS.211.380 or AS.215.380, but not both.
Area: Humanities.

AS.215.388. Narrating Mexico: Novel and History. 3.0 Credits.
The 200 years since the eruption of Mexican Independence present a panorama of struggle, strife, and literary creation. This course explores how Mexican literature formulates, contests and conditions portrayals of the national reality of Mexico. Taught in Spanish. Recommended Course Background: Advanced Spanish I or another Spanish survey course.
Instructor(s): C. Ray
Area: Humanities
Writing Intensive.

AS.215.390. Modern Spanish Culture. 3.0 Credits.
This course will explore the fundamental aspects of Spanish culture from the nineteenth to the twenty-first centuries. The course will offer a general survey of the history of Spain and will discuss texts, movies, songs, pictures, and paintings in relation to their social, political, and cultural contexts. This course will be of particular interest for students planning on spending a semester abroad in Spain—specially for those students going to the JHU Fall Semester in Madrid, at Carlos III University. Taught in Spanish. Recommended Course Background: AS.210.311 or appropriate Webcape score.
Area: Humanities.
AS.215.402. Senior Seminar: Literaturas y culturas del Cono Sur: Argentina, Uruguay y Chile. 3.0 Credits.
Focus on twentieth and twenty-first century literary authors, filmmakers, and various other media.
Prerequisites: AS.210.311
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.403. Cine en Común. 3.0 Credits.
Eleven commercial films in Spanish closely examined through screenings, class discussion, and short papers. Besides basic film appreciation, the course intents to develop a common critical vocabulary between Spanish and English to discuss movies in plain language and in terms relevant to social issues
Prerequisites: AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.404. Cuba Between Heresy and Revolution. 3.0 Credits.
We will examine the Stalinist and Leninist refashioned doctrines of Fidel Castro and Ernesto Che Guevara; Cuba's Devil's Pact with Obama; the decline to near breakdown of Cuba-Venezuela Alba dual nation Chavismo; and the startling implications that all of it poses to the rise of sham populism in America. We will press hard into the fabric of Cuba's battered daily lives, mostly in greater Havana, but also in Miami. Among others, the work of filmmaker Fernándo Pérez, the fiction of Leonardo Padura, and Mariel exodus artists will inform our discussions. Our shared hypothesis: that post-revolutionary national sovereignty, coupled with Cuban exile irredeemism, may have engendered the island's dual nation status, tied to Miami's so-called Cuban enclave. As a result, a theologico-political confessional crisis continues into infinity in terms of plural and bipolar heresies supported by US electoral mapping and lobbying, and in some minds having Cuba become the Fifty-First US state.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.406. Novelist Intellectuals. 3.0 Credits.
What does a novelist's op-ed about economics have to do with her literary writing? In what ways does a fiction writer's essays on the environment inform how we read her novels? What happens when we find the political opinions of a writer objectionable? This undergraduate seminar will consider what the Spanish writer Francisco Ayala termed "novelist intellectuals," that is, literary writers who actively participate in a society's public sphere. Considering writers from Madrid to New York, from London to Buenos Aires, we will ask how one should hold a novelist's fictional and non-fictional writings in the balance and explore ways of reading that allow us to consider the public intellectual side and the aesthetic side of a novelist together.
Instructor(s): B. Seguin
Area: Humanities.

AS.215.411. Folly & Insanity in Spanish Culture: Origins of Modern Madness in the Literature of Spain. 3.0 Credits.
What is human madness? Taking into account Foucault’s famous dictum, "There can be no madness without society," this course returns to the earliest constructions of madness in the early modern period and moves forward into modernity through a close reading of literary, philosophical and scientific texts published in Spain. Readings include: Cervantes, Leon Hebreo, Huarte de San Juan, Lope de Vega, Calderon, Galdos, Freud, and others. Earlier representations of mental disquiet will be compared with the latest advances in psychology and neuroscience published in the JHU Gazette and the HUB. Recommended Course Background: AS.210.312
Instructor(s): G. Ponce
Area: Humanities
Writing Intensive.

AS.215.412. Populism. 3.0 Credits.
What do Hugo Chávez, Marine Le Pen, and Donald Trump have in common? According to many from across the political spectrum, they are all populists. But what is populism, exactly, and how can it describe such disparate phenomena as left-wing social movements, xenophobic anti-immigrant policies, and economic redistribution? This advanced seminar will examine the history, culture, and political theory of populism. We will pay special attention to the resurgence of populism after the Great Recession and examine a number of cases from Latin America, Europe, and the United States.
Instructor(s): B. Seguin.

AS.215.413. Cuba y España. 3.0 Credits.
La frase “más se perdió en Cuba” alude al singular rango de la antigua Provincia de Ultramar en el mapa geopolítico del colonialismo hispánico. Hemos de estudiar la prolongada relación entre España y Cuba, desde 1492 al presente, a través de materiales literarios, crónicas, artes plásticas, música y medios sociales al corriente. Enseñado íntegramente en español.
Prerequisites: AS.210.311
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.415. Horror in Spanish Literature. 3.0 Credits.
While our modern conception of "horror" owes much to English literature of the 19th century, it has an under-appreciated precedent in the literature of the Spanish Golden Age. In this course we will read tales of witches, monsters, and the living dead from an age that pre-dates ours by 400 years, but whose darkest fears are surprisingly familiar.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

AS.215.422. Amor y romanticismo en una novela y tres películas. 3.0 Credits.
Prerequisites: AS.210.311 AND AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.
AS.215.440. The Picaresque Novel in Spain. 3.0 Credits.
Readings will include selections from Medieval and Renaissance Works, such as "El Conde Lucanor," "Amadis de Gaula," "La carcel de amor," "El Abencerraje," "Lazarillo de Tormes," "La Diana," "El buscon," "Novelas ejemplares" (Cervantes) and "Don Quixote.
Instructor(s): H. Sieber
Area: Humanities.

AS.215.443. Hispanic Literatures and the Arts. 3.0 Credits.
Literary works from different genres (fiction, drama, poetry) by authors from Spain and Latin America are studied and illustrated in reference to the plastic and visual arts and cinema, indigenous, popular, and religious cultures. Cross-listed with PLAS
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.452. Che Guevara and Magical Realism. 3.0 Credits.
His detractors often compare him to Hitler while many of his admirers see in him a saint and a martyr like Jesus Christ. Cuban school children are taught to be like him. Che was killed in 1967, the same year in which Gabriel García Márquez published Cien años de soledad (One Hundred Years of Solitude). We will study Guevara’s life as a militant revolutionary through his own writings and the exorbitant style known as realismo mágico, crafted by García Márquez, one of Che’s great admirers. Four movies will anchor our visual take on the myth and the man: Los diarios de motocicleta (Walter Salles, 2004), Che I and Che II (Steven Soderbergh, 2008), and Wall Street (Oliver Stone, 1987). The nineteen-eighties narcotraffic boom in Colombia and the cocaine-driven financial high times during the late Reagan years will frame our study. Taught in Spanish
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.458. Cuba and its Culture Since the Revolution. 3.0 Credits.
We will study the visual and textual arts, cinema, political culture, and blogosphere; reaching back to the first phases in the building of the revolutionary state apparatus and its sovereign mandate. Taught in Spanish.
Prerequisites: AS.210.312[C]
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.463. Borges: His Fiction and Critical Essays. 3.0 Credits.
This course will deal with close readings of Borges ficciones and critical essays in order to determine how his thinking on the problem of writing and thinking is fictionalized in his stories.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.464. Senior Seminar: El Caribe como problema. 3.0 Credits.
Recommended for Spanish majors and anyone fluent in the language. The course explores through diverse media the Hispanic and Afro-Descendant Caribbean/Antillean societies, from the early Spanish conquest to the current crises in Caribbean Venezuela, Colombia, Mexico, and Florida. Taught in Spanish
Prerequisites: AS.210.311 OR AS.210.312 or equivalent test score.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.476. El “moro” de al-Andalus al Siglo de Oro y América. 3.0 Credits.
Este curso examina la figura del “moro” en el medioevo, la modernidad temprana, y las colonias americanas desde la conquista islámica de 711 hasta la expulsión de los moriscos en 1614. Temas incluyen identidades híbridas, “arabizadas” y transculturales de conquistadores y conquistadas; los comienzos andalusíes de la picarea; el estilo mudéjar en España y las colonias americanas; y los festivales de “moros y cristianos” en la América colonial entre otros. Las lecturas incluyen selecciones del Mio Cid, el Conde Lucanor, las Guerras civiles de Granada, "Ozmín y Daraja," la "Conquista de Jerusalén" de Tlaxcala 1539, y episodios de Don Quijote.
Prerequisites: Prereq: AS.210.311
Instructor(s): N. Altschul
Area: Humanities.

AS.215.477. La Habana Miami: One World and Two Cities. 3.0 Credits.
A tale of two cities approach to the exceptional bond between two nations in the age of migration. The arts, the blogosphere, cinema and music and the vast unknown.
Prerequisites: Pre-req: AS.210.312
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.484. Orientalismo al Sur. 3.0 Credits.
Taught in Spanish. Este curso examina la presencia del Islam y el concepto del “oriente” en el Cono Sur, especialmente Argentina. Leeremos obras de los siglos 19 y 20 que representen al oriente, y discutiremos los significados y cambios que la llegada de inmigrantes “islámicos” produjo en la cultura literaria de esta zona de América Latina. Tendremos en cuenta de forma particular que el problema del “oriente” en España y sus colonias es un problema “interno”. Debido a que la península ibérica tuvo una importante presencia musulmana durante toda la edad media (711-1609), en los círculos europeos España fue considerada “islámica” u “oriental” también durante los tiempos modernos. Es así que el Oriente llega a América con la conquista de los españoles “islamizados.” Cross-listed with PLAS.
Instructor(s): N. Altschul
Writing Intensive.

AS.215.489. Poetry in Latin America: A multilingual survey from 1200 to the present.. 3.0 Credits.
The course focuses on a presentation of the multiple traditions of poetry writing that make up the Latin American tradition from the Mexica poets at about 1200 to current writers in Latin America. Original poetry in Nahautle, Maya-Quiche, Spanish and Portuguese will be read along side translations into English. Attention will be paid to translation theory.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.490. Reading Ancient Mexico Today: Amoxtli, Tlacuilos and the Florentine Codex. 3.0 Credits.
This course offers an in depth study of "Mexican" writing systems before and after the Spanish Conquest in 1521. Special emphasis is placed on the role of the tlacuilos—nathuatl intellectuals— in the writing of the Florentine Codex (1584), the largest surviving compendium on pre-conquest Mexico.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

AS.215.525. Spanish Independent Study. 1.0 - 3.0 Credits.
Instructor(s): B. Seguin; E. Gonzalez; H. Sieber; S. Castro-Klaren; W. Egginton.
AS.215.526. Spanish Independent Study. 0.0 - 3.0 Credits.
Instructor(s): B. Seguin; E. Gonzalez; H. Sieber; S. Castro-Klaren; W. Egginton.

AS.215.527. Spanish Internship. 1.0 Credit.
Instructor(s): E. Gonzalez.

This seminar will be based on close readings of the 'Lazarillo de Tormes', selections from Mateo Aleman's 'Guzman de Alfarache', and three of Cervantes' 'Novelas ejemplares.' These texts reflect the impact that Spanish fiction exerted on Golden Age Spanish literary history and on the European novel in general. An extensive bibliography will also be covered.
Instructor(s): H. Sieber.

AS.215.635. Spanish Golden Age Theater.
Close reading of plays by lope de Vega, Calderon, Tirso de Molina, and others.
Instructor(s): H. Sieber
Area: Humanities.

AS.215.639. Don Quijote de la Mancha.
The novel will be the focus of the entire seminar. Recent trends in Cervantes criticism, textual issues related to the novel's publication, biographical, cultural, and social history, and patronage in the Courts of Philip II and III will be topics of discussion and research. The goal is a wide-ranging appreciation and understanding of the novel's original contexts.
Instructor(s): H. Sieber.

AS.215.642. Readings in Contemporary Literary Criticism and Theory.
This course is a graduate level survey of contemporary trends in literary theory and criticism. Readings will span all aspects of literary and cultural scholarship and may include such topics as: new materialism, new formalism, affect theory, Marxism, literary history, and comparative literature.
Instructor(s): B. Seguin
Area: Humanities.

AS.215.646. The Narrative of Conquest in the Andes, 1530 - 1680.
Departing from narratology and the perspective of post-colonial studies, the course will analyze the narrative of conquest as developed by Cieza de Leon, Garcilaso de la Vega, Inca, Guaman Poma, Jose de Acosta and William Prescott.
Instructor(s): S. Castro-Klaren.

From neuroscience to political theories, we will examine early modern and late modern works in literature and critical thought in which dreams and dreaming intersect with power under diverse political regimes and modalities.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.650. Mexico and the Invention of America.
Departing from O’Gorman, the course will entail a reconsideration of the discursive invention of Mexico-America. Anonymous, Sahagun, Clavijero, Humboldt, Dussel and Alzandua will conform part of the readings. Taught in English
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

This course will focus on the art of writing poetry, the art of reading poetry and the poetics of each of the poets whose work is the textual matter of the course.
Instructor(s): E. Gonzalez
Area: Humanities
Writing Intensive.

Readings from colonial times to the present from three cultural legacies, Hispanic, English and French. Centered on slavery and its sequels.
Instructor(s): E. Gonzalez

AS.215.667. Cities in Motion, Worlds Adrift.
We will explore the comparative phenomenology of the city in historical reference to literary, cinematic, and TV serial values. Modalities of segregation and diviseness will dominate our inquiry. Undergrads by request and with approval of instructor.
Instructor(s): E. Gonzalez
Area: Humanities.

AS.215.710. Medievalisms.
This course examines variegated constructions and redeployments of “the middle ages” in postmedieval times. Topics include historical revivals, the national philologies, literary, and filmic reconstructions, postcolonial medievalisms, and theories of temporality, among others.
Readings in English and Spanish.
Instructor(s): N. Altschul.

AS.215.713. What Are Humanities?.
They are one of three established divisions of knowledge. Almost half the departments at our own university are categorized under that division. We all feel we know what the “humanities” are, but how? Is the best answer we have to that question a paraphrase of Justice Potter Stewart’s definition of pornography, “I know them when I see them?” In this seminar we will examine the question of what the humanities are through the close reading of a series of key texts spanning the period from the Renaissance to the twentieth century. In many ways our readings will be necessarily proleptic, since the very category we are interrogating postdates many of the sources we will be analyzing. Our guiding question, however, will be how the specific division of knowledge under which we now organize our disciplines came into being, and what presuppositions that organization implies. The course will be conducted in English but will include, to the extent possible, readings in the original language. Graduate students should be prepared to work in the original language if it is one that they already master (which may include Latin, Spanish, Italian, French, or German) and with translations when not. Readings may include selections by Desiderius Erasmus, Lorenzo Valla, Juan Luis Vives, Juan Ginés de Sepúlveda, Francisco de Vitoria, Bartolomé de las Casas, Denis Diderot, Johann Wolfgang von Goethe, Immanuel Kant, Martin Heidegger, Maurice Merleau-Ponty, and Jean-Paul Sartre.
Instructor(s): W. Egginton
Area: Humanities.
How should one study contemporary literature and culture? Is "the contemporary" a period in and of itself? Does it require a distinct conceptual approach? This graduate seminar will examine various approaches that have emerged since Michel Foucault called his genealogies a "history of the present." We will pay special attention to contemporary literature and culture's most distinguishing feature today: crisis. Considering theories of crisis and "the contemporary" together, the course will explore how living in a time of overlapping crises—economic, political, social, cultural, environmental, and others—affects the way we interpret the world.
Instructor(s): B. Seguin
Area: Humanities

AS.215.735. The Boom Revisited. Visions by Carlos Fuentes, García Marquez, Diane Goodrich and the MLA.
Now that Carlos Fuentes has written his history of the Latin American novel, that a biography of García Marquez is out and several retrospective studies on the making and impact of the "boom" are circulating, it is time to reconsider the boom as a force in the making of the cannon and a paradigm for narrative interpretation. Besides three long critical studies and the MLA's "how to teach the boom," the seminar will consider in detail three key novels: La muerte de Artemio Cruz, Cien anios de soledad, and La casa verde.
Instructor(s): S. Castro-Klaren
Area: Humanities
Writing Intensive.

A close reading of Cervantes' short stories, with concentration on their literary tradition and their relationship to some of his other works. We will also investigate Spanish court society, politics, and history between 1598 & 1621 and critical bibliography.
Instructor(s): H. Sieber.

The course engages close readings of Borges critical essays and some of his fiction in order to establish the points of interpellation that Postmodern theory takes from or shares with Borges's meditation on the problem of writing.
Instructor(s): S. Castro-Klaren.

Readings will include selections from Medieval and Renaissance Works, such as "El Conde Lucanor", "Amadis de Gaula", "La carcel de amor", "El Abencerraje", "Lazirillo de Tormes", "La Diana", "El buscon", "Novelas ejemplares" (Cervantes) and "Don Quixote".
Instructor(s): H. Sieber
Area: Humanities.

AS.215.753. Latin American Premodern.
Focusing on the idea that Iberian colonization was premodern in character, this course examines the association of Spanish and Portuguese America with topics like feudality, the orient, despotism, and medieval cultural lifestyles. Among others, theoretical discussions include the medieval-modern divide, (neo)medievalism, settler postcolonial theory and comparative colonialisms, modernization and dependency theories; texts include, among others, Argentinians Domingo Sarmiento and José Ingenieros, Brazilians Euclides da Cunha and Gilberto Freire, Peruvian José Carlos Mariátegui, and Cuban Alejo Carpentier.
Instructor(s): N. Altschul.

AS.215.778. Topics in Baroque and Neobaroque Literature.
This seminar we will look at theories and source texts comprising the cultural production known as the Baroque and Neobaroque, categories that extend to and include some twentieth-century and contemporary aesthetic practices. Although the focus of the seminar will be largely literary and theoretical, we will look at some examples of visual culture as well. Students will prepare several presentations and a final research paper. Presentations in the second portion of the course should be prepared in reference to a primary corpus you intend to write you final paper on.
Instructor(s): W. Egginton
Area: Humanities
Writing Intensive.

AS.215.792. GRLL SEMINAR/Fellini - Almodóvar.
In this co-taught graduate seminar, Professors Eduardo González and Bernadette Wegenstein will be discussing these two seminal European directors in their cultural and historical context and with an eye to both their radical eccentricity and utter centrality to cinema today (e.g., The Great Beauty). Our discussions will start with questions that are intrinsic to film theory such as mimicry, travesty, the visual and narrative construction of the erotic, as well as questions pertaining to the degree of realism in these directors' work, i.e., the "road beyond neorealism" for Fellini, and Almodóvar's queerness as expressed in his "true-and-false testimonies." We will then proceed to read and watch some historical documents around the constructions of some of these directors' films, such as Petronius' Satyricon, about the worshipping of the most important female deity in late antiquity, Isis, in light of Fellini's Satyricon; and Thierry Jonquet's novel Tarantula and the French-Italian horror film, Eyes Without a Face (1960), which were both the basis for Almodóvar's ThSkin I Live In (2011). We will be reading Karen Pinkus' Montesi Scandal, a unrealized screenplay about the birth of the Paparazzi in Fellini's Rome, as well as Almodóvar's columns from La Luna de Madrid, written in the persona of a female prostitute. The class will also include several guest speakers TBA.
Instructor(s): B. Wegenstein; E. Gonzalez
Area: Humanities

AS.215.826. Spanish Independent Study.
Instructor(s): B. Seguin; E. Gonzalez; H. Sieber; S. Castro-Klaren; W. Egginton.

Instructor(s): B. Seguin; E. Gonzalez; H. Sieber; S. Castro-Klaren; W. Egginton.

Instructor(s): B. Seguin; E. Gonzalez; H. Sieber; S. Castro-Klaren; W. Egginton.

AS.216.300. Contemporary Israeli Poetry. 3.0 Credits.
This course examines the works of major Israeli poets such as Yehuda Amichai, Nathan Zach, Dalia Rabikovitch, Erez Biton, Roni Somek, Dan Pagis, Yona Wollach, Yair Horwitz, Maya Bejerano, and Yitzhak Laor. Against the background of the poetry of these famous poets we will study recent developments and trends in Israeli poetry, including less known figures such as Mois Benarroch, Shva Salhoov and Almog Behar. Through close reading of the poems, the course will trace the unique style and aesthetic of each poet, and will aim at presenting a wide picture of contemporary Hebrew poetry.
Prerequisites: Students may receive credit for AS.216.300 or AS.300.413, but not both.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.
AS.216.307. Reflective Mirrors: Israeli and Palestinian Cinema. 3.0 Credits.
Palestinian and Israeli cinemas have emerged side by side, each depicting its Other as a deceiving mirror of its own self. This course will analyze the different images of these Others in both cinemas.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.216.342. The Holocaust in Israeli Society and Culture. 3.0 Credits.
This course examines the role of the Holocaust in Israeli society and culture. We will study the emergence of the discourse of the Holocaust in Israel and its development throughout the years. Through focusing on literary, artistic and cinematic responses to the Holocaust, we will analyze the impact of its memory on the nation, its politics and its self-perception.
Instructor(s): N. Stahl
Area: Humanities
Writing Intensive.

AS.216.370. Israel Through Prose. 3.0 Credits.
This course examines representations of various aspects of Israeli society and culture in contemporary Israeli prose. The course will follow both a thematic and chronological path in order to study the ways in which Israeli prose reflects political, ideological, social and cultural aspects of contemporary Israel. In this context, we will read works by several major authors such as: Agnon, Shabtai, Kahanah-Carmon, Oz, Kenaz, Yehoshua, Grossman, Castel-Bloom, Matalon, Laor, Kashua and Hoffmann. Students who sign up for section 2 will work an additional hour in Hebrew with Professor Cohen at a time mutually agreed upon by the professor and the students enrolled.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.216.373. War in Israeli Arts and Culture. 3.0 Credits.
In this course we will study the various representations of what functions as one of Israel's most unifying and yet dividing forces: war. By analyzing literary and cinematic works as well as visual art and popular culture we will attempt to understand the role of war in shaping Israeli society, culture and politics. Topics such as commemoration and mourning, heroism, dissent and protest, trauma and memory and the changing image of the soldier will stand at the center of the course.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities
Writing Intensive.

AS.216.398. Zionism: Literature, Film, Thought. 3.0 Credits.
This course studies the relations between modern Hebrew and Israeli culture and Zionism. Based on a close reading of both literary and non-literary Zionist texts, we will explore the thematic, social and political aspects of the Zionist movement. The course focuses on primary sources and its main goal is to familiarize students with the various ways in which Zionism was formed and understood. In the last part of the semester we will investigate the different meanings of Post-Zionism through contemporary literary and non-literary texts as well as recent Israeli films.
Instructor(s): N. Stahl; Z. Cohen
Area: Humanities.

AS.216.412. The Divine in Literature and Cinema. 3.0 Credits.
This course studies various issues concerning literary and cinematic representations of the divine. We will investigate theoretical, theological, generic and aesthetic aspects of the topic and will familiarize ourselves with the general problem of the relation between religion, literature and cinema. Among the topics to be discussed are, negative theology in literature and film, theodicy and anti-theodicy, the question of religion and literary modernism, providence and narratology in the modern novel and in contemporary cinema.
Instructor(s): N. Stahl.

AS.216.444. The Apocalypse in Literature and Film. 3.0 Credits.
"Everything which we loved is lost! We are in a desert" – this emotional assertion was the reaction to Kazimir Malevich's 1915 painting The Black Square, as the artist himself recalled it. This sentiment of fearing, warning and even witnessing the end of the world as we know it, will stand at the center of the course. We will study the literary and cinematic representations of this apocalyptic notion and investigate its theoretical, theological, physiological and aesthetic aspects. We will seek to trace the narrative dynamics as well as literary and cinematic means of apocalyptic representations in works from various periods, languages, cultures and religions. Among the issues to be discussed: what is the apocalypse, biblical apocalypse, dystopia and nostalgia, trauma and post trauma, war and the apocalypse, the Holocaust as the end of civilization, the atomic bomb, realism and anti-realism, political changes and the apocalypse in popular culture.
Instructor(s): N. Stahl
Area: Humanities
Writing Intensive.

AS.216.500. Independent Study. 0.0 - 3.0 Credits.
Instructor(s): N. Stahl.

AS.216.800. Independent Study.
Instructor(s): N. Stahl.

Cross Listed Courses
History of Art
AS.018.204. Italian Art in the Middle Ages. 3.0 Credits.
This course explores key monuments of medieval art and architecture in Italy from c. 400 until 1350. We will concentrate on historical, functional, and aesthetical aspects that lead to the creation of single monuments and art works. Emphasis is given to the analysis of "sacred space" by means of architecture, painted, and sculptural decoration, as well as ritual performances. Another focus is laid on the emergence on the political dimension of art for the creation of civic identity as well as in the context of the late medieval courts. We raise questions about the importance of materiality and science for the creation of medieval art works.
Instructor(s): N. Zchomelidse
Area: Humanities.
AS.010.434. Italian Art, Politics, and Religion in the time of Dante, c. 1250-1400. 3.0 Credits.
This seminar will investigate the interrelationship between art, politics, and religion on the Italian peninsula during the later Middle Ages. We will focus on the major cities as patrons of the arts (visual and poetic), e.g. Florence, Siena, Padua, Milan, Naples, Venice, and Rome, in order to understand how the elite used art to further their political and religious agendas. Select topics include: the rise of the Mendicant orders; the importance of Dante's Divine Comedy on manuscript production; artistic competition among communes; the rise of the individual artist; humanism and the arts.
Instructor(s): C. Lakey
Area: Humanities
Writing Intensive.

AS.010.707. Therapies of Art and Literature in Early Modern Europe. 3.0 Credits.
This seminar examines the myriad ways art and literature in Early Modern Europe addressed itself to its audiences as a form of therapy. Taking as our point of departure Petrarch's neo-Stoic therapy of the passions, the revival of consolatio literature, and the development of new Christian "wisdom" genres aimed at ethical self-cultivation, we consider how artists participated in the care of the body, the soul, and the self, innovating therapies that were at once sacramental and philosophical, spiritual and ethical. Intersections with the history of medicine will prompt us to inquire into the transposition of physiological and psychological theories, practices, and metaphors into the arena of ethical-spiritual therapy.
Instructor(s): M. Merback

Classics

AS.040.238. Freshman Seminar: Magic and Miracles from Antiquity to the Renaissance. 3.0 Credits.
This freshman seminar will explore concepts of magic and miracles and their different forms from ancient Greece and Rome and early Christianity through the Middle Ages up to the Renaissance. Dean's Prize Teaching Fellowship Course.
Instructor(s): M. Mueller
Area: Humanities
Writing Intensive.

AS.040.601. Italian Renaissance Humanism and Modern Humanities.
This course will reflect on certain key moments in the development of Latinate and Italian Renaissance humanism and will also include reading and discussion of certain recent landmark contributions to the history of the modern humanities.
Instructor(s): C. Celenza.

AS.040.606. Topics in Classical Reception.
An exploration of recurring themes and recent trends in the reception of classical antiquity.
Instructor(s): M. Butler.

AS.040.716. Petrarch (1304-74) and the Beginnings of Renaissance Latin.
This course will provide close readings of certain Latin texts by Petrarch, with attention to his letters and to other prose works.
Instructor(s): C. Celenza.

Film and Media Studies

This course provides students an introduction to the discipline of sound studies and its relationship to three eras of historical forms of technological media. Structured around a problematic of emitter, medium, and receiver, it explores how sound was encoded by its creators as a structure of meaning in early media cultures; how it emerged as a means of aesthetic creation with the rise and dominance of the cinematic medium; and last, how it reaches the infatuated individual listener in the new era of mobile earbud audio. Theorizing our relationship to media through the study of sound and listening, we find new histories to be explored, as well as new media aesthetics to be negotiated. Through engagement with thinkers such as economist Jacques Attali, auditory and cultural historians Emily Thompson and Jonathan Sterne, film sound theorists Michel Chion and Rick Altman, and sound studies scholar Michael Bull, we construct how technologically mediated listening allows us to understand the historical and theoretical components of sound's media aesthetics. Recommended Course Background: AS.061.245 for undergraduates or JHU graduate student status (open to all JHU graduate students).
Instructor(s): M. Ward
Area: Humanities
Writing Intensive.

Anthropology

AS.070.262. Cuban Intellectuals, Cinema, and the State. 3.0 Credits.
This course examines the relationship between intellectuals and the Cuban state, focusing on how cinema and other arts have been mobilized both as propaganda and as sites for social criticism. Screenings will be required for this course and will take place on Tuesdays from 7 pm to 9:30 pm. Cross-list: Film and Media Studies, PLAS, Romance Languages.
Instructor(s): L. Humphreys
Area: Humanities, Social and Behavioral Sciences.

History

AS.100.602. The French Revolution.
Introduces graduate students to the rich historiography of the French Revolution. Topics include: revolutionary origins, political culture and radicalization, citizenship, violence, family & gender, the search for stability after the Terror, global revolution, Napoleon's Brumaire coup.
Instructor(s): L. Mason
Area: Humanities, Social and Behavioral Sciences.
Instructor(s): A. Krauss

**Insomnia (2002; Christopher Nolan).**

Hemingway, F. Scott Fitzgerald, Djuna Barnes, Gabriel García Márquez and writing. Authors and films to be considered will include among others placed on the relationship between insomnia, subjectivity, thinking, and those in medical and scientific discourse. Particular emphasis will be what extent interpretations of sleeplessness in the humanities differ from insomnia in modern philosophy, literature and film. We will analyze to thinking into endless introspection, self-absorbed melancholy, if not sleeplessness turns into an obsession with the potential to transform haunts the weary wakeful and makes him meditate on insomnia. Thus the fact that sleeplessness tortures the body and exhausts the mind, of sustained productivity are inextricably bound to insomnia's "dark" side, distinguishing humankind from animals but testifies to human awareness in its ceaseless striving for wisdom and truth. Insomnia appears as vigilance, an exalted state of mind well suited for philosophic reflection, intense scrutiny of the world, and sudden inspiration. Yet these moments of sustained productivity are inextricably bound to insomnia's "dark" side, the fact that sleeplessness tortures the body and exhausts the mind, haunts the weary wakeful and makes him meditate on insomnia. Thus sleeplessness turns into an obsession with the potential to transform thinking into endless introspection, self-absorbed melancholy, if not misanthropic sarcasm. This course will examine representations of insomnia in modern philosophy, literature and film. We will analyze to what extent interpretations of sleeplessness in the humanities differ from those in medical and scientific discourse. Particular emphasis will be placed on the relationship between insomnia, subjectivity, thinking, and writing. Authors and films to be considered will include among others Emanuel Lévinas, Emil Cioran, Franz Kafka, Samuel Beckett, Ernest Hemingway, F. Scott Fitzgerald, Djuna Barnes, Gabriel García Márquez and Insomnia (2002; Christopher Nolan).

**Philosophy**

**AS.150.483. Topics in Jewish Philosophy: Heresy. 3.0 Credits.**

Hassidism is the ecstatic religious movement that emerged in East European Jewry in the mid eighteenth century. In this research seminar we will concentrate on the teachings and activities of the circle of Dov Ber of Mezrich between 1760 and 1772. We will study both internal and external sources (such as Salomon Maimon's report in his Lebensgeschichte). All materials will be available in English translation, though reading knowledge of Hebrew would be an asset.

Instructor(s): Y. Melamed.

**Political Science**

**AS.191.344. Belonging to Nature in the Anthropocene. 3.0 Credits.**

This course explores debates in contemporary environmental political thought concerning humanity's relationship to nature in the Anthropocene. The Anthropocene refers to the era in which "human" activity becomes a force of "nature"—when the impact of human activity on natural processes manifests itself in the stuff of the Earth. For many of us, these planetary transformations are hardly noticeable in day-to-day life, but they are dramatic: we are living through the Earth's sixth mass extinction. What is our relationship to these transformations? Do we have the power to stop them, or at least to minimize their harmful effects? Course readings and films introduce multiple visions of the human/nature relationship and examine the responses they recommend to these and other questions. The political stakes of these visions are brought to light as we consider: How do visions of the human/nature relationship shape and texture core political concepts like freedom, agency, responsibility, and progress? What do they suggest about the strategies most likely to motivate action amid the uncertainty of the Anthropocene? How do these visions subtly (and not so subtly) relegate some to the realm of "nature" so that others can be classified as "human"?

Instructor(s): S. Erev

Writing Intensive.

**Comparative Thought and Literature**

**AS.300.219. A History of Outer Space. 3.0 Credits.**

Where did Outer Space come from? This course explores the history of Outer Space from the 18th century to today. In particular, it examines Outer Space as a place constructed by the interaction of political, militarist, cultural, and scientific discourses. We will examine a wide variety of materials, from Star Trek to The X-Files to War of the Worlds in our quest to construct a history of the Final Frontier. There will be a field trip to the National Air and Space Museum.

Instructor(s): B. Stein

Area: Humanities

Writing Intensive.
AS.300.337. The Tragic Tradition. 3.0 Credits.
This course offers a broad survey of tragic drama in the Western tradition, from its origins in ancient Greece to the twentieth century. In weekly lectures and discussion sections, we will study the specific literary features and historical contexts of a range of different works, and trace the continuities and transformations that shape them into a unified tradition. Key questions and themes throughout the semester will include what counts as tragic, the tragedy of social and political conflict, the bearing of tragedy on the meaning and value of life, the antagonistic relation between world and humans, the promises and dangers of tragedy for contemporary culture. Authors to be studied: Sophocles, Euripides, Seneca, Shakespeare, Racine, Goethe, Ibsen, Strindberg, Chekov, Brecht, Pirandello, and Beckett.
Instructor(s): L. Lisi
Area: Humanities.

AS.300.349. Capitalism and Tragedy: from the 18th Century to Climate Change. 3.0 Credits.
In contemporary discussions of climate change, it is an increasingly prevalent view that capitalism will lead to the destruction of civilization as we know it. The notion that capitalism is hostile to what makes human life worth living, however, is one that stretches back at least to the early eighteenth century. In this class, we will examine key moments in the history of this idea in works of literature, philosophy, and politics, from the birth of bourgeois tragedy in the 1720s, through topics such as imperialism and economic exploitation, to the prospects of our ecological future today. Authors to be studied: George Lillo, Balzac, Dickens, Marx and Engels, Ibsen, Weber, Brecht, Arthur Miller, Steinbeck, Pope Francis, and contemporary fiction, politics and philosophy on climate change.
Instructor(s): L. Lisi
Area: Humanities.

Humanities Center
AS.300.389. Freud's Cases - Source of Psychoanalytic Knowledge. 3.0 Credits.
Even though major scientific discoveries have been made from the intensive study of singular cases, modern science is mostly quantitative in its approach. In this course we will follow psychoanalysis' use of clinical practice as the primary context for the generation of knowledge. We will use two notions from the philosophy of science: “exemplars” (Kuhn) and “personal knowledge” (Polanyi), as we read Freud's cases in which he combines theoretical consideration and detailed investment in the singularity of the person. In his accounts of the “hysteria” of Dora, the “phobia” of Little Hans, the “obsession” of the Rat Man, the “infantile neurosis” of the Wolf Man and Schreber's “paranoia,” Freud not only generated theoretical and technical knowledge but also constituted the “single case study” genre of investigation, as the primary source of psychoanalytic knowledge. Readings will include: Freud, Foucault, Polanyi, Kuhn, Hacking, and Forrester. Cross-listed with Film and Media Studies
Instructor(s): O. Ophir
Area: Humanities.

AS.300.419. 1966 before and after. French theory. 3.0 Credits.
The "Languages of Criticism" conference held at Hopkins marked a watershed moment in the history of literary studies and redefined, for many scholars and intellectuals, the nature of humanistic inquiries. This course involves the close study of key texts that, from the postwar years into 1970s (from Bachelard, Poulet, and Starobinski to Lacan, Barthes, and Derrida), are landmarks in this changing critical and philosophical landscape. Knowledge of French is desirable but not required.
Instructor(s): E. Ender
Area: Humanities.

AS.300.427. Reading Freud. 3.0 Credits.
Sigmund Freud was one of the most influential thinkers of the 20th century. Psychoanalysis, which was his theory of mind, a research method, and a therapeutic technique, offered concepts that pervade Western culture and the humanities. In this seminar which is designed for students from all fields of knowledge, we will closely and chronologically read Freud's major works, follow his developing theories, and become familiar with psychoanalytic concepts such as the unconscious, the uncanny, instincts, sexuality and aggression, which illuminated mysteries in other fields, from literature to anthropology, from political science to religious studies, and from philosophy to the arts.
Instructor(s): O. Ophir
Area: Humanities.

Interdepartmental
AS.360.133. Freshman Seminar: Great Books at Hopkins. 3.0 Credits.
Freshman Seminar: Students attend lectures by an interdepartmental group of Hopkins faculty and meet for discussion in smaller seminar groups; each of these seminars is led by one of the course faculty. In lectures, panels, multimedia presentations, and curatorial sessions among the University's rare book holdings, we will explore some of the greatest works of the literary and philosophical traditions in Europe and the Americas. Close reading and intensive writing instruction are hallmarks of this course; authors for Fall 2018 include Homer, Boethius, Machiavelli, Shakespeare, Descartes, Apha Behn, Mary Shelley, Mozart, Douglass, and Woolf.
Instructor(s): E. Patton; E. Refini; S. Weiss; W. Egginton
Area: Humanities
Writing Intensive.

Program in Latin American Studies
AS.361.130. Introduction to Latin American Studies. 3.0 Credits.
The goal of this course is to provide an overview of Latin America, analyzing political and cultural aspects, chronologically organized. We will begin studying the origins of the multi-ethnic societies, starting with the ancient civilizations and their transformation under colonization. It is important to understand the survival of cultural traits among indigenous peasants today in the countries that were the cradle of ancient civilizations: Mexico, Guatemala and the Andean countries. In the republican era the course will focus on the classical Caribbean dictators in the first half of the 20th century and their reflection in the literature, comparing the historical reality with the magic representation in the work of Garcia Marquez. The course will scrutinize the most important revolutions in the continent: the Mexican, Cuban and Bolivian revolutions and the geopolitics of USA in the Americas. Weekly lectures related to the assigned reading will focus on specific periods, topics and regions. After each lecture, we will review the material, connecting specific details from the readings with the more theoretical aspects provided in my lecture. The course has a website where the PowerPoint presentations will be posted. Students are encouraged to post their questions, comments and suggestions on the web after their readings. Students will be given a study guide for each lecture, which will be the basis for the exams. Our perspective on Latin America will be enhanced by a selection of few films related to the topics.
Instructor(s): E. Cervone
Area: Humanities, Social and Behavioral Sciences.
Study of Women, Gender, Sexuality
AS.363.341. The Making of Modern Gender. 3.0 Credits.
Gender as we know it is not timeless. Today, gender roles and the assumption that there are only two genders are contested and debated. With the binary gender system thus perhaps nearing its end, we might wonder if it had a beginning. In fact, the idea that there are two sexes and that they not only assume different roles in society but also exhibit different character traits, has emerged historically around 1800. Early German Romanticism played a seminal role in the making of modern gender and sexuality. For the first time, woman was considered not a lesser version of man, but a different being with a value of her own. The idea of gender complementation emerged, and this idea, in turn, put more pressure than ever on heterosexuality. In this course, we will trace the history of anatomy and explore the role of literature and the other arts in the making and unmaking of gender.
Instructor(s): K. Pahl
Area: Humanities.

Music
AS.376.305. Operatic Technologies. 3.0 Credits.
Operatic Technologies offers an introduction to opera via a series of case studies about the materials used to produce it. With a particular focus on the Italian case, we will trace issues such as how auditoriums have historically been illuminated; orchestras directed; machines used to create and sustain illusion and operas simulcast. Students will leave this course with a clear sense of how the look and feel of the operatic experience has changed over time; how technological practices established in the past continue to determine productions now, and how the cinema can be considered an extension of opera. Our course includes a visit to the cinema to see a Metropolitan Opera simulcast. Ability to read music is not required.
Instructor(s): L. Protano Biggs
Area: Humanities
Writing Intensive.

Center for Language Education
AS.384.115. First Year Hebrew. 4.0 Credits.
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Instructor(s): Z. Cohen

AS.384.116. First Year Hebrew II. 3.0 Credits.
Designed to provide reading and writing mastery, to provide a foundation in Hebrew grammar and to provide basic conversational skills. Cross-listed with Jewish Studies.
Prerequisites: AS.384.115
Instructor(s): Z. Cohen

AS.384.215. Second Year Hebrew. 3.5 Credits.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Prerequisites: AS.384.116 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.216. Second Year Hebrew II. 3.0 Credits.
Designed to enrich vocabulary and provide intensive grammatical review, and enhance fluency in reading, writing and comprehension. Recommended Course Background: AS.384.215 or permission required.
Prerequisites: AS.384.215
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.315. Third Year Hebrew. 4.0 Credits.
Designed to maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Cross-listed with Jewish Studies. Final day/time will be determined during the first week of classes based on students’ schedules.
Prerequisites: AS.384.216 or equivalent.
Instructor(s): Z. Cohen
Area: Humanities.

AS.384.316. Third Year Hebrew II. 3.0 Credits.
Designed to: maximize comprehension and the spoken language through literary and newspaper excerpts providing the student with the language of an educated Israeli. Recommended Course Background: AS.384.315 or permission required. Cross-listed with Jewish Studies.
Prerequisites: AS.384.315 or instructor permission
Instructor(s): Z. Cohen
Area: Humanities.

Program in Museums and Society
In 1857 Baltimore’s historic George Peabody Library was born, one of America’s first public libraries. This course studies its history, rare book collections, and foundational role in Baltimore’s cultural history.
Instructor(s): E. Havens
Area: Humanities, Social and Behavioral Sciences
Writing Intensive.

AS.389.353. Revolutions of the Book: Material Culture & the Transformation of Knowledge from Antiquity to the Renaissance. 3.0 Credits.
Explores the material culture of knowledge through transformations in the technologies and arts of communication, taught entirely from rare books, manuscripts, and artifacts in JHU libraries and museum collections.
Instructor(s): E. Havens
Area: Humanities
Writing Intensive.

AS.389.356. Halls of Wonder: Art, Science, and Literature in the Age of the Marvelous, 1500-1800. 3.0 Credits.
Instructor(s): E. Havens
Area: Humanities.

History
http://history.jhu.edu/

The Department of History offers students the opportunity to work intensively in the classroom and with individual faculty to discover the richness and complexity of history. Undergraduates begin with general courses, but progress quickly to courses that explore topics in depth
and provide experience in researching, analyzing, and writing about the past. Graduate students work independently and with faculty advisors on reading and research in their fields of interest, while departmental seminars bring them together to discuss their research, forging a collegial intellectual culture. The department emphasizes European history, United States history, and the histories of Africa, Latin America, and China. Faculty and students participate in a variety of interdisciplinary programs, including Africana Studies, East Asian Studies, Latin American Studies, Judaic Studies, Museums and Society, the Program for the Study of Women, Gender & Sexuality, and International Studies.

Facilities
In addition to the Milton S. Eisenhower Library at the university, students in the Department of History can use the collections of the Peabody Institute Library, the Enoch Pratt Free Library, and the Maryland Historical Society in Baltimore, and of the Library of Congress, the National Archives, the Folger Shakespeare Library, and other specialized libraries in nearby Washington, D.C. There is provision for regular transportation to and from the Library of Congress. Also within easy distance are the holdings of specialized historical libraries and archives in Annapolis, Richmond, Williamsburg, Charlottesville, Wilmington, Harrisburg, Philadelphia, Trenton, Princeton, Newark, and New York.

Undergraduate Programs
Requirements for the B.A. Degree
(Also see Requirements for a Bachelor’s Degree. (p. 7))

The Krieger School classifies history as both a social scientific and humanistic discipline. This accords very well with the wide range of explanatory and interpretive approaches to the past that now prevail in the discipline of history. One of the history program’s goals is to introduce students to these varied approaches. Although the department offers strong preparation for students who seek to specialize in a particular cultural or geographic region, history at Johns Hopkins is primarily issue and topic oriented. It also puts a premium on developing the capacity to reason comparatively and on deepening the student’s understanding of global connections among cultures in the past and in contemporary life.

The department offers undergraduate courses that range from large introductory classes to small, focused seminars that encourage intensive interaction with individual professors and with other students. Beyond the introductory level, most of our courses are writing intensive and promote in all students critical reading skills and the ability to formulate effective written arguments. Through its core curriculum, the major also introduces students to these varied approaches. Although the department offers strong preparation for students who seek to specialize in a particular cultural or geographic region, history at Johns Hopkins is primarily issue and topic oriented. It also puts a premium on developing the capacity to reason comparatively and on deepening the student’s understanding of global connections among cultures in the past and in contemporary life.

The program’s overall aim is to deepen the critical habits of mind that arise from the study of time and change. These capacities are the hallmarks of liberal learning, but they are also the foundation for success in post-graduate studies and careers of many kinds, including business, law, and public affairs.

Major in History
• Students must earn a “C-” or higher grade in all courses used to satisfy major requirements, and may not count courses that are graded as satisfactory/unsatisfactory.

• For students who choose to focus on one geographical area (Europe, United States, Latin America, Africa, Asia), two courses must be taken outside the student’s area of focus.

• Except for courses used to satisfy the foreign language proficiency requirement, no more than four courses offered outside the History department (AS.100.xxx) may be used to satisfy major requirements (e.g., cross-listed, transfer, and study abroad courses). No more than two of these four courses may be offered outside the Krieger School of Arts and Sciences (usually summer transfer credit and/or study abroad courses).

Total Credits 42-60

1  Foreign language proficiency may be demonstrated by coursework or by special examination, but a language requirement waived by exam must be documented on the student’s transcript.

2  Students must have a cumulative GPA of 3.25 and a cumulative GPA in history of 3.5 or higher by December of their junior year to be eligible for the senior thesis option to graduate with honors in history.

Cognate Courses The History Department encourages interdisciplinary work in cognate fields of learning. History minors are therefore strongly advised to take additional courses in any department, including the History Department, that relate to the student’s major discipline in a historical way.

Sample Program of Study for History Majors

A sample path toward degree completion might include the following sequence of courses. Many alternative paths will also work. Please consult with your department advisor regarding alternative paths.

Total Credits 6
Honors students will normally be expected to complete the thesis with a grade of A- or better. All thesis writers must also enroll in both the AS.100.507 Senior Thesis (fall, 3 credits) and AS.100.508 Senior Thesis (spring, 3 credits) and AS.100.494 Senior Honors Seminar (fall, 1 credit) and AS.100.495 Senior Honors Seminar (spring, 1 credit) - enrollment is by instructor’s permission and will be granted only to students who have obtained a commitment from a faculty thesis advisor. This commitment should normally be obtained no later than April 30th of the junior year.

For questions about the honors track in history or finding a thesis advisor, consult your departmental advisor or the current Director of Undergraduate Studies.

### Minor in History

The minor in history offers to students majoring in other programs of study an opportunity to pursue a serious interest in history.

- Students must earn a “C–” or higher grade in all courses used to satisfy minor requirements and may not be taken satisfactory/unsatisfactory.
- No more than one course offered outside the History department (AS.100.xxx) may be used to satisfy minor requirements (e.g.: cross-listed, transfer, and study abroad courses).

**Elective Courses**

| One 200-level or higher history course | 3 |
| Three 300-level or higher history courses | 9 |

Total Credits: 18

### Cognate Courses

The History Department encourages interdisciplinary work in cognate fields of learning. History minors are therefore strongly advised to take additional courses in any department, including the History Department, that relate to the student’s major discipline in a historical way.

### B.A.- M.A. Programs in History

The department offers two B.A.– M.A options for current Hopkins undergraduate students. Details can be found on the Graduate tab.

### Graduate Programs

The graduate program prepares professionally motivated students for careers as research scholars and college and university teachers. Hence it is designed for candidates who want to proceed directly to the Ph.D. degree, who have developed historical interests, and who are prepared to work independently. Within the areas of European history, American history, and the histories of Africa, Latin America, and China, the department emphasizes social/economic and intellectual/cultural history. Although diplomatic and political history are not emphasized, attention is given to the social, economic, and cultural bases of politics.

The program is organized around seminars rather than courses, credits, or grades. AS.100.781 The Seminar-AS.100.782 The Seminar and satellite seminars in European, American, and Comparative World History bring together students, faculty, and invited scholars from outside the university to discuss their research work. These departmental seminars
